l) State Goals and Priorities
m) Order of Selection
n) Goals and Plans for Distribution of title VI Funds.
o) State's Strategies
p) Evaluation and Reports of Progress: VR and Supported Employment Goals
q) Quality, Scope, and Extent of Supported Employment Services.

A Program-Specific Requirements For Combined State Plan Partner Programs

Appendix 1. Performance Goals for the Core Programs for Program Years (PYs) 2018 and 2019
Appendix 2. Other State Attachments (Optional)
WIOA State Plan Type

The Workforce Innovation and Opportunity Act (WIOA) of 2014, Public Law (Pub. L. 113–128), reauthorizes the Workforce Investment Act (WIA) of 1998. WIOA provides the opportunity to align “workforce investment, education and economic development systems in support of a comprehensive, accessible, high-quality workforce development system in the United States.” Over the past several years the State of Arizona has strived to create an innovative and comprehensive workforce development system to meet the needs of its growing population. With the implementation of WIOA, Arizona now has the perfect opportunity to create positive change that will improve the workforce development system as a whole. To this end, Arizona is proud to present its 2016–2020 WIOA Unified Workforce Development Plan (“Plan”), as required by WIOA sec. 102 (29 U.S.C. 3112).

To facilitate the transition from WIA to WIOA, a statewide WIOA Implementation Team was established, engaging the Workforce Arizona Council (Council); the Arizona Department of Economic Security/Division of Employment and Rehabilitation Services (DES/DERS); Local Workforce Development Areas (LWDAs); the Arizona Commerce Authority (ACA); the Arizona Department of Education/Adult Education Services (ADE/AES); the Arizona Department of Administration/Office of Employment and Population Statistics (ADOA/EPS); community colleges, community–based organizations, providers, the universities and the Arizona Board of Regents.

Eight task forces were created to review the provisions of WIOA and explore the impact on existing programs. The task forces met independently and reported out to the statewide Implementation Team. The task forces also identified questions and concerns and created a list of priorities for further research and discussion.

Building on the work of the Implementation Team, a steering committee was assembled in early June 2015 to lay the foundation for further planning, propose goals and start building capacity for compliance with WIOA. Committee members included subject matter experts from all four core partners, Title I: Workforce Development Program (Adult, Dislocated Worker and Youth Programs), Title II: Adult Education and Family Literacy Act Program, Title III: Wagner–Peyser Act Program, Title IV: Vocational Rehabilitation Program, as well as representatives from EPS, ACA, and the City of Phoenix to represent the LWDAs.

Workgroups were formed across task forces to address priority issues, and WIOA Resources and Planning Tools have been posted on the DES/DERS website at www.des.az.gov. Workgroup members developed strategies and related action steps in the areas of communication, data, career pathways, sector strategies and common processes for core partners.

Workgroup members were responsible for identifying ways to strengthen collaboration and more effective ways to communicate amongst all core partners, employers (as the job creators) and job seekers. Workgroup members were also charged with outlining a more streamlined, common process within the local Job Centers and methods for gathering information more efficiently across the various data systems used throughout the State’s workforce system. The Implementation Team, State Plan steering committee, task forces and workgroups completed their work drafting of this Plan, and now the Workforce Arizona Council is carrying on their work and setting policy for the implementation of the Plan. As the Council establishes task forces, committees and work groups, these teams, or new ones, may be called upon for specified work in carrying out the Plan.
This unified Plan seeks to provide an in-depth analysis for the State of Arizona’s workforce development system and to describe the various planning and operational elements to be implemented over the next four years. This Plan also details how labor market information and feedback from workgroups and committee members were used to identify gaps within the workforce system as a whole.

To complete the two-year modifications to Arizona’s WIOA Unified State Plan for Program Years (PYs) 2018 and 2019 the Council Chair convened a workgroup with representatives from each of the core WIOA partner programs, along with Council staff. It is important to note that one aspect of the Arizona workforce system landscape that changed since the initial development of the State Plan was the creation of the Arizona Office of Economic Opportunity within the Arizona Commerce Authority (ACA/OEO). This newly created office was established pursuant to A.R.S. §41-5303 to serve as the State’s Workforce Planning Coordinator with the intent of creating synergy between workforce and economic development initiatives through the placement of the new office within ACA. The office now houses the Council staff, along with economists responsible for supporting WIOA through the provision of labor market information (formerly ADOA/ EPS staff).

The State Plan changes reflected in the two-year modification were identified by the workgroup in a collaborative manner. Representatives from the Department of Economic Security, the Department of Education, and the Office of Economic Opportunity contributed to the update, which was then submitted to the Council’s State Plan Subcommittee and the full Workforce Arizona Council for review. Following Council approval, there was a public comment period, which was used to solicit input from local workforce development boards, other interested stakeholders, and the general public. A webinar providing an overview of the modifications was conducted for state and local workforce partners, with a recording of the session posted on the Council’s website, to ensure transparency in the development of the modifications to the State Plan.

**Unified State Plan.** This plan includes the Adult Program, Dislocated Worker Program, Youth Program, Wagner-Peyser Act Program, Adult Education and Family Literacy Act Program, and Vocational Rehabilitation Program. Yes

II) **Strategic Elements**

a) **Economic, Workforce, and Workforce Development Activities Analysis**

1) **Economic and Workforce Analysis**

Arizona’s economy consists of a wide range of industries offering opportunities for individuals seeking employment of all types. Since the end of the Great Recession, employment growth has rebounded in a majority of sectors, while 2016 personal income levels and state gross domestic product (GDP) both increased over 2015 levels. Other indicators of economic importance also show positive improvements for the economy:

- Population levels continue to increase across the state as individuals nationally and internationally seek increased economic opportunities.
- Unemployment levels among Arizona residents have declined, while more people entered into the labor force in 2016.
• State and local housing sectors continue to slowly improve with gradually rising levels of building construction permits and starts along with housing prices.

While economic development efforts have always impacted workforce development, the expectation that these two drivers of the economy work in tandem has never been clearer than with the implementation of WIOA. Work has begun to account for anticipated job growth associated with ACAs economic development efforts. For example, in FY 2017 ACA has obtained commitments from 102 companies for the creation of 19,473 jobs over the next three year period. The goal as we move forward is to use this business intelligence to provide context to the standard short and long term employment projections. Another way the alignment between economic development and traditional workforce labor market information is being realized is through the incorporation of a weighting factor into the existing and in demand industry sector and occupation analysis that recognizes if the industry or occupation is also identified as the seven key industry sectors in ACA’s Workforce 2020 report.

This section summarizes labor market and workforce trends occurring within the Arizona economy to help address and manage future workforce challenges.

A) Economic Analysis

The Arizona Office of Economic Opportunity (ACA/OEO) identified existing and emerging demand industries for the State of Arizona. Industries were selected based on several economic indicators reflecting the overall health of the industry and importance of the industry to the Arizona economy. Parameters were applied to help define and distinguish existing and emerging demand industry categories, and build on the industry performance indicators. The complete description of the methodology used is available in Appendix A.

i) Existing Demand Industry Sectors

Table 1 lists 10 industries identified as existing demand industries ranked by their overall wage and employment indicators. For each existing demand industry, 2017 weekly wage levels, 2017 wage location quotients\(^1\) for national comparison, and the 3-year annualized average employment and wage growth from 2014 to 2017 are listed. Existing demand industries have weekly wages within the top state average wage levels.

**Ambulatory health care services** recorded the largest wage location quotient (1.1) in 2017 Q2. **Ambulatory health care services** shows it provides some of the highest pay levels in Arizona and does particularly well relative to the nation as a whole. **Securities, commodity contracts, investments** provided the highest 2017 Q2 pay levels ($1,766/week), while simultaneously recording the largest annualized pay level percentage increase from 2014 Q3 to 2017 Q2 (4.6%). Overall, **Ambulatory health care services** had the highest average ranking score when considering all pay and employment variables.

\(^1\) Location quotients are ratios that allow an area’s distribution of employment by industry to be compared to a reference or base area’s distribution. The reference area is usually the U.S. and the reference or base industry usually includes all industries in the economy.
In 2017 Q2 the 10 existing demand industries provided 746,511 private sector jobs, roughly 27.0 percent of total employment. Selecting large, established industries ensures that a large number of jobs will be available through employee turnover (aging workforce, employees in transition), even if the industry is not projected to record high rates of growth. Reviewing Table 2, which lists the demand industries by number employed, **Ambulatory health care services** had the largest employment levels of the existing demand industries, employing 155,088 individuals in 2017 Q2. **Securities, commodity contracts, investments** and **Nonstore retailers** each recorded the highest annualized percentage employment increase from 2016 Q3 to 2017 Q3, increasing employment by 4.6 percent each year.

ii) **Emerging Demand Industry Sectors**

Emerging demand industries were identified as industries with small employment levels and large short-term historic employment and pay growth. Emerging demand industries were required to have an above-average pay level and positive 3-year annualized employment level percentage change.

Table 3 lists 10 emerging demand industries by average weekly pay indicators. Electrical equipment and appliance manufacturing was identified as the top emerging demand industry based on employment and pay variables described above. This industry saw an 11.1 percent increase in pay levels annualized from 2014 Q3 to 2017 Q2 and has the largest average weekly pay location quotients of the total 10 emerging demand industries. Pipeline Transportation provided the highest 2017 Q2 weekly pay levels ($2,077).

Table 4 lists 2017 Q2 employment indicators for emerging demand industries. Pipeline Transportation recorded the largest 3-year annualized employment percentage change with a 13.6 percent increase. This percentage increase translated into average annual gains of 42 new jobs each year. Electrical equipment and appliance manufacturing and other information services also recorded large employment growth in the same time period. Data processing, hosting and related services compares the best relative to the nation given its location quotient (1.6).

In-Demand Occupations

Existing and emerging demand occupations were selected from all occupations within each existing and emerging demand industry. Existing and emerging demand occupations were identified as occupations with high wages, large employment levels and strong long-term projected employment growth. These occupations each provide opportunities for future employment through growth or replacement needs.

Although the existing and emerging occupations identified below represent ideal employment opportunities, there are many related jobs that an individual might seek out that will help them obtain an in-demand occupation in the future. OEO and other core partners will continue to work to create career pathways that will identify the knowledge, training and work experience needed to obtain the identified existing and emerging demand occupations to better serve individuals with wide ranging educational backgrounds, work experience and skill levels.

iii) Employers’ Employment Needs

Table 8 identifies common attributes that are highly valued within the occupations. Attributes are categorized into three groups: occupational knowledge, skills and abilities. As future employment needs increase within existing and emerging demand occupations, employers will seek out potential candidates who demonstrate competency within these attributes. Workforce development should focus, in part, on ensuring the future workforce is prepared for the knowledge, skill and ability requirements of existing and emerging occupations.

B) Workforce Analysis

i) Employment and Unemployment

Labor Force Participation Rate

The Labor Force Participation Rate (LFPR) is the labor force as a percent of the civilian noninstitutionalized population who:

- is a person 16 years of age and older;
- resides in the 50 states and District of Columbia;
- are not inmates of institutions;
- are not on active duty in the Armed forces; and
- are employed or able to be employed and have actively sought employment within the last four weeks.

The LFPR\(^2\) for Arizona in 2016 was estimated at 60.4 percent of the civilian non–institutionalized population.\(^3\) A modest increase over the 2014 LFPR of 60 percent. The percent of the population participating in the labor force\(^4\) has been declining since 2002, when Arizona’s LFPR peaked at 66.2 percent of the civilian noninstitutionalized population. Several factors are responsible for the recent decline in labor force participation at varying levels of importance, including an aging U.S. population, individuals opting out of the labor force to pursue higher education and individuals opting out of the labor force because they cannot find work. Population growth also factors into LFPR changes. In Arizona, population growth has outpaced labor force growth since labor force participation peaked in 2002. If

---

\(^2\) The labor force participation rate is the labor force as a percent of the civilian non-institutional population.

\(^3\) The civilian non-institutional populations include persons 16 years of age and older residing in the 50 States and the District of Columbia who are not inmates of institutions (for example, penal and mental facilities, homes for the aged), and who are not on active duty in the Armed Forces.

\(^4\) The labor force includes individuals within the civilian non–institutional population who are employed or are able and have actively sought employment within the last four weeks.
population levels increase faster than the labor force levels increase, the LFPR will decline, even though labor force levels continue to increase.

From 2002 to 2010, Arizona’s LFPR declined only because population growth outpaced labor force participation growth. However, in 2011, Arizona recorded its first decline in annual labor force levels since 2000. Arizona’s labor force levels continued to decline until it recorded positive growth of 3.1 percent in 2014. Arizona’s labor force levels increased from 3,012,000 in 2013 to 3,105,000 in 2014, an increase of 93,000 individuals entering into the labor force. Then from 2014 to 2016 Arizona’s labor force levels continued to increase with an additional 138,000 individuals entering the labor force, reflecting 4.4 percent growth over the two-year period.

Table 9 displays labor force levels and LFPRs for seven age categories. When labor force participation is broken down into age groups it becomes clear that participation for youth under 19 years of age is particularly low at 36.8 percent, though the under 19 rate did increase slightly from 34.1 percent in 2014. Also, Table 9 below illustrates that the LFPR for prime–age workers (i.e., 25 – 54 years old) ranges from 80.3 percent to 78 percent.

Source: Produced by the Arizona Commerce Authority/Office of Economic Opportunity in cooperation with the U.S. Dept. of Labor, Bureau of Labor Statistics

The most recent 2016 estimates show that individuals between the ages of 45 and 54 represent the largest age group in the labor force with a 78 percent labor force participation rate. This age group represents a significant portion of Arizona’s population (being second only to the 65 years and over age group). These individuals are at the age where they are more likely to be working or seeking work rather than retired or focusing on education.

From 1995 to 2016 the participation rate for teens (aged 16 to 19) decreased from a high of 63.1 percent in 1995 to the current 36.8 percent. One factor impacting the decline in teen labor force participation is the increase in the percent of high school graduates pursuing higher education. For example, the 2015–16 Arizona Board of Regents: High School Report Card shows that the Arizona university system recorded an increase of 847 (6.4 percent) in the number of Arizona high–school graduates who enrolled in the fall semester immediately following their senior year. Between 1999 and 2015, the enrollment of this group in Arizona has increased 69%.
Participation in the labor force for individuals age 55–64 steadily increased from 49.9 percent in 1981 to 63.7 percent in 2009. There are many factors that could be influencing individuals in older age categories to continue working, including advancements in medical technology resulting in increasing average life expectancy and raising the age of full retirement. It was also less likely that an individual would consider early retirement during the most recent recession because of economic turmoil in financial and housing markets. However, as the economy began to recover and markets stabilized, individuals age 55–64 and 65 and older began to leave the labor force. Labor force participation rates for individuals age 55–64 and 65 and older remained at 60.8 percent and 16.2 percent respectively in 2016.

Subsets of the workforce can be analyzed to understand factors impacting labor force participation for particular populations. Information is provided below on veterans, individuals with disabilities, those lacking basic literacy skills and the incarcerated population in Arizona.

The Bureau of Labor Statistics estimated a total population of veterans in Arizona at approximately 511,000. Participation in the labor force for all Arizona veterans was 45.4 percent in 2016, which is slightly lower than the overall LFPR in Arizona at 73.6 percent. Looking at veterans in aggregate, however, masks differences in labor force participation between different service group eras. Approximately 75.2 percent of male veterans who served in WWII, Korea, and Vietnam are no longer in the civilian labor force, likely because they are in retirement; versus veterans who served in later eras and are still participating in the workforce. Nationally, this subgroup of veterans makes up about 43.4 percent of the male veteran population, which would equal about 22,185 veterans in Arizona.

One noticeable difference does arise analyzing different service group eras — Gulf War Era II Veterans have a higher unemployment rate than non-veterans in the same age group, which is a pattern that does not hold true for the other service era veterans (where unemployment is similar for veterans and non-veterans). The discrepancy comes from the 25 to 34-year-old population which shows a higher percent who are unemployed. In addition to being younger, Gulf War – Era II Veterans have over 150 percent the rate of service-connected disability (36.3 percent) than the reported rate for all veterans (21.9 percent).

The workforce system will also directly engage individuals with disabilities. In 2016, 62.8 percent of America’s total population over 16 years old was in the labor force, either employed or unemployed. Among individuals with a disability, that number is 20.0 percent. The national unemployment rate (the percentage of the labor force that is not employed) among people with disabilities was 10.5 percent in 2016, while the rate among people without disabilities was 4.6 percent. Within Arizona, individuals with disabilities are finding it harder to obtain employment. In 2014, individuals with disabilities represented 11.1 percent of total unemployed levels, yet represented only 4.9 percent of the total individuals employed. This suggests that individuals with disabilities represent a disproportionately large share of the total unemployed population.

National, nearly half of individuals with a disability are over 64. In 2016, 47.5 percent of persons with a disability were age 65 and older, compared with 15.1 percent of those with no disability in this age group. Individuals with a disability often experience higher than average expenses and are required to continue to work when individuals without individuals may be considering retirement.

The disabled population also participates in the labor force as part time employees at a higher rate than the non-disabled population. Thirty-four percent of workers with a disability are employed part-time, compared to 18 percent of non-disabled workers. This discrepancy is not the result of their intentionally pursuing part-time work; 6 percent of workers who were disabled and working part time did so for
economic reasons, versus the 4 percent who were not disabled and worked part time for economic reasons.

Adults with low academic skills represent an additional group for which services will be targeted; therefore, statistics on this population are provided to convey the scale of need required to assist with this population’s successful integration into the workforce. Based on a 2010 Arizona Profile of Adult Learning survey, approximately 25.2 percent of Arizona’s working age adult population, or 981,971 individuals, are estimated to lack basic academic skills.

Another population that presents unique employment challenges comprises those individuals that were previously incarcerated. In Arizona, the incarcerated population has been increasing at a faster rate than the general population. For example, from 1999 to 2009 the state populations increased by 32 percent while the prison population increased 56 percent to approximately 40,500 over the same period.

Unemployment

Arizona’s unemployment rate has steadily declined after peaking at 11.2 percent in December 2009. Since December 2009, the employment rate has declined 6.7 percentage points to 4.5 percent in December 2017. During this period, unemployment levels declined by 149,909 individuals to 197,070 in September 2015. Arizona’s unemployment rate has consistently trended above the U.S. unemployment rate through and after the recession, reflecting the severity of the recession effects in Arizona.

Unemployment rates vary dramatically between different demographic groups in the state. Table 9 illustrates unemployment rates and levels by age groups in 2014. Individuals 34 to 44 recorded the lowest level and rate of unemployment, whereas the two youngest age groups recorded unemployment rates significantly above the other age groups. Historically (1981–2014), unemployment rates for the two youngest age categories (16–19 and 20–24) have consistently trended higher than unemployment rates for the remaining age categories; however, the magnitude at which youth (age 16–19) unemployment rates have been higher has increased through the decades, and unemployment remains stubbornly high for this age groups post–recession.

Industry Employment

In 2017, Arizona had 2.75 million Nonfarm jobs as is displayed in Table 10 under “Total Nonfarm Employment.” This represents a growth of 180,500 jobs or 2.3 percent from 2014 levels. As displayed in
the table, all Supersectors recorded positive annual average employment growth from 2014 to 2017 with two exceptions—Natural Resources & Mining and Other Services.

5 The US Economic Classification Policy Committee aggregated NAICS sectors into groupings called “Supersectors” for the purposes of analysis. For information visit http://www.bls.gov/ces/cessuper.htm.
The largest Supersectors in Arizona are 1) Trade, Transportation and Utilities; 2) Government; 3) Professional and Business Services; 4) Education and Health Services; and 5) Leisure and Hospitality. These five Supersectors accounted for 64 percent of nonfarm employment in 2017. In addition, if Government is excluded, these Supersectors also recorded the majority of gains from 2014 to 2017, partially because of their large employment bases. Arizona’s largest Supersector—Trade, Transportation and Utilities—gained 20,000 26,200 jobs and grew 1.4 percent annually. The Supersectors that recorded the highest annual percentage growth in 2017 are 1) Leisure and Hospitality (4.2 percent growth); 2) Construction (3.5 percent growth); 3) Education and Health Services (3.5 percent growth); and, 4) Financial Activities (3.3 percent growth).

Industry Employment by Sub–State Region

Employment levels for sub–state regions were analyzed by metropolitan statistical areas (MSAs) and an aggregate area called “balance of state” representing counties not identified as MSAs by the U.S. Bureau of Labor Statistics (BLS). Annual employment levels and employment shares from 2014 to 2017 are illustrated in Table 11. A significant portion of economic activity occurs in the Phoenix MSA and Tucson MSA, which combine to account for 85.9 percent of 2017 Nonfarm employment in the state. The Phoenix MSA recorded the fastest annual employment growth rates (2.9 percent growth) from 2014 to 2017; adding 164,700 jobs. The Phoenix MSA also increased its share of total Arizona employment from 71.2 percent to 72.4 percent during this period. The Tucson MSA recorded the second largest employment gains, adding 7,800 jobs, and grew at a slower rate than the Phoenix MSA (0.7 percent growth). The Prescott MSA recorded the second highest annual employment growth rates (2.6 percent growth). The Sierra Vista–Douglas MSA and the Balance of State were the only sub–state regions to record employment losses over this period. The Sierra Vista-Douglas MSA shed 300 jobs at a -0.3 percent annualized rate and the Balance of State shed 2,500 at a -0.6 percent annualized rate. The Flagstaff MSA (1.2 percent growth), Yuma MSA (1.9 percent growth), and Lake Havasu City–Kingman MSA (1.7 percent growth) also recorded positive annual employment growth rates from 2014 to 2017.

---

6 The general concept of an MSA is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus.

Occupation Employment

In Table 12, employment levels and shares are categorized into 22 major occupation groups. In 2016, Office and Administrative Support was the largest major occupation group with 458,420 jobs and accounted for 17.3 percent of total employment. Farming, Fishing and Forestry represented the smallest major occupation group with 14,390 jobs and accounting for 0.5 percent of total employment.

Wages within an occupation will vary for a number of reasons, including the education level, years of experience and technical skills of an individual. Wages are also influenced by the cost of living of an area. Table 12 provides a range of wage estimates for individuals earning less than 90 percent of all individuals within an occupation up to individuals earning 90 percent more than all individuals within an occupation. It is important to consider wage ranges within an occupation to understand the wage potential each occupation group offers.

The average per hour wage level for All Occupations in Arizona is $22.26. Not surprisingly, Management occupations rank the highest in average hourly wage levels. Management occupations are generally filled by highly skilled or experienced individuals within their respected field. The lowest average wages offered

---

7 Occupation employment estimates group employment by the type of job an employee performs.
are in Farming, Fishing, and Forestry occupations ($11.06 average hourly wage) and Food Preparation and Serving Related occupations ($11.14 average hourly wage).

ii) **Labor Market Trends**

**Short-Term Industry Employment Projections**

ACA/OEO publishes two–year, short–term industry employment projections. The purpose of these publications is to identify employment growth opportunities for displaced workers seeking to reenter the labor market after short–term retraining. In the most recent short–term industry projections, Arizona is projected to gain 138,553 Nonfarm jobs from 2016 to 2018. This represents an annualized growth rate of 2.4 percent. The projected short-term employment trend results in more moderate growth than between 2014 and 2016, where nonfarm employment increased by 2.7%

Eleven out of twelve major sectors of the Arizona economy are projected to gain jobs during the 2016–2018 forecast time period. Educational and Health Services is projected to add 38,757 jobs, the most jobs of any sector. Other sectors with large projected gains include Professional and Business Services (27,582 jobs), Leisure and Hospitality (19,018 jobs), Trade, Transportation and Utilities (15,925 jobs), Construction (10,943 jobs), and Financial Activities (10,879 jobs). Smaller gains are forecast in Other Services (1,943 jobs), Manufacturing (1,593 jobs), Government (940 jobs), and Information (630 jobs). Self-Employed Workers, in all jobs, are anticipated to see a growth of 8,129 jobs, or 2.4%. Natural Resources and Mining are anticipated to decline by 737 jobs, or 1.1%.

ACA/OEO is projecting that sub–state regions within Arizona will record different rates of employment growth. Table 13 shows the annualized growth rate in Total Nonfarm employment for Arizona, Phoenix MSA, Tucson MSA, and Balance of State. In 2018, all regions are forecast to have positive annual over–the–year growth rates in Nonfarm employment. Arizona is forecast to grow at an annualized percentage growth of 2.4 percent for the period. Phoenix is expected to grow faster than the state at 2.8 percent. However, the projected growth rates for Tucson (1.3 percent) and the Balance of State (1.5 percent) are slower than the statewide and Phoenix MSA rates. The expected Nonfarm job gains for the period in the Phoenix MSA are 115,258 jobs, the Tucson MSA 10,068 jobs, and the Balance of State 12,813 jobs.

a) Historical  
b) Forecast
Long–Term Industry Projections

Over the projections time period of 2012 to 2022, ACA/OEO forecasts total Nonfarm employment in Arizona to increase by 22.7 percent, or 559,700 jobs. This would translate to average Nonfarm employment gains of 2.27 percent per year for Arizona. All 11 Supersectors are projected to gain jobs from 2012 to 2022. A majority of the employment growth is projected to occur in the service providing industries. Construction is projected to grow at the fastest pace, while Professional and Business Services and Educational and Health Services sectors are projected to gain the largest number of jobs.

While Construction was one of the most severely impacted industries in Arizona during the Great Recession, it is also projected to grow at the fastest pace between 2012 and 2022. In 2015, Construction ended the year up 4.5 percent over 2014 employment levels, with particularly strong growth recorded in the third and fourth quarters of 2015. In addition, existing home sales are back up and housing inventory levels are back down to early 2000’s levels.

Phoenix is projected to record faster employment growth than the state, growing 25.4 percent from 2012 to 2022. The projected growth rates for Tucson (15.1 percent) and the Balance of State (16.7 percent) are slower than the statewide and Phoenix MSA rates. The expected Nonfarm job gains from 2012 to 2022 for the Phoenix MSA are 355,500 jobs, for Tucson MSA are 47,300 jobs, and for Balance of State are 51,800 jobs.

Long–Term Occupation Employment Projections

Occupation employment projections are derived from industry employment projections, but offer a very different perspective of projected job growth. Occupations can span multiple industries and provide insight into job opportunities or career pathways from the perspective of the job seeker. The most recent long–term occupation employment projections forecast gains in 21 of the 22 major occupation groups, with the largest number of job openings projected to occur within Office and Administrative Support (88,981 jobs) and Sales and Related (53,518 jobs) occupations. These major occupation groups have two of the largest employment bases as of 2016 and it is not surprising that the largest number of openings would occur within these occupations. The largest employment percentage growth is projected to occur within Construction and Extraction Occupations, projected to record 44.0 percent growth over the 10–year period. Building and Grounds Cleaning and Maintenance and Personal Care and Service Occupations are both projected to record increases with both having a projected growth rate of 23.6 percent. In addition, Healthcare Support Occupations are also projected to record large rates of growth at 22.7 percent job creation during the projected period. See Table 14 for the full list of projected occupation employment growth.

iii) Education and Skill Levels of Workforce

Occupations requiring a wide range of education levels, work experience and on-the-job training combine to create the current Arizona economy. Table 15, Table 16, and Table 17 categorize 2014 and 2022 occupation employment by their respective education, work experience and on-the-job training...
requirements\textsuperscript{9} to help identify current and forecasted needs. In 2014, occupations requiring a high school diploma or occupations requiring less than a high school diploma combined to represent 67.4 percent of total employment. This is not a trend unique to Arizona, as similar employment shares can be identified at the national level.

On-the-job training can provide employees with knowledge and skills not offered through schooling. Some form of on-the-job training is typically required for 67.7 percent of Arizona jobs. On-the-job training is particularly important for occupations requiring less than a high school diploma and occupations requiring a high school diploma. Some form of on-the-job training is required for 98.9 percent of jobs that require less than a high school diploma and 81.3 percent of jobs that require a high school diploma. Typically, these forms of on-the-job training are short-term, but do provide informal education to individuals opting out of traditional forms of post-secondary education.

Work experience is an important attribute for occupations that require employee oversight, such as managers, supervisors or administrators. This trend is consistent across all educational attainment levels that require work experience. Occupations requiring work experience, but little to no employee oversight, typically include the self-employed, such as private detectives or writers.

\textit{iv) Apparent “Skills Gaps”}

Closing the gap between the skills desired by an employer and those held by the workforce attracts and retains high-skilled employers. Identifying future employment demands can help ensure that individuals are obtaining knowledge and skills to meet the needs of business growth. Projected employment data displayed in Table 15 identifies forecasted employment needs by education requirement for 2022. To meet future employment demand, a larger share of the workforce will need to acquire post-secondary degrees. Occupations requiring post-secondary degrees are all projected to increase their share of total employment in 2022 compared to 2014 levels. Jobs requiring a high school diploma will also increase their share of total employment. By 2022, 40.1 percent of jobs will require a high school diploma compared to 39.5 percent in 2014. As the share of total employment increases for occupations requiring post-secondary degrees and a high school diploma, the share of jobs requiring less than a high school diploma is projected to decline. If these future employment demand changes are not accounted for, the workforce skill levels will not align with business demand and the skill gap could widen.

Success in identifying and addressing concerns about the skill gap should also involve coordination with local businesses. Business involvement is essential to obtain support and local knowledge of workforce supply shortages. ACA/OEO intends to strengthen collaboration with local government and business entities to analyze workforce supply and demand trends.

\textsuperscript{9} BLS uses a system to assign categories for entry-level education, work experience in a related occupation, and typical on-the-job training to each occupation. Categories do not necessarily identify the exact level of education, job experience or on-the-job training an individual employed in that occupation has. For more information regarding education, job experience and on-the-job assignments visit:

2) **Workforce Development, Education and Training Activities Analysis**

**A) Arizona’s Workforce Development Activities**

WIOA authorizes the one-stop career center service delivery system and six core programs. The core programs are:

- Title I: Adult, Dislocated Worker and Youth formula programs;
- Title II: Adult Education and Literacy Act;
- Title III: Wagner–Peyser Act employment services; and
- Title IV: Rehabilitation Act programs.

Arizona’s workforce system operates under the brand ARIZONA@WORK, which was launched February 2016. This new brand encompasses the Workforce Arizona Council (Council), the Department of Economic Security (DES), the Arizona Department of Education (ADE), the Arizona Commerce Authority (ACA), the Office of Economic Opportunity (ACA/OEO), Local Workforce Development Areas (LWDAs), as well as their respective Local Workforce Development Boards (LWDBs), comprehensive ARIZONA@WORK Job Centers, satellite offices, affiliate sites and an array of workforce partners. In the past, branding efforts were not used consistently across the state, creating confusion about the system and the entities involved. The ARIZONA@WORK brand, including the tagline “Innovative Workforce Solutions” was created to increase public awareness and to break down silos among the various workforce partners. The ARIZONA@WORK system is a proud partner of the American Job Center Network.

Arizona has a strong foundation for providing workforce development activities due to its long history of locally established workforce partners, adult education, and vocational rehabilitation programs. State policy provides workforce system partners with instruction and guidance on the ARIZONA@WORK seamless delivery system. Through this system, clients can access a broad range of employment and training–related services at a single point of entry. The following programs are required to deliver their services through the ARIZONA@WORK system.

- Adult, Youth, and Dislocated Worker (Title I)
- Adult Education and Literacy (Title II)
- Programs authorized under the Wagner–Peyser Act (Title III (Employment Service))
- Vocational Rehabilitation (Title IV)
- Career and technical education programs at the postsecondary level authorized under the Carl D. Perkins Career and Technical Education Act of 2006
- Employment and training activities carried out under the community Services Block Grant Act
- Employment and training activities carried out by the Department of Housing and Urban Development
- Jobs for Veterans State Grants programs authorized under chapter 41 of title 38, United States Code
- Programs authorized under State unemployment compensation laws
- Programs authorized under section 212 of the Second Chance Act of 2007
- Programs authorized Part A of title IV of the Social Security Act
- The Senior Community Services Employment Program authorized under Title V of the Older Americans Act of 1965
Trade Adjustment Assistance activities authorized under chapter 2 of title II of the Trade Act of 1974

The Governor has determined that Temporary Assistance for Needy Families (TANF) will not be a required partner in the State Plan.

Arizona currently has 18 comprehensive ARIZONA@WORK Job Centers and 39 affiliate sites; a complete directory of locations is posted on the internet at https://arizonaatwork.com/az-locations. At least one comprehensive ARIZONA@WORK Job Center is located in each of twelve geographic areas, known as Local Workforce Development Areas (LWDA) and provides access to physical services of the core programs and other required partners. Affiliate sites provide access to certain services and refer customers to other partner programs for additional services, as needed. Physical ARIZONA@WORK locations are supplemented by virtual access through the Arizona Job Connection at www.azjobconnection.gov, the State’s web-based labor exchange, case management and reporting system.

DES has been designated as the fiscal and administrative agency for three of the four core partners (Title I Adult, Dislocated Worker, and Youth Programs, Title III Wagner–Peyser Employment Service, and Title IV Vocational Rehabilitation [VR]), permitting the partners to leverage resources, including DES and ARIZONA@WORK Job Centers throughout the state, to provide services to job seekers, including individuals with disabilities. Workforce Development and Employment Service staff is present at all comprehensive ARIZONA@WORK Job Centers. Vocational Rehabilitation staff is available at 41 offices throughout the state. Some VR offices are co-located within ARIZONA@WORK Job Centers. VR staff is available itinerantly at all ARIZONA@WORK Job Centers and some affiliate sites throughout the state.

Title II Adult Education services are provided through 24 local providers funded by the Arizona Department of Education (ADE), typically in its own offices, but all ARIZONA@WORK Job Centers are able to refer clients to adult education services when needed. Title IV VR services are provided statewide through a network of contracted service providers. Both programs are identified as proud partners of ARIZONA@WORK.

Despite the number of ARIZONA@WORK Job Centers and virtual access options, accessing the system remains difficult for individuals in remote areas or those who do not have access to transportation or a reliable computer connection.

Governance

The Workforce Arizona Council (Council) was established by Executive Order in 2015 as the State’s workforce board. Members represented three of the four core partners: Title I–B Adult, Dislocated Worker, and Youth Programs, Adult Education, and Employment Service. Community partners, the business community, and educators were also on the state board. A standing committee of the Council has taken a lead on policy development regarding the state’s workforce delivery system, local boards, service integration, and One-Stop certification. A standing committee of the Council has taken a lead on policy development regarding the state’s workforce delivery system, local boards, service integration, and One-Stop certification. These policies are posted on the DES website at www.azdes.gov and the Council webpage at www.arizonaatwork.com/about/workforce-arizona-council. In addition, the Arizona Apprenticeship Advisory Committee was established under WIA to provide advice and guidance to the Arizona Registered Apprenticeship Program and carried forward to WIOA. As outlined in the 2012 State
of Arizona Integrated Workforce Plan, the LWDAs created local plans that were approved by the previous Council in 2014. These plans describe the operations in the ARIZONA@WORK Job Centers, including service delivery, collaboration, and operational policies and procedures.

During WIOA implementation, Arizona drafted new Local Governance policies, including the policies for the designation of LWDAs and the criteria for the selection of local board members. Local Workforce Investment Areas (LWIAs) submitted their requests for re-designation as Local Workforce Development Areas (LWDAs) in the spring of 2015. Two of the twelve existing LWIAs had asked for a change in local area designation from their prior designation. The proposed re-designation was approved by local boards and chief elected officials and is reflected in the letter signed by the Governor designating the following twelve LWDAs to serve Arizona as of July 1, 2015.

- ARIZONA@WORK – Coconino County
- ARIZONA@WORK – Maricopa County
- ARIZONA@WORK – Mohave/La Paz Counties
- ARIZONA@WORK – Nineteen Tribal Nations (consortium of 13 tribes)
- ARIZONA@WORK – Northeastern Arizona (Navajo, Apache, Gila Counties)
- ARIZONA@WORK – City of Phoenix
- ARIZONA@WORK – Pima County
- ARIZONA@WORK – Pinal County
- ARIZONA@WORK – Santa Cruz County
- ARIZONA@WORK – Southeastern Arizona (Graham, Greenlee, Cochise Counties)
- ARIZONA@WORK – Yavapai County
- ARIZONA@WORK – Yuma County

**Services to Employers**

Business customers play a key role in the success of the LWDAs, therefore putting them at the forefront in the provision of services. The LWDAs assist businesses by matching job creators with skilled workers, listing employment opportunities in AJC and referring qualified job seekers to these jobs. Workforce staff is able to provide public, public–limited and private access to employer information based on the request of the employer. This allows for the ability to open the job opening(s) to all job seekers or provide a customized match for the employer. Employers also have the ability to utilize the LWDA as the sole source of recruitment needs—cutting down on job seeker traffic in their offices—and receive only qualified referrals. Employers also have the opportunity to allow the workforce staff to set the stage for the referral process, which may include workforce staff handling the set up for interviews or a simple hand off for the employer to do their own scheduling. The ability to have several choices for recruitment at their disposal assists with the flexibility of the recruitment whether it is one opening or several. LWDAs also assist businesses by providing labor market information, personalized recruitment services, specialized hiring events and/or larger activities, such as job fairs.

Initial and on-going meetings with employers establish the communication with businesses needed to help determine what jobs are in demand in the LWDAs, the types of training and credentials that individuals need to be qualified for these positions, development of career pathways and identification of sector strategies, leading to a job–driven workforce system. When these collaborative environments are developed and strengthened, they lead to enhanced services to job seekers. When employers, as job creators, become more familiar with the services, their interest in providing opportunities for job seekers expands into participation in work–based training such as on–the–job training and customized training.
All Arizona LWDAs provide various types of services to employers, from customized hiring events and job fairs to targeted topic workshops. Examples of services include the following:

- Southeastern Arizona Workforce Solutions hosted or participated in numerous job fairs, including the Graham County Career Fair in partnership with Eastern Arizona College, with 279 job seekers attending. Targeted recruiting events were held that served employers such as Verizon Wireless, Caring Hearts, Arizona Department of Corrections and several seafood employers from Alaska.

- The Yavapai County Business Assistance Center offers quality business services and partnered with Northern Arizona University (NAU) to provide employer workshops in Competitive Innovation, Strength–based Management, Theory of Constraints, and Critical Chain Project Management, just to name a few.

- Maricopa County works closely with the Greater Phoenix Economic Council and other economic development entities. This has provided opportunities for workforce staff to present to businesses looking to expand operations in Maricopa County.

- Yuma County holds a yearly Community Job Fair that brings several outside partners to the table, including the Marine Corps Air Station, Goodwill of Arizona, Yuma Proving Ground, Arizona Western College and the Quechan Indian Tribe. This rural county event draws over 1200 job seekers each year and coordinates with the winter vegetable harvest season to allow for Migrant and Seasonal Farmworker (MSFW) services to be provided. During the event there have been well over 600 MSFWs in attendance.

