4.2 Provide your	LIHEAP program's definition for determining a crisis.	-				
A crisis is defined as a delinquent or shut off notice, or if utilities are included in the rent, an eviction notice is required. Added to the definition of a crisis is the determination of a Human Service Emergency made by the Arizona Department of Economic Security. A Human Service Emergency includes, but is not limited to, fire or flood which results in the evacuation of homes and shelters. Upon determination of a Human Service Emergency, households affected may be assisted with costs to temporarily shelter or house individuals in hotels, apartments, or other living situations, i.e., placing people in settings to preserve health and safety and to move them away from the crisis situation.						
4.3 What constitu	utes a <u>life-threatening crisis?</u>					
A life-threatening crisis is defined as, but not limited to, individuals who are exposed to extreme out door temperatures that adversely affect their health and can potentially directly or indirectly lead to death. A life-threatening crisis also includes individuals who must utilize life sustaining medical equipment and are either unable to pay their utility bill or are within five days of running out of fuel/utility or being shut off. A household member's health and/or well-being would likely be endangered if energy assistance is not provided.

4.17 Describe the terms of the moratorium and any special dispensation received by LIHEAP clients during or after the moratorium period.							
Several of Arizona's energy vendors enforce moratoriums with varying criteria. The largest energy vendors are represented below with their specific guidelines.							
In accordance with Arizona Administrative Code 14-2-211(A)(5)(c) & 14-2-201(46), Arizona Public Service (APS) uses 32 degrees Fahrenheit as the point in which they stop disconnections for non-payment for low temperatures. In addition, APS also developed an internal business process where disconnections are suppressed for non-payment when high heat stress indexes are present, as determined by the Phoenix Heat Alert website that relies on heat and humidity predictions from the National Oceanic and Atmospheric Administration (NOAA).							
Southwest Gas (SWG) tariff is prohibited from performing shutoffs during periods of time where weather will be especially dangerous to one's health. These weather conditions are defined as that period of time commencing with the scheduled termination date when the local weather forecast, as predicted by the NOAA, indicates that the temperature will not exceed 32 degrees Fahrenheit for the next day's forecast. The Corporation Commission may determine that other weather conditions are especially dangerous to one's health as the need arises.							
Salt River Project (SRP) self-initiates moratoriums in the winter and summer based on weather conditions. The duration of the self-initiated moratoriums fluctuates based on weather conditions. The criteria for moratoriums are extreme cold temperatures or excessive heat warnings issued by the National Weather Service.							
If any of the above questions require further explanation or clarification that could not be made in the fields provided, attach a document with said explanation here.

Weatherization monitoring encompasses the aforementioned areas, plus on-site quality control inspection of weatherized homes. Monitoring visits are also used for contractor training and technical assistance as required. Monitoring relates to Service Providers' separate evaluations of internal controls, such as control self- assessments or internal procedures and performance. Internal monitoring processes shall be practiced by Service Providers. LIHEAP Service Providers have a responsibility to monitor and be monitored for compliance with program requirements.				
The Arizona Department of Economic Security monitors Service Providers' compliance with all requirements of federal, state, and local laws, the contractual requirements, and directives in the policy manual.
