

Unlock Your Workforce Potential

February is

CAREER TECHNICAL EDUCATION MONTH

PREPARING STUDENTS FOR ARIZONA'S WORKFORCE

Governor Ducey proclaimed February as Career Technical Education (CTE) month to raise awareness of the excellent CTE programs in Arizona designed to prepare high school students for future success in the workforce.

Upon completion of a CTE program, students may earn industry-recognized certificates in their program of study to support them as they embark on a new career path. Programs are available in almost every career and are offered at no cost for high school students, although students of all ages are able to participate.