- Pinal County holds community job fairs in different areas of the large rural county on a quarterly basis and as a best practice allows for Veterans Priority of Service by opening the first hour of the job fair to veterans only.

- In November 2015, the Pinal County Business Services Team worked closely with the Economic Development Manager assisting with two prospective employers. Both projects combined could bring approximately 2500 job to Casa Grande in 2016. The team also provided targeted hiring fairs for specific employers or groups of employers from a specific industry.

Arizona provides quality business services to employers across the state and each LWDA has a Business Services Team whose focus will be to design and implement locally focused strategies to engage and serve the business customer. In some areas of the state, the Business Services Teams have participated in local economic development sessions with prospective employers. The Business Services Teams bring valuable workforce information to the table by providing potential employers with current labor pool information, wage information and insight to educational opportunities that could support the business moving to the area.

**Sector Partnerships**

ARIZONA@WORK partners have supported the creation and sustainability of sector partnerships across industries statewide, for example, manufacturing, healthcare, and mining, as well as renewable energy with tribal partners. In addition, as outlined in the State of Arizona Integrated Workforce Plan, the LWDAs created sector strategies for their areas, identifying industries most critical to their economic growth.10

---

10 State of Arizona Integrated Workforce Plan, p. 29, loc. cit.
One of the priorities being addressed by each of the partnerships is the need to better align workforce, education and economic development with industry needs.

Among the successful sector partnerships in the state is the Phoenix Health Care Sector partnership, focusing on increasing alignment between workforce, training, and sector needs, leading to a policy briefing at the State Capitol and collaboration with the Arizona Nurses Association and the Arizona Action Coalition. Another example of a regional initiative is Pima County Local Area Workforce Development partnering with Tucson Regional Economic Opportunities to host a Sector Partnership forum, bringing together partners from construction, health/long-term care, and bio-science.

The Southern Arizona Manufacturing Partners, with more than 20 member manufacturing companies, continues to develop a new generation of manufacturing technicians, in partnership with Pima County, Pima Community College, Pima County Joint Technological Education District, and the Sunnyside and Tucson Unified School Districts. A total of 23 interns have been placed with companies and enrolled in certificate training at Pima Community College. The partnership has sparked numerous efforts to streamline the pathway, including dual enrollment credit for high school career technical education, certification of adjunct faculty, submittal of newly developed, industry-validated programs for the Eligible Training Provider List, and development of toolkits for industry-based mentoring and internships.

**Title I–B Workforce Development Activities**

The Adult, Dislocated Worker, and Youth Programs comprise the WIOA Title I–B workforce development programs. These programs offer an assortment of employment and training activities designed to prepare participants for employment that will lead to financial stability and economic security for themselves and their families. The programs are co-located in the ARIZONA@WORK Job Centers in Arizona.

**Youth Program**

The Youth program serves eligible in–school youth ages 14–21 and out–of–school youth ages 16–24. The youth program is designed to prepare Arizona’s youth to enter postsecondary education, training, or employment upon completion of designated program activities. The design framework of the youth program includes outreach and recruitment, objective assessment, development of an Individual Service Strategy (ISS), case management, supportive services and follow–up services. The youth participants are enrolled in one or more of the 14 required youth program elements based on the youth’s needs as identified in the ISS. Program elements can include tutoring, alternative services, paid and unpaid work experiences, occupational skills training, adult mentoring, financial literacy education, and leadership development activities.

Youth programs in Arizona have been serving in–school youth and out–of–school youth at an approximate ratio of fifty percent each, based on approved expenditures. In Program Year (PY) 2015, Arizona exceeded the U.S. Department of Labor’s (U.S. DOL’s) negotiated performance targets for statewide youth services. Seven LWDAs exceeded all negotiated measures for youth, and only two LWDAs did not meet all negotiated levels.

LWDAs work with numerous community partners on initiatives designed to assist youth with the transition to employment, such as:
- Youth programs that provide work experience and help with the transition from high school to employment including TeenWorks in Coconino County and the Arizona Integrated Basic Education Skills Training (AZ–IBEST) Construction Degree Program in Navajo/Apache Counties.
- Services to help offenders re–entering the community or youth on probation, including the Smart Justice initiative in Maricopa County, YouthBuild in Phoenix, or the EAGLES program in Mohave County.
- Arizona Call—a–Teen Youth Resources, which has managed a regional collaboration for Phoenix and Maricopa County in partnership with the Bureau of Land Management and the Student Conservation Association since 2011, providing opportunity for hands–on work experience.
- The Pima Vocational High School works with out–of–school and other at–risk youth, with a focus on high school completion and preparation for employment.

**Adult and Dislocated Worker Programs**

The Adult and Dislocated Worker programs have two types of services: Career Services and Training Services. The Adult Program provides workforce investment activities designed to assist individuals, particularly those with barriers to employment, increasing access to employment, retention, earnings, and the attainment of recognized postsecondary credentials. Services for adults age 18 and older are provided by all 12 LWDAs. The Adult Program provides priority of service to veterans, public assistance recipients, other low–income individuals, and individuals who are basic–skills deficient. Self–service is available to all Arizonans at the ARIZONA@WORK Job Centers or via the AJC website, including job search, orientation and group workshops.

The Dislocated Worker Program provides services to individuals who have been terminated, laid off, or received a notice of termination or layoff, from employment generally due to closures or downsizing. Self–employed individuals who are unemployed due to general economic conditions and individuals who meet the WIOA definition of a displaced homemaker may also be eligible for services.

Arizona exceeded its negotiated performance levels for the Adult Program and met or exceeded the negotiated performance levels for the Dislocated Worker Program in PY 2015. All but three LWDAs met or exceeded their U.S. DOL performance levels for the Adult and Dislocated Worker Programs in PY 2015.

LWDAs engage in numerous partnerships and initiatives in their communities, working directly with partner agencies or participating in grant–funded activities, to support youth, veterans, and individuals with disabilities and other barriers.

- Pima County continued serving as a State sub–grantee for the Senior Community Service Employment Program (SCSEP) grant in conjunction with the county–funded Plus 50 Employment Program for individuals over age 50. The Plus 50 Program provided employability–skills training for 125 mature job seekers, while SCSEP offered eight low–income program “graduates” the opportunity to train in a work–based setting to gain competitive employment skills.
- H1–B Southern Arizona Technical Career Pathways is a four–year grant from the U.S. DOL to ARIZONA@WORK Southeastern Arizona, offering training to move incumbent workers up the career ladder in engineering, information technology, and production management occupations. ARIZONA@WORK Southeastern Arizona has enrolled 58 participants in this grant, with all participants pursuing information technology certificates with the exception of three participants, who have pursued bachelors’ degrees.
• In 2013, the Gila River Indian Community Employment and Training Department received an AmeriCorps planning grant that allowed the Department to research the needs of veterans and their families in the community. Findings from that research led to a new grant in October 2014 to fund “Veterans Serving Veterans,” a program funded by the three–year AmeriCorps grant and implemented by the Department. The program’s sole purpose is to serve community veterans.

Rapid Response

Rapid Response is the cooperative effort of staff in Arizona’s employment and training and partner programs to offer assistance and services to workers and employers affected by layoffs, business closures, or natural or other disasters resulting in a mass job dislocation. The intent of Rapid Response activities is to aid workers during a difficult time in their lives and help them transition to new employment as quickly as possible. Assistance to employers focuses on providing guidance and coordination to ensure a smooth transition for their employees and facilitate the linkage to available resources and services.

State–level Rapid Response activities are managed by the DES Statewide Rapid Response Coordinator. The State Coordinator is responsible for the entry of Workers Adjustment and Retraining Notifications (WARN) into the Arizona Job Connection (AJC) system and providing technical assistance to the LWDA Rapid Response Coordinators. Local Rapid Response Coordinators are responsible for connecting dislocated workers to partner programs and coordinating the provisions of required Rapid Response activities. Each LWDA plan addresses service delivery to target populations and how Rapid Response will coordinate and deliver services to eligible dislocated workers. The plans also describe how the LWDA provides layoff aversion strategies through services to employers, such as incumbent worker training, using Rapid Response funds. The State Coordinator monitors the LWDA to ensure compliance with each of the local plans. Rapid Response events include workshops and demonstrations, including the provision of labor market information, resume preparation and interview workshops. The affected workers are also provided information by program representatives on employment and training resources, emergency services and human service programs including Unemployment Insurance, Employment Service, and Trade Adjustment Assistance (TAA), if a certification for trade has been submitted or certified. The following examples help illustrate the effectiveness of Rapid Response:

• In December 2014, Mohave County was notified of a major layoff with Mineral Park Mine affecting 383 employees. The Mohave County Rapid Response Coordinator put plans into motion immediately to assist the affected workers through counseling and job fairs. Based on employer feedback and anecdotal information, it is estimated that more than 70 percent of the mining workers were able to experience rapid reemployment through the efforts of the workforce development team.

• The Coconino County Rapid Response Task Force also responded quickly and intensively when called into action on the announcement of the closure of a pharmacy distribution center in Flagstaff. 345 employees, with more than 25 percent of the employees having over 20 years of service, were left looking for new positions. With the help of the Coconino County Career Center and Rapid Response partners, the employees received valuable information and opportunities within days after the announcement. Partners included the Coconino County Career Center, the City of Flagstaff, Economic Collaborative of Northern Arizona, DES Veterans staff, Goodwill of Northern Arizona, and DES Employment Services. Local financial and housing institutions set up one–on–one discussions with employees to ensure they were able to manage the upcoming financial impact to their lives.
Eligible Training Provider List

DES maintains the Eligible Training Provider List (ETPL), which contains approved providers who offer training services to meet the skill development needs of Adult, Dislocated Worker, and Out-of-School Youth program participants, including those who are disabled and/or require literacy assistance. Training programs approved for the ETPL must be in demand occupations in the LWDA. They are evaluated by the LWDA ETPL approvers using criteria that include the demand for occupations in the LWDA, alignment with sector strategies and the respective local plans. As of the end of PY 2014, the ETPL contained nearly 250 approved training providers and more than 1,500 approved programs. Compared to PY 2013, this was a reduction both in the number of providers and the number of programs as a direct result from an intensive statewide effort to update listings and remove programs that no longer meet the needs of the LWDAs.

The ETPL is a resource to be used by participants in the Adult and Dislocated Worker Programs, and Out-of-School youth participants in the Youth Program to select a training provider once an assessment has identified a need for training in order for the individual to become employable. Additionally Trade Adjustment Assistance (TAA) and Vocational Rehabilitation (VR) also utilize the ETPL. Many WIOA participants have barriers to employment, and LWDAs are successful at matching the individuals to suitable training. However, up to this point, Arizona has not been emphasizing the need to have providers that serve individuals with a disability. Core partners will need to ensure that rural areas have adequate access to providers, reviewing the availability of computer/Internet–based training. There are reciprocal agreements with Montana, Nevada, New Mexico and Utah and their ETPL providers, and Arizona plans to add more reciprocal agreements with other states to increase training options. Among the issues that need to be addressed are the development of a comprehensive monitoring process and improved performance data collection. Arizona had obtained a waiver for collecting initial eligibility data and is now beginning to address issues related to performance data collection and data sharing processes that would allow providers (including community colleges) to report credential and employment rates, as required by WIOA.

Arizona Office of Registered Apprenticeship

Since its transfer in 2011 from ACA to DES, the Arizona Office of Registered Apprenticeship has been working closely with workforce partners in LWDAs to develop strategies for engaging the business community and increasing the visibility of the Arizona Registered Apprenticeship Program. Complying with the Arizona Governor’s Executive Order 2013–01, the Council maintained the Arizona Apprenticeship Advisory Committee (AAAC), first established in 2008 to help and advise the Arizona Office of Apprenticeship staff on any apprenticeship issues that might arise. The Arizona Office of Registered Apprenticeship is looking to create and develop registered apprenticeship program opportunities in all industries for multiple occupations within each industry. The registered apprenticeship team maintains active contact with employers and employer groups as well as presenting to stakeholders statewide. The stakeholders include employers, industry groups, chambers of commerce, veterans’ groups, Vocational Rehabilitation (VR), community colleges, and the Arizona Department of Education (ADE), including the Joint Technical Education Districts (JTED) and Career and Technical Education (CTE) programs. Each LWDA has designated a staff member, who attended a presentation on registered apprenticeship programs within the ARIZONA@WORK system to be the contact person for the Arizona Office of Registered Apprenticeship Program Lead.
Table 18: Arizona Office of Apprenticeship Report (as of June 30, 2017)

<td>937</td>
</tr>
</tbody>
</table>

Arizona uses the Registered Apprenticeship Partners Information Data System (RAPIDS) to record programs and apprentices. This system allows for accurate tracking of program data, which is shared with the U.S. DOL. Arizona introduced electronic registration in 2014, allowing employers to maintain information on their apprentices in the system. The registered apprenticeship team has a plan to continue growing the number of programs and apprentices in Arizona. Being able to provide more options when economic changes impact specific sectors, the registered apprenticeship team is creating programs in non-traditional occupations and industries such as information technology, healthcare, advanced manufacturing, business services, hospitality, insurance and other non–traditional occupations. Such diversification should also help attract more female apprentices, whose share of participation has remained the same at four percent for a number of years.

**Coordination with Other Programs**

Also located in DES/DERs are the Temporary Assistance for Needy Families (TANF) Jobs Program and the Supplemental Nutrition Assistance Program Employment and Training Program (SNA E&T). Staff for these two programs is co–located in the ARIZONA@WORK Job Center, readily allowing for referral of clients and sharing of resources.

An example of successful cooperation is the Jobs Program contractor in Maricopa County, MAXIMUS, who closely coordinates services with Maricopa County and the City of Phoenix WIOA ARIZONA@WORK systems. For several years the Jobs Program has operated from within two Maricopa County ARIZONA@WORK Job Centers.

- Contractor employees have been stationed as greeters at the front reception desks, welcoming all visitors into the Centers.
- Contractor employees also shared responsibility with other ARIZONA@WORK partner staff in assisting job seekers in resource areas, the facilitation of employment readiness workshops and job clubs, and conducting employer outreach and on–site hiring events.
- Jobs Program participants were identified by the contractor for co–enrollment into WIOA programs, and case management, training, and employment services were coordinated between county and contractor staff for co–enrolled Jobs Program/WIOA participants.
- Outside of Maricopa County, ResCare is the Jobs Program contractor and works closely with ARIZONA@WORK staff. Constant collaboration helps to identify the best systems to provide the optimal job seeker experience, avoiding duplications of effort.
- Collaboration with ARIZONA@WORK and Employment Service makes it possible to share job leads, job fairs, and related activities, such as job readiness workshops, adult education, trainings.
- Direct referrals to ARIZONA@WORK Job Centers have the primary first goal of having job seekers register with the AJC system.
- In some areas ResCare staff, ARIZONA@WORK staff, and other partners meet at least quarterly and collaborate to increase job seeker opportunities.
Accountability and Evaluation

DES is responsible for the monitoring of workforce programs under Title I and Title III. Staff reviews client files and data entry for accuracy and compliance with policy. Annual site visits include the monitoring of physical accessibility as required by the Americans with Disabilities Act and Equal Employment Opportunity Act. Fiscal staff reviews the use of funds and compliance with policies and “Administrative Requirements, Cost Principles and Audit Requirements” issued by the Office of Management and Budget (OMB) in December 2013. Programs that do not meet requirements are put on a corrective action plan. All LWDAs use the AJC data system to record client data, allowing DES to prepare quarterly and annual reports as required by U.S. DOL.

Data on services to job seekers is collected in AJC and reviewed monthly so that LWDA staff can track progress and performance. An annual report on activities is prepared for U.S. DOL in September of each year. This report includes a detailed analysis of clients served, individuals receiving training or entering employment, and wage levels attained for Title I and Title III programs.

Title II Adult Education Workforce Development Activities

Arizona Adult Education, in accordance with WIOA, implements services to assist adults in becoming literate, obtaining the knowledge and skills necessary for employment and self-sufficiency, obtaining the skills necessary to become full partners in their children’s education, completing their secondary school education, transitioning to post-secondary education or training, and improving the reading, writing, and comprehension skills for English language learners, and acquiring an understanding of the American system of government.

Prior to the passage of WIOA, Arizona Adult Education developed and implemented a Two-Year Strategic Plan for Adult Education that addressed the necessity for college and career readiness as an overarching goal for our adult learners. Arizona Adult Education College and Career Readiness Standards training and curricular alignment, the statewide hybrid and distance learning delivery models, and Arizona IBEST (AZ–IBEST) pilot programs are examples of initiatives implemented during the Two-Year Strategic Plan for Adult Education.

During the WIOA Transition Year, Arizona Adult Education implemented activities to address the intent of WIOA reauthorization, including assisting adults in obtaining employability skills such as critical thinking and communication; the integration of workforce preparation into literacy activities; career pathways and post-secondary bridge program models; the expansion of distance and hybrid learning services to extend learning beyond the classroom; and the improvement of instruction in the areas of reading, writing, math and English language acquisition.

Arizona Adult Education programs are currently funded to provide the following services to adult learners:

- Adult Basic Education (ABE), including instruction in reading, writing, and math up to the 8th grade level;
• Adult Secondary Education (ASE), including preparation for testing leading to a high school equivalency diploma;
• English Language Acquisition for Adults (ELAA);
• Civics engagement for English language learners;
• Distance Education and Hybrid Learning instructional delivery; and
• Arizona Integrated Basic Education Skills Training (AZ–IBEST).

State Leadership and Professional Development

Arizona Adult Education implements State Leadership Initiatives and provides professional development to support activities, programs and projects that are research– and standards–based, data–driven and designed to increase the academic and workplace skills of adult learners and advance the state’s workforce development efforts. The multi–year projects below were initiated prior to passage of WIOA and are continuing during the WIOA Transition Year and beyond.

• Arizona Career Information System (AzCIS)

AzCIS is an interactive online environment used in Arizona statewide in both K–12 classrooms and adult education classrooms to provide students with assistance in planning for transition to postsecondary education and/or employment. Tools include resume builders, job search tutorials, assessments for employability skills, application trackers, and learning styles and interest inventories. Arizona Adult Education Services, in collaboration with the Exceptional Student Services Division of the Arizona Department of Education, maintains a statewide site license to make the software tool available to learners in all adult education classrooms.

• **College and Career Readiness (CCR) Initiative**

The CCR initiative is designed to foster sustained, comprehensive professional development experiences. These facilitate programs and instructors in implementing programmatic and instructional practices to help learners gain the skills needed for successful transition to college or a career pathway. The Arizona Adult Education College and Career Readiness Standards are utilized as the foundation, and face-to-face workshops, webinars, contracted facilitators and customized technical assistance for cohorts of adult educators are strategically incorporated over the course of two years. Outcomes include the statewide implementation of the Standards in Action (SIA) model and in-depth implementation of the CCR standards, including research and evidence based practices, into program operations at the local level.

Arizona Integrated Basic Education Skills Training (AZ–IBEST) Pilots

This initiative serves individuals whose low literacy skills prevent them from participation in post-secondary skills training programs for which they would otherwise qualify. The ultimate purpose is to prepare adults seeking High School Equivalency (HSE) Diplomas with the basic literacy skills, postsecondary credentials, and work ready skills needed for unsubsidized employment. The latest AZ–IBEST cycle provided funding to five programs from three counties for 20 months: Cohort 1, 11–1–2014 through 6–30–2015, and Cohort 2, 7–1–2015 through 6–30–2016. Participating local providers represent both urban and rural communities.

In Cohort 2, providers are continuing the same certification categories and are projected to serve 60–70 additional participants. The following lessons were learned during Cohort 1 implementation and will inform changes during Cohort 2 implementation:

- Recruiting for AZ–IBEST programs must be a collaborative process between ARIZONA@WORK Job Centers and Adult Education;
- Support services for selected students are an essential component of participant success; and
- AZ–IBEST programs require a higher student skill level and greater commitment from the student, but those students have greater successes and retention rates are better than the average Adult Education student of similar skill level.

33

---

11 Subsidized employment means an employer is receiving public funds to offset part or all of the cost for employing an individual.
• **Arizona Distance Education for Adult Learners (ADEAL)**

This initiative supports the implementation of diverse delivery models, including distance learning and hybrid learning classes, to transform how instruction is delivered in Arizona’s adult education classrooms. The hybrid instructional model, a strategic blend of face–to–face instruction with online curricular content that can be accessed by students outside of the classroom, is offered in all 24 adult education programs across the state. Nine programs also offer pure distance delivery instructional options for students who cannot or prefer not to attend face–to–face classes. The main goals of ADEAL are to increase the capacity of the system, accelerate learning, and promote and support adult learners’ acquisition of independent learning skills for college and career readiness.

*Preliminary Data

During PY 2015/16, Arizona Adult Education funded and implemented additional State Leadership Initiatives designed to assist local adult education providers in their transition to WIOA and adult education’s role as a core partner in the ARIZONA@WORK system. Local providers were given the opportunity to apply for additional funding to implement one or more of the initiatives below.

• **Arizona Career Pathways Pilots**

Funding and training to assist in the design and implementation of a Career Pathway pilot that organizes education, training and other services to meet learner needs; offers an educational course of study concurrent with and in the same context as workforce preparation for a specific occupation or occupational cluster; enables learners to attain a secondary high school equivalency diploma and at least one recognized post-secondary credential; and helps learners enter or advance within a specific occupation or occupational cluster.

• **Arizona Postsecondary Bridge Pilots**

Funding and training to assist in the design and implementation of a pilot bridge program to meet the needs of lower skilled ABE/ASE and/or ELAA learners and specifically target the basic skills needed to enable learners to enter and succeed in post-secondary education/training and a career pathway.
• **WIOA Program Operations and Collaboration Initiative**

Funding and training in the development of program operations to assist programs in their alignment and collaboration with WIOA Core Partners and the successful implementation of college and career readiness components as identified in the Arizona Adult Education – National College Transitions Network (NCTN) College and Career Readiness Program Operations Rubric.

• **Action Research Projects**

Funding and training to assist in the design and application of classroom level Action Research that aligns to the Arizona Basic Education (ABE), Adult Secondary Education (ASE), and English Language Acquisition (ELAA) Teachers Standards and achieves the goals below:

- Improves instructional practice through continual learning and progressive problem-solving in the selected content area;
- Develops a deep understanding of practice based on research and evidence through collaborative planning and implementation; and
- Accelerates, extends, and aligns student learning outside the classroom through the innovative use of technology and online curricular resources.

**Accountability and Evaluation**

Arizona adult education providers are evaluated both fiscally and programmatically based on a model incorporating the factors below:

- A cyclical system for risk assessment and monitoring;
- Monthly desk–monitoring, including data analysis and technical assistance; and
- Evidence of high quality data–driven and research–based professional learning aligned to content standards and professional learning standards.

Comprehensive case reviews are conducted annually in the fall. The case review includes an analysis of each local program’s prior year’s performance data, professional learning plan, technology integration status, annual programmatic and fiscal reporting, and risk assessment. Local programs that do not meet the state performance measure targets are placed on a Corrective Action Plan (CAP). Programs on a CAP work throughout the year with state staff to plan and implement improvement efforts. This team approach has been valuable in providing comprehensive targeted technical assistance to local programs. Additionally, it allows state staff to gain a broader view of the dynamics of each program and provides programs with a consistent message.

Monitoring for compliance to federal and state requirements is an important part of the Arizona Adult Education Program Improvement Model. Desk monitoring is conducted on all programs throughout the year, and on–site monitoring is conducted based on risk assessment and issues identified during the Case Review process.
Program reporting is part of the annual program improvement cycle. Each local provider completes a comprehensive set of final reports on program operations, performance, professional learning, technology integration and fiscal contracts. As programs are completing their final reports they are also developing the foundation for the upcoming program year’s plan.

Technology Integration and Distance Learning

Integrating technology into adult education instructional settings has been a major initiative for the past ten years and is rooted in the belief that learners enrolled in adult education must have the opportunity to acquire necessary technology skills in order to transition successfully to college and/or the workplace. In addition, technology is viewed as an important capacity building mechanism that allows more learners to be served. As a result, technology use by programs, teachers and learners has expanded in important ways: the variety of technologies used in the classroom, including Web 2.0 technologies; teachers who are skilled at and comfortable with integrating technology into their instructional delivery model; an emphasis on helping adult learners become independent learners who are able to access and apply resources relevant to their lives; and the availability of diverse delivery models, such as distance and hybrid learning classes, for students who cannot or will not attend in a traditional classroom setting or wish to accelerate their learning and goal achievement. Statewide access to and utilization of an online curriculum is a key component of the technology integration initiative and intensive training on how to effectively use the curriculum to deliver instruction at a distance is required.

Title III Wagner–Peyser Employment Service

Employment Service is a network of public employment offices providing placement services for job seekers and labor force recruitment services for employers. Employment Service is co–located in all ARIZONA@WORK Job Centers throughout the state. Career services are delivered in one of three modes: self–service, facilitated self–help services and staff–assisted service. Employment Service focuses on providing a variety of employment–related labor exchange services including, but not limited to:

- Employability Assessment;
- One–on–one initial registration in the Arizona Job Connection (AJC);
- Review on–line employability assessments for possible referral to other programs;
- Referrals to partner services within the ARIZONA@WORK Job Center;
- Discussion job search techniques;
- Assessing and referring job seeker to job search workshops;
- Job search assistance;
- Job referral and placement assistance for job seekers;
- Providing labor market information;
- Resume preparation;
- Job development;
- Re–employment services to Unemployment Insurance claimants;
- Priority of service to veterans and their spouses which may include referral to the Disabled Veterans Outreach Program (DVOP) Coordinator;
• Assisting migrant and seasonal farmworkers with the “MSFW Outreach Packet,” developed to provide critical information concerning access to services in their area;
• Assessment of eligibility for the Work Opportunity Tax Credit (WOTC) and issue certification for job seekers found eligible; and
• Recruitment services for employers with job openings.

Employment Service assists job seekers from all walks of life and is committed to working with the partners within the ARIZONA@WORK system to ensure job seekers have access to the full menu of services available. Certain populations require more assistance than the standard job seeker, at times requiring staff to spend more time with them. Some examples are:

• Veterans;
• Homeless veterans;
• Low–income individuals and recipients of public assistance;
• Ex–Offenders;
• Individuals with limited English proficiency;
• Unemployment Insurance compensation claimants;
• Unemployed, underemployed individuals;
• Migrant and seasonal farm workers;
• Older workers; and
• Individuals with a disability.

Employment Service staff serves on Local Workforce Development Boards (LWDBs). The collaborative working relationship developed through LWDBs provide staff the opportunity to share information gained from both employers, the job creators, and jobless workers, allowing community leaders to better identify the types of training that will prepare unemployed workers for needed local jobs.

Employment Service staff also participate on the Business Service Team in each area, which facilitates the ARIZONA@WORK Job Center in being more responsive to the needs of the business community. Local offices routinely receive employers’ requests for workers to fill a wide range of jobs from entry level to highly qualified positions. Among them are professional, technical, and managerial positions, clerical and sales jobs, service occupations, manufacturing work, agricultural employment, machine trades, and skilled crafts.

With the implementation of WIOA, Employment Service staff has taken on a new role in the ARIZONA@WORK Job Center by participating in the design, implementation and provision of services through the Welcome Team. In some instances the roles are shared with the partners for a seamless delivery of services, including but not limited to:

• Front desk screening for services;
• Conducting ARIZONA@WORK orientations;
• Completing partial registration of the customer in AJC during the triage process;
• Determining the appropriate provision of services and completing a referral; and
• Scheduling appointments for services within the ARIZONA@WORK system.
Cross-training and information sharing sessions will be held to ensure that Employment Service staff have the knowledge to provide quality services to the job seeker, therefore enhancing their customer experience within the ARIZONA@WORK system.

**Title IV Vocational Rehabilitation**

The purpose of the Vocational Rehabilitation (VR) program is to provide persons with disabilities with the services and supports they need to overcome disability–related barriers to employment and become an integral part of the workforce. VR services are provided statewide through a comprehensive network of staff and contracted service providers who are trained to meet the unique needs of persons with disabilities, including those who are visually impaired or blind, hard of hearing or deaf, who have experienced a traumatic brain or spinal cord injury, have a mental health diagnosis or are a youth with a disability. The VR program utilizes Employer Coordinators to collaborate with local businesses and increase awareness of the large, often over–looked, talent pool of people with disabilities. Employer needs are addressed and employment opportunities for persons with disabilities are enhanced through activities such as coordinated job fairs, job preparation seminars, and employer panels.

Persons eligible for VR services must have a physical or mental disability that creates a barrier to employment and must be able to benefit from VR services in terms of achieving an integrated and competitive employment outcome. Services are individualized and adapted to meet each client’s specific vocational goals and disability–related needs. Services may include, but are not limited to, assessments for determining eligibility and rehabilitation needs, vocational counseling and guidance, job development and retention services, vocational and educational training and support services, mobility training, adjustment to disability services, and rehabilitation technology. The VR program also provides post–employment services and coordination of Extended Supported Employment services to enhance job retention and/or help an individual regain employment in an efficient manner.

The Arizona VR program believes that education and training are vital to preparing persons with disabilities for employment and enhancing opportunities for the attainment of high quality employment outcomes. All clients receive career counseling and may participate in various assessments to determine interests and aptitudes, as well as the need for accommodations and support services. Clients may begin preparing for employment through participation in work adjustment training, on–the–job training, apprenticeships, vocational/occupational training, or undergraduate and graduate degree programs. Support services such as coaching, assistive technology, tutoring, and assistance with obtaining necessary accommodations may be provided to support the successful completion of the training endeavors.

**Provision of Education and Training Services and Supports**

Clients receive career counseling and assessments to assist in determining aptitude, skills, abilities, weaknesses, and the need for accommodations and support services. Tuition assistance for occupational/vocational training, undergraduate and graduate degree programs are provided based on an individual’s ability to complete the educational requirements. Additionally, on–the–job training and apprenticeship opportunities are sought out and provided whenever available.

The VR program prepares persons with disabilities to be competitive in the labor market by offering services such as occupational/vocational training as well as undergraduate and advanced degrees. The VR program has the unique ability to support individuals in attending specialized or out–of–state schools for
disability–related reasons, and Arizona VR clients have graduated from schools such as the Rochester Institute of Technology for the Deaf and Gallaudet University in New York. Education and training support services vary based on student need but many individuals receive tutoring, assistive technology, supplies/tools, and assistance arranging accommodations with the school’s Disability Resource Center. In Federal Fiscal Year (FFY) 2015, 1,470 individuals participated in a plan of services and received educational training supported by the VR program, and a total of $5,826,857 was spent to fund these educational endeavors.

B) The Strengths and Weaknesses of Workforce Development Activities

Among the strengths of the workforce development system are the following:

- **Existing Partnerships.** Arizona used Program Years 2014 and 2015 to strengthen the working relationship and collaboration across partners, putting in place a transparent process of communication and planning meetings. As a result, all core partners, and ACA/OEO are deeply committed to working together and creating a more integrated and comprehensive workforce system. At the local level, workforce boards have begun meeting to share information on all programs and educate board members about partners and their programs and priorities.

  As stated in the previous Plan section, the core workforce partners have an extensive network of community partners in place at this time. Many of the LWDAs work with youth providers, the Department of Corrections and Juvenile Probation Departments to reach out to youth. LWDAs have repeatedly combined resources to obtain grants to provide additional assistance to disconnected youth, as well as veterans and adults with barriers. The State is well–positioned to strengthen its network of partners and put in place policies and agreements for a stronger workforce system.

- **Sector Strategies.** For a number of years, ACA has provided leadership in the development of sector initiatives, both statewide and at the local level. ACA convenes sector partnerships at the state level and provides assistance to LWDAs on setting up partnerships in demand industries. This foundation will serve well to strengthen sector initiatives, increase interaction with the business community, and integrate labor market information into decision making.

- **Labor Market Data.** The Office of Economic Opportunity (ACA/OEO) supports workforce development with reports, analyses, and technical assistance. The ACA/OEO websites https://population.az.gov/ and https://laborstats.az.gov/ are available to all stakeholders and the general public. ACA/OEO has been an integral partner in WIOA implementation and is currently working with LWDAs—including all core partners—to identify needs for data and technical assistance. ACA/OEO will be an important partner for the implementation of strategies requiring labor market information.

- **Arizona Job Connection System.** Both the Workforce Development (Title I–B) and Employment Service (Title III) partners use the AJC, a comprehensive workforce case management and reporting system managed by America’s Job Link Alliance (AJLA). AJC will provide case management, data collection and reporting capabilities for U.S. DOL programs to include: Veterans, Migrant and Seasonal Farmworkers, Re–employment, Trade Assistance, and Work Opportunity Tax Credit. There is flexibility to include other workforce–related programs such as the Jobs Program and Supplemental Nutrition Assistance Employment and Training (SNA E&T). In addition, AJC will improve the effectiveness and efficiency of DES and local ARIZONA@WORK Job Center partners in managing the activities of program participants. AJC consists of a
comprehensive software system capable of reporting all required data to the U.S. DOL under the reporting requirements. The system requires minimal interaction to ensure data accuracy and timely reporting.

The system has been upgraded to be WIOA compliant. The other core partners, Adult Education and Vocational Rehabilitation, currently use other systems, but with AJC, Arizona has a good foundation for the work that needs to be done on linking all data systems and generating reports for all partners.

- **Adult Education Leadership and Professional Development.** Arizona Adult Education utilizes State Leadership initiatives and professional development to support activities, programs and projects that are research– and standards–based, data–driven and designed to increase the academic and workplace skills of adult learners and advance the state’s workforce development efforts.

- **Adult Education Accountability and Evaluation.** Arizona Adult Education providers are evaluated both fiscally and programmatically based on a cyclical model that incorporates monitoring (desk and onsite), data analysis and technical assistance.

- **Adult Education Technology Integration.** Technology integration has been a major initiative for the past ten years and is rooted in the belief that adult learners must acquire necessary technology skills in order to transition successfully to college and/or the workplace. Distance learning is an important capacity building mechanism that allows more learners to be served and helps adults become independent learners who are able to access and apply resources relevant to their lives.

- **Vocational Rehabilitation Individualized Services.** The VR program recognizes the need for individualized services and tailors employment plans/services to fit each unique individual. The client’s strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice are all fully explored to ensure the chosen services are appropriate and beneficial. Individuals are able to choose their service providers and are encouraged to provide feedback and recommendations for improving future services. Employment plans and services are adapted throughout the VR process to ensure the individual’s needs and goals are continually being addressed.

- **Vocational Rehabilitation Staff.** The VR program employs staff statewide and has specialty counselors trained to meet the unique needs of persons who are visually impaired or blind, hard of hearing or deaf, who have experienced a traumatic brain or spinal cord injury, have a mental health diagnosis or are a youth with a disability. Specialty comprehensive contracts and agreements have been developed to provide enhanced services to meet the training and employment needs of these populations.

The VR program also employs staff knowledgeable in the use of assistive technology. Staff provides guidance, input, and recommendations to clients, fellow staff members, employers, and program partners with regard to the appropriate prescription, purchase, placement, and training of the various assistive technologies being used by clients and partners in their homes, communities and workplaces.
Among the weaknesses of the workforce development system are the following:

- **Workforce a Well–Kept “Secret.”** Many employers know about the Employment Service (ES), but they do not necessarily connect it with the broader workforce programs and partners. ES staff is located in ARIZONA@WORK Job Centers that have used varied names, looks and or customized identities that varied county by county. Employers are contacted by numerous DES agencies and community partners to fulfill their respective program needs, i.e. job developments, employment verifications, solicitation of job orders, and recruitment for hiring events. Input received from focus group participants also reflects a perception of high levels of bureaucracy and obstacles, for example, rules governing the Eligible Training Provider List (ETPL).

- **Funding silos.** Funding continues to be provided from different federal entities, each with its own administrative requirements. As funding comes from several federal agencies, programs have varying program–specific requirements which, at times, hamper full integration of staff, programs, and duties.

- **Insufficient service integration across partners.** Integration of services offered by core partners needs to improve.
  - Adult Education has supported the integration of activities between adult education, post–secondary, and employment training partners over the past several years as part of its College and Career Readiness initiatives and AZ–IBEST pilots. While the efforts to articulate and build career ladders and career pathways with local partners have resulted in leveraged service delivery and better success for Arizona adult learners, there is still work to be done to improve integration of educational services with all WIOA core partners.
  
  - Currently, Arizona’s state–funded adult education providers offer Title II services on–site at ARIZONA@WORK Job Centers in five of the 12 LWDAs. In addition, all 12 areas have service and referral agreements between local adult education providers and the local ARIZONA@WORK Job Centers. Many of the strategies and initiatives outlined in this Plan are designed to increase and strengthen the collaboration between adult education and workforce partners to develop and implement consistent and standardized processes for communication, intake, orientation, assessment, referral and data sharing to better serve our clients. Specific steps that have been taken include ADE/AES deployment of Workforce Collaboration Specialists who serve as a liaison between local Title II providers and local LWDBs and one-stop operators. This position facilitates the flow of information and data and provides technical assistance as needed regarding Adult Education Services to the LWDBs and one-stop operators. In addition, a key example of the increased collaboration at the local area is ADE/AES involvement in the development and review of local plans.
  
  - A conscientious effort is being made by VR staff and workforce development partners to increase the knowledge of, and collaboration between, all core partner programs to ensure the workforce system under WIOA can respond efficiently to the needs of clients and employers. Strategies for consistent reciprocal referral and communication processes are being developed in order to facilitate effective program integration. Increased collaborative efforts have also resulted in cross–agency training of all workforce development staff. Initial trainings have focused on allowing staff to learn about partner programs and services in order to gain a more comprehensive view of the workforce development system from a state and regional perspective. Continued emphasis on partner training and collaboration will result in a highly effective and accessible workforce system.
More coordination with schools/superintendents, Career and Technical Education (CTE) programs, Joint Technical Education Districts (JTEDs) and the Arizona Registered Apprenticeship Program is needed. Focus group participants commented on the fact that Arizona at times generates negative headlines regarding its education spending and insufficient levels of performance. There is a desire to change that perception and the reality, including a need to educate lawmakers and media about the workforce system.

- **Career Pathways.** All partners need to collaborate to develop and utilize more career pathways. Clients need to be made aware that it is possible to start in the middle of a career pathway.

- **Insufficient Interoperability of Data Systems.** Three management information systems are used by the WIOA core partners, with additional systems for TANF and E&T. In addition, contractors and providers may use their own proprietary systems.

