

Data Share workgroup (Ginny Seltenright/ADE – lead)
1-7-15
Meeting summary

We came up with some objectives for the workgroup and a next step of developing some data diagram per each agency or data work flows.

Objectives of workgroup:

1. Decision on how we're going to use data from a higher level
2. Recommendations to the policy team- inform decisions with our findings.
3. Identify data we currently gather
 - a. What do we need and what other agency may have that another doesn't
4. Identify mutual tracking #s that can be used across agencies. SS#s were mentioned
5. What data is there from other agencies that we want/need to collect but currently do not have.

Next Steps:

Paul Shannon shared his data diagramming flow charts. They describe the processes for the Local Area Unemployment Statistics (LAUS) and Quarterly Census of Employment and Wages (QCEW) programs.
