

## LANDLORD PERMISSION TO PROVIDE FAMILY CHILD CARE SERVICE

Arizona Department of Economic Security (DES) certifies family child care homes to provide child care services. The DES certified family child care providers can care for maximum of six children. If a child care provider's home is a rental property, the provider must obtain permission in writing from the landlord, or designated property manager, to provide a child care service at the provider's home.

Your tenant has applied to become certified for a DES family child care home to provide a child care service at your rental property

If you have any questions, please contact:

---