- **Concentration of Resources in Metropolitan Areas.** Over 60 percent of Arizonans live in the Phoenix metropolitan and Tucson areas, and most resources are concentrated in those areas. The lack of resources for clients in rural and remote areas is further exacerbated by geographic isolation or lack of transportation and limited employment opportunities. Despite the number of ARIZONA@WORK Job Centers and virtual access options, accessing the system remains difficult for individuals in remote areas or those who do not have access to transportation or a reliable computer connection.

- **Adult Education Follow-up on Employment and Post–Secondary Goals.** State staff continually provides training and technical assistance to programs on follow-up procedures, timelines and cohort definitions. Although progress has been made since the original submission of the Plan and data share agreements have been implemented, this area continues to be challenging for Arizona due to the fact that many students do not provide a social security number.

Arizona Adult Education has established a Data Sharing Agreement regarding Unemployment Insurance (UI) Wage System Information. Follow-up with students after program exit using the survey method is now only needed for those students who do not provide the information needed for the data match. The survey method continues to be very challenging as programs are only able to make contact with a small percentage of students one to three quarters after exit.

- **Insufficient Use of Labor Market Information.** All core partner staff needs improved training on the effective interpretation and use of labor market information in their day-to-day interaction with job seekers. To address this need the ACA/OEO Economic Analysis Division has provided trainings; though additional work is needed to weave the use of labor market into day-to-day interactions with job seekers. To meet this need, ACA/OEO intends to develop a LMI training webinar. The value in this approach is it allows asynchronous learning because the session can be recorded and uploaded for later viewing. ACA/OEO is also considering developing a weekly LMI email to be distributed to all core partner staff with a common job seeker question or need and how it could be answered with LMI data.

- **Insufficient Resources for Vocational Rehabilitation.** As of the end of FFY 2015, 4,171 persons with disabilities are waiting for VR to receive additional funding so they can begin services to circumvent or ameliorate their disability-related barriers to employment and get back to work. Since 2009, the VR program has only been able to serve individuals with the most significant disability-related needs (Priority Category One). As all funding is limited, the VR program must rely on Third Party Cooperative Arrangements (TPCAs), Interagency Agreements, and Memorandums of Understanding with public, non-profit agencies to supplement 50 percent of the non-federal dollars needed just to continue serving the individuals in Priority Category One.
Information and referral services are provided to individuals who are eligible but placed on a waitlist. Clients are given information about local community resources where they may be able to obtain employment related assistance. Clients who are eligible but placed on a waitlist for services are contacted via mail every six months in order to determine if they are still interested in VR services and want to remain on the wait list, no longer want or need VR services, or believe that there has been a change in their disability and would like to discuss options with their counselor. VR staff is tasked to follow up with any client who requests to speak with program staff about their disability. Referral information to the ARIZONA@WORK Job Centers and Employment Networks is provided in this communication to the client as well.

VR program staff continually seeks ways to collaborate with both current and new community partners to increase the capacity to serve persons with disabilities waiting for VR services.

The VR program currently has two Employer Coordinators to serve the entire state. VR needs to increase the services available to employers and build stronger collaborative relationships between employers and VR in local communities. Potential strategies for accomplishing this objective are to increase the number of Employer Coordinator positions, strategize with other core partners regarding employer outreach and training, train VR staff to assess and meet the needs of local employers, and increase effective utilization of labor market information.

- **Inability to Identify Secondary Students for Vocational Rehabilitation Services.** DES/DERS has established a cooperative working relationship with the Arizona Department of Education, Exceptional Student Services (ADE/ESS). Collectively, it is recognized that a data sharing agreement is necessary and will allow DES and ADE/ESS to identify mutual participants in order to enhance student participation in VR services, provide pre-employment transition services, and increase the ability to gather post-school outcome data. Now that a data sharing agreement is in place, students that can benefit from VR services are more easily identified, which has increased secondary student participation.

C) **State Workforce Development Capacity**

Provide an analysis of the capacity of State entities to provide the workforce development activities identified in (A) above.

In addition to the state workforce board, there are three state entities charged with carrying out workforce development activities; each play a unique and critical role in supporting the efforts of the workforce system. These include the Arizona Commerce Authority’s Office of Economic Opportunity (ACA/OEO), the Arizona Department of Economic Security (DES), and the Arizona Department of Education (ADE). The four core partners, housed within these three state agencies, are currently identifying more avenues for collaboration. As part of the transition from WIA to WIOA, the partners propose to identify gaps in services and the referral process, duplication of services, and alignment of processes that will improve efficiencies and decrease waste. The state entities and core programs will meet quarterly to discuss implementation efforts. Implementation teams organized through these meetings will provide updates and feedback to the Workforce Arizona Council (Council) regarding the work being done. This will provide the opportunity to evaluate the effectiveness of current policies, identify future policies, determine best practices, explore legislative solutions and better coordinate the programs throughout the state. ACA/OEO fulfills a coordination role through its role as staff to the
Council and through the provision of labor market information for use across the workforce system. DES provides programmatic support for Titles I, III, and IV of WIOA and staff is organized to provide compliance and financial oversight as well as procedural support for the workforce development activities occurring throughout the system. ADE provides oversight and programmatic support for Title II programs throughout the state. ADE is working to create better connections with the LWDAs and strengthen collaboration with the LWDBs.

Office of Economic Opportunity

ACA/OEO came into existence through legislative action on August 8, 2016. This new office supports the Council and is organized as a centralized data and research resource for the state’s economic development and workforce activities. Its staff will provide data analysis and additional assistance to the state’s 12 LWDAs. By statute, ACA/OEO provides staffing assistance to the Council. Additionally, ACA/OEO is charged with leading a data task force to identify and implement critical data sharing agreements to make informed decisions regarding the state’s overall workforce. The agency also provides statewide support for the formation and implementation of sector partnerships as well as structured and relevant business services training throughout the system.

Department of Education

Title II: Adult Education

The ADE provides oversight and programmatic support for Title II programs throughout the state. The ADE is working to create better connections with the LWDAs and strengthen collaboration and communication with the LWDBs.

The ADE currently funds 24 local providers under WIOA Title II to provide adult education instructional services in all workforce areas throughout the State. Arizona’s adult education providers are diverse agencies: eight are community colleges, seven are community-based organizations, four are school districts, three are county agencies, and two are adult probation agencies. Arizona Adult Education System Annual Capacity:

- 24 currently funded adult education providers;
- Classes offered at over 130 sites across the state;
- Over 500 adult educators—approximately 20 percent are administrators and 80 percent are instructors;
- 13,000+ enrolled students—approximately 60 percent ABE/ASE and 40 percent ELAA;
- 1,100,000+ instructional attendance hours; and
- 5,000+ students on waiting lists statewide (as of June 2017).

Note: Waiting lists are maintained by providers throughout the year and are reported to the Arizona Department of Education semi-annually in June and December.

Department of Economic Security

The DES provides programmatic support for Titles I, III, and IV of WIOA. Its staff is organized to provide compliance and financial oversight as well as procedural support for the workforce development activities occurring throughout the system. The state’s Vocational Rehabilitation and Apprenticeship departments are housed within DES.

Title I: Youth Program

In PY 2016 (July 1, 2016, – June 30, 2017) WIOA Title I–B served 4,173 individuals in the Youth Program (see table below. Most areas will need to revise their program strategies to work towards meeting the 75 percent out-of-school-youth requirement. It is challenging to reach disconnected youth and some LWDAs may need technical assistance to meet the out-of-school-youth requirement. Arizona, specifically Maricopa County, has a percentage of disconnected youth that is higher than the national average. The ARIZONA@WORK partners hope to serve more disconnected youth through coordinated efforts.
Title I: Adult and Dislocated Worker Programs

In PY 2016 the ARIZONA@WORK system was responsible for new reporting requirements under WIOA. Over 16,000 clients were served through the WIOA Title I–B program, with 10,904 receiving staff–assisted services in the Adult Program and 1,602 in the Dislocated Worker program. There are no wait lists; however, some local areas need to manage spending with caps on funds for training and other services.

Source: Department of Economic Security, Arizona Job Connection, WIOA Title III 6/30/2016 Quarterly Report
IV: Vocational Rehabilitation

The VR program has 41 offices across the state, and employs approximately 196 counselors and 175 program support staff. The average caseload is 82 clients per counselor. On average, 500 referrals to the VR program are received, 113 eligibility decisions are made, and 63 Individualized Plans for Employment are written each month.

Services are provided statewide to clients through a contracted service delivery system. The VR program manages 97 types of contracted services, resulting in 852 individual contracts with 1,646 different vendors.

The VR program is providing services to 16,656 individuals as of November 2015. These individuals have been determined to be significantly disabled and are eligible and able to receive services. The VR program assisted 1,339 individuals to obtain and maintain competitive and integrated employment in FFY 2015. These individuals earned an average wage of $11.22 per hour, which is $2.72 higher than the state minimum wage.

Due to a lack of state appropriations, the VR program is unable to serve all eligible individuals and must operate under an Order of Selection. Since 2009, only individuals who are determined through the eligibility process to be a person with a most significant disability (Priority Category One) are able to receive services, all other eligible persons with disabilities are placed on a waitlist. Priority Categories Two and Three have remained closed since 2009. At the close of FFY 2015, 4,171 persons with disabilities across the state of Arizona were on a waitlist, waiting to receive the services necessary to help them become a part of, or remain, in the workforce. The VR program provides all individuals on the waitlist with resource and referral information to access other state–provided employment services.

b) State Strategic Vision and Goals

1) Vision

Governor Doug Ducey’s vision for Arizona is to build a pro–growth economy that provides opportunity for all and creates prosperous communities. This means ensuring that all Arizonans eligible to work, regardless of their circumstance, background, social status or zip code, have access to the best economic opportunity, educational options, healthcare services, safety system and overall quality of life as possible.

State Priorities Established by Governor Ducey:
The State’s workforce system, led by the Council, plays a key role in building the skills and abilities of people to meet the workforce needs of employers. This includes creating meaningful linkages between the education and workforce systems, aligning data so that metrics can be better defined and more easily measured, and helping people of all backgrounds gain employment and prosper in a rapidly changing economy.

Through the required coordination of core programs and the inclusion of industry, WIOA presents an extraordinary opportunity to improve the efficiency, relevance and productivity of the workforce system. Uniting under this state plan and a common identifier, the system players will engage in strategic partnerships that strengthen the State’s ability to encourage economic growth by leveraging its qualified workforce. With the Governor and Council providing leadership and direction, the Arizona Department of Economic Security, the Arizona Department of Education, the Arizona Commerce Authority, and workforce partners will work together to provide services that ultimately meet the needs of job creators in growing and emerging industries and individuals in need of fulfilling employment.

Ensuring the quality and ease of services provided by the workforce system will require integrated service delivery that includes high–quality educational classes, occupational skills trainings and business services. The system will strive to create career pathways, aligned to industry needs, which combine education and training opportunities in a way that provides individuals with life–long learning maps. Connecting programs, services and systems will require collaboration around building a strong data infrastructure and metric measuring tools.

By leveraging improved data and the perspective and input of industry to provide strategic influence in the decisions made at the state and local levels, the system can ensure it is fulfilling its value as an economic development asset. The strategies within this plan will set the State on the path to implementing key activities that will drive this vision of an integrated, efficient and productive workforce system.

2) ARIZONA@WORK Goals

The four goals identified for Arizona’s Economic and Workforce Development system for WIOA are positioned to respond to weaknesses and opportunities determined during the planning process.

1. Create Partnerships and Strengthen Communication
2. Promote a Customer-Centric System
3. Grow and Develop a Skilled Workforce
4. Strengthen Data Utility and Reporting

An educated workforce which drives economic success in Arizona
Goal 1: Create Partnerships and Strengthen Communication

This goal addresses several areas of weakness, notably the following:

- **The need to build a complete network of partners** for the unified system. The diverse array of job seekers welcomed by the ARIZONA@WORK Job Centers statewide requires the addition of local and statewide partner providers who can serve populations who require highly specialized services.
- **The need to build a level of public and agency awareness** for economic and workforce development. Every State Plan focus group conducted statewide indicated that too few employers and job seekers were aware of the services that ARIZONA@WORK Job Centers provide.
- **The need to coordinate separate program delivery**, despite a history of strong and positive relationship–building at local and state levels. Integrated program design and delivery is intended to establish greater familiarity among program elements by representatives of a wide range of agencies. In addition, emergent opportunities to blend funding and support can be realized by collaboration and communication.
- **The need to strengthen direct communication between economic development and workforce Development**, both at conceptual and practical levels, to ensure accurate and mutually beneficial information– and practice–sharing, to build a talent pipeline and identify focal points for talent development to meet industry needs.
- **The need for better policy and administrative procedure coordination among agencies.** Policies typically reflect single–agency administration. WIOA represents a change that maintains effectiveness in a broader context. Such broad context necessitates the removal of obstacles that preclude smoothly combined program delivery. The strong partnerships and communication specified by Goal 1 intends to furnish rich information–sharing among core partners that guides the effectiveness of policy and administrative changes that are mutually beneficial to the system.
- **The need to strengthen direct communication and coordination with programs and entities that serve individuals with barriers**, including individuals with a disability.

Supporting strategies have been developed in response to Goal 1, for purposes of addressing the above–cited areas needing improvement.

- **Strategy 1: Raise Awareness and Build a Comprehensive Network of Partners**;
- **Strategy 2: Formalize Communication Between Economic and Workforce Development Partners at the Statewide and Local Levels**; and
- **Strategy 3: Align Policies and Procedures Across Core Partners, Facilitating Collaboration, Data Sharing, and Alignment of Services**.

Goal 2: Promote a Customer–Centric System

This goal responds to the need for reaching out to employers and job seekers for purposes of providing services mutually needed both locally and statewide. The following areas of concern are relevant:

- **The need for recruitment and the engagement of clients.** Customer–centric efforts necessitate identification of employer and job seeker clients. In some instances, notably out–of–school youth, ex–offender, and other populations the system seeks to serve, such as individuals with barriers, including disabilities, substantial outreach is necessary to recruit individuals who can be served.
Out-of-school youth present a particularly challenging population, based upon the need for identifying social and locational points of access for these youth.

- An opportunity to design approaches that meet clients where they are. In some cases, the provision of services may need to assume a different format from traditional learning or job-developing approaches. Simplifying training and education through online or other alternative means, as well as meeting social and support requirements for clients with barriers, requires developing agency consciousness concerning who is being served.

- The need for identifying what agencies are in the system and how their services fit with those of other agencies. It is crucial that the scope of the system be clarified so that employer and job-seeking clients recognize how they are being served, as well as the capacity that the total system has for serving them. For example, a particular apprenticeship program being offered in one local area may have implications for another. Customer-centricity means increasing the scope of workforce development partners, to enable the design and development of replicable methods that serve greater numbers of employer and job seeker clients.

- The up-skilling of workforce development staff. Throughout Arizona, workforce development staff and partners balance a rich array of partner agency relationships while maintaining professional development and learning opportunities. The new law facilitates growth and development of industry knowledge that supports expanded professional reach for seasoned provider agencies and ARIZONA@WORK staff. From basic familiarity with economic trends to practice in designing and delivering programs, continued growth of the agencies represents an important part of the service equation.

Supporting strategies have been developed in response to Goal 2, for purposes of addressing the above-cited areas needing improvement.

- Strategy 4: Develop a Workforce System and Services Accessible to All Employers and Job seekers, Including Individuals with Barriers
- Strategy 5: Integrate Standard and Consistent Processes Across Core Partners to Facilitate a Seamless Delivery of Services, including the use of common assessments that are accessible to individuals with disabilities; and
- Strategy 6: Implement Consistent, High-Quality Staff Training Across Core Partners.

**Goal 3: Grow and Develop a Skilled Workforce**

This goal addresses several areas of opportunity, including:

- Notable industry sectors identified for growth within Arizona have high-level entry requirements for education and/or experience. Familiarization of young citizens and their families with areas of job growth can begin early in the education system. Exposure to growth industries, current and emerging job roles, and potential futures for youth, represents an important early step in the model career pathways approach to filling the talent pipeline.

- Recognition of alternative modes of education, including but not limited to registered apprenticeship programs, offers a wide range of learning opportunities for job seekers. Workplace education offers learning that may begin with orientation to an industry and continue through mastery of particular trades, skills areas and leadership.

- Continued outreach to employers through partnership with economic development professionals needs to be pursued in the interest of fortifying confidence by employers that the state and local
workforce system can serve their needs. Sharing examples and model career pathways can stimulate the development and delivery of additional programs.

- **Focus on strategies targeting job seekers with barriers, including disabilities,** ensuring that individuals with barriers are provided informed customer choice and appropriate assessments. This will include effective career pathways with multiple entry and exit points, including entry for individuals with low skills levels or other barriers and expansion of work-based learning opportunities, such as apprenticeship and on-the-job training (OJT), which may be suitable to individuals with limited work experience, low skills and/or academic credentials.

Supporting strategies have been developed in response to Goal 3, for purposes of addressing the above-cited areas needing improvement.

- **Strategy 7: Identify and Respond to High-Demand and Growing Industry/Employment Sectors at Local and Statewide Levels;**
- **Strategy 8: Establish Model Career Pathways, Including Portable and Stackable Credentials and Soft-Skills Training, for Designated Industry Sectors; and**
- **Strategy 9: Implement increased opportunities for alternative training and education, including work-based training and registered apprenticeship programs.**

**Goal 4: Strengthen Data Utility and Reporting**

This goal was established to address persistent concerns relative to the need to streamline access by agencies and simplify customer utilization of the system. In addition, data-driven decision making requires shared information by agencies working together to achieve a common goal.

- **The four core partner agencies** that comprise the WIOA Unified Plan for Arizona were originally established to function unto themselves, with all requisite protections that take the form of administrative policies and procedures. Under WIOA, data-sharing and reporting can facilitate better coordinated program design, delivery, and evaluation.
- **Evidence-based decision making** by partnering agencies necessitates shared data. Current policies and procedures are characterized by silo-based entities, each having separate information, much of it potentially duplicative, relative to clients.
- **Current policies and practices in effect across core partner agencies preclude some data-sharing.** The duplicative nature of some data, combined with potential gaps in data, necessitates smooth, shared data systems that facilitate usage of the Economic and Workforce Development system by employer and job seeker clients.

Supporting strategies have been developed in response to Goal 4, for purposes of addressing the above-cited areas needing improvement.

- **Strategy 10: Establish Process of Data Linking Across Core Programs to Ensure Core Programs Are Able to Share Key Data Elements for Shared Clients;**
- **Strategy 11: Promote Evidence-Based and Data-Driven Decision Making; and**
- **Strategy 12: Identify and Document Obstacles and Establish Continuous Improvement Through Outcomes Analysis and Reporting.**
3) **Performance Goals**

In preparation for negotiations of performance goals for the Adult, Dislocated Worker, Youth, Wagner–Peyser, Adult Education, and Vocational Rehabilitation programs, the core partners will compile data consisting of the program outcomes for the last three years. Partners will look at the trends for those outcomes; review the Government Performance and Results Act goals and any statistical models that the U.S. DOL has prepared for the states to use. Additional data will be collected for performance negotiations and will serve to better understand the characteristics of the participants served and of economic conditions. In addition to reviewing the past three years, the programs will collect data on wage earnings to formulate a target on wage earnings for the second and fourth quarters after program exit and median wages.

While ARIZONA@WORK partners that provide core programs had initially sought to work together to create one common menu of options for the measurable skills gain indicator, additional guidance in TEGL 10-16 defined the five types of measurable skill gains and clarified the methodology for calculating the measurable skills gains for each core program. Based on this new guidance, the strategy was modified. The ARIZONA@WORK partners will now collaborate to understand measurable skill gains across the programs using common definitions and will encourage co-enrollment across the core programs for youth and adults.

Additionally, the State has plans to work with the LWDAs, allowing the LWDAs to provide performance targets for the Adult, Dislocated Worker, and Youth programs based on past performance data, as well as justifications (economic, participant characteristics, etc.). Arizona will utilize the targets proposed by the LWDAs to aid in decision making for the state’s PY 2016 performance negotiations with U.S. DOL.

**Assessment**

Arizona will develop a continuous improvement process to include a statewide scorecard on key measures. The Council will guide the development of a data dashboard, ensuring that goals and objectives of the State Plan are addressed and measured and that employer satisfaction is included. The Measuring Effectiveness Subcommittee of the Council has worked closely with core partner programs and ACA/OEO to guide the development of a data dashboard that reflects the key WIOA performance measures. The Council takes the requirement to measure employer satisfaction with the ARIZONA@WORK system seriously and is working to support the system modifications—in-terms of staff procedures and information technology systems—to ensure information is being captured that measures the effectiveness Arizona’s workforce system from the job creators’ perspective. The metrics assigned to each goal in this Plan will provide the framework for the assessment of progress; additional metrics will be added as needed as well as a timeline. Agency staff will continue to conduct annual monitoring of contractors, local area and local board activities, and the appropriate use of funds. Regular reports will be presented to the Council, including an analysis of economic and labor market data.

The State will continue to develop standard data gathering across core programs and to determine the structure of joint reports in the future, calling on the expertise of core entities. An example of these efforts can be seen in the core agencies development of a standard data template for the PY 2016 Workforce Arizona Council Annual Report completed pursuant to A.R.S. § 41-5401 (C). The development of the template allowed for data to be gathered across the core programs in a way that provide a consistent cross-program picture for state policy makers. Agency staff will prepare performance reports
required under WIOA. DES or ACA/OEO will collaborate to determine which agency will take a leadership role in compiling and disseminating comprehensive statewide reports for all programs on a project by project basis.

All partners will encourage pilot/demonstration projects at the local level, giving preference to projects that involve multiple core partners, engage job creators, and present truly innovative strategies. The Council will provide the overarching framework for such projects and review outcomes.

c) State Strategy

1) Strategies the State Will Implement

Underlying the State Strategies is the guiding vision of an educated and skilled workforce which drives economic success in Arizona. This vision establishes the fundamentally interdependent relationship between the state’s advancement in business and industry and its systemic plan for producing a pipeline of qualified workers to meet the needs of a burgeoning job market within each designated industry sector. Recent efforts established in concert with the previous workforce law, the Workforce Investment Act (WIA), have paved the way for an increasingly deliberate collaborative endeavor under WIOA. To realize the full mutual benefits of economic and workforce development throughout the State, Arizona has selected the following strategies, explained in detail in the table below:

Table 26: Strategies the State Will Implement

2) Strategies the State Will Use to Align the Core Programs, Partner Programs and Other Resources

**Strategy 1. Raise Awareness and Build a Comprehensive Network of Partners**

Successful implementation of WIOA and the activities proposed in this Plan are possible only if Arizona has a single, unified workforce system. All partners must be engaged in regular communication, planning and evaluation. Funding streams must be coordinated to the greatest degree possible in order to best utilize available resources. One of the strengths of Arizona’s workforce systems is the strong network that already exists at the state and local level. Increased emphasis on regional planning and collaboration will be a high priority. Under the leadership of the Council and with support from DES and ADE, Arizona will engage the full range of partners to work collaboratively on the direction that aligns state economic development, education, and workforce system policies around the principles of connecting talent to businesses.

Implementation will focus on:

- Strategic partnerships
- Regional planning
- Common messaging and branding for core partners

**Strategy 2. Formalize Communication Between Economic and Workforce Development Partners at the State and Local Levels**

Clarification of distinctive, mutually supportive roles, fortified by frequent, in–depth, and formal communication, allows economic and workforce development systems to flourish. The implementation team created for the purpose of drafting the State Plan built a strong baseline for future collaboration across agencies and geographic regions. As the Council evaluates and explores ways to build on relationships and enhance communication within the system, entities involved with State Plan creation may be called upon for specified work involving the implementation of the Plan.

Implementation will focus on:

- Awareness of the workforce system among employers and job seekers
- Regular information exchange
- Co–location/proximity of services
Strategy 3: Align Policies and Procedures Across Core Partners, Facilitating Collaboration, Data Sharing, and Alignment of Services

Implementation of collaboration and alignment is possible only with the investment and cooperation of all core partners. This collaborative atmosphere, coupled with a foundation of statewide administrative policies and agreements designed to support collaboration will guide and direct future efforts to develop and support a seamless workforce development system. In support of these efforts the Council, along with various workforce partners, will continue to provide statewide leadership, ensuring the system is collaborative, coordinated, and united. To this end, the Council held a statewide convening in November 2017 that brought together members of the State and Local Workforce Development Boards, along with other workforce leaders, to discuss WIOA implementation—progress and challenges that remain. The session included representation from the DOL Employment and Training Administration along with local directors and board members from neighboring western states to share their success stories. It was an invigorating session for the workforce system and the Council intends to host a convening at least annually.

Implementation will focus on:

- Policies and agreements to foster collaboration
- Data sharing agreements
- Review of funding streams and strategies for coordination

Strategy 4: Develop a Workforce System and Services Accessible to All Employers and Job seekers, Including Individuals with Barriers

WIOA emphasizes the need to work with individuals who may face multiple barriers to employment.

Individuals with barriers to employment, as defined in WIOA Section 3 (24), include:

- Displaced homemakers (as defined in WIOA sec. 3(16));
- Low-income individuals (as defined in WIOA sec. 3(36));
- Indians, Alaska Natives, and Native Hawaiians (as defined in WIOA sec. 166(b));
- Individuals with disabilities, including youth who are individuals with disabilities (as defined in WIOA sec. 3(25)) (includes individuals who are in receipt of Social Security Disability Insurance);
- Older individuals (age 55 and older) (as defined in WIOA sec. 3(39));
- Ex-offenders (“offender” as defined in WIOA sec. 3(38));
- Homeless individuals or homeless children and youths (see Attachment III); displaced homemakers, low-income individuals,
- Youth who are in or have aged out of the foster care system;
- Individuals who are:
  - English language learners (WIOA sec. 203(7)),
  - Individuals who have low levels of literacy (an individual is unable to compute or solve programs, or read, write, or speak English at a level necessary to function on the job, or in the individual’s family, or in society); and
  - Individuals facing substantial cultural barriers;
- Eligible migrant and seasonal farmworkers (as defined in WIOA sec. 167(i)(1-3));
- Individuals within two years of exhausting lifetime TANF eligibility;
• Single parents (including single pregnant women); and
• Long-term unemployed individuals (unemployed for 27 or more consecutive weeks).

The ARIZONA@WORK system must be accessible to all and the concept of universal design will be applied when developing processes, designing services delivery methods and providing services. Universal design refers to the concept that processes, buildings, services, etc. will be built in an environment that is accessible to all. Additionally, creative and innovative programs will be explored in order to provide services to individuals who traditionally are not afforded the opportunity to participate for various reasons. For example, providing face-to-face services and training in rural areas is a major challenge, according to focus group participants, so identifying and implementing innovative approaches to providing services in these areas must be a priority.

Implementation will focus on:

• Alternative delivery methods for services and training, e.g. use of technology
• Staff development and training
• Network of employers/community partners able to work with individuals with barriers

Strategy 5: Integrate Standard and Consistent Processes Across Core Partners to Facilitate a Seamless Delivery of Services

The State of Arizona is interested in reducing bureaucracy, eliminating duplication of services and maximizing resources to minimize delays for customers. Individuals seeking employment or training should not go through multiple interviews, forms, or assessments. Employers seeking candidates or support in providing training should be able to access the system and information through an easily identifiable portal.

Implementation will focus on:

• Utilization of common intake forms and processes
• Standardized assessment processes and the utilization of common assessments that are accessible to individuals with disabilities.
• Comprehensive orientation processes with standardized referral processes

Strategy 6. Implement Consistent, High-Quality Staff Training Across Core Partners

High-quality, consistent service delivery through the workforce system requires motivated, trained staff. Key competencies have been researched and identified, and the State intends to continue this work and explore a statewide uniform training and certification system for staff.

Implementation will focus on:

• Core competencies for all core partner staff
• High-quality training modules
• Certification or credentials for workforce staff
Strategy 7. Identify and Respond to High–Demand and Growing Industry/Employment Sectors at Local and Statewide Levels

Through the utilization of labor market trend information, population statistics and continuing situation analyses of the state’s resources, ACA has provided leadership to industry sector identification. Particular areas of the state where specified industry sectors are present or show the potential for developing a presence represent opportunities for growth. The Council, along with key workforce system partners will guide the development of a mechanism to share analyses of opportunities for enhancing existing industry presence in the state or influencing relocation to Arizona. Some of these industries include healthcare, cyber–security, and electrical engineering.

Implementation will focus on:

- Statewide and local or regional sector partnerships in key industries
- Engagement of the business community in planning
- Analysis of trends in in–demand occupations

Preparing the greatest number of people with portable, stackable career growth facilitates hiring and upward mobility for new entrants into careers. Arizona has successfully piloted career pathway models for adult learner cohorts for several years. Under WIOA, Arizona recognizes the need to expand opportunities statewide and develop robust career pathways that allow individuals with barriers and disabilities to participate and gain industry recognized credentials. Arizona will develop career pathways that include multiple aligned programs with funding by a variety of sources and driven by industry needs as defined through sector strategies and partnerships. Arizona chose the U.S. DOL’s Career Pathways Toolkit and the Shared Vision, Strong Systems Framework (CLASP, June 2014) as resources to develop an Arizona–specific definition that aligns with the WIOA definition and requirements for career pathways. This definition will serve as a foundation for the development of a state process for recognizing and evaluating career pathway programs.

Implementation will focus on:

- Career pathways in specific occupations for each geographic area, including pathways that begin at lower educational attainment levels to provide opportunities for individuals with barriers and disabilities
- Engagement of the business community in developing training
- Clear identification of industry–recognized credentials

Strategy 9. Implement Increased Opportunities for Alternative Training and Education, Including Work–Based Training and Registered Apprenticeship Programs

There is no linear progression from a single training event to lifelong self–sufficiency. The workforce system realizes that employment readiness, education, training, and continuous employment require repeated interaction with the workforce development and education systems. Job seekers enter the system with different levels of skills and readiness, and the system must provide an array of education
and training models and modes. Work–based training, such as registered apprenticeship programs or OJT, can offer a supportive environment to individuals, including individuals with barriers and disabilities.

Implementation will focus on:

- Work–based training opportunities, including registered apprenticeship programs
- Secondary education combined with career preparation
- Outreach to targeted populations, such as veterans, individuals with disabilities, and disconnected youth
- Exploration of possible incentives for employers to expand on–the–job training opportunities

**Strategy 10. Establish Process of Data Linking Across Core Programs to Ensure Core Programs Are Able to Share Key Data Elements for Shared Clients**

This strategy will support the customer–centric goal of Arizona’s workforce system by facilitating the coordination of services and preventing service duplication. Data sharing agreements will be fully implemented across the workforce system. Partners intend for the data sharing agreements to include access to unemployment insurance wage record information as authorized by state law. The use of cross–system data matches will provide the statistics required to establish data–driven decision making across the workforce system. For example, data matches can identify successful programs in terms of placement, retention or wage growth. These successful programs can be targeted for growth, development and replication in other areas. Underlying components of all strategies concerning data include the identification and maintenance for secure processes for data collection, storage, transmission, and evaluation, along with adherence to all security protocols.

Implementation will focus on:

- Data linkage across information technology systems
- Alignment of data collection and reporting across partners
- Timely and accurate reports
- Data security

**Strategy 11. Promote Evidence–Based and Data–Driven Decision Making**

The LWDAs have a rich history of local and regional grant–funded demonstration projects and other initiatives with community partners. The proposed collaboration under WIOA will provide an even broader foundation for such projects that share resources, funding, and intellectual capital.

Implementation will focus on:

- Demonstration projects to explore innovative changes
- Technical assistance to program partners on data sources and utilization
- Data–driven decision making
Strategy 12. Identify and Document Obstacles and Establish Continuous Improvement Through Outcomes Analysis and Reporting

Under the direction of the Council, the State will develop a continuous improvement process. As the State Plan implementation efforts progress, the Council, in consultation with the workforce partners, will suggest modifications as they become necessary.

Implementation will focus on:

- Definition of metrics for goals and strategies
- Continuous improvement processes
- Modifications of the State Unified Plan to reflect lessons learned and data analysis

II) Operational Planning Elements

a) State Strategy Implementation

1) State Board Functions

The Workforce Arizona Council (Council) is the State advisory board to the Governor on workforce development issues. Appointed by the Governor under WIOA, the Council is made up of leaders representing private business, labor, community–based organizations, the Arizona Legislature, local government and state agencies. The majority of the Council represents business, including the chair, as selected by the Governor. In order to implement its functions as prescribed by Section 101(d) of WIOA, the Council will hold public meetings, pursuant to state open meeting laws, at least four times per year. In order to successfully monitor the efficiency of the workforce development system and make meaningful recommendations to the Governor in carrying out this Plan. The Council will organize itself into committees, task forces and work groups comprised of Council members, who will provide the leadership. These committees serve to inform and recommend strategies to the full Council for consideration and a vote, and all meetings will be conducted according to state open meeting law. The committees will serve as a key avenue for involvement in the statewide monitoring and continuous improvement efforts from the LWDAs, core programs and other individuals who played a key role in drafting the Plan.

2) Implementation of State Strategy

A) Core Program Activities to Implement the State’s Strategy

Activities Funded to Implement the Proposed Strategies

DES is the fiscal and administrative agency for three of the four core partners (Title I Adult, Dislocated Worker and Youth Programs, Title III Wagner–Peyser, and Title IV VR programs), permitting the partners to leverage the DES facilities throughout the state to provide services to individuals.

DES/DERS as the fiscal and administrative entity to receive and manage the funds for WIOA Title I, III, and IV will allocate funding to programs and sub–recipients.
• Title I: Adult, Dislocated Worker and Youth Programs. DES will disburse funds to the twelve LWDAs to provide services to or to sub-contract with community partners.
• Eligible Training Provider List (ETPL). DES will maintain and disseminate the ETPL via the AJC system at www.azjobconnection.gov. The list contains training providers eligible to receive Title I funds for providing training to participants in the Adult and Dislocated Worker programs.
• Rapid Response Activities.
• Registered Apprenticeship Program. The Arizona Office of Registered Apprenticeship Program Lead is part of DES and provides outreach and technical assistance to employers, monitors compliance, and engages the LWDAs and other programs in activities designed to offer more apprenticeship opportunities.
• Title III: Wagner–Peyser Employment Service. Employment Service activities are performed by DES staff, including posting of job orders to the AJC system, job matching, assistance with resume writing and other required services.
• Title IV: Vocational Rehabilitation. VR services are provided through a combination of VR staff and vendor services to assist individuals with disabilities in obtaining and maintaining employment.

Title II: Adult Education services are provided through 24 local providers funded by the ADE.

In an effort to align the Department’s multiple workforce programs to support the Governor’s and Department’s vision as well as bolster the ability to effectively implement the requirements of WIOA, DES/DERS has embarked on a reorganization process. To achieve the desired results, programs and services will be combined and will be structured into the following administrations.

• The Employer Engagement Administration will work with Arizona employers to identify current and emerging workforce needs, effectively engage the business community in order to provide a unified approach to identifying and engaging the employer community, improve the understanding and responsiveness to employers’ current and emerging workforce needs, and leveraging employer relationships across DES/DERS to benefit the employer. To this end, Unemployment Insurance Tax, Apprenticeship, Business Services, and other workforce programs developed specifically to benefit the employer will be a part of the DERS Employer Engagement Administration.
• The Workforce Administration has a primary focus on engaging and readying all job seekers for employment and will work toward aligning workforce programs for a seamless and accessible workforce system that is inclusive of all job seekers, connecting job seekers with in-demand jobs, and supporting equal access to services and employment opportunities for all job seekers, including those with barriers and disabilities. Active and strategic engagement and partnerships with educational partners and institutions in coordination with economic development agencies will further support positive outcomes for the employer, as the job creator, and the job seeker.
• The Reemployment Assistance Administration was established to assist individuals who have recently become unemployed or require general employment services assistance rather than comprehensive career services and training assistance.
• The Rehabilitation Services Administration continues to oversee the Vocational Rehabilitation (VR) program.
• The Child Care Administration (CCA) is also part of DES and enables eligible individuals to maintain employment through use of the ARIZONA@WORK system.
Implementation of Strategies

Strategy 1: Build a comprehensive network of partners and raise public awareness of the workforce system

The State of Arizona will continue to build upon relationships already established with current workforce partners, to ensure that service integration is seamless. The nature of the collaboration must change from co–existence and referrals to a system that allows seamless service delivery.

Proposed actions include the following:

- Review the roles of the Council and local boards and services of the core partners.
- Ensure that educational and vocational rehabilitation partners have a role with the Council and local boards, public institutions as well as private.
- Engage human service agencies and partners outside of the Plan, such as TANF and the Supplemental Nutrition Assistance Program, in dialogue designed to strengthen linkages and information exchange.
- Engage potential partners, such as the Department of Corrections, Juvenile Court, probation officers, and other re–entry resources.
- Determine roles and responsibilities.
- Ensure local and state workforce entities and partners embrace and utilize the ARIZONA@WORK brand along with common messaging and materials to eliminate any confusion as to what constitutes the workforce system.

Strategy 2: Formalize communication between economic and workforce development partners at the statewide and local levels

Regular and clear communication is needed to make partner collaboration effective. Building on the work of workgroups established for the creation of the State Plan, the Council intends to create a comprehensive communications plan that supports to the partnerships described in strategy 1 and the proposed alignment of services in strategy 5.

Proposed activities include the following:

- Leverage the Council and its subcommittees to convene stakeholders to carry out the coordination and implementation of communications efforts.
- Develop a communication plan, including media contacts.
- Conduct assessments of how communication occurs with the business community.
- Determine best practices for Business Team structure.
- Provide contact directories and develop a statewide list of core partners’ single points of contact.
- Develop a tool to measure success in communicating with the business community.
- Identify core partner representatives to represent the system (rather than individual programs) and interact regularly with economic development entities and sector partnerships.
- Obtain letters of support from all partners for specific initiatives, such as the development of career pathways.
Strategy 3: Align policies and procedures across core partners, facilitating collaboration, data sharing, and alignment of services

To support proposed coordination and alignment of programs and services, policies and regulations will be reviewed at the state level. System-wide policies and systems must be aligned and agreements or memorandums of understanding must be put in place. The Council will take the lead and engage core partners along with other stakeholders in this process.

Proposed activities include the following:

- Review existing policies on governance to assure that partnerships and proposed alignment are addressed.
- Revise administrative procedures of the One-Stop (ARIZONA@WORK) Delivery System and Certification to address the collaboration of the four core partners and additional partners.
- Create policy foundations and propose legislation, where applicable, for strategies suggested in this Plan, such as career pathways, shared processes and data sharing
- Enable co-location through agreements on shared infrastructure costs or in-kind contributions, as allowable.
- Engage business partners, economic development, and the educational community in a review of the composition and purpose of the ETPL.
- Develop policies on industry-recognized credentials and on requirements for training providers to serve individuals with barriers, including persons with disabilities.

