

reCAPTCHA Implementation

Target Audience - Qualified Vendors and Providers

Transmittal Date - 07/15/2026

Effective today, July 15, 2026, the Division is automatically verifying that users are human before being granted access to the Contract Administration System (CAS) by implementing a reCAPTCHA check. Qualified Vendors will not see any difference when logging in. However, if they are using an auto-login or “bot” system, the system will automatically redirect them to the login screen and prevent them from accessing CAS until they enter their username and password directly. This update ensures the Division’s electronic systems comply with website security and fraud protection requirements.