Strategy 4: Develop a workforce system and services accessible to all employers and job seekers, including individuals with barriers

The ARIZONA@WORK system must find ways to allow clients to access the system without having to travel to an office location. Barriers to employment can include geographic isolation, lack of transportation, or the inability to leave the house due to caregiving responsibilities. Physical offices and informational materials need to be accessible to individuals with barriers and persons with a disability. All core partners will collaborate on these activities, with VR taking a lead role. Community colleges also have substantial experience in serving individuals with barriers and will be invited to participate.

Access options should include face-to-face programs, online delivery of services and education, as well as easy access to professionals in the system. In addition to furnishing coursework online, the opportunity exists to case manage job seeking clients by electronic means, whether by Skype or other methods, to maintain regular contact to support individuals. Staff development in all modes of delivering services represents an imperative component of supporting service access, making it “customer-centric.”

Rural youth, including disconnected youth, and adults with barriers face obstacles to gaining traction in their careers, according to participants in focus groups held throughout the state during preparation of the State Unified Plan. Participants noted that the absence of large employers especially in rural areas, requires many individuals to gain jobs at fast food restaurants, which in themselves are unlikely to serve the objective of demonstrating qualifications for advancement in more sophisticated and technically-driven industries. Portable training by way of mobile units, as is used in the medical model, shows potential for taking face-to-face training to rural areas in a reasonable and efficient manner. Youth Hubs established in Maricopa County and a strong presence for youth at the Phoenix Public Library represent
further service access for the large number of youth and disconnected youth in the greater Phoenix metropolitan area.

To support this strategy, VR has facilitated continued education on accessibility issues though the funding of Disability Awareness/Sensitivity trainings as requested by ARIZONA@WORK Job Centers. The request for the local trainings are often one product of the accessibility discussions occurring in the LWDAs. In addition, VR local board representatives have provided guidance and insight with regards to physical access and various assistive technology needs of disabled individuals.

Continued activities include the following:

- Continually assess the needs of clients, to ensure that client needs inform service delivery.
- Develop specific opportunities, such as service access through alternative delivery methods, for individuals with barriers, including disconnected youth and individuals with a disability.
- Evaluate location and material accessibility, capitalizing on the expertise of VR staff. Such services can be offered to ARIZONA@WORK Job Centers as a non–cash contribution to ARIZONA@WORK Job Center infrastructure costs.
- Identify use of technology that permits remote access at flexible times.
- Provide assistance and training opportunities for individuals unfamiliar with technology.
- Develop processes that do not require clients to come to physical offices unnecessarily.
- Utilize means of communication, such as social media, to reach youth.
- Educate staff across partners on the needs and preferences of individuals with a disability.
- For employers, provide assistance on the use of the AJC labor exchange system.
- Organize job fairs and business outreach jointly across partners, so that employers don’t get multiple contacts from different partners.

**Strategy 5. Integrate standard and consistent processes across core partners to facilitate a seamless delivery of services**

Alignment of services across core partners will be critical in implementation efforts. Regardless of the point of initial contact with the workforce system, the client should experience standard and consistent processes for seamlessly aligned delivery of services. Such alignment, or coordination, will help to reduce duplication and therefore conserve resources. Customer service improves if clients don’t have to fill out forms repeatedly, retake assessments, or wait for referrals, potentially shortening the time from first contact with the system to receiving services. Activities to facilitate this alignment were identified during the writing of the State Plan, and the State will continue to explore options to this end. Individual LWDAs may propose pilot projects to test different approaches.

Proposed activities include the following (see also section C below):

- Identify duplication of service across core partners.
- Implement a uniform intake process.
- Develop a process to share assessments. One option to consider is to have the Title II Adult Education partners offering assessments as a contribution to ARIZONA@WORK Job Center infrastructure costs.
- Identify available assessments that are disability friendly, provide necessary data and can be used consistently across core partners.
• Develop a process to align plans, such as the Integrated Employment Plan.
• Develop a common referral process.
• Align forms used by the core partners.
• Identify what information about clients can and should be shared.

**Strategy 6. Implement consistent, high–quality staff training across core partners**

During the WIOA Implementation process in 2014, six shared competencies spanning each partner entity were identified. These include, community resources and knowledge of partner programs, teamwork, career exploration, communication, WIOA laws and regulations for core programs, and customer service. The DES Training Unit created the following training courses: WIOA Program Partners, WIOA Laws and Regulations, Career Exploration, Strengthening Communication Strategies, and Customer Excellence that have been rolled out statewide to ARIZONA@WORK staff.

The Council also identified activities to assist with workforce staff training. DES/ERS, with input from the Council is taking the lead on creating the training infrastructure and will report to the Council on progress.

Proposed activities include the following:

• Identify or create high–quality training materials that address key competencies, as well as specialized business service competencies, for appropriate staff.
• Establish a training schedule for core partner staff.
• Integrate staff development requirements into ARIZONA@WORK Job Center Certification.
• Provide training through multiple delivery models, including computer–based training.
• Identify development opportunities other than training, such as conference attendance, continuing education, or practical experiences.
• Ensure ARIZONA@WORK staff are learning about their respective business communities by visiting business associations to learn about collective needs.
• Incorporate visits and tours of business and manufacturing facilities, so that staff can gain a stronger understanding of business needs.

**Strategy 7. Identify, and respond to high–demand and growing industry/employment sectors at the local and statewide levels**

ACA has historically been the lead facilitator in identifying sectors for partnerships and providing support to LWDAs for sector strategies and partnerships from a statewide perspective. This work will continue under the guidance of the Council. LWDAs outlined sector strategies in the business plans submitted in 2014. One of the many priorities identified by each of the partnerships includes the need to better align workforce, education, and economic development with industry needs.

Proposed activities include the following (see also sections D and H below):

• Identify in–demand occupations by local area or region.
• Promote registered apprenticeship programs in growing industries.
• Disseminate up–to–date labor market information specific to geographic regions.
• Convene meaningful sector partnerships with LWDAs.
• Prepare relevant reports on employers and high demand sectors.
Strategy 8. Establish model career pathways, including portable and stackable credentials and soft-skills training, for designated industry sectors

In addition to the career pathway definition described in the strategy section of this Plan, a workgroup formed during the plan creation developed the 42 strategies below, which are aligned to the Six Key Elements of Career Pathways identified in U.S. DOL’s Career Pathways Toolkit, to assist in the development of a robust career pathways system in Arizona. The Council intends to focus on career pathways as a key strategy of WIOA implementation. Along with key stakeholders, especially the ADE, the Council will continue to evaluate and build upon the work already accomplished in Arizona.

Proposed activities include the following:

- **Key Element 1: Build cross-agency partnerships and clarify roles**
  - Identify and engage all partners (state and local) needed to implement the model;
  - Establish a shared vision and mission;
  - Gain support from political leaders;
  - Determine the capacity and limitations for services of all partners;
  - Define roles and responsibilities of each partner;
  - Provide guidance and develop templates for memorandums of understanding that support Arizona’s definition of Career Pathways;
  - Centralize regional efforts through local workforce boards; and
  - Annually review partnership roles and responsibilities.

- **Key Element 2: Identify industry sectors and engage employers**
  - Identify state/local sources for labor market information;
  - Identify and target high-demand and growing employment sectors (locally/regionally);
  - Identify and target specific employers within each major industry sector (regionally);
  - Create and disseminate clear and consistent messages to key employers of their role and the benefits of participation;
  - Annually review industry growth trends and changes (state/region/local).

- **Key Element 3: Design education and training programs**
  - Ensure that pathways include multiple entry points for both well-prepared individuals and those with barriers to employment, such as low basic skills;
  - Define outreach and marketing techniques for recruitment;
  - Determine specific strategies to recruit out-of-school youth, individuals with disabilities, non-native English speakers, individuals with low basic academic skills, and other populations with barriers to employment;
  - Provide training to program developers in contextualization and standards-based instruction;
  - Work with employers to develop competency models with identified knowledge, skills and abilities
  - Determine clear sequences of education courses and credentials that meet the needs of targeted sectors;
• Work with community colleges to build standardized pathways that are stackable and portable at all Arizona colleges;
• Highlight programs, including those on the ETPL, that qualify as career pathway programs; and
• Annually review program success and revise strategies as necessary.

• Key Element 4: Identify funding needs and sources

• Identify costs associated with implementing a career pathways program;
• Clearly identify limitations and allowable expenses for each partner;
• Develop a comprehensive map of funding needs, partner requirements and partner contributions;
• Identify and eliminate duplication of services when possible;
• Determine bounds for linking economic development funding to education and training within priority sectors;
• Leverage Title I–B training funds to support career pathways programs with providers on the ETPL;
• Investigate ways to incentivize industry investments in education and training; and
• Identify sources and develop proposals for additional funding from private foundations and non-profit organizations.

• Key Element 5: Align policies and programs

• Identify any statutory barriers and pursue needed reforms in state and local policy;
• Review dual credit policies with regard to Career and Technical Education and remove policies that limit this potentially seamless connection;
• Conduct a comprehensive analysis of programmatic procedures from the customer perspective to identify impediments to easy, navigable pathways;
• Develop and implement universal intake policies among partner programs;
• Develop policies that assure data sharing among partner programs;
• Develop policies that support co-enrollment and braided funding as essential elements of the career pathways model;
• Establish a process to verify that a program meets the Arizona definition of a Career Pathways Program; and
• Coordinate deadlines for reporting and require annual review of all performance metrics.

• Key Element 6: Measure system change and performance

• Determine consistent and secure processes for data collection, storage, sharing and evaluating;
• Determine key performance indicators and set goals and desired outcomes to establish common benchmarks, growth measures and timelines;
• Identify and align data sets to facilitate data sharing (or matching) across programs; and
• Analyze performance data and assess implementation progress routinely to make adjustments as necessary.
Strategy 9. Implement increased opportunities for alternative training and education, including work-based training and registered apprenticeship programs

WIOA puts more emphasis on service to individuals with barriers to employment, and alternative training and education models will be considered to obtain better results. Work–based training, such as on-the-job training, internships, and apprenticeships are effective training options for individuals with barriers. These training opportunities combine hands–on learning with classroom training, and may lead to employment where standard classroom and textbook learning may not enable the client to succeed in employment. Internships and apprenticeships also engage the employer in the development of training content and delivery. Such work–based training thus addresses the needs of both employers and job seekers. The Registered Apprenticeship Program, housed in DES/DERs will take a lead role in promoting work–based training models. Alternative training and education options will be developed with individuals with barriers and disabilities in mind to allow equal access to these opportunities.

Proposed activities include the following:

- Identify and target high–demand and growing employment sectors.
- Exploring and identifying potential incentives for employers to expand on–the–job training opportunities.
- Create and disseminate clear, consistent messages to employers on the benefits of work–based training, including registered apprenticeship programs.
- Identify funding streams to support work–based training, other than WIOA.
- Develop an outreach effort to spread knowledge of registered apprenticeship programs.
- Utilize universal design concepts in the development of alternative training and work–based training options.

Strategy 10. Establish process of data linking across core programs to ensure core programs are able to share key data elements for shared clients

This strategy will support the customer–centric goal of Arizona’s workforce system by facilitating coordination of services and preventing service duplication. Partners intend for the data sharing agreements to include access to unemployment insurance wage record information as authorized by state law. The use of cross–system data matches, or data linking across core programs, will provide the data required to establish a workforce system informed by a data–driven decision making model. For example, data matches can identify successful programs in terms of placement, retention or wage growth. These successful programs can be targeted for growth and development. Underlying components of all strategies concerning data include the identification and maintenance for secure process for data collections, storage, transmission, and evaluation, along with adherence to all security protocols.

The Council and WIOA core partners are working to address the barriers to system–wide data sharing, through activities such as:

- Developing data sharing agreements and protocols that adhere to state and federal privacy and confidentiality requirements, for example unemployment insurance and Family Educational Rights and Privacy Act requirements.
- Supporting shared case management, identifying what data can/cannot be shared and exploring mechanisms to identify common participants.

The State of Arizona has a strong interest in empowering its ARIZONA@WORK system to effectively use data and data–driven approaches to decision making. In order to realize this goal, ARIZONA@WORK partners will be incorporating multiple types of data into decision making. For example, at the onset of WIOA implementation, geospatial data was used to determine where intensive, pilot services should be deployed to address areas of severe unemployment.

Use of data to generate insights regarding the workforce system to further inform partner decisions will be promoted with the following activities:

- Analyze performance data to assess implementation progress and inform programmatic adjustments.
- Provide analysis of local area econometric indicators to the LWDBs.
- Provide training for ARIZONA@WORK staff on the availability and use of various public and proprietary data.

Strategy 12. Identify and document obstacles and establish continuous improvement through outcomes analysis and reporting

Through the Council and its subcommittees, task forces and workgroups, the entities involved in the creation of the State Plan will continue to provide implementation information and expertise so that obstacles preventing an efficient and productive workforce system may be addressed.

Proposed activities include the following:

- Develop a comprehensive continuous improvement approach.
- Annual review and matching of ETPL programs with local needs, based on program outcomes and environmental analysis.
- Annual program evaluation and annual reports will include an analysis of the economic environment, the labor market and skills gaps.
  - A new component will be an evaluation of the program year activities in light of the economic and labor market analysis, providing feedback for core partners and sub–recipients and their providers on fit of service delivery with needs based on data.
  - An annual registered apprenticeship report will review the fit between availability of apprenticeship programs based on geographic employment and labor market needs.

B) Alignment with Activities outside the Plan

Low–Income Individuals (TANF and SNA E&T)

DES is responsible for the administration and financial oversight for the Temporary Assistance for Needy Families (TANF) Program and the Supplemental Nutrition Assistance Program (SNAP). The DES Division of Benefits and Medical Eligibility (DBME) determines eligibility for applicants to receive SNAP, TANF and medical benefits. Individuals that are subject to federal work provisions, and who do not meet a qualifying
exemption, are referred to the TANF Jobs Program or the SNA E&T Program respectively, both of which are administered by DES/DERs.

The Jobs Program and SNA E&T are employment and training programs that provide job search and job readiness services, other work-related skills training, and supportive services to individuals referred. After a thorough assessment, these individuals are assigned to complete work activities, and are allowed to utilize supportive services to assist with identified barriers. Often, close ties exist and TANF families, for example, benefit from the additional connections and resources available through the workforce system. These individuals are referred directly to one of the WIOA Title I-B programs, or to the various ARIZONA@WORK Job Centers for further assistance in meeting their work activity requirements. Feedback from both Jobs and SNA E&T Program staff and clients alike have indicated that communication between the ARIZONA@WORK Job Centers, WIOA core programs, and the Jobs Program and SNA E&T are not always satisfactory.

DES is currently working on a more effective strategy to improve communication, align processes, and ensure that there is no duplication of services. Arizona has initiated a pilot project for the SNA E&T Program in an effort to expand its current service capacity. During the research and planning phase for the pilot project, DES staff noted that some areas of service delivery for SNA E&T participants needed improvement, specifically, the referral process of SNA E&T participants to a WIOA Title I-B program for additional training.

Moving forward, the Jobs Program contractors and ARIZONA@WORK will develop a stronger partner collaboration through regular meetings and increased co-location in ARIZONA@WORK Job Centers, where possible, and through initiatives such as the following:

- The City of Phoenix identified a single point of contact who now serves as a liaison to the Jobs Program workers, for coordination of WIOA Title I-B enrollment. Cross training will occur between direct-service staff within the Jobs Program and WIOA Title I-B. A similar model has been in place with Maricopa County.
- These partners are working to develop a more streamlined referral process for adult TANF recipients as well as recipients who meet WIOA Title I-B Youth Program criteria (e.g., teen parents receiving TANF who are age 18–24 and are unemployed/not enrolled in school).
- Co-enrollment of TANF recipients into WIOA Title I-B services will expand vocational training and employment options and resources, allowing both programs to achieve a greater impact, stretch limited funds, and avoid duplication in effort, benefitting all clients served.

Behavioral Health Services

Vocational Rehabilitation (VR) has developed and maintained multiple cooperative agreements to provide enhanced services to mutual clients of diverse systems. These agreements encompass a diverse population base and exist to provide enhanced services to clients while maximizing the expertise and funding of separate funding sources. VR has worked collaboratively with the following entities:

- Division of Behavioral Health Services to support individuals with Serious Mental Illness;
- Native American Vocational Rehabilitation programs to coordinate services to American Indians with disabilities that reside on and off the reservation;
- Division of Developmental Disabilities to support individuals with developmental delays;
• Veterans Administration to support veterans who have a disability;
• Youth in the Foster Care and Division of Developmental Disabilities systems to expand the continuum of comprehensive vocational services; and
• Governor’s Council on Spinal and Head Injury to provide comprehensive services and supports to those with Spinal Cord or Traumatic Brain Injury.

**Linking Workforce Demand to Individuals with Disabilities**

Untapped Arizona (UAZ) was established to support Arizona businesses meet their inclusive workforce needs by tapping into the labor pool of individuals with disabilities. UAZ is led by business leaders who are diversifying their own workforces by recruiting, hiring, retaining, and advancing workers with disabilities and actively encouraging other Arizona businesses to do the same. UAZ focuses on identifying and engaging the entire talent pool of individuals with disabilities regardless of whether or not they have a disability determination and/or are served by a government system. UAZ does not serve the job seeker customer, but rather the business customer, recognizing there are already systems, agencies, and services in place to support the job seeker to prepare for and find employment.

UAZ business leaders represent Arizona’s key industry sectors—information technology and related manufacturing, aerospace and defense, health care, and energy—and speak to the current and future labor needs of their sector. UAZ collaborates with employment service provider agencies to ensure they assist in driving the talent pool of individuals with disabilities to the AJC system, the state labor exchange system, to connect with qualified job candidates with disabilities.

**Child Support Services**

Employment Service (ES) and the Division of Child Support Services (DCSS) have ventured into a partnership focused on assisting and connecting DCSS participants to employment and training resources. One of the goals is to assist participants in obtaining training and or skills to assist them to increase their earnings and contributions to support their children.

DCSS provides their participants with a referral form to take to the closest ES office to meet with an ES Employment Specialist. ES staff meet one–on–one with each participant and provide the following services:

- Ensure the participant completes a full–registration in AJC;
- Make job referrals as applicable;
- Make referrals to community partner programs for additional support services as applicable;
- Document AJC services including case notes; and
- Scan the completed referral form to the DCSS Case Manager within 24 hours of meeting with the participant.

Designated DCSS management staff have received training and will have “read only” access to AJC to review the DCSS participant activities and successes. This collaborative effort will assist in making a difference in the lives of children and families in Arizona communities.
**Recidivism Initiative**

The Department of Economic Security (DES) partnered with Arizona Department of Corrections (ADC) to create a pre-release program to provide inmates with comprehensive employment services in prisons throughout the state. Second Chance Centers opened in three prisons in Arizona, each of which is equipped with a resource room that includes computers with internet access, printers, full-time DES staff and other workforce-related resources. Eligible inmates who are within 60 days of release participate in eight weeks of workforce activities. Inmates benefit from help with résumé writing; interview skills, that includes explaining convictions to potential employers; soft skills/workforce retention training; job search assistance; registration on the AJC website; participation in on-site job fairs; presentations from community partners; and access to free professional clothing to wear to work. DES staff also connect inmates to apprenticeship opportunities, on-site job training, and federally-funded workforce opportunities. DES staff provide workforce services in parole offices and prisons without Second Chance Centers throughout Arizona.

There are many success stories of individuals who have participated in the program and have been matched with employers. Many have been incarcerated multiple times and for several years. By providing services, support and hope through this program, many will be able to stop this cycle of incarceration.

**Arizona Roadmap to Veteran Employment**

While priority of service for veterans is an established element of the ARIZONA@WORK system, the Plan will now incorporate an expanded focus on effectively serving transitioning, unemployed and underemployed military members, veterans, and their family members. This expanded focus will integrate with the Arizona Roadmap to Veteran Employment, a statewide public/private partnership of key stakeholders with an emphasis on job seekers, employment service providers, employers, and the community.

This Governor–supported effort is facilitated by the Arizona Department of Veterans’ Services (ADVS) and the Arizona Coalition for Military Families (ACMF), which will provide training and technical assistance to each LWDA relating to serving the military, veteran and family population.

The Roadmap encompasses a focus on the interests and needs of different key stakeholder groups, as well as the relationship between those stakeholders with an end goal of successful hiring and retention. The Roadmap strategically engages technology solutions to complement existing service and resource systems.

To implement the Roadmap, ADVS and ACMF will continue to engage key stakeholder agencies including:

- Arizona Chamber of Commerce and Industry
- Arizona Commerce Authority
- Arizona Department of Economic Security
- Arizona National Guard
- ARIZONA@WORK System
- Employer Support of the Guard and Reserve
- Governor’s Office
- League of Arizona Cities and Towns
- U.S. Department of Labor
• U.S. Department of Veterans Affairs

ARIZONA@WORK system–related metrics include:

Employment Service Providers

• The number of ARIZONA@WORK Job Centers that receive Roadmap Employment Service Provider training.
• The number of workforce sites that become Employment Service Provider partner organizations.
• The number of workforce sites that complete organization and resource profiles in order to be matched with job seekers.
• Designate one or more points of contact (POCs) per LWDA

Business Services Teams

• The number of employers in each Local Workforce Development Area (LWDA) that receive Roadmap Employer training.
• The number of employers that become Arizona Veteran Supportive Employers.
• The number of employers that create an employer profile and post jobs to be matched with job seekers.
• Designate one or more points of contact (POCs) per LWDA

Senior Community Service Employment

Senior Community Service Employment Program (SCSEP) national grantees and State sub-grantees will work together to assess the quality of the coordinated services between the SCSEP providers and the newly branded ARIZONA@WORK delivery system. Coordination efforts include collaboration to improve cooperation and communication between ARIZONA@WORK Job Centers and SCSEP, co-location when possible at the ARIZONA@WORK Job Centers, and work toward the development of innovative ways to improve services to the public and between programs in the ARIZONA@WORK system.

DES Division of Aging and Adult Services (DAAS) SCSEP staff will coordinate efforts between the national grantees and the local workforce boards to discuss and outline a coordination plan for the delivery of SCSEP activities and services within each ARIZONA@WORK Job Center, and eliminate confusion within each LWDA regarding multiple SCSEP grantees in the same workforce investment area.

SCSEP staff will work with the Employment Service programs operated as part of the State’s ARIZONA@WORK system to assist participants in obtaining unsubsidized employment. Partnerships with vocational rehabilitation will be strengthened to assist participants with disabilities and leverage available resources.

SCSEP staff will be encouraged to participate in local ARIZONA@WORK activities to strengthen the relationship between SCSEP and the ARIZONA@WORK Job Centers. Staff will be encouraged to attend local partner meetings and work with ARIZONA@WORK staff to educate them on issues unique to SCSEP participants seeking employment.
It is anticipated that this sharing of information will also provide for expanded knowledge within the ARIZONA@WORK system of the services available through the Area Agencies on Aging (AAAs) for customers who may benefit from them. This coordinated effort will facilitate program integration between AAAs who administer programs primarily targeting the 60 and older population and the employment service programs through the utilization of the ARIZONA@WORK system throughout Arizona.

C) Coordination, Alignment and Provision of Services to Individuals

Strategy 5 provided an overview over the State’s intention to align services to individuals across core partners. During the creation of the State Plan concrete recommendations were developed, both at the policy and the operational level. Further research and pilot projects will take place mainly at the local level while State partners participate in information exchange and providing technical assistance.

The common processes workgroup formed during State Plan creation recommended that Arizona proceed to align core programs and integrate customer service by enhancing two policies previously adopted by the Council. The Council will evaluate and make necessary changes to the following:

- **The Service Integration Policy**
  This policy will serve to align staff and services into each of the ARIZONA@WORK Job Centers through their respective workforce system operator and functional management structure.

- **One–Stop Delivery System Policy**
  This policy will provide direction for LWDBs, core programs and other workforce system partners on the coordination of the ARIZONA@WORK system. It will assign responsibilities at the local, state and federal levels that will enhance the delivery of the integrated services delivery system. This will require designation of an ARIZONA@WORK Job Center Operator through a competitive process to ensure oversight and seamless service delivery by entering into an operator agreement with the LWDBs that will describe:

  - Coordination by function for all partners;
  - Assurance of seamless service delivery;
  - Development of a customer flowchart to include access to all Career Services; and
  - Operational procedures and protocols for an effective seamless service delivery for all partners.

Each LWDB will be responsible for the development, execution and maintenance of a Memorandum of Understanding (MOU) with all core partners and required partners who provide services to align with WIOA requirements.

Additional ways the State can potentially embrace to streamline common intake, assessments, and methods for applying shared case management include:

- Policy development for the purpose of integrating services.
- Integrating an Individualized Employment Plan that includes the educational steps.
A single management information system for shared reporting and case management. The group realizes that the core partners will initially pursue a strategy to create linkages for existing data systems.

- A uniform way to share customer information.
- A common assessment tool.
- Analysis and utilization of data for referral and services.
- Establishment of clear service access points of entry: individuals will find numerous access points, but with consistent processes.
- Expand accessibility for rural Arizonans, utilize technology for virtual or remote access where possible, and strengthen support services, e.g. transportation. See also Strategy 4, which focuses on alternate opportunities for service access.

Arizona plans a comprehensive review of all reports and the data gathered by core partners, followed by a plan to streamline reporting and work towards interoperability of systems. Shared data, aligned with shared case management will allow for better evaluation, more seamless service delivery and progression (see also Strategy 10).

D) Coordination, Alignment and Provision of Services to Employers

In concert with coordinated and aligned provision of services to job seekers, the ARIZONA@WORK system serves the needs of employers in multiple ways. Consistent with the strategic approach to serving the combined economic development and workforce development system in the state, Arizona has developed a deliberate approach to identifying, understanding, and responding to the specified needs of its current and future employers. The following descriptive elements define the state’s approach at the local and statewide levels to engage with employers, support their needs, and recognize the roles of job providers within the larger system of economic and workforce development that includes education, training, workforce development services, and data analysis:

- Invest in outreach to employers by ARIZONA@WORK system partners in state and local workforce development, including but not limited to the following:
  
  - Chamber of Commerce communication to employers
  - Workforce development professional membership in community organizations, including fraternal and service organizations, nonprofit board service, and formal presentations to communities and professional organizations, both in person and by radio and television appearances
  - Targeted visits to meetings, associations, and conferences serving private sector employers, for purposes of building long–term professional relationships that facilitate mutual assistance in matters of shared concern, such as local area business development
  - Outreach to education, enlisting schools, vocational/technical educators, colleges, and universities in efforts to sponsor visits to employer sites to stimulate interest in innovative and emerging careers, supported by career pathways approaches available to potential applicants
  - Visits to LWDAs and relocating organizations to initiate awareness of Workforce Development services, including but not limited to:
Interviewing candidates on behalf of organizations seeking to expand or retrain their workforce

Designing training in concert with local area education providers for purposes of improving the skill of the local workforce in the interest of particular companies seeking to provide staff development

Providing rapid response for organizations needing to downsize and/or cease operations in their current location

Planning and implementing transferable skills application in like industries, to avert job shortages and unemployment within a given locale

Interpreting the transferability of skills to design any needed supplementary education and training, in collaboration with Adult Education and appropriate providers

- Initiate services to employers that enhance employers’ ability to build a capable workforce, and develop long-term, trusting professional relationships that facilitate collaboration by meeting immediate and long-term needs:
  - Identify career pathways for youth and adults
  - Establish current and anticipated career needs of the organization
  - Provide value to the employer by delivering what the firm cannot provide for itself, as it seeks to respond to change within the marketplace
  - Discover new sources of candidates for jobs
  - Integrate education and training into career pathways or segments of learning need that supplement existing career preparation vehicles
  - Earn the trust of local employers in the ability of workforce development to meet the needs for specific training and development that sustains the organization’s immediate and long-term needs

- Structure, clarify, and simplify all services to employers, to facilitate responses “at the speed of business” and ensure specific handling of industry needs:
  - Explain what can be done, using minimal jargon, and specifying who does what and when
  - Segment services into phases or related clusters of service provision
  - Use bullets rather than lengthy prose
  - Build standard blocks of training that can be customized readily to meet industry-specific requirements

- Seek to optimize contributions from individuals whom WIOA seeks to serve, based upon qualifications earned and any needed shaping of criteria that fills an employer’s upcoming need, while offering an opportunity to an individual with barriers to employment:
  - Incorporate available funding for support to individuals, including but not limited to assistive technology
  - Utilize funds for initial internship or related workplace introduction, to mitigate costs to the employer where possible
  - Demonstrate the capability of translating the upside of individuals with barriers to clarify benefits to the employer, revealing the unexpected advantages to the picture of hiring an individual who has barriers
• Contribute to the development of communities of practice that serve local industry groups, with the intention of seeding interest in youth and adults, and supporting sector–based professional engagement:

  o Initiate contact with professionals through industry contacts, for the purpose of building active interest in the professions being developed
  o Identify opportunities to share these professional communities with individual youth and adult groups who are developing an interest in transitioning to or entering new careers
  o Create public interest in particular industry areas in the locale, by engaging radio channels and other media and seeking guest speakers for interviews that introduce the public to careers and business contributors to the local economy

• Establish regularly scheduled meetings with employers and workforce development professionals in LWDAs to review data–informed progress to date, in delivering fully responsive approaches to the talent pipeline requirements of local industry:

  o Maintain primary, face–to–face contact with key employer representatives, to ensure responsiveness to stated needs
  o Explore data in the aggregate, to determine opportunities for the local economy
  o Identify new areas of need, and re–establish the ability of workforce and economic development to support local area efforts to grow the economy
  o Ensure the understanding of local partners in workforce development services, both for continuity of practice and for identifying new ways to serve business and industry
  o Rotate the location of meetings, holding sessions at different workplaces and ARIZONA@WORK Job Centers, to increase familiarity among group members relative to services and industry activities

• Identify and document new needs that emerge from a review of the data and employer reports relative to pipeline–related deliverables by workforce development:

  o Explore training and development opportunities that fine–tune existing baseline or other training within the career pathways arena
  o Identify early education that can foster long–range interest from students who may seek to pursue given industry areas
  o Innovative programming that enhances existing career pathway endeavors

• Integrate local and statewide areas of achievement and need, specifying:

  o Competitive features of Arizona, both statewide and within specific locales
  o Planning for outreach to other regions in the United States to attract new employers, based upon the economic and industry environments within the State
  o Initiatives to grow specified industry groups with the assistance of economic development at the State and local levels
  o Areas needing new or additional support within particular regions, for particular industry groups, or for particular professions
  o Potential funding and other support services made possible by WIOA and/or by supplemental sources of support
E) Partner Engagement with Educational Institutions

The state’s community colleges and universities play an important role in the implementation of the strategies proposed in this Plan.

To implement Goal 1: Create Partnerships and Strengthen Communication, the state will ensure that educational partners have a seat on the Council and on local boards as specified in Local Governance Policy, including institutions both public and private. In addition, educational partners, and public and private institutions as well, are represented on the Arizona Apprenticeship Advisory Committee (AAAC). The following list includes important operational considerations:

- Ensure that educational partners, public and private, are engaged in review of the ETPL policy to create effective strategies and appropriate performance criteria.
- The annual “Training Expo” will continue, providing information on workforce and training issues to providers and representatives of state and local/area agencies.
- LWDAs, in collaboration with state staff, will schedule informational meetings or webinars on the ETPL.
- Where possible, registered apprenticeship programs will have a relationship with community colleges to provide related training for apprentices.
- The State Registered Apprenticeship Program Coordinator will strengthen linkages to the community colleges and the Joint Technical Education Districts (JTEDS) to explore articulation and creation of more pre-apprenticeships. In addition, it is critical to connect employers who participate in community college advisory boards and industry councils with the need for apprenticeships in non–traditional industries.
- Annual review of ETPL to determine which community colleges and universities are represented based on ETPL policy.

To implement Strategy 8: Establish Model Career Pathways, Including Portable and Stackable Credentials and Soft–Skills Training, for Designated Industry Sectors, the work group designated to refine and implement the career pathways model will include members representing secondary education, Career and Technical Education (CTE), JTEDS, adult basic education, colleges, internships, apprenticeships and employment. The following list includes important operational considerations:

- The Career Pathway Work Group will include representatives from educational institutions; both community college districts and private institutions. This work group will develop career pathway models for specific occupations aligned with sector strategies and in–demand occupations. The design of these models will take into consideration the expertise and available support from educational institutions.
- The ETPL and training policies will be reviewed for relevant content on career pathways.
- The ETPL is one of the strongest links to educational institutions. Arizona will ensure that all community colleges are on the list.
  - As of January 2016, nearly 250 providers were approved with over 1,500 programs.
  - Most of the state’s community colleges are approved providers on the Eligible Training Provider List; they are in fact the most important training provider for Title I Adult program participants.
  - The state’s three universities also have programs listed on the ETPL.
Private training providers make up the bulk of the list, including private colleges as well as numerous specialized training providers that often offer programs for just one or two specific occupations.

- The Registered Apprenticeship Program is another key program that interacts with educational institutions, primarily community colleges.
  
  - Colleges develop and provide related training that is required for apprenticeship programs. The Registered Apprenticeship Program will work with stakeholders to review the availability of related training and the need for any additions.
  
  - The Registered Apprenticeship Program will work with community colleges toward the goal of all colleges becoming Registered Apprenticeship College Consortium (RACC) members.

- Youth programs coordinated by LWDAs and their contracted youth program providers have close relationships to high schools.

**Evaluation/Continuous Improvement will include the following:**

- Annual report by the Career Pathways Work Group on availability and applicability of career pathways for specific occupations.
- Annual report by Office of Apprenticeship, including:
  
  - Review of RACC membership by the Arizona Office of Registered Apprenticeship Program Lead,
  
  - Review the fit between availability of apprenticeship programs based on geographic employment and labor market needs.
  
  - Tracing of the number of programs with linkages to colleges

- Annual review by the Arizona Apprenticeship Advisory Committee (AAAC) on related training provided by colleges, any curriculum revisions, and interaction with relevant industry entities, e.g. sector partnerships or trade associations like the Arizona Manufacturing Partnership (AMP).

**Evaluation/Continuous Improvement:**

- Regular review and matching of ETPL programs with local needs, based on program outcomes and environmental analysis.
- Program evaluation and annual reports will include an analysis of the economic environment, the labor market and skills gaps.

**Partner Engagement with Other Education and Training Providers**

See Sections III.a.2.C. on Coordination and E. on Engagement of Educational Institutions, and III.b.4. Assessment
G) Leveraging Resources to Increase Educational Access

The core partners will work with community colleges and universities to identify complementary activities, such as career counseling and job fairs, to explore more opportunities for coordination and sharing resources.

- Utilize partners’ expertise in strategic planning, grant planning and grant applications, including sector strategy teams for employer engagement and community colleges for curriculum development and regional labor market data.
- Engage core partners, educational providers and sector strategy teams in asset mapping to better utilize existing resources and knowledge.
- Collaborate to identify and build on best practices, such as AZ–IBEST, Year Up, YouthBuild, CTE Dual Enrollment, Carl D. Perkins Programs of Study, and JTEDS.
- Explore standards for core competency training, such as the Certified Workforce Development Professional (CWDP) credential.

The community colleges also may be eligible to apply for grants on curriculum development and creating career paths in collaboration with the business community.

Currently, the Vocational Rehabilitation program has entered into a Third Party Cooperative Agreement (TPCA) with the JTEDS at Western Maricopa Education Center to bring together the resources of two systems in order to facilitate the seamless transition of clients from high school to the world of work. Mutual clients are provided enhanced and structured transition services which include occupational training and vocational services through the coordination, cooperation, and collaboration efforts of both parties. Agreements such as this expand the resources of two systems, as well as enhance service provision to mutual participants who wish to access education.

H) Improving Access to Postsecondary Credentials

By utilizing the state’s strategies, the ARIZONA@WORK system will produce a pipeline of qualified workers, who have earned recognized post-secondary credentials. Recognized post-secondary credentials demonstrate and document skills, and help employers fill skilled positions, create talent pipelines and compete. By increasing the number of skilled workers with recognized post-secondary credentials in the state, businesses will be encouraged to expand in and relocate to Arizona. The benefits of credentials for workers and job seekers include improved labor market experience, higher earnings, greater job mobility and job security. Recognized post-secondary credentials include educational diplomas and certificates, educational degrees, such as associates (2-year) or bachelor’s (4-year) degree; registered apprenticeship certificates, occupational licenses, and industry recognized certificates, including personnel certifications.

Implementing a career pathways model in Arizona (Strategy 8) will help identify training paths in specific industries and occupations. The very nature of the career pathways allows individuals to enter and exit the pathway at any level, and identifying the appropriate credential to allow for portability and stacking of training modules and credentials is an important component of the career pathway development.

The emphasis on work–based learning, including registered apprenticeship programs (Strategy 9) is also a direct path to increase access to postsecondary credentials, including the credential rate for individuals with barriers to employment. Registered apprenticeship programs result in federally recognized
credentials; other work–based learning experiences may need to be examined on a case–by–case basis to
determine if they result in an industry–recognized credential. Related technical instruction for registered
apprenticeship programs are often provided through community colleges or an agreement with
community colleges. This can provide easier entry for participants to pursue a college degree. Several
colleges in Arizona are already members of the Registered Apprenticeship College Consortium (RACC),
and the Arizona Office of Registered Apprenticeship Program Lead is pursuing a strategy to have all
community colleges join the RACC. College credits from RACC members are transferable to other colleges,
making it easier for students to complete degree requirements.

Identifying high–demand and growing industries or sectors (Strategy 7) will also open avenues for
improving access to post–secondary credentials. Employer engagement is critical for this strategy, and
having this dialogue with employers will make it easier for the workforce and education partners to
identify recognized credentials. By clearly defining recognized post-secondary credentials, and improving
the methods used to identify programs that result in industry–recognized credentials, ARIZONA@WORK
will improve access to activities that lead to recognized post-secondary credentials and achieve greater
training services results by increasing the quality and quantity of training programs listed on the state’s
ETPL. Participation by sector partnerships offers an additional advantage in the process to identify
additional recognized credentials that directly benefit the Arizona economy. An additional entity that will
be consulted in these discussions is the Arizona Board for Private Postsecondary Education. This board
provides a license to provide training for private providers of vocational training not already licensed by
another entity, such as the Board of Nursing or the Motor Vehicles Division.

1) Coordinating with Economic Development Strategies

WIOA implementation in Arizona is positioned to integrate fully its capabilities in economic development
and workforce development. The new legislation offers an opportunity to refine strategic processes
initiated under the WIA, based upon the increased flexibility and opportunity for innovation of WIOA. The
strategy for system–level structuring and positioning reveals a sequential strategic flow that begins with
establishing an Economic Development strategy to target specified industry sectors for the mutual benefit
of specified sector groups and the State itself.

Of particular importance to economic development is the state’s availability of a qualified workforce and
a system that creates a pipeline of talent to serve the expanding job market that is anticipated for a variety
of industries. The following diagram displays an integrated, strategic approach to meeting the goals set
forth for WIOA in Arizona. The diagram reflects a system–level approach, supported by continuous
process–based refinements. The strategic sequence of “select, design, deliver, and evaluate” guides both
state–level and regional/local level WIOA endeavors. At all levels, the accurate response to economic
development strategies by workforce development establishes the planned talent pipeline. Focusing on
increased access by adults, youth, out–of–school youth, and a diverse population of individuals who face
barriers, increases the scope of the available workforce. The focal design of statewide and local area
practices guides the fusion of education and training, plus the work experience needed. In addition, the
clarity provided by updated branding of all ARIZONA@WORK services and locations, as well as increasing
the range of learning and services provided, builds brand recognition and therefore utilization of the
services by those job seekers who can benefit.
Delivery of services, performed in collaboration with employers, serves those sectors that economic
development has indicated as appropriate for statewide and regional/local development. Educating,
training, and tracking results stimulates continual capacity building at state and local levels.

Continuous process and outcome evaluation of the integrated economic and workforce endeavors for
WIOA is designed to establish the following:

- Process–based features associated with building familiarity with services in LWDAs by business
  and job seekers
- Outcome–based features associated with quantitative measures associated with completion of
certification programs and/or related education and training or work experience, as well as
employment
- Qualitative indicators that reflect effectiveness in:
  - Engaging employers to work with local area workforce development
  - Attracting job seekers to participate in career development
  - The perception of employers and job seekers relative to workforce development to the local
economy

Table 27: Integrated Strategic Direction of Economic and Workforce Development for WIOA

Of importance to the integrated model is the flexibility that accommodates a wide range of industry
groups as the state’s economic and workforce experts perform collaboratively in building a pipeline of
talent that meets the needs of a growing economy in the short– and long–term. As new information
becomes available to state economists, workforce professionals can respond effectively through
collaboration at both the statewide and local levels. Those industries targeted for growth in Arizona reflect the substantial technological future that extends current capabilities. The strategic flow specified for WIOA places the initial impetus on economic development’s being structured by ACA in concert with partner organizations statewide. Full recognition of targeted industry sectors affords workforce development and other core partners in WIOA to anticipate and plan career pathways that ensure the building of a pipeline that can sustain new and existing industries of choice. Of greatest significance is the commitment of agencies to partner in several direct features associated with economic development. In particular, establishing regularly scheduled meetings that bring together ACA and workforce development professionals provides the opportunity to explore the following on a regular basis:

Direct Response to Economic Development Needs

1. Identify industry sectors for economic development
2. Specify skill-based needs of industry groups
3. Explore presently qualified workforce to serve needs
4. Develop training, development, and work experience
5. Apply or design certification, programs, and courses in response

Among the key features of coordination between WIOA and economic development are the following perspectives:

- Economic development in Arizona stimulates relocation and the creation of new jobs in the State through a program of tax incentives that allows up to $9,000 of State income or premium tax credits over a three–year period per new job brought to the State. For metropolitan areas, this requires a minimum of 25 new jobs and $5 million of capitalization. For rural areas, this requires a minimum of five new jobs and $1 million of capitalization. Other stimulus opportunities, like job training and research and development, further stimulate relocation.
- The skilled available workforce is emphasized to attract organizations to Arizona, based upon workforce development itself and the system of renowned university education available through the state’s three major public universities and a host of private higher education institutions.
- Low cost of doing business, access to major world markets, and other stimulus points are identified for future employers to relocate in the state.
- A surging innovation ecosystem is recognized in Arizona, inviting start–up organizations to join fellow technology firms to thrive in Arizona.

At present, multiple industry sectors are targeted for economic development in the state. ACA has identified the following industries as important to the growth of Arizona:
- **Aerospace and Defense.** Arizona hosts more than 1,200 small and large firms specializing in this sector. The state is the fourth highest employer within this industry in the United States.
- **Technology and Innovation.** Arizona is anticipated to have the highest growth in the nation within this sector during the period of 2012–2017.
- **Renewable Energy.** Arizona is the 1 alternative energy industry leader and among the top ten solar energy manufacturing leaders.
- **Bioscience and Health Care.** Arizona’s sustained presence and job growth within this industry area represents a substantial opportunity for organizations and job seekers.
- **Optics and Photonics.** An applied science category of industry which remains a strong leader within the state.
- **Advanced Manufacturing.** Arizona is among the top five states in the nation in advanced manufacturing.
- **Advanced Business Services.** Home to 50 different data centers, Arizona maintains a growing presence in this technologically advanced industry.

Of particular relevance to workforce development, each of the target industry groups has the following in common:

- **Requiring of high–technical, future–based skill sets** that contribute to increasing competitiveness of the state and the nation.
- **Sustainable industry that supports and repurposes environmental elements** for expansion through ingenuity and invention.
- **Technological breakthrough industries** that facilitate discovery and further innovation.

The industry groups featured can benefit from early educational exposure to these fields of endeavor through WIOA–based partnerships with education and training, workforce development, and business and community leaders coming together to support ACA designed economic development initiatives. A present challenge exists in meeting the immediate demands of industries that are operating on the threshold of a rapidly emerging future.

As noted in the strategic approach to implementing career pathways, this approach furnishes a strong and vital force that stimulates the long–range health of targeted industries and supports the coalition–building of “home–grown” talent through early exposure, ongoing education, and training of Arizona’s youth and adults. The system potential of workforce development and economic development actively supporting long–term strategies with the tangible pursuit of expertise for Arizonans answers the call from futuristic industry either currently in Arizona or planning to relocate to the state. WIOA offers the opportunity to concentrate efforts to make the workforce a tremendous and competitive asset that complements the statewide vision of economic development.

b) **State Operating Systems and Policies**

1) **State operating systems**

A) **State Operating Systems that Support Coordinated Implementation of State Strategies**
The state operating systems across core partner programs are intended to provide coordinated, comprehensive services and access to resources that will support the implementation of state strategies that:

- Provide workforce solutions to grow and develop an educated and skilled workforce that attract and support a strong and vibrant economy;
- Promote a customer–centric delivery system for businesses/industry, job seekers and youth that provide access to training and employment opportunities; and
- Produce strong partnerships that support regional economies based on data–driven decisions and focus on continuous improvement and evaluation.

Optimal communication, collaboration and coordination among the core partners and programs can be accomplished through a common, supported and mutually agreed upon data sharing strategy. As the state continues its implementation strategies for WIOA, stakeholders will work towards identifying co–location and/or shared case management strategies to create efficiencies that will support and help manage a shared client base, avoid duplication of services and leverage resources. The following information describes data management systems currently used by core partners.

**Title I and Title III**

The State of Arizona provides workforce development support through a number of agencies for businesses and job seekers.

AJC is the comprehensive Internet–based workforce data system used by DES/DERS for WIOA Title I and Title III for case management, job bank, training provider listing, data collection, and reporting. Through data sharing agreements, AJC allows communication and efficiencies between DES and LWDA staff and providers in managing activities of workforce participants.

AJC features comprehensive software system capable of reporting all required data to the U.S. DOL. The system requires minimal interaction to ensure data accuracy and timely reporting. Further, AJC will:

- Meet the service, tracking, reporting and follow–up requirements under the U.S. DOL’s performance measures for the WIOA, Wagner–Peyser Act and/or their successors;
- Provide local LWDA s with accurate individual and aggregate tracking, reporting and follow–up data for those programs, and;
- Offer the flexibility to serve WIOA–mandated partner programs and other workforce programs.

Using AJC’s case management and participant tracking component allow LWDA staff to:

- Manage and monitor caseloads;
- Assess employment barriers;
- Establish training and employment plans;
- Track literacy and numeracy gains for youth; and
- Search for and select WIOA Youth Services Providers.

In addition, staff and participants can access the WIOA ETPL as a source of training provider information for job seekers and employers. A universal information client record will avoid duplicate data entry, even
in the case of multi-program enrollments and services by different agencies. Numerous edit checks ensure accurate data entry, minimizing the time and effort required for validation. Online access allows staff and administrators to monitor progress toward youth performance goals at any time. Reports can be viewed and saved and most allow the user to drill down to a specific client record. AJC priorities are consistent with the national vision of a demand–driven system that is focused on more efficient use of employment and training funds and preparing Arizona’s human resources to meet the demands of the state’s growing businesses.

Title II

The agency representing Title II, the ADE, uses Benchmark Integrated Technology Services, branded as the Arizona Adult Education Data Management System (AAEDMS); an Internet–based educational data system that meets all National Reporting System (NRS) requirements for data and participant tracking of attendance, assessments and outcomes. Local adult education providers input program and participant data according to policy and have full access to their own data and reports for program improvement purposes. State staff can access all data at both the statewide and provider level to assist in desk monitoring efforts and to inform professional development needs across the State.

In addition to adult education data collection, the Benchmark system manages high school equivalency testing records from 1942 to the present, collaborates with high school equivalency testing vendors for real–time access to score reports, provides data matching of secondary diploma receipt to the educational database, issues diplomas and transcripts to high school equivalency testing candidates, and provides access to transcript verification for third–parties through a secured web–based portal upon request by the high school equivalency testing candidate.

Additional features provided by Benchmark Integrated Technology Services include:

- Real–time/online access to authorized users to scores, demographic information, and performance data (including student, classroom, program, goal and goal follow–up at state, local provider and individual classroom levels);
- The ability to produce standard and recurring federal, state and agency reports as directed by ADE;
- The ability to provide custom and ad hoc reports as directed by ADE;
- The ability to download raw data into XML or TXT files for ADE to create custom reports as needed;
- The ability to securely and privately collect social security numbers (SSN) and/or assign a unique personal ID for each student separate from the SSN;
- Adherence to all ADE data governance and privacy concerns;
- Provide multiple levels of access, including view–only access for certain authorized staff personnel; and
- Edit checks and validation systems to ensure accurate data reporting.

Title IV

DES VR Services, representing Title IV, utilizes a web–based data management system called “System 7” by Libera, Inc. System 7 is considered “accessible” as it integrates with various assistive technology software programs, which allow individuals who are blind or visually impaired to access and utilize the system.
The initial system was a standard program, and over time the VR program, in conjunction with System 7, has created a customized and complex program which provides the following management systems:

- Case Management
  - Vocational Rehabilitation
  - Independent Living Rehabilitation Services
  - Older Individuals who are Blind Program
  - Business Enterprise Program
- Financial Management (interfaces with DES financial management systems)
- Procurement Management
- Contract and Vendor Management
- Policy Manual Management (for multiple programs)
- Federal Reporting Management

System 7 is a role based system. Each user is assigned a role which allows certain rights regarding data accessibility, access to forms, and the ability to complete various functions. The VR program has developed roles for various positions; additional restrictions can be placed within each of the management systems as control mechanisms. Query tables are available which allow users to effectively manage tasks, assignments, and due dates. Client case files contain a running log of activity to assist with data management and tracking requirements. Data checkpoints are embedded throughout the management systems to ensure that the data needed for federal and state reports is available.

**Workforce System Communication Protocol**

To promote alignment and coordination of delivery of workforce services, all communication regarding workforce system policy, guidance and informational broadcasts will flow from DES, the state administrative entity to the local boards with a copy to the Director for the Council, local workforce system administrative entities, operators, and site managers. The operators and site manager must inform affiliate and comprehensive ARIZONA@WORK Job Center staff.

Communications regarding partner program policy, guidance and information will be communicated from the program authority at the state level to appropriate LWDA core partner programs and staff responsible for program administration, ensuring the local administrative entity and the operator and site manager are simultaneously copied.

**Data-collection and Reporting Processes - All Programs and Activities**

AJC is utilized not only for case management but also for common data collection, information management, and U.S. DOL reporting for WIOA, Wagner–Peyser and Trade Adjustment Act programs. America’s Job Link Alliance, the AJC vendor, is responsible for providing upgrades to its DART (Data Analysis and Reporting Tool) system, which collects common measure data for Wagner–Peyser reporting. DES/DERS is responsible for developing policies and training for LWDA staff to ensure accurate and timely data collection. To ensure data integrity, the State reviews each LWDA’s performance on a quarterly schedule, utilizing the mathematical Data Reporting Validation System (DRVS). This program detects and calculates performance warnings and rejects errors in the local data. DES staff works throughout the year
with LWDA’s to review WIOA performance data and assist LWDA’s in improving program operations and data collection accuracy. DES/DERS also staffs an integrated, cross-functional help desk that serves WIOA, Wagner-Peyser, Unemployment Insurance Tax and Wage, Labor Exchange, Unemployment Insurance Benefits, SNA E&T Program, and TANF/Jobs clients statewide.

2) **State policies supporting state strategy implementation**

All Arizona workforce system policies will support the alignment of service delivery and focus on creating and growing business. The Council will review and revise all workforce system policies and include alignment and seamless strategies that are customer focused and demand driven. Policy development will be a collaborative approach, bringing in stakeholders to assist, including DES, ADE, and LWDA’s.

As stated previously in this Plan, the Council is interested in developing a state workforce system that:

- Is integrated and customer–centric;
- Facilitates continuous improvements processes;
- Developing and utilizing career pathways and; and
- Effectively uses aligned data in decision making.

The current state policies are as follows:

- **Regional Designation:** Created in 2016, this policy outlines the state’s determination to designate each local area as a region for the first program year of implementation. The state intends to review these designations after the first year. This policy will be incorporated into the local governance policy once that policy is updated.
- **Local Governance:** Updated in February of 2017, this policy articulates the State’s vision and purpose for the LWDBs, provides guidance on the appointment and certification of LWDBs, outlines the roles, responsibilities, and authority of the chief elected officials and the LWDBs in regards to the local workforce system, and describes the process for local area designation.
- **One-Stop Delivery System:** Updated February 2017, this policy provides LWDBs and other workforce system partners with instructions and guidance regarding the administration of ARIZONA@WORK Job Center Service Delivery system.
- **One-Stop Operator Selection:** Adopted February 2017, this policy provides LWDB and other workforce system partners with instruction and guidance regarding the roles and responsibilities of the ARIZONA@WORK Job Center Operator and competitive selection process required under WIOA.
- **One-Stop Certification:** This policy, effective August of 2017, establishes statewide objective criteria and procedures for use by local workforce development boards to certify ARIZONA@WORK Job Centers. The criteria is in adherence to WIOA requirements related to the effectiveness, physical and programmatic accessibility, and continuous improvement, as well as measuring the local area’s progress in achieving the statewide vision for the ARIZONA@WORK Job Center delivery system outlined in the One-Stop Delivery System policy. LWDBs must certify to be eligible to use infrastructure funds in the State funding mechanism. This policy applies to ARIZONA@WORK Job Center comprehensive, affiliate and specialized sites.
- **ARIZONA@WORK Job Center MOU and Infrastructure Costs:** Updated August 2017, outlines the purpose and criteria for development of a Memorandum of Understanding (MOU) for the operation of the One-Stop Delivery System regarding infrastructure costs. Infrastructure costs of
One-stop centers are non-personnel costs that are necessary for the general operation of the one-stop center, such as facility rental, maintenance, technology and equipment. This policy also addresses the steps the State will have to take if an agreement on the infrastructure cost sharing is not reached by any local area.

- **WIOA Titles I and III Statewide Monitoring Policy:** This policy, effective November of 2017, establishes the oversight role of the Workforce Arizona Council (Council) in the Titles I and III monitoring process, which is designed to ensure compliance with WIOA law and regulation, Council policy, and policies of the DES related to the implementation of WIOA. Monitoring information is used to inform the Council on the systems’ current status to support the Council in fulfilling its statutorily defined strategic objectives. The roles of the ACA/OEO and the DES in supporting the Council oversight role is delineated.

- **Service Integration:** This policy has not yet been examined, but is intended to be reviewed and updated to comply with WIOA. The intent of this policy is to align staff and services around employment and training functions rather than providing services through silos and independent funding streams. This includes elements of functional alignment and functional management.

The Council also intends to explore additional policies as innovative ideas emerge through practice or research as well as guidance implementation of issues addressed in these policies, including topics such as infrastructure cost-sharing resolution. The Council’s four standing committees will take the lead in exploring best practices both within and outside of the system. They will also ensure the full Council stays connected with the implementation efforts of state and local entities.

3) **State Program and State Board Overview**

A) **State Agency Organization**

The Governor assigned DES as the State’s administrative and fiduciary agency for workforce programs. ACA/OEO serves as the administrator for the Council.

Three of the four core partners under WIOA are administered by the DES Division of Employment and Rehabilitation Services (DERS): Title I–B Adult, Dislocated Worker and Youth Programs; Vocational Rehabilitation; and Wagner–Peyser Employment Services. Adult Education and Family Literacy is housed in the ADE. The four core partners and their community partners have established processes for communication and collaboration; all are committed to collaboration and the sharing of data.

To leverage resources, streamline service delivery and improve the workforce system to meet the needs of the state’s employers and job seekers, Arizona’s workforce development system engages:

- ACA/OEO for state and local Labor Market Information (LMI) and workforce development assistance;
- ACA for economic development–related activities.
One–Stop Delivery System

State policy provides local boards and other workforce system partners with instruction and guidance on the Arizona one–stop seamless delivery system, known as ARIZONA@WORK. The system is charged with enhancing the range and quality of workforce development services available to job seekers and businesses through a coordinated approach among partner agencies. It is a collaborative effort among education, business, public agencies, and community–based organizations to provide services to job seekers and employers in a seamless manner. Participating entities are called workforce system partners. Services are provided through a variety of access points. Each LWDA is required to have at least one comprehensive ARIZONA@WORK Job Center that includes, at a minimum, representation from the four core partner programs which are WIOA Title I–B adult and dislocated worker services, Wagner–Peyser labor exchange and access to unemployment insurance services, VR, and Adult Education and Literacy.

Branding Efforts

In an effort to market Arizona’s workforce development network and services to employers and job seekers, Arizona undertook its own branding effort. This endeavor involved the Workforce Arizona Council, LWDAs, DES and ACA. The result is the brand ARIZONA@WORK, a single common identifier that will be used throughout the state. In February 2016, all LWDAs changed their signage at ARIZONA@WORK Job Centers throughout the state to reflect the new brand. The ARIZONA@WORK logo was added to e-mail signatures and to the websites of workforce partners.

Regional Partnerships

Workforce literature review supports building and sustaining regional partnerships as one characteristic of effective job–driven workforce programs. Through strategic partnering, programs are able to align education and training programs with workforce and economic development strategies to meet local and regional business needs by investing in and growing a skilled and trained workforce.

The State will continue to promote partnerships with community colleges, labor organizations, registered apprenticeship programs, civic groups and community organizations to align workforce development strategies for regional development and prosperity. Education at every level will closely align with jobs and industries important to local and regional economies. The outcomes will be achieved by using innovative technology and state–of–the–art practices to expand and strengthen the capacity of the entire workforce system, creating a pipeline for increased access to education and training opportunities for adults, dislocated workers and low–income adults needing to acquire new skills.

The Arizona Advanced Technology Corridor is a promising regional initiative that began in Arizona in 2017. ACA/OEO has partnered with three community colleges—Maricopa Community College, Central Arizona Community College, and Pima Community College—to jointly develop a regional approach to meeting the workforce needs of Central and Southeast Arizona’s advanced manufacturing sector. This regional partnership is critical for the development of a talent pool to address employers growing concerns about their ability to source qualified talent. This project will contribute to an improved local supply of front-line and mid-skill production workers with command of the knowledge and skills required to perform in today’s high-tech manufacturing environments.
B) State Board

The Council is the leading body in implementing and monitoring the State Unified Plan, providing statewide policy direction, building collaborative relationships, and coordinating resources. The Council oversees the efficiency, accessibility and continuous improvement of Arizona’s workforce system. The following chart lists the current membership that comprises the Council.

i) Membership roster

**ii) Board activities**

The Council intends to provide leadership for the system as it works to meet performance goals and implement the state’s key strategies. Council meetings take place at least once every quarter, and the standing committees meet at least once in between each Council meeting. The Council organized itself into five standing committees, one task force and one workgroup in order to carry out its responsibilities:

- Performance Excellence Committee
- Measuring Effectiveness Committee
- Strategic Communications and Partnerships Committee
- Quality Workforce Committee
- Executive Committee
- State Plan Task Force
- Bylaws Workgroup

Each standing committee has developed and adopted a charter, which outlines its intended activities and goals. These charters are reviewed and updated annually to reflect activities completed and to identify new goals. Some of the committee activities and goals identified by the committees include:
• Creating communication plans for the Council to reach out to each local area about policies and performance and the business community to disseminate information about the workforce system;
• Creating a continuous improvement toolkit that identifies methods for using data to drive performance for the LWDBs to use when evaluating one-stop performance;
• Developing a statewide training program, including a focus on timelines, effectiveness measures, methodology, costs, and monitoring of progress;
• Creating a comprehensive map of career pathway programs including the populations they serve;
• Fostering collaboration and integrating data to ensure the state and LWDAs have access to a comprehensive outlook of the workforce system and workforce needs;
• Identifying best practices in public and private entities that can be leveraged locally and at the state level;
• Monitoring progress in meeting the statewide goals established in the State Unified Plan; and
• Seeking input and involvement from local stakeholders in the successful implementation of the State Unified Plan.

The effort to be collaborative and efficient is also reflected in the Council’s interest and endorsement of initiatives championed by partners across the workforce system. Programs endorsed by the Council that support collaboration with educators and employers include the Arizona Career Readiness Credential, the Arizona Advanced Technology Corridor Project and the Roadmap to Veteran Employment Project, along with beginning work on a career pathways initiative and the mapping of workforce programs to the populations served. An innovative initiative taking place in Phoenix’s Maryvale area was also endorsed by the Council as a project that demonstrates the benefits of multiple government agencies and non-profits working together to deliver enhanced services to address pockets of high unemployment. Finally, the Council has endorsed the implementation of the Arizona Management System (AMS) within ARIZONA@WORK Job Centers as a measure to support system efficiency.

4) Assessment and Evaluation of Programs and One-Stop Program Partners

Among the hallmarks of excellence in WIOA is that “One–Stop Centers (or American Job Centers) provide excellent customer service to job seekers and employers and focus on continuous improvement” (U.S. Department of Labor https://www.doleta.gov/wioa). To this end, ARIZONA@WORK partner programs must not only ensure that job seeking and business clients have a high quality experience but must integrate shared primary indicators of performance into service delivery models at all levels.

A) Assessment of Core Programs

WIOA prescribes six primary indicators of performance for the core programs. Currently, Title I and Title III programs have overlapping performance measures and utilize the same data reporting system and sources. Titles II (Adult Education/Literacy) and IV (Vocational Rehabilitation) have separate measures and separate reporting systems.

Arizona established a taskforce in the fall of 2014 comprised of core program professionals to begin discussions on aligning and coordinating data systems. The taskforce has discussed each of the indicators, existing reporting systems, and the unique identifiers required in order to utilize available systems to minimize burden in collecting and analyzing data for reporting purposes as well as ensuring integrity in
the data reporting process. As previously noted Arizona will continue to research and identify data systems that link the four core programs for integrated reporting. Arizona will use the following performance measures required by WIOA. No federal guidance has been disseminated for the proposed employer measures, but Arizona has developed the measures listed below.

Table 29: WIOA Performance Measures – for Non–Youth Programs

</table>

12 Pursuant to WIOA, out–of–school youth is defined as 16–24, while in–school–youth is defined as 14–21, unless defined differently by a core program.
3. Number of businesses whose worksites have been visited by an ARIZONA@WORK Business Services Representative.

B) Assessment of One-Stop Partner Programs

Partner programs will be assessed based on their statutory performance and reporting requirements. Partner programs will be asked to make such reports available on request to workforce partners and the Council.

Partner programs will also be assessed based on meeting commitments outlined in MOUs.

The Council will review achievement of locally determined performance targets and measures of effectiveness. In the context of these reviews, the Council may review performance of partner programs and apply criteria such as:

- Provision of assessments and referrals
- Availability of complete client record
- Service to individuals with barriers
- Staff development in alignment with competencies and training identified by core partners
- Customer satisfaction

C) Previous Assessment Results

Following are the statewide outcomes for the two preceding years for the core programs:

**WIOA Title I–B – Adult, Dislocated Worker, and Youth Programs**

With the implementation of WIOA came new performance goals. Performance outcomes for PY2016 are expected to be available in October 2018.

D. Evaluation

WIOA stakeholders are committed to collaborating with key partners to create and coordinate data-driven policy solutions. Effective evaluation methods and research projects can improve policy solutions by highlighting the success or challenges to existing programs, and, therefore, will be a large function of WIOA planning in the future.

The Workforce Arizona Council (Council), the Department of Economic Security (DES), the Arizona Department of Education (ADE) and the newly formed Arizona Commerce Authority Office of Economic Opportunity (ACA/OEO) will work together to develop and implement future WIOA core program evaluations and research projects. ACA/OEO was created, in part, to help streamline the state’s workforce programs and will provide support to the Council’s Measuring Effectiveness Committee in its efforts to evaluate the effectiveness of the workforce system. Statewide evaluation of programs and effectiveness of operations will take place at the Council’s Measuring Effectiveness Committee, however, it has a vested interest in ensuring local boards have the necessary tools to evaluate local performance on a more regular basis.

As LWDBs express research needs for implementation efforts, the state agencies will coordinate to ensure a comprehensive approach is taken. Any research requests will be provided to the Council’s Measuring Effectiveness Committee so that it may identify common areas of need and discuss how best to share and implement best practices across the state. The goal will be to build capacity within the state’s LWDA’s to conduct more research projects independent of the state so that information can be generated and shared more expediently.

Before program evaluations and research projects can be effectively established, an increase in cross-agency data coordination between core partners is required. Arizona is in the initial stages of developing a longitudinal workforce data system. The objective is to provide access to de-identified workforce and education data via the Arizona Workforce Evaluation Data System (AWEDS) to support program and policy evaluation. As the state continues to develop workforce data matching capabilities between core partners through AWEDS, more in-depth analysis on the impact of workforce programs on the long-term success of individuals will be conducted.

5) Distribution of Funds for Core Programs

A) For Title I Programs

i) Youth activities in accordance with WIOA section 128(b)(2) or (b)(3)

Every year, typically in March or April, U.S. DOL issues a Training and Employment Guidance Letter (TEGL) that lists the state allotment for WIOA programs and outlines allowable uses and funding limits for the program year. Arizona utilizes WIOA Title I funds in accordance with WIOA and the relevant TEGL; inter-governmental agreements are used as the legal mechanism to pass through funds to the LWDAs.
• WIOA permits the state to hold up to 15 percent of each program’s funding, prior to allocation to the LWDAs. Out of the 15 percent, the state can use up to 5 percent for allowable administrative costs; the remaining 10 percent can be set aside for other allowable statewide reserves.
• For Youth and Adult Programs, 85 percent is directly allocated to the LWDAs.
• For the Dislocated Worker Program, 80 percent is directly allocated to the LWDAs, and 20 percent is held for the Rapid Response Program.

Arizona employs a discretionary formula to allocate each program’s funds to the LWDAs. Each year, the Council reviews five funding options for the Youth and Adult Programs and six options for the Dislocated Worker Program and Rapid Response. Under each option for Youth and Adult, 70 percent of the allocation is based on a standard formula through U.S. DOL. The remaining 30 percent is based on other data factors allowed under Federal regulation. For Youth and Adult programs, the 30 percent data factors ratios vary by option but are the same ratios year after year.

• Option 1: 100% of the 30% is based on Economically Disadvantaged Youth/Adults respectively.
• Option 2: 100% of the 30% is based on Areas of Substantial Unemployment.
• Option 3: 50% of the 30% is based on the Economically Disadvantaged and the remaining 50% is based on Area of Substantial Unemployment.
• Option 4: 75% of the 30% is based on the Economically Disadvantaged and the remaining 25% is based on Area of Substantial Unemployment.
• Option 5: 25% of the 30% is based on the Economically Disadvantaged and the remaining 75% is based on Area of Substantial Unemployment.

For both the Youth and the Adult allocations, a hold harmless provision is applied. The hold harmless provision states that a local area cannot receive less than 90 percent of its relative share based on the average relative share of the total LWDA’s allocation from the previous two funding years. Arizona takes an average of the last two years’ funding to level out sizable fluctuations that can happen in funding from year to year.

ii) Adult and training activities in accordance with WIOA section 133(b)(2) or (b)(3)

See Section A.1. Youth Activities.

iii) Dislocated worker employment and training activities in accordance with WIOA section 133(b)(2) and based on data and weights assigned

Every year, typically in March or April, U.S. DOL issues a Training and Employment Guidance Letter (TEGL) that lists the state allotment for WIOA programs and outlines allowable uses and funding limits for the program year. Arizona utilizes WIOA Title I funds in accordance with WIOA and the relevant TEGL; intergovernmental agreements are used as the legal mechanism to pass through funds to the LWDAs.

• WIOA permits the state to hold up to 15 percent of each program’s funding, prior to allocation to the LWDAs. Out of the 15 percent, the state can use up to 5 percent for allowable administrative costs; the remaining 10 percent can be set aside for other allowable statewide reserves.
For the Dislocated Worker Program, 80 percent is directly allocated to the LWDAs, and 20 percent is held for the Rapid Response Program. Of the 20 percent held for Rapid Response, 10 percent is sent to the LWDAs, and the other 10 percent is reserved by the State.

Arizona employs a discretionary formula to allocate each program’s funds to the LWDAs. Each year, the Council reviews six options for the Dislocated Worker Program and Rapid Response. The Dislocated Worker allocation will be subject to the hold harmless provision in future funding years but has not been in the past. The hold harmless provision states that a LWDA cannot receive less than 90 percent of its relative share based on the average relative share of the total local area’s allocation from the previous two funding years.

Arizona takes an average of the last two years’ funding to level out sizable fluctuations that can happen in funding from year to year. For the Dislocated Worker and Rapid Response funds, the entire respective allocations are based on Unemployment Concentration, Long Term Unemployed, Declining Industries, and Employment data factors, with each option varying the weighted percentage. The options for Dislocated Worker and Rapid Response are weighted identically.

- **Option 1:** 80% is weighted on Unemployment Concentration, 5% is weighted on Long Term Unemployed, 10% is weighted on Declining Industries, and 5% is weighted on Employment.
- **Option 2:** 50% is weighted on Unemployment Concentration, 1% is weighted on Long Term Unemployed, 48% is weighted on Declining Industries, and 1% is weighted on Employment.
- **Option 3:** 5% is weighted on Unemployment Concentration, 5% is weighted on Long Term Unemployed, 80% is weighted on Declining Industries, and 10% is weighted on Employment.
- **Option 4:** 1% is weighted on Unemployment Concentration, 1% is weighted on Long Term Unemployed, 95% is weighted on Declining Industries, and 3% is weighted on Employment.
- **Option 5:** 10% is weighted on Unemployment Concentration, 10% is weighted on Long Term Unemployed, 60% is weighted on Declining Industries, and 20% is weighted on Employment.
- **Option 6:** 10% is weighted on Unemployment Concentration, 10% is weighted on Long Term Unemployed, 20% is weighted on Declining Industries, and 60% is weighted on Employment.

Once these options are developed, DES submits recommendations to the Council based on the principles of least harm and widest benefit. The Council approves the final selection of funding options. Whichever option is chosen for Dislocated Worker must also be chosen for Rapid Response.

### B) For Title II Programs

#### i) Multi-year grants or contracts

The Arizona Department of Education (ADE) is the State’s eligible agency for adult education and literacy programs. ADE is responsible for administering funds and providing program and performance oversight to grantees (see Arizona Revised Statute 15-232 and 15-234).

To allocate grant funds available under section 222(a)(1) for PY 2017/2018 to local providers, ADE will conduct a competitive Request for Grant Application (RFGA) process to award multiyear grant contracts to eligible providers. The grants will be awarded on a cycle that is a minimum of three years and all providers will be subject to the same funding cycle. Note: A contract extension process will be conducted with current adult education providers for PY 2016–2017.
The purpose of the multiyear grant contracts awarded through the RFGA process is to enable local adult education providers, as core partners of Arizona’s workforce system, to develop, implement and improve adult education and literacy services throughout the state to further the vision and goals as outlined in this State Plan and in the Arizona Adult Education Mission to prepare learners for success in college, career and life, and Arizona Adult Education Goals as described below:

- **System Goal:** The Arizona Adult Education System is an integral component of Arizona’s educational pipeline leading to postsecondary education and career pathways.
- **Profession Goal:** Arizona Adult Educators empower adult learners to transition to postsecondary education and livable–wage employment.
- **Instruction Goal:** Arizona Adult Education Instruction prepares adult learners for success in postsecondary education and the workforce.

Eligible providers, in adherence to WIOA, are organizations with demonstrated effectiveness in providing adult education and literacy activities and may include:

- A local education agency;
- A community–based organization or faith–based organization;
- A volunteer literacy organization;
- An institution of higher learning;
- A public or private non–profit agency;
- A library;
- A public housing authority;
- A non–profit institution that is not described above and which has the ability to provide adult education and literacy activities to eligible individuals as described in WIOA;
- A consortium or coalition of the agencies, organizations, institutions, libraries, or authorities described above; and
- A partnership between an employer and an entity described above.

The distribution of funds across the state will be determined by LWDAs, as designated by the Governor, and the amount for each area will be based on demographic data and needs analyses pertaining to the target population of adult learners to ensure that addressing the purpose of WIOA is the basis for funding decisions.

To determine if an applicant organization demonstrates effectiveness in providing services that improve the skills of low-literate adults, all applicants will be required to submit data that supports the applicant’s effectiveness in improving the academic skills of adult learners. Prior recipients of ADE adult education funds will be required to submit data from the State’s data management system to demonstrate how the State-negotiated performance measures for all NRS levels were met. New applicant organizations will be provided forms to use to submit data and evidence demonstrating their effectiveness in improving the academic skills of adult learners. All applicants will also be required to demonstrate a record of improving the knowledge and skills needed for learners to successfully transition to postsecondary education, training and/or employment. Each applicant will be reviewed to determine if the standard of demonstrated effectiveness is reached and only those applicants reaching the standard will be funded.

The thirteen factors below and described in WIOA, Title II, Sec. 231 (e) will be used to determine funding decisions:
• The degree to which the eligible provider would be responsive to:
  o Regional needs as identified in the local plan under section 108; and
  o Serving individuals in the community who were identified in such plan as most in need of adult education and literacy activities, including individuals:
    ▪ Who have low levels of literacy skills; or
    ▪ Who are English language learners.

• The ability of the eligible provider to serve eligible individuals with disabilities, including eligible individuals with learning disabilities;

• Past effectiveness of the eligible provider in improving the literacy of eligible individuals, to meet state–adjusted levels of performance for the primary indicators of performance described in section 116, especially with respect to eligible individuals who have low levels of literacy;

• The extent to which the eligible provider demonstrates alignment between proposed activities and services and the strategy and goals of the local plan under section 108, as well as the activities and services of the ARIZONA@WORK partners;

• Whether the eligible provider’s program:
  o Is of sufficient intensity and quality, and based on the most rigorous research available so that participants achieve substantial learning gains; and
  o Uses instructional practices that include the essential components of reading instruction.

• Whether the eligible provider’s activities, including reading, writing, speaking, mathematics, and English language acquisition instruction delivered by the eligible provider are based on the best practices derived from the most rigorous research available and appropriate, including scientifically valid research and effective educational practice;

• Whether the eligible provider’s activities effectively use technology, services, and delivery systems, including distance education in a manner sufficient to increase the amount and quality of learning and how such technology, services, and systems lead to improved performance;

• Whether the eligible provider’s activities provide learning in context, including through integrated education and training, so that an individual acquires the skills needed to transition to and complete postsecondary education and training programs, obtain and advance in employment leading to economic self–sufficiency, and to exercise the rights and responsibilities of citizenship;

• Whether the eligible provider’s activities are delivered by well–trained instructors, counselors, and administrators who meet any minimum qualifications established by the state, where applicable, and who have access to high–quality professional development, including through electronic means;

• Whether the eligible provider’s activities coordinate with other available education, training, and social service resource in the community, such as establishing strong links with elementary schools and secondary schools, postsecondary educational institutions, institutions of higher education, LWDBs, ARIZONA@WORK Job Centers, job training programs, social service agencies, business, industry, labor organizations, community–based organizations, nonprofit organizations, and intermediaries for the development of career pathways;

• Whether the eligible provider’s activities offer flexible schedules and coordination with federal, state, and local support services (such as child care, transportation, mental health services, and career planning) that are necessary to enable individuals, including individuals with disabilities or other special needs, to attend and complete programs;

• Whether the eligible provider maintains a high–quality information management system that has the capacity to report measurable participant outcomes (consistent with section 116) and to monitor program performance; and

• Whether the LWDAs in which the eligible provider is located have a demonstrated need for additional English language acquisition programs and civics education programs.
The timeline below for conducting the competitive RFGA process was determined to allow coordination of Title II providers with local area planning efforts to ensure that adult education participates in local plan development prior to the implementation year. The proposed timeline is:

- December 2016, release of application for funding in PY 2017–2018
- December 2016 through January 2017, plan development
- January through February 2017, review process conducted with local workforce board
- February 2017, application due
- March 2017, evaluation results and determination of awards (pending State Board of Education approval)
- April 2017 through June 2017, successful applicants engage in local planning to prepare for July 1, 2017 implementation
- July 1, 2017, begin implementation of programs and services according to grant contract

ii) **Ensure direct and equitable access**

ADE is committed to conducting a competitive Request for Grant Application (RFGA) process that ensures direct and equitable access to all eligible providers competing for Title II grant contracts. Information regarding the application and process will be made available broadly via a public website and through press releases. An adequate amount of time to complete the application will be allowed, based on best practices as determined by ADE’s procurement department. Submittal of applications will be done in a manner that allows equitable access to all individuals, including those with disabilities.

Eligible providers, in adherence to WIOA, are organizations with demonstrated effectiveness in providing adult education and literacy activities and may include:

- A local education agency;
- A community–based organization or faith–based organization;
- A volunteer literacy organization;
- An institution of higher learning;
- A public or private non–profit agency;
- A library;
- A public housing authority;
- A non–profit institution that is not described above and which has the ability to provide adult education and literacy activities to eligible individuals as described in WIOA;
- A consortium or coalition of the agencies, organizations, institutions, libraries or authorities described above; and
- A partnership between an employer and an entity described above.

Applications will be evaluated based on a scoring rubric as described in the application. The evaluation team members shall consist of a variety of diverse professionals, including members unaffiliated with Arizona’s prior Adult Education system. Award amounts will be determined by area demographic and needs analyses to ensure that addressing the purpose of WIOA is the basis for funding decisions.

General Education Provisions Act (GEPA) Statement: Each applicant requesting funds will be required to include a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its federally–assisted program for students, teachers, and other program beneficiaries.
with special needs. Section 427 GEPA highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, applicants will determine whether these or other barriers may prevent participation in the program or activities, and the steps to be taken to overcome identified barriers must be included in the application.

C) **Title IV Vocational Rehabilitation**

DERS is the designated state agency and Rehabilitation Services is the designated state unit responsible to administer the VR services portion of the State Plan. Vocational Rehabilitation is a combined state unit; therefore, there is no need to distribute funds to separate VR programs.

6) **Program Data**

A) **Data Alignment and Integration**

i) **State plans to make the management information systems for the core programs interoperable to maximize the efficient exchange of common data elements to support assessment and evaluation**

**Research and Assessment of Current Status**

It has been identified that Arizona core partners currently utilize three distinct programs across the four core programs. Title I–B (Adult, Dislocated Worker and Youth Programs) and Title III, Wagner–Peyser Employment Service, utilize the AJC system, developed by AJLA to manage all aspects of case management, data recording, and performance reporting for the programs. Title II Adult Education programs utilize the Arizona Adult Education Data Management System (AAEDMS) through Benchmark to enter student demographic, performance and class data as required for Federal reporting. Title IV, Vocational Rehabilitation, has developed a comprehensive system with Libera, Inc., called System 7. Case, vendor, procurement, and financial management modules are built into System 7 and information is captured for federal reporting purposes. Each of the programs is currently in multiyear contracts with the respective data management vendors.

**Management Information Systems Inter–Operation for Core Programs**

Core partners will continue to work together in an effort to identify technological tools for linking datasets in order to maximize efficiency and the exchange of information. Preliminary exploration indicates that two possible options exist to manage data across core programs:

- **Option 1** – Develop a web–based system that leverages the existing data management systems of the state for maximum secure data sharing with minimal new cost investment. A web–based system meets the unique and combined needs of the core partners by facilitating client identification, streamlined access to participant information, and data collection across core programs.
- **Option 2** – Develop a support system to facilitate data sharing between current systems. A process of data alignment and integration is being investigated in an effort to begin to analyze data from across all core programs and formulate a standard template for the exchange of common and required data elements. Data used for program analysis would be matched based on the “record
linkage" technique where program files are processed electronically and individually identifiable data is matched from different databases. Following the data matching process the data would be de-identified as the purpose of the linkage process is to develop aggregate statistics, program performance, or other program analysis.

The state will work toward Option 1 while presently implementing Option 2 in order to meet the immediate requirements of WIOA performance management and program reporting. Data sharing agreements are currently being developed in order to maximize the efficient exchange of common data elements. Additionally, research is being conducted to determine how to implement a single identifier for participants that would be shared across all programs. A single identifier currently exists between Title I and Title III, which use the same data management system. Title IV has also begun using the same data management system and a single identifier is available for Title IV if clients who are enrolled in a program tracked in the data management system. There is no data-matching with Title II at this time, however the opportunity for Title II to register students in the data management system when they are job-ready would create a single identifier with a program in which the student is enrolled. It is anticipated that a single identifier will allow client files to be exchanged across programs in order to serve clients effectively as well as conduct necessary research and reporting functions.

ii) **State plans to integrate data systems to facilitate streamlined intake and service delivery to track participation across all programs included in this plan**

Each of the core partners will continue to gather client and programmatic information as required in terms of the partners’ programmatic regulations, rules, and statutes. In order to ensure streamlined intake and service delivery a list of standard intake data elements will be developed, which will facilitate direct agency-to-agency transfer of information to serve clients. DES/DER, as the designated state administrative entity for Title I and Title III funding, will update state policies to ensure streamlined and unified intake and assessment processes. All partners are responsible for initiating a streamlined intake and assessment process, and the state policies will be developed with input from the core partners. Adult Education and VR will mirror these processes in their respective policies or requirements for vendors.

Each LWDB is responsible for the development, execution, and maintenance of a Memorandum of Understanding (MOU) with the core and required partners as mandated by WIOA. These MOUs will facilitate collaboration across core partners and will provide the basic structure for cooperation and a seamless delivery of service provision for mutual clients.

iii) **State board assistance of the governor in aligning technology and data systems across required one-stop partner programs (including design and implementation of common intake, data collection, etc.) and how such alignment will improve service delivery to individuals, including unemployed individuals**

One component of WIOA implementation that will require extensive partner collaboration concerns the alignment of technology and data systems. The Council will remain informed of challenges and progress made by workforce partners as they align technology and data systems across the mandatory ARIZONA@WORK partners by assigning this oversight task to a subcommittee. The Council subcommittee is envisioned to be supported by implementation and subject matter experts from the core partner agencies who can address critical implementation activities and issues. Technical support will involve presentations on the status of data collection issues, information concerning core partner plans for addressing data and technology constraints, and status updates on data alignment progress. This
structure will result in a Council that is well-informed and able to address the challenges Arizona faces in meeting alignment goals, notably the state’s goal to align ARIZONA@WORK partner technology and data systems.

**iv) State plans to develop and produce the reports required under section 116, performance accountability system (WIOA section 116(d)(2))**

At this time, real-time reporting is not possible due to multiple data systems and lack of participant identifiers. Until system interoperability is fully realized, the core partners will create a work plan identifying required data elements, timelines for transmission, and responsible parties for all partners to meet WIOA reporting requirements. All partners will submit data to DERS for data collection and submission of combined reports.

**B)**

**C) Assessment of Participants’ Post-Program Success**

Arizona will use the federal measures required by WIOA Section 116. Data elements are captured by the data systems used by the core partners. Three of the four core partners are housed in the same agency (DES), which also houses the Unemployment Insurance Program. Therefore, they have access to the wage and employment records. Adult Education is able to access this data through a data sharing agreement with DES. In addition, the ACA/OEO will enter into an MOU on data sharing with DES to assist programs and educational institutions with access to client outcomes data after program exit.

Follow-up services are provided up to 12 months for individuals exiting Title I-B services and 90 days for individuals exiting Title IV services. This includes tracking progress, providing support when needed, and identifying barriers to remaining in training or employment.

Arizona also conducts customer satisfaction surveys to capture the job seekers experience and discover opportunities for improvement.

**D) Use of Unemployment Insurance (UI) Wage Record Data**

Arizona uses quarterly wage data record information as a mechanism to measure progress on state and local performance measures. DES has access to information from the Wage Record Interchange System and the Federal Employment Data Exchange System and utilizes this information to obtain wage data and history of employment.
E) Privacy Safeguards

Each program has confidentiality requirements surrounding the release of records. A proposal to amend state statute has been put forth, which will allow workforce partners to share Unemployment Insurance data in order to effectively conduct assessment and evaluation of workforce and education programs. The core partners are committed to cooperating and finding solutions to address all barriers to data sharing as they arise. Concurrent to the legislative process, a key initial goal will be to establish a data sharing agreement between the Department of Education’s Adult Education program and DES programs. The data sharing needed between the core programs involves both the establishment of agreements to facilitate the use of Unemployment Insurance data to measure program performance and the ability to share data regarding clients being served.

All partners agree to maintain the privacy and confidentiality of all participant information according to federal laws and regulations, which include, but are not limited to, the following:

- 29 U.S.C. 2935, as amended by WIOA reports, recordkeeping, and investigations.
- 20 CFR Part 603, safeguards and security requirements regarding disclosed information under Unemployment Compensation.
- 20 CFR 617.57(b), regarding disclosure of information under the Trade Act.
- 34 CFR 361.38, protection, use and release of personal information of VR Services participants.
- 2 CFR 200.303, regarding reasonable measures to safeguard protected personally identifiable information.

Finally, a recommendation to develop a data governance committee will be made to the Council. This committee will be able to identify, examine, and evaluate the needs of the workforce system and provide recommendations on technology that supports interoperability and real-time data exchange across partners while upholding the privacy safeguards of each of the partner programs.

7) Priority of Service for Veterans

In accordance with 20 CFR 1010, veterans and eligible spouses must receive Veterans’ Priority of Service (VPOS). Veterans and eligible spouses are referred to as “covered persons.” VPOS means when clients indicate they are a veteran or an eligible spouse of a veteran, they are to be placed next in line for services ahead of non-covered persons. It is the SWA’s responsibility to ensure that covered persons are made aware of and given priority of service.

Front desk staff will follow the steps outlined in the Veterans Priority of Service Front Desk Staff Aid (ESA-1200):

- Identify covered persons who must receive priority of service.
• Identify covered persons with significant barriers as this population is served by veteran staff.

• Inform appropriate staff, following local office procedures that a covered person is in need of services.

The DES/DERS will conduct an initial assessment of the client to determine the level of services needed. Services are based on the needs of the covered person and may include core, intensive, or training services, and/or assistance with eliminating barriers to employment.

The DES/DERS will provide services to include:

• Provide the covered person with a Veterans’ Priority of Services ID Card (ESA-1184D) and explain clients are to present the ID card each time the client visits a local office to alert staff of their priority.

• Register and complete an in-depth assessment using the integrated services delivery system ensuring the client is accurately identified as a covered person.

• Determine through the in-depth assessment the level of services needed.

• Review any services that are available to the covered person.

• Complete appropriate referrals to assist the client.

• Record services in the integrated services delivery system.

• Document the Veterans Priority of Services qualifying category of the covered person and the requested services as noted on the Priority of Service Assessment form in the integrated services delivery system case notes.

The DES Training Unit provides training for staff in ARIZONA@WORK Job Centers and Employment Service facilities to ensure new and existing staff understand Veterans’ Priority of Service policy and procedures and how to serve and refer covered persons. In addition, information for veterans’ priority of service is also available on the AJC website.

8) Addressing the Accessibility of the One-Stop Delivery System for Individuals with Disabilities

ARIZONA@WORK Job Centers are overseen by DES and monitored annually to ensure accessibility for individuals with disabilities. The State is committed to making all services, facilities and information accessible for individuals with disabilities. This applies to all programs, activities, and services provided by or made available to potential employees, volunteers, contractors, service providers, licensees, clients, and potential clients within the ARIZONA@WORK system. To reinforce this commitment, all recipients and service providers are required to provide written assurance in their agreements, grants and contracts that they are committed to and will comply with the requirements of the Workforce Innovative & Opportunity Act (WIOA) Section 188, Americans with Disabilities Act (ADA), Rehabilitation Act of 1973, and with 29 CFR Part 32 and Part 38.
The State WIOA EO Officer utilizes the ADA Checklist for Existing Facilities 2010 to review all ARIZONA@WORK Job Centers for accessibility. The Non-Discrimination Plan (NDP) directs all EO officers in the LWDA to ensure that the written assurances of the sub-recipients are followed and in compliance with the ADA requirements for both facility and activity accessibility for individuals with disabilities.

9) Addressing the Accessibility of the One-Stop Delivery System for English Language Learners

Both the LWDAs and DES have policies and procedures to correctly handle LEP individuals. The LWDAs are required as a part of the Code of Federal Regulations (CFRs) and the State of Arizona Non-Discrimination Plan (NDP) to have developed and implemented a process of utilizing a language line, interpreters, or translators to be made available upon request or when needed in order that LEP individuals have the same communication of information as the English speaking individuals. Local area policy and procedures are reviewed during the monitoring reviews by the State WIOA EO Officer for acceptance. WIOA policy and procedure is in compliance with 29 CFR 38.9 of the regulations. Support is required for languages spoken by a significant number or portion of the population eligible to be served or likely to be encountered. LWDA must translate vital information in written materials into these languages and make the translations readily available in hard copy, upon request, or electronically such as on a website. The vital information these materials contain can be provided to LEP participants by oral interpretation or summarization. For other languages not spoken as frequently in the area, information will be supplied as the need arises or upon request. Staff Training is required by the NDP to be done at minimum annually by either the LWDA Equal Opportunity (EO) Officer or the State WIOA EO Officer. Generally the State WIOA EO Officer does training via an annual Technical Assistance Conference held by DES/DERS for purposes of making sure all EO Officers are up to date with the latest changes or new procedures available to them. It is the responsibility of the LDWA EO Officer to make sure the local staff is aware of their requirements to assist a client to file a discrimination complaint and ensure it is done properly. LWDAs engage in additional activities to ensure that the needs of LEP participants are met. This can include workshops in Spanish, referring customers to English Language Acquisition Training classes in the community, or instruction in Vocational English as a Second Language.

IV) Coordination with State Plan Programs

Arizona has a strong history of agency collaborations to address local unmet needs and to mobilize around common goals. LWDA staff convenes key stakeholders to address a community, industry sector, and/or social–economic issue. Goals and objectives for a particular project or initiative are established to measure achievement. ARIZONA@WORK partners must build upon this collaborative spirit to better blend missions and program objectives. They must be willing to adapt to a shared understanding of what they are working to achieve that may slightly differ from individual agency missions and goals.

For example, connecting job seeker talents to business needs through an economic development lens means new businesses will locate in Arizona and existing businesses will remain. Through the human services or social service lens, it can mean that a long–term public assistance recipient has broken the cycle of poverty by gaining new skills and securing entry-level employment. In the end, these shared clients (job seeker and business) find each other, but the approaches may differ. Both approaches are
important, and it is critical that there is a clear understanding among ARIZONA@WORK partners for whom to employ these approaches and when. To remain relevant in this role to connect the shared clients, workforce partner agencies must collectively and continually reset and redefine roles. This will require more clearly identifying each other’s strengths and differences. Some differences are inherent in agency missions that may not be impactful to the larger workforce network while others may indicate a unique strength. To ensure that shared clients have the best possible access to address their needs, other ARIZONA@WORK partner programs will:

- Commit to supporting creating an integrated and unified workforce system;
- Identify common goals and planned achievements;
- Determine specific roles to include individual agency assets;
- Identify what data is needed to measure progress, how it will be collected, and how it will be used; and
- Agree upon common language and common definitions to minimize confusion among shared clients.

\[ ) \text{Common Assurances (for all core programs)} \]

1. The State has established a policy identifying circumstances that may present a conflict of interest for a State Board or local board member, or the entity or class of officials that the member represents, and procedures to resolve such conflicts; Yes

2. The State has established a policy to provide to the public (including individuals with disabilities) access to meetings of State Boards and local boards, and information regarding activities of State boards and local boards, such as data on board membership and minutes; Yes

3. The lead State agencies with optimal policy-making authority and responsibility for the administration of core programs reviewed and commented on the appropriate operational planning elements of the Unified or Combined State Plan, and approved the elements as serving the needs of the populations served by such programs; Yes

4. (a) The State obtained input into the development of the Unified or Combined State Plan and provided an opportunity for comment on the plan by representatives of local boards and chief elected officials, businesses, labor organizations, institutions of higher education, the entities responsible for planning or administrating the core programs, required one-stop partners and the other Combined Plan programs (if included in the State Plan), other primary stakeholders, including other organizations that provide services to individuals with barriers to employment, and the general public, and that the Unified or Combined State Plan is available and accessible to the general public; (b) The State provided an opportunity for review and comment on the plan by the State Board, including State agency official(s) for the Unemployment Insurance Agency if such official(s) is a member of the State Board; Yes

5. The State has established, in accordance with WIOA section 116(i), fiscal control and fund accounting procedures that may be necessary to ensure the proper disbursement of, and accounting for, funds paid to the State through allotments made for the core programs to carry out workforce development activities; Yes
6. The State has taken appropriate action to secure compliance with uniform administrative requirements in this Act, including that the State will annually monitor LWDAs to ensure compliance and otherwise take appropriate action to secure compliance with the uniform administrative requirements under WIOA section 184(a)(3);  **Yes**

7. The State has taken the appropriate action to be in compliance with WIOA section 188, Nondiscrimination, as applicable;  **Yes**

8. The Federal funds received to carry out a core program will not be expended for any purpose other than for activities authorized with respect to such funds under that core program;  **Yes**

9. The State will pay an appropriate share (as defined by the State board) of the costs of carrying out section 116, from funds made available through each of the core programs;  **Yes**

10. The State has a One-Stop certification policy that ensures the physical and programmatic accessibility of all One-Stop centers with the Americans with Disabilities Act of 1990 (ADA);  **Yes**

11. Service providers have a referral process in place for directing Veterans with Significant Barriers to Employment (SBE) to DVOP services, when appropriate; and  **Yes**

12. Priority of service for veterans and eligible spouses is provided in accordance with 38 USC 4215 in all workforce preparation, development or delivery of programs or services funded directly, in whole or in part, by the Department of Labor.  **Yes**
VI) Program-Specific Requirements for Core Programs

Adult, Dislocated Worker, and Youth Activities under Title I-B

a) General Requirements

1) Regions and Local Workforce Development Areas

A) Identify the regions and the local workforce development areas designated in the State.

Title I workforce services are provided through twelve LWDAs and their boards. LWDBs are responsible to contract with community-based human services and educational providers to deliver services to Arizonans seeking assessment, training, and assistance with the job search.

The following twelve LWDAs, also designated as regions, are serving Arizona.

- ARIZONA@WORK – Coconino County
- ARIZONA@WORK – Maricopa County
- ARIZONA@WORK – Mohave County, La Paz County
- ARIZONA@WORK – Nineteen Tribal Nations (consortium of 13 tribes)
- ARIZONA@WORK – Northeastern Arizona (Navajo, Apache, Gila Counties)
- ARIZONA@WORK – City of Phoenix
- ARIZONA@WORK – Pima County
- ARIZONA@WORK – Pinal County
- ARIZONA@WORK – Santa Cruz County
- ARIZONA@WORK – Southeastern Arizona (Graham, Greenlee, Cochise Counties)
- ARIZONA@WORK – Yavapai County
- ARIZONA@WORK – Yuma County
ARIZONA@WORK – Local Workforce Development Areas*

*Mohave and La Paz Counties

Coconino County

Yavapai County

City of Phoenix

Maricopa County

Pinal County

Pima County

Santa Cruz Co.

Northeastern Arizona: Navajo, Apache, and Gila Counties

Southeastern Arizona: Graham, Greenlee, and Cochise Counties

B) Processes used for designating LWDAs, including procedures for determining whether the local area met the criteria for “performed successfully” and “sustained fiscal integrity” in accordance with 106(b)(2) and (3) of WIOA, and used for identifying regions and planning regions under section 106(a) of WIOA including a description of how the State consulted with the local boards and chief elected officials in identifying the regions.

The Local Governance Policy describes the requirements for Local Workforce Development Area Designation and the process for submitting a Local Workforce Development Area Designation Request.

**LOCAL WORKFORCE DEVELOPMENT AREA DESIGNATION REQUEST:** A new or existing LWDA (an area previously designated under WIA) must request designation as a LWDA in writing to the Governor’s Office. Workforce Development Area Designation Petitions submitted to the DES also will be accepted during the period of transition from WIA to WIOA. The written request or petition must include:

- A Chief Elected Official Agreement for Consortia as described in this policy, (if applicable);
- For newly configured workforce areas, a narrative regarding how the area meets the considerations outlined in Section 106(b)(1)(B);
- For existing workforce areas, certification that the area performed successfully and sustained fiscal integrity for the two–year period preceding enactment of WIOA (July 1, 2012–June 30, 2014);
- A list of Local Board members, to include composition categories and contact information;
- Identification of grant recipient/fiscal agent and signature of lead official;
- Documentation that public input was solicited and any comments received; and
- Signatures of chief elected officials from the petitioning counties.

Written requests from LWDAs will be received and reviewed according to the following process:

- All formal written requests (including Workforce Development Area Designation petitions) must be submitted to the Governor, with a carbon copy to the Executive Director of the Workforce Arizona Council and DES/DERs.
- Petitions will be reviewed by the executive committee for the State Workforce Development Board and by the full State Board.
- A public comment period will be advertised and commence with opportunity for comment by representatives of LWDBs, chief elected officials, businesses, institutions of higher education, labor organizations, other primary stakeholders, and the general public regarding the designation of the local area (20 CFR 679.240).
- After the required public comment period, the Council will make a recommendation to the Governor.
- Final designation of LWDAs will be made by the Governor.

**Existing Workforce Areas:** Per WIOA 106(b)(2), the Governor will approve a request for re-designation as a local workforce development area from any area that was designated as a local area for the two-year period preceding enactment of WIOA, performed successfully, and sustained fiscal integrity. Re-designation will be for a period of two years.

**Newly Configured Workforce Areas:** Per WIOA 106(b)(4), the Governor may approve a request from any unit of general local government (including a combination of such units) for designation as a local...
workforce development area if the State Workforce Development Board determines, based on the considerations described above, and recommends to the Governor, that such area should be designated.

Per Section 106(e)(1), the term performed successfully means the local area met or exceeded the established levels of performance for each of the last two consecutive years for which data are available.

Per Section 106(e)(2), the term sustained fiscal integrity means that the Secretary has not made a formal determination, during either of the last two consecutive years, that either the grant recipient or the administrative entity of the area misexpended funds provided under WIA due to willful disregard of the requirements of the provision involved, gross negligence, or failure to comply with accepted standards of administration.

Designation of Regions

The Council adopted a Regional Designation Policy that allows for each LWDA to be designated its own planning region for the first year of implementation. Following the first year, the Council will re-evaluate this policy and determine whether or not creating regions makes sense from a state and local perspective. This was done to allow the system time to adjust to new structures and to evaluate impacts of the final WIOA regulations, which have not yet been released.

Prior to the Council being seated, the State produced research on the creation of regions and participated in discussions with the 12 LWDAs. The 12 LWDAs then conferred with one another and their respective Boards, ultimately creating the recommendation for a temporary designation of single area regions. The Council, once seated, adopted this policy at the request of the LWDAs and for the purposes of doing a more thorough review of the concept prior to providing a more robust recommendation to the Governor. The Council still strongly encourage LWDAs to participate in regional partnerships during the first year of implementation.

C) Appeals process as referred to in section 106(b)(5) of WIOA relating to designation of LWDAs

The Local Governance Policy describes the requirements for LWDA Designation and the process for submitting a Local Workforce Development Area Designation Request. The Policy further specifies the Appeals policy and procedure in case a request for LWDA Designation is not granted.

Appeals: In accordance with WIOA 106(b)(5), if an existing workforce area requests, but is not granted, designation as a local workforce development area, the unit of general local government (including a combination of such units) or grant recipient may submit a written appeal to the State Workforce Development Board within 20 days of receiving written denial notification. Appeals submitted after this time will not be considered.

The appealing entity must explain why it believes the denial is contrary to the provisions of WIOA 106(b)(2). No other cause for appeal will be considered. The Council must consider and respond in writing to such an appeal within 20 days of its receipt.

If the petitioning entity is again denied such designation, further appeal to the Secretary of Labor may occur if the entity alleges that the area meets the requirements of WIOA 106(b)(2) or that the entity
was not accorded procedural rights under the State appeal process described herein. All such appeals to the Secretary must be submitted within 15 days of receipt of the notification of denial by the Council on behalf of the Governor. The appealing entity must simultaneously notify the Governor and the Council of such an appeal to the Secretary. The Secretary will make a final decision within 30 days after the appeal is received. The Secretary will notify the Governor and the appellant in writing of the Secretary’s decision.

D) Appeals process as referred to in section 121(h)(2)(E) of WIOA relating to determinations for infrastructure funding

If core partners do not reach agreement on infrastructure funding, the process determined by the Governor must be utilized. In accordance with section 121 (h)(2)(E) of WIOA and 20 CFR Part 678.750, an appeals process will be established for an ARIZONA@WORK partner to appeal the determination of the portion of funds to be provided. The ARIZONA@WORK partner must submit the appeal to the Council as follows.

**Appeals:** In accordance with WIOA 121(h)(2)(E), if an ARIZONA@WORK partner wishes to appeal the Governor’s determination regarding the ARIZONA@WORK partner portion of funds to be provided for one-stop infrastructure costs, the ARIZONA@WORK partner may submit a written appeal to the Council within 30 days of the Governor’s determination. Appeals submitted after this time will not be considered.

The appeal may be made on the grounds that the Governor’s determination is inconsistent with proportionate share requirements in 678.735(a), the cost contribution limitations in 678.735(b), or the cost contribution caps in 678.735(c). The appealing entity must explain why it believes the determination is contrary to the provisions of WIOA 121(h)(2)(E). No other cause for appeal will be considered. The Council must consider and respond in writing to such an appeal within 30 days of its receipt.

2) Statewide Activities

A) State policies or guidance for the statewide workforce development system and for use of State funds for workforce investment activities

Arizona’s administrative policies are posted on the DES website. These include policies on the ARIZONA@WORK System, Local Governance, Service Integration, and ARIZONA@WORK Job Center Certification. The Local Governance Policy has been revised to be WIOA compliant. The Council has approved seven policies regarding WIOA implementation. These policies can be found on the Council webpage. Draft regulations and TEGLs provide guidance for the use of State funds for workforce investment activities.

B) State intentions concerning the use of Governor’s set aside funding; how the State will utilize Rapid Response funds to respond to layoffs and plant closings and coordinate services to quickly aid companies and their affected workers, and layoff aversion strategies implemented to address at risk companies and workers
WIOA funding includes a ten percent allocation for Governor’s Set Aside Funding, to be used for required and allowable statewide training and employment activities. Arizona will use these funds for the required statewide activities:

- **Support Rapid Response activities:** A state-level Rapid Response point of contact was established to monitor statewide Rapid Response activities, which are carried out by LWDA coordinators. Funding will be provided for maintaining an automated system for accessing rapid response activities information, staff support at the state level, and technical assistance to LWDA.

- **Arizona supports this activity with the State Reserve of Rapid Response Funds.** Arizona will develop and implement layoff aversion strategies to include expanding partnerships. Arizona will continue to conduct Rapid Response Roundtables, to promote and improve a proactive layoff aversion framework and guidance. LWDA will partner with businesses to identify risk of layoff and provide solutions for aversion strategies to retain employees.

- **Disseminate the Eligible Training Provider List (ETPL) and maintain the website:** A portion of the funds will be used to maintain and continuously update the ETPL website with the most current information on training programs and providers, including registered apprenticeship programs, in order to give individuals a variety of training programs and occupational choices customized to their needs. The website will include information on the cost of attendance, including tuition and fees. Youth providers are not included in the statewide list; LWDA will maintain their own list of eligible youth providers in accordance with WIOA Title I–B policy.

- **Disseminate information on a variety of strategies and practices,** including:
  - Information identifying eligible providers of OJT, customized training, incumbent worker training (see draft regulations § 680.780) internships, paid or unpaid work experience opportunities (see § 680.170) and transitional jobs (see § 680.830);
  - Information on effective outreach and partnerships with business;
  - Information on physical and programmatic accessibility for individuals with disabilities (see WIOA sec. 134(a)(2)(b)(v)(VI)).

- **Evaluate WIOA activities for Youth, Adults, and Dislocated Workers and promote methods for achieving high–level performance:** Technical assistance will be provided through technical assistance sessions with workshops conducted by DES and federal speakers. WIOA staff from LWDA will exchange information about effective, innovative methods to provide services to WIOA participants and achieve high levels of performance (WIOA sec. 134(a)(2)(B)(vi)) under WIOA sec. 116(e), consistent with the requirements found under draft federal regulations § 682.220.

- **Provide technical assistance to LWDA in carrying out activities described in the State Plan, including coordination and alignment of data systems used to carry out the requirements of this Act.**

- **Assist LWDA, ARIZONA@WORK Job Center operators, ARIZONA@WORK partners, and eligible providers, including development of staff, staff training to provide opportunities for individuals with barriers to employment to enter in–demand industry sectors or occupations and nontraditional occupations, and the development of exemplary program activities (see WIOA sec. 134(a)(2)(B)(IV)).**

- **Assist LWDA with carrying out the regional planning and service delivery efforts required under WIOA sec. 106(c).**

- **Assist LWDA by providing information on and support for the effective development, convening, and implementation of industry and sector partnerships.**
• Provide technical assistance and capacity building funds to assist LWDAs that have failed to meet or may fail to meet performance levels in any of their program initiatives. DES will also provide technical assistance to LWDAs by evaluating their data to enable them to improve performance levels.
• Carry out monitoring and oversight of activities for services to Youth, Adults, and Dislocated Workers under WIOA Title I, and which may include a review comparing the services provided to male and female youth (WIOA sec. 129(b)(1)(E)).
• Operate a fiscal and management accountability system: Internal database systems used for MIS, evaluating performance measures and tracking expenditures will be updated and maintained.
• Submit required state and federal reports. Existing database systems will be updated to meet the state and federal reporting requirements.

Optional activities funded by administrative and Governor’s Set Aside funds will include:

• America’s Job Link Alliance (AJLA) hosting of AJC system;
• Development of AJC Fiscal Link component;
• Arizona Registered Apprenticeship Program activities;
• Helping to establish career pathways; and
• Program rebranding.

C) State policies and procedures to provide Rapid Responses in cases of natural disasters including coordination with FEMA and other entities

The DES WIOA Policy Manual, Section 400: Rapid Response, includes information on the National Dislocated Worker Grant (DWG), and how to apply for the DWG and for the coordination of services through the Federal Emergency Management Agency (FEMA). Also provided is information that the LWDAs should include in their DWG application to assist them with the application process. In the event of a natural disaster, the State Coordinator and the local Rapid Response Coordinator will discuss the DWG application to ensure that the policy is followed.

D) State provision of early intervention (e.g., Rapid Response) to worker groups on whose behalf a Trade Adjustment Assistance (TAA) petition has been filed (Section 134(a)(2)(A)), including State dissemination of benefit information to provide trade-affected workers in the groups identified in the TAA petitions with an accurate understanding of the provision of TAA benefits and services in such a way that they are transparent to the trade-affected dislocated worker applying for them (Trade Act Sec. 221(a)(2)(A) and Sec. 225; Governor-Secretary Agreement) and State use of funds that have been reserved for Rapid Response to provide services for every worker group that files a TAA petition

Rapid Response provides early intervention to worker groups on whose behalf a TAA petition has been filed:

• Rapid Response teams consist of TAA, WIOA Title I–B and Wagner–Peyser Employment Service representatives, who as a team conduct on-site presentations at the employer location (whenever permissible). Every effort is made to provide information sessions prior to the commencement of the lay-offs/closures. These presentations consist of overviews of the benefits
and services that can be expected from each of the partner groups. During these sessions the emphasis is on how TAA, WIOA Title I–B and Wagner Peyser staff will be working together as a team to offer the customer individualized comprehensive re–employment benefits and services.

- Whenever possible after a lay–off occurs, Intake/Orientation sessions for the TAA and WIOA Title I–B programs are co–led and combined so the customer is being co–enrolled and observes firsthand the service integration between the two programs.

- As soon as a petition is certified, the TAA Coordinator works with the employer to get a list and contact information of all affected workers. The TAA Region office notifies all workers of their potential benefits and services available, provides program information and an application to be completed and sent back, in order to determine individual eligibility. Urgency is stressed as there are deadlines for certain benefits under the TAA program. Once an application is received, the Determination of Eligibility is completed and sent to the individual, along with the contact information for the TAA Counselors.

- The TAA Coordinator shares information with the Rapid Response Coordinator regarding the TAA petition. Rapid Response funds are used for these activities.

b) Adult and Dislocated Workers Program Requirements

1) State is utilization of work-based training models (e.g. On-the-job training, Incumbent Worker training, Transitional Jobs, and Customized Training) as part of its training strategy State strategies for how these models ensure high quality training for both the participant and the employer

Arizona will utilize alternative training models as a training services option for the Adult and Dislocated Worker programs. These will provide Adults and Dislocated Workers work experience, opportunities to learn new transferable skills and job placement. Alternative training models also benefit local employers by helping to reduce training costs, employee turnover, and to avert layoffs.

LWDAs will continue to promote alternative training models that have been successful in the past such as on–the–job training and customized training. Moving forward, Arizona will also explore other work based training models provided under WIOA, such as incumbent worker training and transitional jobs. The LWDAs will review the options and their specific advantages to determine how to utilize these training options effectively. Alternative training models for Arizona include:

- OJT will be utilized by the LWDAs to provide participants work experience, new transferable skills, and job placement upon successful completion of the training program. These opportunities are ideal for individuals with barriers, which can include disabilities.

- LWDAs may reimburse employers up to 50 percent of the worker’s wages. Employers that provide OJT are required to hire participants that successfully complete training. LWDAs also have the flexibility to increase the reimbursement to 75 percent when factors, as described in TEGL 19-16, are met and documented. Employers that provide OJT are required to hire participants that successfully complete training.

- Incumbent worker training will be utilized to avert layoffs by transitioning employees to other positions that will not be eliminated and create backfill opportunities for less-skilled employees. Incumbent worker training will be utilized to avert layoffs by transitioning employees to other positions that will not be eliminated. Rapid Response Coordinators will discuss with employers
who have notified the state and LWDAs of imminent layoffs. The option of training employees in new skills to transition the employee into other positions and avert layoff. Twenty percent of the LWDA’s total Adult and Dislocated Worker funds may be used for incumbent worker training. Employers that participate in incumbent worker training are required to retain employees who successfully complete training.

- Customized training will be utilized to assist employers in training current employees and participants referred to the employer by the LWDAs. Customized training may cover topics such as the introduction of new technologies, new production or service procedures, as well as upgrading to new jobs that require additional skills. Customized training will also be used as an incentive to attract businesses to relocate to Arizona. Employers will be required to pay for a significant portion of the training costs based on the number of employees participating, the wage, and other factors. Customized training will require a commitment from the employer to hire the participants after successful completion of the training program.

- Transitional jobs will be utilized to serve individuals with chronic unemployment, poor work history, and severe barriers to employment. Transitional jobs will allow the participant to establish a work history, demonstrate work success and develop skills that lead to unsubsidized employment.

To ensure high quality training for both the participant and the employer, priority consideration will be given to training programs that are related to an in-demand occupation, aligned with career pathways and industry sectors and result in a recognized postsecondary credential. LWDAs are required to collect performance data on work-based training programs. LWDAs must not continue to contract with employers who fail to provide participants long term employment opportunities, with wages and benefits, and working conditions comparable to other employees who have worked a similar amount of time, doing the same type of work. LWDAs will monitor employer onsite contracts to ensure training, wages, hours, benefits, and working conditions are provided in accordance with the contract. Training participants’ performance and progress will be monitored during the training to determine supportive service needs, the appropriateness of the training activity and if placement in unsubsidized employment has occurred.

2) **State incorporation of Registered Apprenticeship Programs into its strategy and services**

DES will promote registered apprenticeship programs as a training strategy to build WIOA participants skills and establish pathways to high levels of employment and wages. Registered apprenticeship programs are industry-driven models that combine on-the-job learning with job-related instruction. This “earn and learn” approach to training allows participants to obtain employment and start to earn wages from the first day of training. Upon completion of a registered apprenticeship program, apprentices achieve a national, industry-recognized credential and 91% of completed apprentices are retained by their employer.

By utilizing registered apprenticeship programs as a workforce strategy, Arizona will be able to meet the needs of businesses and support sector strategies and career pathways. Registered apprenticeship programs can be designed to meet the needs of any business and help businesses by building a pipeline of qualified workers. The Arizona Office of Registered Apprenticeship and DES Business Service representatives with support from staff at LWDAs will work with industry and businesses in Arizona to encourage the growth of apprenticeship program opportunities and expand apprenticeship training in a wide range of related occupations. Registered apprenticeship programs currently include careers in healthcare, informational technology, transportation and energy. Arizona plans to focus on non–
traditional apprenticeships, specifically in manufacturing, health care, information technology, hospitality, and Insurance industry, to address the needs of employers as well as maintaining robust construction apprenticeships. This should also help attract more female apprentices and other underrepresented groups. Similar to other work–based training options, registered apprenticeship programs are a training model that may be a good fit for individuals with barriers to employment.

Registered apprenticeship programs receive automatic approval for the ETPL. By listing registered apprenticeship programs on the ETPL, the registered apprenticeship program’s information is available to LWDA staff and participants on the AJC, and this valuable training option can be discussed in the development of the Individual Employment Plan proposed for program participants. LWDAs will promote registered apprenticeship programs by providing participants with information for programs that are located within in the local area and by educating participants on the benefits of participating in a registered apprenticeship program.

WIOA Title I-B training services may be used in conjunction with registered apprenticeship programs, including:

- Developing an ITA may for a participant to receive training through a registered apprenticeship program;
- Developing an OJT contract with a registered apprenticeship program for training participants. OJT contracts are made with the employer or registered apprenticeship program sponsor, and registered apprenticeship programs generally involve both classroom and on-the-job instruction. The OJT contract may be made to support some or all of the OJT portion of the registered apprenticeship program;
- Providing a combination of an ITA to cover the classroom instruction along with an OJT contract to cover on-the-job portions of the registered apprenticeship program is allowed; and
- Using incumbent worker training for upskilling apprentices or journey workers who already have an established working/training relationship with the registered apprenticeship program.

3) **Procedure, eligibility criteria, and information requirements for determining training provider initial and continued eligibility, including registered apprenticeship programs (WIOA Section 122)**

Arizona’s Eligible Training Provider List (ETPL) is comprised of training programs that are approved by the LWDA and DES to provide training services to eligible WIOA Title I-B participants. Arizona is well–positioned to strengthen the ETPL, since records are maintained on AJC, the state’s labor exchange system. This allows training providers to complete an application on the AJC website, and all approved programs are available to the public and to WIOA partners on that website. The state and LWDA share the responsibility of managing the ETPL, including approving programs for initial and continued eligibility, ensuring training provider compliance, and ensuring accuracy of information, removing training providers or programs, and monitoring of training providers. LWDA’s are required to establish Local ETPL policies, which include a local appeal process for providers.

In Arizona, the State approves training providers after ensuring the providers meet the training provider eligibility requirements listed in the WIOA and State operational policy for the ETPL. These include having a physical location in Arizona and providing training for at least 12 months prior to submitting the ETPL application. In addition, training providers must maintain licenses from appropriate federal, state or
professional licensing authorities, as required by law, have a written student grievance policy and refund policy, and also maintain liability insurance to be eligible training providers.

Once the training provider is approved, each training program is evaluated individually by the ETPL Coordinator in the local area where the training provider is located. The intent is to determine if training programs meet state and local ETPL requirements, including initial performance data standards, resulting in a federally or locally recognized credential and being related to an in-demand sector or occupation in Arizona. The LWDA ETPL Coordinator reviews required ETPL program information on the application including the following: a detailed description of the program, the total cost of the program, including the cost of tuition, books, and any fees, credential information, and labor market information for the related occupation, including the minimum entry level wage and demand for the occupation in the local area, and initial performance data. Arizona uses the training program’s credential attainment rate as the performance factor for initial eligibility. Programs that are approved at the local level are reviewed for accuracy and completeness by the State ETPL Coordinator and placed on the Statewide ETPL for a one-year initial eligibility period.

LWDAs will target training programs that support industry sectors and prepare participants for jobs in identified career pathways. Using LMI, LWDAs will also determine higher paying jobs, in-demand industry sector and occupations in the local area and work with local employers to determine the minimum requirements for these jobs and the types of training and certification requirements for these positions. Using this information, LWDAs will reach out to local training providers to encourage them to add their training program to the ETPL.

All training programs listed on the ETPL (except registered apprenticeship programs) are reviewed biannually for continued eligibility in accordance with WIOA and State operational policy for the ETPL. Arizona has been consulting with LWDAs, community colleges, and other training providers on the requirements for tracking performance and gathering performance data. These conversations will continue to identify barriers and strategies for collecting the required information in a timely manner. The LWDA and the State ETPL Coordinator will review the training provider’s program performance based on the performance accountability measures, using data on all WIOA Title I-B participants who participated in the training program during the performance period. Each program’s performance will be evaluated against state performance standards to determine if the program will remain on the list.

4) State implementation and monitoring of the priority for public assistance recipients, other low-income individuals, and individuals who are basic skills deficient in accordance with the requirements of WIOA sec. 134(c)(3)(E), which applies to individualized career services and training services funding by the Adult Formula program

The WIOA Policy for the Adult & Dislocated Worker Program Section 102 outlines the Priority of Service (see excerpt below).

Prior to providing any individualized career or training services, LWDAs must determine priority of service for all individuals in the WIOA Adult program.

01 WIOA Priority Groups

Priority of service is to be determined, in order, by the following priority groups:
1. A veteran or an eligible spouse of a veteran who:
   A. Is currently receiving public assistance, or has received public assistance in the last 6 months,
   B. Is low-income, as defined in Section 101.02(A), or
   C. Is basic skills deficient, as defined in Section 101.02(B).

2. A non-veteran who:
   A. Is currently receiving public assistance, or has received public assistance in the last 6 months,
   B. Is low-income, as defined in Section 102.02(A), or
   C. Is basic skills deficient, as defined in Section 102.02(B).

3. A veteran or an eligible spouse of a veteran who is not included in WIOA priority groups identified in 102.01(A)(1) or (A)(2) above.

4. A non-veteran who is not included in WIOA priority groups identified in 102.01(A)(1) or (A)(2) above.

LWDAs may not establish policies that undermine WIOA’s focus on providing services to targeted priority of service populations. LWDAs must not set a percentage of funds that will be used to serve priority populations. The priority of service provision in WIOA applies to all Adult program formula funds for individualized career and training activities.

Local area policy must clearly state how LWDAs serve adults who do not meet priority of service criteria and how this information is tracked.

.02 WIOA Adult Priority of Service Criteria

The criteria that an adult must meet to be considered for priority of service include low-income status or basic skills deficiency.

A. An adult is low-income when he or she is:
   1. Currently receiving or has received public assistance in the last six months, either solely or as a member of a family;
   2. A member of a family whose total family income does not exceed the higher of either the poverty line or 70 percent of the Lower Living Standard (LLSIL);
   3. A homeless individual, as defined in 42 U.S.C. 14043e-2(6) of the Violence Against Women Act of 1994, or 42 U.S.C. 11434a(2) of the McKinney-Vento Homeless Assistance Act; or
4. An individual with a disability whose own income meets the income requirement in Section 104.02(A)(2), but is a member of a family whose income does not meet this requirement.

B. An adult is basic skills deficient when he or she is unable to:

1. Compute or solve problems; or

2. Read, write, or speak English at a level necessary to function on the job, in his or her family, or in society.

5) **State criteria regarding local area transfer of funds between the adult and dislocated worker programs**

The LWDA's are expected to:

- Describe the situation that necessitates transferring funds. This may include labor market information and other economic conditions that contributed to the need for the transfer.

- Explain how the transfer of funds will impact the participant level in both the Adult and Dislocated Worker Programs and provide estimates of the number of Adult and Dislocated Workers expected to be served if the transfer is granted.

- Explain the effect of the transfer on current providers of training and other services, including any impact on jointly funded employment and training programs in the local ARIZONA@WORK system.

- Describe the expected improvement percentage in WIOA performance outcomes for both funding streams, if funding is better aligned with participant needs in the LWDA. Based on the review of the form and justification the transfer is approved or denied

c) **Youth Program Requirements**

1) **State-developed criteria to be used by local boards in awarding grants for youth workforce investment activities and how the local boards will take into consideration the ability of the providers to meet performance accountability measures based on primary indicators of performance for the youth program as described in section 116(b)(2)(A)(ii) of WIOA in awarding such grants**

LWDA's are required to include youth service provider procurement criteria in their local plans. Criteria for selecting youth providers are described in the WIOA Title I–B Policy Manual, Section 300: Youth Program. The policy was developed following the established process that requires input from the LWDA's. When selecting a youth provider, LWDA's must take the following into consideration:

- Financial stability of the service provider;
Experience in successfully providing services to disconnected youth and youth with barriers to employment, including youth with disabilities;

Demonstrated success in serving youth, specifically youth with barriers and out-of-school youth;

Length of time in business;

Network of business and community partners; and

Ability to meet performance accountability measures based on performance indicators for youth.

To ensure quality, job-driven training programs are available for youth, LWDAs are also required to include criteria to be used in procuring youth training programs in their local plans, taking into consideration:

- If the training program is related to an in-demand occupation, or career pathways identified in the state and local plans; and
- If the training program results in a recognized credential.

LWDAs have the flexibility to provide WIOA Title I-B Youth Program Elements directly based on whether they can most efficiently and cost-effectively provide the elements, such as Labor Market Information (LMI), and the services that are part of the program design, including assessments, supportive services, and follow-up services. The LWDA must award such grants or contracts on competitive basis in accordance with standards found in 20 CFR 200 and 2900. LWDAs must follow the same procurement procedures used for non-federal funds.

2) **Strategies the State will use to achieve improved outcomes for out-of-school youth as described in 129(a)(1)(B), including how it will leverage and align the core programs, and Combined State Plan partner programs included in this Plan, required and optional one-stop partner programs, and any other resources available**

To expand outcomes for out-of-school youth, Arizona’s strategy includes building partnerships with organizations and programs that have previously served out-of-school youth or are currently serving out-of-school youth, and that are able to refer out-of-school to the WIOA Title I-B Youth Program. These partnerships will help to increase awareness of the WIOA Youth Program and services available in the state’s communities and increase the number of youth who apply for and receive services. Partners will also identify additional opportunities for resources sharing to reconnect youth to education and/or employment.

To expand referrals, Arizona will examine other programs that are offered through DES, such as Temporary Assistance for Needy Families (TANF) and Child Care Services, which are already providing services to out-of-school youth, and establish procedures for each program to refer youth clients to the WIOA Title I-B Youth Program.

To serve youth who have recently dropped out of school or graduated high school, Arizona will expand partnerships with the public school system, including high schools and alternative high schools in each LWDA. Through these partnerships LWDAs will establish data sharing agreements and/or a referral system for recent dropouts and graduating youth to be referred to ARIZONA@WORK Job Centers for services...
such as assistance with obtaining a high-school equivalency and/or assistance in entering employment and/or postsecondary education.

Arizona will also expand partnerships with organizations who service youth with barriers to employment in each local area to increase the number of youth who are referred to the WIOA Title I–B Youth Program with specific barriers to employment. This will mean working closely with organizations that serve runaways and homeless youth, pregnant and parenting youth, subjects of the adult or juvenile justice system, including Arizona Department of Corrections, juvenile hall and juvenile probation, foster care partners, and organizations that provide services to youth with disabilities. Arizona will be able to focus on serving youth most in need, and services provided will increase outcomes for these young adults. Arizona will also seek to increase referrals from the YouthBuild program and Adult Education programs.

3) **State strategy to ensure that all 14 program elements described in WIOA section 129(c)(2) are made available and effectively implemented**

DES will allocate Youth formula funds to the LWDAs which must be used to provide Youth Program services to eligible youth. LWDAs have the option to competitively procure or provide directly some or all of the youth workforce activities. If the LWDA chooses to award grants or contracts to youth service providers to carry out some or all of the youth workforce activities, the LWDB must award such grants or contracts on a competitive basis.

The youth program provider must determine what specific program services will be provided to each youth based on the objective assessment and the individual service strategy. Availability and implementation of each element may vary at each LWDA depending on the framework design. Local programs may leverage partner resources to provide some of the readily available program elements, however the LWDB must ensure that the program element is closely connected and coordinated with the WIOA youth program. The Workforce Services Section monitors the LWDAs annually to ensure the 14 elements are made available to youth.

The LWDBs must design the framework of youth services to ensure the required program elements support youth in the attainment of a high school diploma or its recognized equivalent, entry into postsecondary education to obtain a federally-recognized credential, and career readiness for entry into employment. The following program elements, as described in TEGL 21-16, must be provided by each LWDA or a community partner organization:

Element 1: Tutoring, study skills training, instruction and evidence-based dropout prevention, and recovery strategies that lead to the completion of the requirements of a secondary diploma, its equivalent, or a recognized postsecondary credential; Element 2: Alternative secondary school services or dropout recovery services;

Element 3: Paid and unpaid work experiences, including summer employment opportunities, employment opportunities that occur throughout the year, pre-apprenticeship programs, and on-the-job opportunities;

Element 4: Occupational skills training, resulting in a recognized postsecondary credential, which is related to in-demand sectors or occupations in the local area.

Element 5: Education offered concurrently with, and in the same context as, workforce preparation activities;
Element 6: Leadership development opportunities; Element 7: Supportive services;
Element 8: Adult mentoring;
Element 9: Follow-up services;
Element 10: Comprehensive guidance and counseling, which may include drug and alcohol counseling;
Element 11: Financial literacy education;
Element 12: Entrepreneurial skill training;
Element 13: Provision of LMI and information on in–demand industry sectors and occupations in the local area; and
Element 14: Activities that help youth prepare for and transition to postsecondary education.

4) State policy language for “requiring additional assistance to enter or complete an educational program, or to secure and hold employment” criterion for out-of-school youth specified in WIOA section 129(a)(1)(B)(iii)(VIII) and for “requiring additional assistance to complete an education program, or to secure and hold employment” criterion for in-school youth specified in WIOA section 129(a)(1)(C)(iv)(VII)

Arizona is a large state with diverse needs affected by geographic and cultural conditions. Flexibility for LWDA's is required to ensure that program delivery is adapted to local needs. State policy requires each LWDA to define the eligibility criterion “requires additional assistance to complete an educational program or to secure or hold employment” in the LWDA's local plan and in local policies.

5) State definition, as defined in law, for not attending school and attending school as specified in WIOA Section 129(a)(1)(B)(i) and Section 129(a)(1)(C)(i)

Arizona Revised Statute 15–802 requires every child between the ages of six and sixteen years to attend a school and be provided instruction in at least the subjects of reading, grammar, mathematics, social studies and science. The person who has custody of the child shall choose a public, private, or charter school or a homeschool, as defined in Arizona Revised Statutes 15–802G, to provide instruction or shall sign a contract to participate in an Arizona empowerment scholarship account pursuant to section 15–2402. For WIOA purposes, attending school applies to both secondary and postsecondary school. Individuals who are participating in Adult Education programs, Job Corps and YouthBuild are not considered to be attending school.

6) State Basic Skills Deficient definition

The Arizona WIOA Title I–B Policy Manual, Section 200: Youth Program, specifies that youth are considered basic skills deficient if key perform any of the following at or below an 8.9 grade level using a state-approved standardized test:

- Compute or solve math problems;
- Read, write, or speak English.
In addition, youth is considered skills deficient if unable to compute or solve problems, or if unable to read, write or speak English at a level necessary to function on a job, in the individual’s family, or in society, as determined in local policy.

d) Single-area State Requirements

Arizona is not a single–area state.

e) Waiver Requests (optional)

Arizona is not requesting waivers.

Title I-B Assurances

1. The State has implemented a policy to ensure Adult program funds provide a priority in the delivery of training services and individualized career services to individuals who are low income, public assistance recipients and basic skills deficient;  Yes

2. The state has implemented a policy to ensure LWDAs have a process in place for referring veterans with significant barriers to employment to career services provided by the JVSG program’s Disabled Veterans’ Outreach Program (DVOP) specialist;  Yes

3. The state established a written policy and procedure that set forth criteria to be used by chief elected officials for the appointment of local workforce investment board members.  Yes

4. The state established written policy and procedures to ensure local workforce investment boards are certified by the governor every two years in accordance with WIOA section 107(c)(2).  Yes

5. Where an alternative entity takes the place of a State Board, the State has written policy and procedures to ensure the alternative entity meets the definition under WIOA section 101(e) and the legal requirements for membership.  Yes

6. The State established a written policy and procedure for how the individuals and entities represented on the State Workforce Development Board help to determine the methods and factors of distribution, and how the state consults with chief elected officials in LWDAs throughout the state in determining the distributions.  Yes

7. The State will not use funds received under WIOA Title I to assist, promote, or deter union organizing in accordance with WIOA section 181(b)(7).  Yes

8. The State distributes adult and youth funds received under WIOA equitably throughout the State, and no local area suffers significant shifts in funding from year-to-year during the period covered by this plan.  Yes

9. If a State Workforce Development Board, department, or agency administers state laws for vocational rehabilitation of persons with disabilities, that board, department, or agency cooperates with the agency...
that administers Wagner-Peyser services, Adult and Dislocated Worker programs and Youth Programs under Title I. Yes

10. The State agrees to report on the impact and outcomes of its approved waivers in its WIOA Annual Report. Yes

11. The State has taken appropriate action to secure compliance with the Uniform Guidance at 2 CFR 200 and 2 CFR 2900, including that the State will annually monitor LWDAs to ensure compliance and otherwise take appropriate action to secure compliance with the Uniform Guidance under section WIOA 184(a)(3); Yes

Program-Specific Requirements for Wagner-Peyser Program (Employment Services)

a) Employment Service Professional Staff Development

1) State utilization of professional development activities for Employment Service staff to ensure staff is able to provide high quality services to both job seekers and employers

Arizona established a task force consisting of the four core programs –Employment Service, WIOA Title I–B, Adult Education, and VR – and comprised of Employment Service field and training staff, as well as representation from seven of the 12 LWDAs. The Task Force identified five core competencies that are integral to all core partner staff to possess throughout all service delivery areas: Partner Programs, WIOA Laws and Regulations, Career Exploration, and Customer Service/Professionalism.

Each core competency consists of learning objectives identified by the task force to establish continuity of core competencies among Employment Service staff. Training will be delivered in various formats, including, but not limited to, e–learning, in–person, computer–based, and video conference. All training modules will be delivered to staff in a variety of locations in order to assist in the reduction of travel for staff and to allow for greater efficiency and program cost savings. Desk aids and/or workbooks will be developed for Employment Service staff to reference on–the–job to provide consistent, high–quality services throughout the four core programs regardless of geographic location.

Employment Service staff is provided certification upon completion of training and includes a measurable assessment to ensure staff understands the information that has been presented and that learning objectives are attained. Additionally, Employment Service staff must complete two evaluations: a survey to determine that the intent of training has been met, and a survey to ensure that training objectives are being utilized in the field.

Arizona is also working with DES Business Service staff to address training needs to assist them in providing quality services to businesses and employers throughout the state. Business Service staff will continue to participate in sector strategy meetings to share best practices and plans to address a statewide rebranding effort to include marketing tools, business cards, customer service training, and how to accurately interpret labor market information.
2) **Strategies developed to support training and awareness across core programs and the Unemployment Insurance program, and the training provided for Employment Services and WIOA staff on identification of UI eligibility issues and referral to UI staff for adjudication**

The DES Data Security Unit has developed a designated and secure e-mail address for the Unemployment Insurance Program, which Employment Service staff use to notify them of potential issues that may require adjudication by Unemployment Insurance staff. Employment Service staff are trained to identify all potential issues that may affect a claimant’s eligibility for unemployment insurance benefits.

Dedicated Unemployment Insurance Program staff monitor the e-mail address in order to accurately investigate and adjudicate all reported potential issues. In addition, Employment Service staff have access to GUIDE where they can enter comments regarding identified potential issues for claimants, to which Unemployment Insurance Program staff have access to read.

b) **State provision of information and meaningful assistance to individuals requesting assistance in filing a claim for unemployment compensation through One-Stop centers, as required by WIOA as a career service**

Filing a new claim for unemployment compensation, filing a weekly claim, or checking the status of an existing claim is easily accomplished through the state’s web-based portal found at www.azui.com. Individuals without access to a computer may come into any comprehensive ARIZONA@WORK Job Center or DES Employment Service office to use a computer in the resource room, where staff is available to help individuals requesting assistance in filing a claim and answer questions individuals may have regarding the filing process.

c) **State strategy for providing reemployment assistance to Unemployment Insurance claimants and other unemployed individuals**

The Reemployment Services and Eligibility Assessment (RESEA) Program has replaced the Reemployment Services Program (RSP) in Arizona and is provided in 31 offices statewide. However, for claimants who are not selected for RESEA, the internet application includes a radio button for claimants to enter a full registration with Employment Services after completing their UI claim. Employment Service staff review the claimant’s information and resume to determine if reemployment services would benefit the claimant. Employment Service staff will then contact claimants and explain services available to them, including, but not limited to:

- Developing an individual employment plan;
- Providing labor market information;
- Conducting a job search;
- Providing job referrals; and
- Providing a referral to appropriate supportive services

Employment Service staff will work with claimants who are interested in receiving reemployment services and exchange contact information, as well as determine a mutually agreed-upon follow-up schedule to ensure continued communication between the claimant and staff. Employment Service staff will document all conversations and/or meetings with the claimant in AJC.
d) **State use of W-P funds to support UI claimants, and the communication between W-P and UI, as appropriate**

1) **Coordination of and provision of labor exchange services for UI claimants as required by the Wagner-Peyser Act**

   Employment Service staff is trained to efficiently and effectively respond to the needs of Unemployment Insurance claimants through a seamless transition of career services available through commonly branded ARIZONA@WORK Job Centers.

   Arizona’s efforts to increase the number of Unemployment Insurance claimants in training is a top priority. Additionally, the integration of low-skilled workers into training to support emerging and high-growth industries is being sought through partnership and apprenticeship programs. These industries include biosciences, sustainable energy, advanced manufacturing, communication/information technology, and “green” jobs.

   Arizona uses the O*Net Online occupational information network https://www.onetonline.org for up-to-date U.S.DOL LMI. More localized information, is available through the Arizona Department of Administration, at http://www.azstats.gov. Both of these resources are available for ES staff to utilize at no cost in the provision of LMI.

2) **Registration of UI claimants with the State Employment Service**

   Registration with Employment Service is required for anyone approved for UI benefits. Registration is completed for each Unemployment Insurance claimant based on the information provided during initial filing of an Unemployment Insurance claim. When registration cannot be completed in AJC for any reason, a notice is sent to the claimant with instructions regarding how to correct and activate the AJC registration in order to avoid delayed or denied Unemployment Insurance benefits.

3) **Administration of the work test for the State unemployment compensation system, including making eligibility assessments (for referral to UI adjudication, if needed), and providing job finding and placement services for UI claimants**

   Employment Service staff administers the Unemployment Insurance work test as required by §7(a)(3)(F) of the Wagner–Peyser Act. Employment Service staff conducts eligibility reviews for Unemployment Insurance claimants, during which time Employment Service staff ensures claimants are engaging in systematic and sustained effort to obtain work, by reviewing work search contacts. Potential issues regarding availability and ability to work are also reported to the Unemployment Insurance Call Center. Unemployment Insurance claimants who receive job referrals through Employment Service and do not follow-through on the referral are recorded in AJC, and the information is also reported to the Unemployment Insurance Call Center as a potential issue.

4) **Provision of referrals to and application assistance for training and education programs and resources**
Employment Service provides comprehensive, collaborative services to job seekers through the ARIZONA@WORK system, including referrals to, and application assistance for, training and education programs and resources. A referral process is in place in each ARIZONA@WORK Job Center, where Employment Service is co-located with WIOA Title I–B and other mandated partners to ensure job seekers receive appropriate services to programs and resources. Additionally, each comprehensive ARIZONA@WORK Job Center offers a resource room with the required equipment for all clients to utilize, as well as trained staff to answer questions in regards to application assistance.

e) **Agricultural Outreach Plan (AOP)**

Arizona’s Agricultural Outreach Plan includes a variety of strategies that together ensure that the full range of employment and training programs and services, delivered through the State’s ARIZONA@WORK delivery system, are accessible and meet the needs of Migrant and Seasonal Farm Workers (MSFWs). DES/DERS Employment Service will provide services through commonly branded ARIZONA@WORK Job Centers to assist MSFWs and Limited English Proficient (LEP) individuals in making career and labor market decisions, receiving support service referrals to local providers, and receiving opportunities that will improve their lives. WIOA principles will be utilized to enhance service delivery to the MSFW population in MSFW significant areas of the state through the ability to tailor services in the local area with partners who are able to provide services and meet the needs of this population. Service delivery to MSFWs will be consistent with 20 CFR 653.107, WIOA Title I final regulations, and applicable WIOA Workforce Development strategies. Program performance will be monitored continuously to ensure that outreach and program services are conducted in accordance with Federal program mandates for provision of services to MSFWs in a manner that is qualitatively equivalent and quantitatively proportionate to services provided to other categories of workers. Local plans will be developed that include how MSFWs will be served through the implementation of WIOA to ensure their needs are being met.

Employment Service staff in partnership with WIOA core and community partners, will strive to meet or exceed federal program requirements with respect to MSFW program equity and minimum service level indicators of compliance. The Employment Service mission includes assisting agricultural and non-agricultural employers in recruitment efforts and in attaining and maintaining compliance with laws and regulations impacting terms and conditions of employment in their business operations. Employment Service will focus on flexibility, customer choice, universal access and continuous improvement in developing services in commonly branded ARIZONA@WORK Job Centers to allow for self–service and staff–assisted services to MSFWs. DES/DERS will continue to develop strategic partnerships that will promote employer job orders, applicant talents, employment and training opportunities, and timely resolution of complaints, apparent violations, and other labor–related issues. Elements covered on an equitable and nondiscriminatory basis will include, but will not be limited to, MSFW benefits and protections, career guidance, vocational counseling, testing, job development, and job referral services. DES/DERS will adhere to guiding principles that ensure a system of service delivery that:

- Is individual and family driven;
- Is effectively integrated and coordinated;
- Protects the rights of families and individuals;
- Allows smooth transition between programs;
- Builds community capacity to serve families and individuals;
- Emphasizes prevention and early intervention;
- Respects clients, partners, and fellow employees;
• Is evaluated for outcomes;
• Is accessible, accountable, and comprehensive;
• Is culturally and linguistically appropriate and respectful; and
• Is strength-based and delivered in the least intrusive manner.

1) Assessment of Need

A) An assessment of the agricultural activity in the State

The top five labor-intensive crops in Arizona include broccoli, cauliflower, lettuce, celery, and cabbage.

The estimated population of MSFWs in Arizona is approximately 127,676, including dependents, and is based on the most recent “Agricultural Profile of Arizona” released by the National Center for Farmworker Health in May 2014. Arizona farm labor estimates indicate 61,233 total workers, broken down into sub–groups as follows:

• 14,988 migrant workers
• 39,890 seasonal workers
• 6,355 livestock workers

This population estimate reflects input received from the Department of Agriculture, U.S.DOL, Department of Education, Department of Health and Human Services, and Reference USA. Many organizations and government agencies that work with the MSFW population use such enumeration report data in providing services, planning, policy setting, health care support, regulatory assistance, identification of underserved areas, agricultural production, determining whether resources are appropriate to the need, and many other areas. The National Center for Farmworker Health report is used by several agencies for estimating and planning to serve the farm worker population in Arizona. To ensure the most current population data is considered, Employment Service will collaborate with other MSFW service providers and partner entities in a coordinated effort to continue to capture current information to track this population. Study updates will include information on individuals engaged in field and orchard agriculture, food processing, and horticultural specialties, and will assess the make–up of animal agriculture. Updated results will be considered to make changes as necessary to the Agricultural Outreach Plan.

Seasonal, Migrant, and Migrant Food Processor farm workers are identified, coded, tracked and referenced in service reports for the purpose of meeting compliance with Federal program requirements. Farm Labor Contractors and Farm Labor Contractor Employees, i.e., crew leaders and field foremen/supervisors, employed seasonally by more than one agricultural producer, will be coded as migrant and/or seasonal farmworkers, and services provided to them will contribute to the attainment of program indicators of compliance. DES/DERs will focus its efforts in identifying and providing services to migrant farm workers and agricultural employers. Migrant farmworkers require greater need for support services when they migrate to areas where they are not familiar with potential services and resources, while agricultural employers face concern over scarcity of farm workers due to lack of American applicants, need for immigration policy change, and immediate improvement to legislation and regulations impacting the agricultural industry.
Farm Worker Needs and Barriers

DES/DERS will continue to seek stakeholder and customer input and will engage MSFW service providers to identify, address needs, explore solutions, and collaborate to remove barriers to improved living and working conditions. Employment Service recognizes that farm workers possess specific needs and face certain barriers that result from cultural, educational, linguistic, scheduling, logistic, and other dynamics that are inherent to that population.

Farm worker needs include, but are not limited to the following:

- Timely labor market information to facilitate planning for continuous employment;
- Occupational guidance and training to maintain a job or transition into a different occupation or industry;
- Transportation to seek employment or supportive services;
- Affordable and adequate housing;
- Information from various jurisdictions on labor laws and worker rights, protections, and responsibilities;
- Supportive services to enable MSFWs to obtain and maintain employment;
- Fair and equitable conditions and supervision from trained and committed field foremen, supervisors and farm labor contractors;
- Fair and equitable pay that includes health benefits. This is a necessity for the laborers, as well as for the safety of our nation’s food supply, and for reducing health and public assistance cost; and
- Pesticide and heat stress prevention training. Barriers that confront farm workers include, but are not limited to the following:
- Decreased demand for a farm worker labor force due to innovations in automated farming, agricultural technology, and application of chemical herbicides;
- Urban sprawl resulting in farm worker job displacement without corresponding assistance for reemployment;
- Lack of timely, reliable data and information pertinent to intrastate and interstate job openings and supportive services;
- Provider service delivery hours of operation that conflict with MSFWs work schedules;
- Lack of transportation, limiting access to jobs and supportive services;
- Limited employment opportunities in rural areas, and increased competition for entry-level jobs;
- Underemployment or unemployment due to limited literacy education, LEP skills, and lack of non-agricultural job experience;
- Limited participation in support programs due to lack of understanding of eligibility and other factors, such as impact on immigration status for having utilized certain services;
- Lack of full-time, year-round work, combined with low wages, that relegates MSFWs to living below the poverty line;
- Competition from undocumented workers who work for less pay and substandard living and working conditions;
- Competition from intrastate and interstate farm labor contractors who follow migrant streams accompanied by their own farm worker crews;
- Limited educational opportunities for MSFWs and LEP individuals;
- Lack of knowledge with respect to automation (phones and computers), resulting in increasing challenges to access information, services, and benefits;
• Stigma associated with working/living a seasonal lifestyle in conjunction with crop seasons (Non-Agricultural employers expect seasonal farm workers to quit when the season starts again, and are, therefore, reluctant to hire them);
• Limited job search techniques/skills for finding jobs outside of agriculture; and
• Lack of understanding on the benefits of having a full–time, year–round job with benefits versus a seasonal job that may pay a higher per hour wage.

In addition to farmworker needs and barriers, additional factors affecting agriculture in Arizona involves growers’ concern over the affect that water shortage has had on crops, as well as a noticeable trend of seasonal workers not returning to work the following season.

B) An assessment of the unique needs of farmworkers

Data indicates that migrant farmworkers in Arizona are primarily from Mexico, Peru, Guatemala, and El Salvador. The primary languages spoken by migrant farmworkers include various dialects of Spanish, as well as English. During peak season, there are approximately 61,233 MSFWs in Arizona and as few as 23,268 MSFWs during non-peak season.

ARIZONA@WORK Job Centers will provide MSFW and LEP individuals with services including, but not limited to, assistance with the following:

• Full range of employment services, benefits, and protections;
• Utilizing job order information effectively;
• Staff–assisted activities and/or as requested or necessary when accessing self–assisted services via electronic technologies;
• Referrals to agricultural and non–agricultural jobs, training, and support services, as well as available testing, counseling, and other job development services;
• Basic information on labor rights, protections, and responsibilities with respect to terms and conditions of employment;
• Preparation and resolution of complaints on acts and/or omissions by Employment Service or other U.S. DOL funded programs;
• Preparation, acceptance, resolution, and/or referral of labor–related complaints and apparent violations in accordance with established policies and procedures;
• Referral of individual or family members to supportive services for which they may be eligible;
• Making appointments for individuals and families;
• Contact to follow–up as necessary and appropriate to provide supportive service and information to the maximum extent possible;
• Information on services available in local offices, and contact information on the nearest commonly branded ARIZONA@WORK Job Center, including PPEP/National Farmworkers Jobs Program (NFJP) WIA Section 167 program, or affiliated offices throughout the national Employment Service network;
• Resume preparation, information on how to post résumés on–line and how to conduct on–line job searches;
• Communicating between LEP individuals referred to jobs and employers;
• Utilization of Work Opportunity Tax Credit, subsidized employment resources, and other employer incentives to promote employment and job upgrades for MSFWs; and
• Connections to local agencies and resources that can assist with services needed, such as housing, medical, legal, emergency food boxes, immigration, etc.

Employment Service’s progressive plan for service delivery to MSFWs is consistent with the U.S. DOL Employment and Training Administration program equity and minimum service delivery indicators of compliance requirements. The plan places emphasis on strategies to collaborate and work with partners to ensure a seamless delivery of services for an improved and integrated ARIZONA@WORK system. Proposed service levels aim to enhance opportunities through a non–discriminatory mode of service delivery that is qualitatively equivalent and quantitatively proportionate to services provided to non–MSFWs.

Cesar A. Fandino, Area Coordinator, and Adam Soto, State Director of Operations with National Farmworker Jobs Program (NFJP) Portable Practical Educational Preparation, Inc. (PPEP) assisted DES with writing the Agricultural Outreach Plan and gathering statistical data for an assessment of the needs of farmworkers in Arizona.

2) Outreach Activities

A) Contacting farmworkers who are not being reached by the normal intake activities conducted by the employment service offices

The State’s ability to connect with the MSFW population has become quite challenging in recent years. A majority of farm workers that visit ARIZONA@WORK Job Centers have come to file for Unemployment Insurance benefits or to report a situation which has occurred in their work environment.

Out of necessity, the MSFW Outreach Worker Unit has found new and creative ways in which to better connect with this special population. Outreach activities now include:

• Conducting worker orientations at the beginning of the season to provide information on: workers’ rights, complaint information, Employment Services, training assistance, and local support services;
• Attending the Migrant Farmworker Programs offered in some school systems to support the migrant population;
• Attending health and local community activities that draw farm workers;
• Collaborating with other organizations that serve the farm worker population;
• Working closely with the NFJP Provider/ Portable Practical Education Program (PPEP);
• Posting informational flyers in laundromats, churches and stores where workers are known to congregate after work, and where farm worker families shop;
• Setting up information tables at stores and events, when farm workers are waiting for pick–up or drop–off during work days; and
• Attending job fairs and recruiting events.

B) Providing technical assistance to outreach workers

Increased collaboration between DES and other organizations, such as Department of Agriculture and Occupational Safety and Health Administration, has provided increased opportunities to offer outreach
staff with technical assistance, such as training, conferences, and additional resources, which include, but are not limited to:

- Arizona Interagency Farmworker Coalition (AIFC) Conference; and

- Various training, including, but not limited to:
  - Sexual Harassment
  - Discrimination
  - OSHA Compliance
    - Apparent Violations
    - Dealing with Difficult People
    - Housing Inspections
    - Pesticides

The service goals projected for PY 2015 have been slightly reduced and are more in line with the projected numbers of MSFWs coming into the State and the ability to complete effective outreach activities. Partner agencies dedicated to serving the MSFW population play a major part in the collaboration to assist this population. Cross-references are made between the agencies as barriers are identified to meet the farm workers’ needs. On a quarterly basis partner agencies are reporting approximately 1,600 MSFWs contacted during outreach activities.

- Outreach activities from partner agency connections include:
  - Healthcare agencies
  - Health and career fairs
  - Training opportunities
  - Community events
  - Job Fairs and recruiting events

Table 42: Service Goals Proposed for PY 2015

<table>

141
Non-Agricultural Placements 150(+) Days 110
MSFW Significant Office Reviews 100.0 %
Field Checks on Agricultural Clearance Orders 25(+) % of orders processed
Timely Processing of MSFW Complaints 90(+) % of complaints processed
MSFW Outreach Contacts 5(+) /per 8 hours of outreach conducted

C) Increasing outreach worker training and awareness across core programs including the Unemployment Insurance (UI) program and training on the identification of UI eligibility issues

See VI. Wagner–Peyser Act Program, section A.2. Strategies to support training and awareness across core programs and Unemployment Insurance Program.

D) Providing State merit staff outreach workers professional development activities to ensure they are able to provide high quality services to both job seekers and employers

Employment Service has six designated MSFW Outreach Workers that serve the significant agricultural areas. Those areas include Cochise, Graham, Maricopa, Pinal and Yuma Counties. Agricultural activities that extend beyond those Counties are also covered by the designated Outreach Workers as needed. The number of partner outreach staff is difficult to determine as some are also part of a case management system in the delivery of services. Outreach staff collaborates on site visits and events when possible to allow for the ability to share information to farmworkers that may be in attendance or expected to report for activities. This enables outreach staff an opportunity to educate and provide informational packets that will assist farmworkers when needed.

DES has numerous trainings available that provide merit staff outreach workers the opportunity to enhance professional development activities, including Effective Communication, First Aid, Communicating Through Writing, Conflict Management, and Diversity. Staff can also access free training on Microsoft® Office products, including Word, PowerPoint, Excel, and Outlook directly through Microsoft® to stay current on the latest PC applications at http://office.microsoft.com/en-us/training/.

In addition, eligible merit staff outreach workers may apply for and receive approval for the Educational Assistance Program, which may reimburse staff up to $2,500 per calendar year for costs associated with approved educational assistance. The Educational Assistance Program Policy (DES 1-27-03) and Educational Assistance Program Procedures (DES 1-27-03-01) are available to all staff on the SharePoint Policy Hub. Finally, the State Monitor Advocate is working with the DES Training Manager to gain a better understanding of further professional development activities/trainings that may be available or developed for merit staff outreach workers.

E) Coordinating outreach efforts with NFJP grantees as well as with public and private community service agencies and MSFW groups

Arizona has a very good working relationship with the WIOA Title I Section 167 grantee, Portable Practical Education Program (PPEP), in each area where there are MSFW significant offices and where outreach
activities are conducted. PPEP is already co–located in three of the commonly branded ARIZONA@WORK Job Centers in Maricopa, Pinal, and Yuma counties. Staff from PPEP have been included in the planning and implementation for establishment of the Welcome, Career/Development, and Business Service teams. Their input for the new ARIZONA@WORK Job Center functions has been valuable to ensure the proper flow of services are provided effectively to the MSFWs entering the facilities for services.

Commonly branded ARIZONA@WORK Job Centers and MSFW Outreach Workers will provide farmworker packets when conducting orientations or when meeting with an MSFW. The information provided in the packet will contain farm worker rights, information on services available in their area and includes contact information for different agencies and organizations that serve the farmworker population. Packets will contain information on services provided by Employment Service, Employment Service Complaint System and ARIZONA@WORK partner information. When the orientation is being provided on an H–2A Agricultural Clearance Order the workers will also receive a copy of the work contract that provides the terms and condition of the employment they have accepted. MSFW Outreach Workers encourage farm workers at every opportunity to take advantage of the full range of services available through the commonly branded ARIZONA@WORK system.

3) Services provided to farmworkers and agricultural employers through the one-stop delivery system

A) Providing the full range of employment and training services to the agricultural community, both farmworkers and agricultural employers, through the one-stop delivery system

i) How career and training services required under WIOA Title I will be provided to MSFWs through the one-stop centers

ii) How the State serves agricultural employers and how it intends to improve such services

As previously indicated, Employment Service’s progressive plan for service delivery to MSFWs is consistent with U.S. DOL Employment and Training Administration program equity and minimum service delivery indicators of compliance requirements. The Plan places emphasis on strategies to collaborate and work with partners to ensure a seamless delivery of services for an improved and integrated ARIZONA@WORK system. Proposed service levels aim to enhance opportunities through a non–discriminatory mode of service delivery that is qualitatively equivalent and quantitatively proportionate to services provided to non–MSFWs.

In addition to planned service delivery for farmworkers, Arizona intends to improve services to agricultural employers by working on recruitment strategies that will assist employers in the hiring process and enhancement of recall procedures for seasonal workers by:

- Making employers aware of services available to them through seminars, meetings, outreach, pamphlets, and conferences;
- Explaining the benefits of using the recall system to employers;
- Attempting to obtain a recall list of workers at an earlier date/time; and
- Participating in the Annual Farmworker Health, Information, and Service Fair.
The State Monitor Advocate and outreach specialists have successfully provided workshops and seminars in collaboration with state and federal enforcement agencies designed to increase the number of agricultural employers utilizing the one-stop system. The State Monitor Advocate and outreach specialists intend to continue using workshops and seminars to provide training to agricultural supervisors, field foremen, and farm labor contractors to help them excel in the crucial role they play in attaining and retaining a viable workforce.

Topics that are intended to be provided to agricultural employers and farmworkers through workshops and seminars include, but are not limited to:

- Overviews of the MSFW Protection Act (MSPA) enforced by the Department of Labor Wage & Hour Division,
- Field sanitation regulations by the Occupational Safety and Health Administration (OSHA),
- Occupational safety and health monitored by the Arizona Division of Occupational Safety and Health (ADOSH), and

B) **Marketing the employment service complaint system to farmworkers and other farmworker advocacy groups.**

The Employment Service Complaint System is marketed to farmworkers and other farmworker advocacy groups and is provided verbally and in writing through orientations, seminars, conferences, printed material handed out at special events, such as Dia Del Campesino and the Melon Festival, and outreach efforts provided by outreach specialists. Outreach specialists also prepare and provide packets to farmworkers containing information regarding the Employment Service Complaint System, services available to farmworkers through ARIZONA@WORK Job Centers, farmworker rights, and contact information for different agencies and organizations that service the farmworker population when they conduct outreach and field visit inspections. In addition, each ARIZONA@WORK Job Center also displays required posters informing the public of the Employment Service Complaint System in English and Spanish.

C) **Marketing the Agricultural Recruitment System to agricultural employers and how it intends to improve such publicity**

As part of a publicity improvement effort, the Agricultural Recruitment System (ARS) will be marketed to agricultural employers through informational presentations, detailed explanations, and question-and-answer opportunities at a variety of events, including, but not limited to:

- The 11th Annual CA/AZ Agricultural Employer seminar, AIFC-AZ Interagency Farmworkers seminar;
- Monthly employer round table meetings; and
- Various employer associations; such as
  - Yuma Fresh Vegetable Association (YF VA); and
  - Western Growers Association (WGA).

II) Outreach specialists will continue to conduct vigorous outreach efforts based on analyzed data.
Job seekers will be directed to facilities easily identified as part of the commonly branded ARIZONA@WORK Job Centers. Outreach policy will emphasize providing sufficient information to agricultural employers, LEP individuals, and MSFWs to enable them to exercise informed choices on accessing services through multiple physical and/or electronic entry–points. Outreach policy will afford staff the flexibility, time, tools, and training necessary to participate in joint ventures to identify and address dynamics that affect living and working conditions within farm worker communities. ES will continue to explore and utilize new technology that provides access and mobility needed to work with this unique population. The HP Tablet and mobile printer equipment is part of the mobile tool set provided to enhance MSFW outreach specialist’s efficiency and effectiveness in providing onsite service delivery to MSFWs and agricultural employers. Tablets allow MSFW Outreach Specialists to access electronic documents, guidelines, inspection check lists, and related material to conduct housing inspections and agricultural surveys. The mobile equipment has enabled outreach staff to download program specific documents, complete, and print them as they conduct outreach and field visit inspections and/or interviews with agricultural employers and farm workers. The new process has allowed for a smoother and timelier transition from the tablet to the state computer system. Printing ability is available by use of a mobile printer located in MSFW outreach vehicles. Employers and farm workers are able to sign required documents in the field. Mobile equipment has allowed for a more timely, complete, and accurate documentation, including the capability of photos and/or audio–video recording of information pertinent to outreach and complaint/apparent violation related activities. The equipment has afforded outreach staff the opportunity to download and print information of interest to farm workers, agricultural employers, and partner entities. This information includes, but is not limited to: required posters; documents and FLC paperwork; complaint and apparent violation forms; resource directories; referral documents; job orders; etc. The new equipment has become be a time saver for the staff who spend a lot of time in the field providing service to farm workers and employers.

1) Other Requirements

A) Collaboration

The State Monitor Advocate and outreach specialists will continue to develop and perform lead roles in coalitions based in agriculturally active areas to leverage resources and share knowledge of solutions in a coordinated fashion. Collaborative efforts will continue with the AIFC, a community-based non-profit corporation with a membership of approximately 50 partners including public, private, federal, and state enforcement and non-enforcement agencies, farmworkers, agricultural employers, and advocacy groups. The State Monitor Advocate and outreach specialists will continue to support coalitions and objectives to create a better understanding of issues affecting the farmworker community and will collaborate in creating forums and seminars to address issues and concerns of interest within the farmworker community.

The State Monitor Advocate and/or outreach specialists will attend monthly meetings to increase collaboration with the following agencies and work more closely on various projects and events:

- Yuma Private Industry Council (YPIC)
- NFJP PPEP
- Campesino Sin Fronteras
- Goodwill of Central Arizona
- Commite Bienestar
The State Monitor Advocate and the FLC Coordinator were involved in the research, composition, review, approval and were able to comment on the Unified State Plan sections related to service delivery to MSFWs.

B) Review and Public Comment.

Individuals and entities representing various service provider disciplines pertaining to every aspect of MSFW occupational and family life were invited to participate in the review and comment process to develop this State of Arizona Plan for Integrated Delivery of Agricultural Wagner–Peyser Services for PY 2015. Entities involved included representatives from the NFJP/WIA Section 167, community–based organizations, labor enforcement agencies, farm worker individuals and families, MSFW advocacy groups, local and state dignitaries, and program volunteers. The Arizona State Monitor Advocate and Foreign Labor Certification Coordinator (MA/FLC) was afforded an opportunity to review, approve and comment on the State Plan, policies and procedures related to service delivery to MSFWs.

A 45–day review and comment period was provided to afford listed interested entities an opportunity to provide comments, suggestions and recommendations for consideration in the development of this State Plan. Input provided was incorporated into this Plan, as appropriate. A final copy of the approved Plan will be shared with all interested partners.

C) Data Assessment

See section D.

D) Assessment of progress

Achievements based on prior plan:

- Improved collaboration with partners throughout significant MSFW areas due to the implementation plans for WIOA. MSFW staff and partners serving the MSFW population have been at the table participating in the development of Welcome and Career Development Teams. These plans have streamlined the process for all clients to receive services, especially the MSFWs;
- ES and MSFW staff has attended complaint training that now provides the opportunity to assist all job seekers and general public with labor issues. All staff is now prepared to assist with complaints when entering an ARIZONA@WORK Job Center.
- Job Order training has been developed for all staff to enhance their ability to write effective job orders;
- Recall efforts for agricultural employers has increased due to the promotion of this service and the successful outcomes;
- The FLC Unit has worked to ensure that agencies that serve MSFWs receive information pertaining to newly listed H–2A clearance orders in order to ensure that U.S. domestic workers receive the opportunity to apply for job openings;
- Creative MSFW outreach activities now include collaboration with medical facilities, food banks, and Unemployment Insurance claimants, to name a few;
- Laptops/mobile printers are effectively used in the field by the MSFW Outreach Workers in order to provide ES services, support services and documents needed to assist the workers;
- Laptops/mobile printers are effectively used to assist agricultural employers and have streamlined housing inspections, prevailing wage/practice surveying activities, provision of required posters/paperwork and the ability to sign required documents in the field;
- Seminars and workshops have been provided to the agricultural employer community to improve their knowledge of federal, state and local laws. Other topics of interest have also been provided regarding income taxes for H–2A workers, Affordable Care Act, Border Health initiatives, and training opportunities for the workers; and
- Outreach packets have been developed in Region 3 and will be carried out to implement in the other MSFW significant areas for MSFW and ES staff to provide when assisting an MSFW seeking services from the commonly branded ARIZONA@WORK system.

Areas not yet achieved, but where progress is being made:

- Service goals were not achieved as projected. Staffing changes and the timeframe needed to train new staff to effectively conduct outreach activities have affected the ability to meet the services goals. Realignment of staff in the MSFW significant areas due to the staffing issues has also been a key factor.
- Outreach strategies to increase the numbers were not met, again due to the staffing issues experienced by the loss of two State Monitor Advocates and staff in the MSFW Outreach Unit.
E) State Monitor Advocate

The State Monitor Advocate and Foreign Labor Certification Coordinator (MA/FLC) positions were combined into one position to improve the ability to monitor and serve the MSFW population and agricultural community. A new MA/FLC Coordinator has been hired. The new MA/FLC is a promotional opportunity for a current staff member who has been working in the FLC Unit. Her experience will allow for an effective transition as she already understands the MSFW population and goals, the H–2A process and has had training that will apply to her new role as the State Monitor Advocate. Realignment of all MSFW staff under the MSFW Supervisor in Yuma will provide consistent supervision and oversight of the program allowing for the achievement of goals statewide.

The State feels that staffing issues have played a major role in the ability to achieve goals set in the plan. However, the changes being made will provide the opportunity for Arizona to be successful with the new Agricultural Outreach Plan.

The State Monitor Advocate thoroughly reviewed the Arizona Agricultural Outreach Plan and has approved all policies and procedures related to the AOP.

F) Wagner-Peyser Assurances

1. The Wagner-Peyser Employment Service is co-located with one-stop centers or a plan and timeline has been developed to comply with this requirement within a reasonable amount of time. (sec 121(e)(3)); Yes

2. The State agency is complying with the requirements under 20 CFR 653.111 (State agency staffing requirements) if the State has significant MSFW one-stop centers; Yes

3. If a State Workforce Development Board, department, or agency administers State laws for vocational rehabilitation of persons with disabilities, that board, department, or agency cooperates with the agency that administers Wagner-Peyser services, Adult and Dislocated Worker programs and Youth Programs under Title I; and Yes

4. State agency merit-based public employees provide Wagner-Peyser Act-funded labor exchange activities in accordance with Department of Labor regulations. Yes

Program-Specific Requirements for Adult Education and Family Literacy Act Programs

a) Aligning of Content Standards

Arizona Adult Education has been at the forefront in developing and adopting content standards to guide what adult education students need to know and be able to do. Below is a timeline of the Arizona Adult Education Standards Initiative, including proposed “next steps” for the timeframe covered by this Plan. The timeline and next steps clearly demonstrate the level of commitment Arizona Adult Education has to a standards–based education system. Furthermore, Arizona Adult Education has many requirements and
assurances in place that require adult education providers to use the Arizona Adult Education College and Career Ready (AZ AE CCR) Standards for instruction and to align all curricular resources used for instruction to the AZ AE CCR Standards. Local providers must use 10 percent of all adult education grant funds for quality professional learning (PL) that is standards–based, job–embedded, and data–driven. Providers are required to report bi–annually on their professional learning plans and implementation. Program administrators and instructional leaders participate in annual professional learning sessions and receive on–going technical assistance to build capacity at the local program level for high quality PL focused on improving teacher effectiveness and student learning outcomes.

There are two items in the timeline that address the alignment of Arizona’s adult education standards with K–12 standards (bolded items). Also, additional information pertaining to K–12 standards in Arizona is described in the section immediately following the timeline section. Ensuring consistent expectations between K–12 and Adult Education pathways to the attainment of a secondary diploma is a priority.

Arizona Adult Education Standards Initiative Timeline:

- 1998 – 1999: Content standards in Reading, Writing, Mathematics, ESOL, and Citizenship Test Preparation are drafted and reviewed by teams of Arizona Adult Educators;
- 1999– Development of performance standards in Reading, Writing, Mathematics, ESOL and Citizenship Test Preparation begins;
- 1999– Content standards in Reading, Writing, Mathematics, ESOL, and Citizenship Test Preparation released to the field;
- 2000– Standards revised to reflect the new federal requirements: 1) additional level in ABE, 2) the division of ASE (formerly GED preparation) into two levels, and 3) the addition of two additional ESOL levels;
- 2000– Content standards in Science and Social Studies drafted and reviewed by teams of Arizona Adult Educators;
- 2000– Cadre of adult educators to support implementation of the Arizona Adult Education Standards Initiative trained (Standards Specialists);
- 2000– Curriculum alignment exemplars in Reading, Writing, Mathematics and ESOL by teams of Arizona Adult Educators;
- 2000– Required alignment of all curricula to Reading, Writing, Mathematics, and ESOL standards by July 1, 2000;
- 2002–2003– Year–long professional development for ASE teachers to align standards to new GED Test;
- 2003– Technology Standards are drafted and reviewed by teams of Arizona Adult Educators;
- 2004–2005– Technology Standards released to the field and required;
- 2008– Revised Reading, Writing, Mathematics, Science and Social Studies standards released to the field;
- 2009– Implemented new ELAA Assessment;
- 2011– Gap analysis conducted to compare AZ Adult Education Standards to Common Core Standards and Arizona K–12 Standards;
- 2011–2013– Work teams convened to revise and align English Language Arts (ELA) and Mathematics Standards to address the identified gaps resulting in release of Arizona Adult Education College and Career Ready (AZ AE CCR) Standards;
- 2013–2014– Technology Standards revised by team of Arizona Adult Educators;
• 2013–2014– EL/Civics Standards developed by team of Arizona Adult Educators;
• 2013–2014– ELAA Teacher Standards developed by team of Arizona Adult Educators;
• 2013–2014– ABE/ASE Teacher Standards developed by team of Arizona Adult Educators;
• 2013–2015– Standards–In Action training rolls out to all program administrators and ABE/ASE;
• Curriculum Alignment Project completed by all programs to analyze and align curricular resources in ELA and Mathematics to the AZ AE CCR Standards.

Arizona Adult Education Standards Initiative Next Steps:

• 2015–2016– Continue to provide Standards–In–Action Training to ELA and mathematics teachers and instructional leaders;
• 2015–2016– Design and implement an Arizona English Language Arts (ELA) Institute and incorporate the Standards–In–Action innovations into the training design;
• 2015–2016– Review current AZ AE CCR Standards in ELA and Mathematics for alignment to OCTAE CCR Standards and AZ K–12 Standards;
• 2016– Integrate the Standards–In–Action innovations and training resources into current and planned State Leadership initiatives and professional learning activities;

Additional Arizona K–12 Standards Information:

At its April 27, 2015, meeting, the Arizona State Board of Education (SBE) directed a committee consisting of representation from the Board, business community, deans of colleges, parents, classroom teachers, a school administrator, a school district governing board member, and the Superintendent of Public Instruction to examine the Arizona K–12 Mathematics and English Language Arts Standards and make any necessary changes to ensure they are vetted, approved and controlled by Arizona, and that the standards are the best for Arizona’s students. The current K–12 College and Career Ready Standards served as the starting point for this process. Additionally, the committee was charged with overseeing two subcommittees comprised of English Language Arts and Mathematics content experts for the responsibility for the technical drafting of the standards.

At its October 26, 2015, meeting, the Arizona SBE passed a motion to reverse a June 28, 2010, ruling to adopt the Common Core Standards, now referred to as the Arizona College and Career Ready Standards. While this decision severs Arizona’s ties to Common Core, it does not affect the ongoing work being conducted by the committees identified in the April SBE meeting. The current English Language Arts and Mathematics standards will remain in place until those committees have finished their work and the revised standards are adopted. According to the Arizona SBE, it is anticipated that the committees will complete their work in time for the Board to adopt the revised standards before the close of the 2015–2016 school year. As soon as possible after the adoption of the revised standards, Arizona Adult Education will align its Adult Education CCR Standards with Arizona’s K–12 standards.

b) Local Activities

Adult Education and Literacy Activities (Section 203 of WIOA)

• Adult education;
• Literacy;
• Workplace adult education and literacy activities;
• Family literacy activities;
• English language acquisition activities;
• Integrated English literacy and civics education;
• Workforce preparation activities; or
• Integrated education and training that—
  1. Provides adult education and literacy activities, concurrently and contextually with both, workforce preparation activities, and workforce training for a specific occupation or occupational cluster, and
  2. Is for the purpose of educational and career advancement.

**Adult Education in Arizona:**

Arizona state law establishes adult education as a division within the Arizona Department of Education (ADE), and ADE serves as the administrative entity for Title II, Adult Education (A.R.S. 15–232, 15–233, 15–234).

The 2010 Arizona Profile of Adult Learning, prepared by the National Center for Higher Education Management Systems, includes the following demographic data based on U.S. Census 2010 and American Community Survey information for adults in Arizona aged 18 to 64:

- 786,679 adults have no college education, are working but living in families with a combined income less than a living wage (twice the level of poverty);
- 556,103 working–age adults have not completed high school (or equivalent);
- 217,792 adults have no college education and speak English poorly or not at all;
- 120,645 adults have not completed high school, speak English poorly or not at all, and are struggling to earn a living wage; and
- Overall, approximately 25% of all working–age adults in Arizona have at least one of the basic challenges the state must address under AEFLA.

The purpose of Adult Education in Arizona under WIOA is to enable local adult education providers, as core partners of Arizona’s workforce system, to develop, implement and improve adult education and literacy services throughout the state to further the vision and goals as outlined in this State Plan, under section II (b) (1) and (2), to address the critical need in Arizona. Helping adults become self–sufficient by facilitating their improvement in educational outcomes and assisting their transition to postsecondary, including access to career pathways programs, is of primary importance. Helping adults support and participate successfully in the educational development of their children is also a primary purpose of Adult Education in Arizona.

The Arizona Adult Education Mission is **To Prepare Learners for Success in College, Career and Life**. The following three Arizona Adult Education Goals are the basis of a strategic plan that addresses and operationalizes the WIOA requirements for Title II as described in this Plan:

- **System Goal:** The Arizona Adult Education System is an integral component of Arizona’s educational pipeline leading to postsecondary education and career pathways.
- **Profession Goal:** Arizona Adult Educators empower adult learners to transition to postsecondary education and livable–wage employment.
• Instruction Goal: Arizona Adult Education Instruction prepares adult learners for success in postsecondary education and the workforce.

Note: The above goals and their corresponding indicators are outlined in section (e) State Leadership.

ADE will fund eligible providers to establish and operate local programs that provide adult education and literacy activities to serve the target populations and address the purpose and goals stated above. The State has been working for several years on increasing low-skilled individuals’ transition to postsecondary education and training, including the implementation of bridge models and career pathways pilots, and plans to continue these efforts. The State will provide funding to support the integration of bridge programs, workforce preparation activities and career pathway pilots into all adult education and literacy activities concurrently, including English language acquisition activities.

Request for Grant Application Process:

Funds allocated to local providers under WIOA section 222(a)(1) will be awarded through multiyear grant contracts by conducting a competitive Request for Grant Application (RFGA) process. The RFGA will ensure that the following components are incorporated:

• Direct and Equitable Access: ADE is committed to conducting a competitive process that ensures direct and equitable access to all eligible providers competing for Title II grant contracts. Information regarding the application and process will be made available broadly to all potential applicants via a public website and through press releases. An adequate amount of time to complete the application will be allowed, based on best practices as determined by ADE’s procurement department. Submittal of applications will be done in a manner that allows equitable access to all individuals, including those with disabilities. Furthermore, the RFGA process will include provisions that ensure that organizations not previously funded are given a fair and equitable opportunity to address the requirements of the application.

• Eligible Providers: Eligible providers, in adherence to WIOA, are organizations with demonstrated effectiveness in providing adult education and literacy activities and may include:
  o A local education agency;
  o A community–based organization or faith–based organization;
  o A volunteer literacy organization;
  o An institution of higher learning;
  o A public or private non–profit agency;
  o A library;
  o A public housing authority;
  o A non–profit institution that is not described above and has the ability to provide adult education and literacy activities to eligible individuals as described in WIOA;
  o A consortium or coalition of the agencies, organizations, institutions, libraries or authorities described above; and
  o A partnership between an employer and an entity described above.

• Coordination with Local Board: A procedure will be included in the RFGA process to ensure that the applicable Local Workforce Development Board(s) (LWDB(s)) reviews the application, prior to its submittal to the State, and provides comments and/or recommendations regarding the
application’s alignment to the strategies and goals of the local plan under section 108 of WIOA. This process did occur with LWDBs providing feedback to ADE/AES regarding if the applicant addresses regional needs and strategies as identified in the local plan.

- **Funding Considerations and Evaluation of Applications:** The thirteen factors in WIOA, Title II, Sec. 231 (e) will be used as the basis to determine funding decisions. Applications will be evaluated using a scoring rubric that includes these thirteen factors, the Plan’s alignment to the LWDB(s) strategies and goals, and the description of strategies and activities that promote concurrent enrollment with Title I services, fulfill ARIZONA@WORK partner responsibilities, collect data and meet performance indicators, and provide services to meet the needs of the target population.

- **General Education Provisions Act (GEPA) Statement:** Each applicant requesting funds will be required to include a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. Section 427 (GEPA) highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, applicants will determine whether these or other barriers may prevent participation in the program or activities, and the steps to be taken to overcome identified barriers must be included in the application.

Scope, Content, and Organization of Local Activities:

All funds received by local providers are to be used to:

- Establish and operate programs that provide adult education and literacy services to learners meeting the statutory definition of an “eligible individual” as defined in Section 203.

An “eligible individual” means an individual who

- Has attained 16 years of age;
- Is not enrolled or required to be enrolled in secondary school under Arizona State Law (A.R.S. 15–802);
- Meets Arizona state eligibility requirements under A.R.S. 15–232 B, and
- Is basic skills deficient;
- Does not have a secondary school diploma or its recognized equivalent and has not achieved an equivalent level of education; or
- Is an English language learner.

- Provide the following services and activities:

  - Adult Basic Education (ABE): Instruction in reading, writing, and math to eligible individuals with educational functioning levels at a particular ABE literacy level listed in the NRS educational functioning level table.
  - Adult Secondary Education (ASE): Instruction in reading, writing, science, social studies, math and problem solving to eligible individuals with educational functioning levels at a particular ASE literacy level listed in the NRS educational functioning level table.
Participation in ASE activities also must be designed to lead to the attainment of a secondary school diploma or its equivalent and transition to postsecondary education, training or employment for applicable individuals.

- English Language Acquisition (ELA): Instruction in reading, writing, speaking and comprehension of the English language to eligible individuals with educational functioning levels at a particular ELA literacy level listed in the NRS educational functioning level table. Participation in ELA activities also must be designed to lead to the attainment of a secondary school diploma or its equivalent and transition to postsecondary education, training or employment for applicable individuals.

- Integrated English Literacy and Civics Education (IEL–CE): Instruction in English language that is integrated with civics education to eligible individuals who are English language learners, including those who are professionals with degrees or credentials in their native countries, and may include workforce training.

- Workforce Preparation: Instruction that is designed to help eligible individuals acquire a combination of skills including basic academic, critical thinking, digital literacy, and self-management skills. Participation in workforce preparation activities also must be designed to lead to employability skills and the development of competencies in using resources and information, working with others, and understanding systems to successfully transition to and complete postsecondary education, training and employment.

- Integrated Education and Training: A program of study with instruction that is delivered across three components: 1) adult education and literacy, 2) workforce preparation activities, and 3) workforce training (within the employment and training services authorized by Title I–B). It is also based on occupationally relevant materials for the purpose of educational and career advancement. Participation is intended for eligible individuals at all skill levels, including adults with low academic skills.

- Implement evidence and research based strategies that accelerate learning and promote readiness for postsecondary education and employment:

  - Standards–Based Instruction: Arizona Adult Education is committed to a standards–based education system. There are many requirements and assurances in place that require adult education providers to use the Arizona Adult Education College and Career Ready Standards for instruction and to align all curricular resources used for instruction to the Standards. All local providers are required to base instruction on the Arizona Adult Education Standards and also align instructional materials and resources to these standards. As described in section VI.e - State Leadership, professional development and ongoing technical assistance for local administrators and instructors will be delivered to support the implementation of standards-based instruction and the integration of bridge programs, workforce preparation activities and career pathway pilots into all adult education and literacy activities. Local providers must use 10 percent of all adult education grant funds for quality professional learning (PL) that is standards– based, job–embedded, and data–driven.

  - Technology Integration and Distance Learning: The use of technology to assist adult learners in attaining the skills needed to successfully participate in the 21st century world and to accelerate and extend student learning outside the classroom has been a priority of Arizona Adult Education for several years. All funded providers are required to integrate digital literacy skills training into classroom instruction and implement hybrid
learning models that strategically blend face–to–face instruction with distance learning activities through the use of a high quality online curriculum to all adult learners. In addition, local providers can apply to receive additional funding to provide distance education courses that do not require face–to–face instruction to adult learners who would benefit from adult education but are unable or choose not to attend class in person.

- **Career Pathways**: Develop robust career pathways that include multiple aligned programs with funding by a variety of sources and driven by industry needs as defined through sector strategies and partnerships. Entry points on these pathways must extend to adult learners with barriers such as disabilities, low basic skills, lack of a secondary diploma, and lack of English language skills.

- **Postsecondary Bridge Programs**: A program of study model with strategies specifically designed to assist adult learners, including those at the lowest academic skill levels, to successfully transition to postsecondary education and training. Formal collaborative agreements with postsecondary institutions, including community colleges, are a requirement.

- **Alignment of Services and Concurrent Enrollment**: A customer–centered and seamless approach to providing an array of services through strategic and deep collaboration with core partners and other entities in the workforce system. The implementation of programmatic and operational strategies, such as common intake, orientation and assessment, and data sharing among all partners will ensure that adult learners have coordinated access to needed systems and services.

- **ARIZONA@WORK Partnership**: By developing formal collaborative agreements with local ARIZONA@WORK Job Centers, including co–location when appropriate, adult education providers ensure that students as job seekers have access to information and services that will lead to positive employment outcomes.

**Special Rule**

Each eligible agency awarding a grant or contract under this section shall not use any funds made available under this title for adult education and literacy activities for the purpose of supporting or providing programs, services, or activities for individuals who are under the age of 16 and are enrolled or required to be enrolled in secondary school under State law, except that such agency may use such funds for such purpose if such programs, services, or activities are related to family literacy activities. In providing family literacy activities under this title, an eligible provider shall attempt to coordinate with programs and services that are not assisted under this title prior to using funds for adult education and literacy activities under this title for activities other than activities for eligible individuals.

**c. Corrections Education and other Education of Institutionalized Individuals**

ADE will award section 225 grant funds for corrections education and education of institutionalized individuals using the same Request for Grant Application (RFGA) process and timeline described for section 231 funds. ADE will award multi-year grants to eligible providers through a competitive RFGA. The grants will be awarded on a cycle that is a minimum of three years and all providers will be subject
to the same funding cycle. The review of applications will include evaluation based on the 13 considerations outlined in Title II of WIOA. All applications will be evaluated using the same rubric and scoring criteria. Special consideration will be given to eligible applicants indicating priority to serving individuals who are likely to leave the correctional institution within five years of participation in the program.

In Arizona, Corrections Education is usually funded through the Arizona Supreme Court, the Administrative Office of the Courts (AOC), and the Arizona Juvenile Justice Services Division. A very small percentage (historically less than 5 percent) of students enrolled in ADE-funded adult education programs are identified as in a correctional institution and fall under section 225. Arizona Adult Education will ensure that not more than 20 percent of funds allocated to local providers with grant contracts under section 231 will be used to carry out section 225. And, as part of the grant contract, funded providers will be required to ensure that if WIOA funds are used to provide educational services to individuals in a correctional or other institution as described in section 225, priority must be given to serving individuals who are likely to leave the correctional institution within five years of participation in the program.

While the great majority of Arizona’s adult learners are not identified as in a correctional institution, it is quite common for providers to serve individuals who have previously been incarcerated and may have additional barriers to address in order to obtain employment. Therefore, when services and activities are provided for individuals who identify as having been incarcerated, providers must incorporate strategies to address this population that evidence and research suggests will reduce recidivism.

d) Integrated English Literacy and Civics Education Program

1) State establishment and operation of Integrated English Literacy and Civics Education programs under Section 243 of WIOA, for English language learners who are adults, including professionals with degrees and credentials in their native countries

Arizona has a long history of providing English language acquisition activities and civics education under WIA. The State will build on its past success to meet the new requirements under WIOA. Eligible applicants will be required to describe how they propose to integrate English language acquisition activities and civics education concurrently and contextually. The grant application’s evaluation rubric will be designed to reward programs that provide the contextualization of English language acquisition with employability, workplace and financial literacy skills. Collaborative agreements and formal partnerships will be required as part of the grant application. Providers that are funded to deliver services to adults who are English language learners will address the requirements of fully implementing Integrated English Literacy and Civics Education (IEL/CE) as described below:

- Integration of civics engagement skills into career pathways and workforce preparation activities targeted to English language learners, including professionals with degrees and credentials in their native countries;
- Integration of educational technology and Hybrid Learning models into civics educational activities, including the use of technology and social media to increase learner opportunities for responsible civic engagement;
• Training and technical assistance on research and evidence–based instructional strategies that promote deeper learning, including the incorporation of experiential civic learning opportunities and digital storytelling;
• Collaborative agreements and formal partnerships with local area workforce system entities, including ARIZONA@WORK Job Centers, libraries, postsecondary institutions and employers; and
• Dissemination and replication of evidence–based resources and promising practices.

2) State funding, in accordance with the requirements of title II, subtitle C, of Integrated English Literacy and Civics Education services and how the funds will be used for those services

ADE will award section 243 grant funds for integrated English literacy and civics education (IELCE) programs using the same Request for Grant Application (RFGA) process and timeline described for section 231 and 225 funds. ADE will award multi-year grants to eligible providers through a competitive RFGA. The grants will be awarded on a cycle that is a minimum of three years and all providers will be subject to the same funding cycle. The review of applications will include evaluation based on the 13 considerations outlined in Title II of WIOA. All applications will be evaluated using the same rubric and scoring criteria. Applicants will provide narrative details to demonstrate how they will meet the criteria. As part of the competitive RFGA process described above and in section (b) Local Activities, applicants applying for funds to serve English language learners will also address the requirements of implementing Integrated English Literacy and Civics Education (IEL/CE) as part of the English Language Acquisition (ELAA) program. The distribution of both ELAA and IEL/CE funds across the state will be based on demographic data and needs analyses pertaining specifically to the geographic distribution of eligible individuals with language barriers in each workforce area.

e) State Leadership

1) State use of funds to carry out the required State Leadership activities under section 223 of WIOA

The State Leadership activities presented in this Plan build upon Arizona Adult Education’s experiences during the previous three years in the implementation of initiatives that assist programs in preparing Arizona learners for success in college and/or career transition and for implementation of WIOA. The Mission, Goals and Indicators below provide the vision for Arizona Adult Education under WIOA.

• Arizona Adult Education Mission: To prepare adult learners for success in college, career and life.

  o System Goal: The Adult Education System is an integral component of Arizona’s educational pipeline leading to postsecondary education and career pathways.

    ▪ Indicator I: The Arizona Adult Education System includes comprehensive services for learners to support successful transition to college and career.
    ▪ Indicator II: The Arizona Adult Education System utilizes a comprehensive data management system to increase successful transition to college and careers.
    ▪ Indicator III: The Arizona Adult Education System provides a statewide comprehensive assessment system.
• Indicator IV: The Arizona Adult Education System aligns and coordinates with core partner agencies to maximize services for learners.

  o Profession Goal: Arizona Adult Educators empower adult learners to transition to postsecondary education and livable-wage employment.

  ▪ Indicator I: The Arizona Adult Education Professional Learning System is standards-based and builds the knowledge and skills of adult educators.
  ▪ Indicator II: Arizona Adult Education recruits and retains highly effective teachers and administrators.
  ▪ Indicator III: Arizona Adult Educators build collaborative partnerships with core partner agencies to better serve adult learners.

  o Instruction Goal: Arizona Adult Education Instruction prepares adult learners for success in postsecondary education and the workforce.

  ▪ Indicator I: Arizona Adult Education instruction integrates and contextualizes skills that lead to college and career readiness.
  ▪ Indicator II: Arizona Adult Education students successfully transition to credit-bearing courses and enter/improve employment.

**Table 44: Alignment of Arizona’s planned State Leadership initiatives with the mandatory State Leadership activities as described in WIOA.**

<table>
<thead>
<tr>
<th>WIOA State Leadership – MANDATORY</th>
<th>Arizona Initiatives that Align</th>
</tr>
</thead>
</table>
| (A) The alignment of adult education and literacy activities with other core programs and one-stop partners, including eligible providers, to implement the strategy identified in the unified State plan under section 102 or the combined State plan under section 103, including the development of career pathways to provide access to employment and training services for individuals in adult education and literacy activities. | • Expand Arizona I-BEST Programs  
• ccrcedis- pilot and build statewide models  
• Postsecondary Bridge Programs- expand to statewide  
• Program Operations for CCR  
• Design and implement Adult Education Administrator Standards  
• State Civics Learning Conference in collaboration with K-12 and Maricopa Community Colleges  
• Regional Contact Directory  
• Regional Networking Initiative  
• Collaboration Building Training for Administrators  
• Joint Training System for Core Partners  
• Collaboration with the State library system and local libraries  
• Collaboration on Zip Code Project and Disconnected Youth Initiative |
(B) The establishment or operation of high quality professional development programs to improve the instruction provided pursuant to local activities required under section 231(b), including instruction incorporating the essential components of reading instruction as such components relate to adults, instruction related to the specific needs of adult learners, instruction provided by volunteers or by personnel of a State or outlying area, and dissemination of information about models and promising practices related to such programs.

- Integration of High Quality PL Models at local and State levels
- Data-driven, Research/Evidence-based PL System (Continued)
- Institutes to improve teacher effectiveness in mathematics, English Language Arts, English Language Acquisition, and Civics Education
- Continued implementation of AZ Adult Education Teacher Standards for ABE/ASE ELA and Mathematics, and ELAA
- Revised State Adult Education Teacher Certification requirements for administrators and teachers

(C) The provision of technical assistance to eligible providers of adult education and literacy activities receiving funds under this title, including—

i. The development and dissemination of instructional and programmatic practices based on the most rigorous or scientifically valid research available and appropriate, in reading, writing, speaking, mathematics, English language acquisition programs, distance education, and staff training;

ii. The role of eligible providers as a one-stop partner to provide access to employment, education, and training services; and

iii. Assistance in the use of technology, including for staff training, to eligible providers, especially the use of technology to improve system efficiencies.

- Standardized Data Collection for Core Partners
- Standardized Intake and Orientation for Core Partners
- Standardized Assessment Processes for Core Partners
- Standardized Referral Guidelines for Core Partners
- Design and implement effective Instructional Models in Career Pathways Programs of Study
- Design and implement effective Instructional Models Postsecondary Bridge Programs
- Revision of AZ Adult Education Content Standards for ABE/ASE and ELAA
- Statewide Use of Online Curricula
- Implementation of Distance and Hybrid Learning Delivery Models
- Training in Instructional Models to Support Hybrid Learning
- Training in Database and use of data for program improvement
- Use of Virtual Learning Environments
- Digital Storytelling Institutes

(D) The monitoring and evaluation of the quality of, and the improvement in, adult education and literacy activities and the dissemination of information about models and proven or promising practices within the State.

- Administrator Training
- Content and Learning Management System
- Use of Data System and Tools
- Action Research for Effective Instruction and Instructional Models
- National College Transition Network Initiative- evaluation of 2-year initiative and dissemination of best practices

Arizona’s State Leadership activities and initiatives are evaluated for effectiveness and evidence of success using documentation for each of the projects implemented. Examples include:
• Submitted project narrative reports
• Program and student outcomes
• Program monitoring tools
• Participation and usage data
• Written guidelines, memorandums of understanding, and agreements
• Forms developed and processes documented
• Technical assistance logs
• Rubrics with recorded results
• Surveys and written reflections
• Educator interviews and classroom observations

2) **State use of funds to carry out permissible State Leadership Activities under section 223 of WIOA, if applicable.**

f) **Assessing Quality**

Arizona adult education providers are evaluated on both fiscal and programmatic areas based on a model incorporating these factors:

- A cyclical system for risk assessment and monitoring;
- Monthly desk–monitoring, including data analysis and technical assistance; and
- Evidence of high quality data–driven and research–based professional learning aligned to content standards and professional learning standards.

Comprehensive Case Reviews are conducted annually in the fall. The Case Review includes an analysis of each local provider’s prior year’s performance data, applicable monitoring results and findings, professional learning plan, technology integration status, annual programmatic and fiscal reporting, and risk assessment. In addition, each provider’s status regarding collaboration with WIOA core partners will be reviewed. Local providers that do not meet the state performance measure targets or with serious issues identified are placed on a Corrective Action Plan. Providers on Corrective Action Plans work throughout the year with the state staff to plan and implement improvement efforts. This team approach has been valuable in providing comprehensive targeted technical assistance to local providers. Additionally, it allows AES staff to gain a broader view of the dynamics of each local provider and deliver consistent messages regarding program improvement.

Monitoring for compliance to federal and state requirements is an important part of the Arizona Adult Education Program Improvement model. Desk monitoring is conducted on all programs throughout the year and on–site monitoring is conducted based on risk assessment and issues identified during the case review process.

- Desk Monitoring: Monthly review and analysis of data management, submitted reports (both programmatic and fiscal), and annual teacher certification verification.
Program Reporting is part of the annual program improvement model. Each local program completes a comprehensive set of final reports on program operations, performance, professional learning, technology integration and fiscal contracts. As programs are completing their final reports they are also developing the foundation for the upcoming program year’s plan.

Arizona uses a cyclical system for technical assistance, monitoring and compliance training needs for both fiscal and programmatic areas in an ongoing program improvement model that includes: planning through contract and contract extension applications, monthly desk monitoring, case review process, corrective action plans (if needed), on–site programmatic and fiscal monitoring based on risk assessment, reflection by program by preparing Final Report.

Data Management

The Arizona Adult Education Performance Accountability System is comprised of the following components to assess the effectiveness of the local providers:

- A secure, web–based data management system that collects student demographic, participation, and outcome measures, including performance results as identified in the National Reporting System (NRS);
- A cyclical system for technical assistance, monitoring and compliance (as described above);
- Ongoing desk–monitoring and interventions for programs not demonstrating continuous achievement in student outcome measures; and
- Corrective Action Plan process to address program deficiencies in meeting outcome measures at the state’s target levels.
- As of July 1, 2016, the performance outcome measures will consist of the following indicators:
  - Percentage of program participants in unsubsidized employment during the second quarter after exit from the program;
  - Percentage of program participants in unsubsidized employment during the fourth quarter after exit from the program;
  - Median earnings of program participants in unsubsidized employment during the second quarter after exit from the program;
  - Percentage of program participants who obtain a recognized postsecondary credential or secondary credential;
  - Percentage of program participants who, during a program year are in an education or training program that leads to a recognized postsecondary credential or employment, and who are achieving a measurable skills gain toward a credential or employment; and
  - Effectiveness on serving employers.

Snapshot data is captured monthly by state staff through desk monitoring of each provider and are compared to previous year snapshots to determine performance trends and identify potential issues. Additionally, analyses of data at the state, program, site and classroom level are used to inform technical assistance and training efforts.
Data Sharing

A data sharing agreement with DES’s Unemployment Insurance (UI) Wage system for data matching for employment outcomes has been executed. This agreement is critical to supporting Arizona Adult Education’s ability to report employment outcomes for individuals enrolled in Title II programs. ADE was also able to reinstate their data sharing agreement with the National Student Clearinghouse for data matching for postsecondary outcomes. The National Student Clearinghouse, Student Tracker, is an online system providing enrollment verification services to more than 3,500 colleges and universities. Student Tracker is used to accurately track postsecondary enrollment and degrees. Adult Education Services will use the service to support federally required follow-up measures in order to measure postsecondary achievements of students enrolled in Adult Education classes.

Evaluating Quality of Professional Development

ADE has used a variety of methods to assess the quality of its professional learning and technical assistance efforts and will continue to do so under WIOA. The following are examples of assessments of quality to be used: 1) Evaluation surveys will be conducted after training and professional development events to determine satisfaction and learning; 2) Final reports and project summaries provided by local providers will be analyzed to assess the quality of implementation of initiatives; 3) Applicable outcome data of participating providers will be analyzed to determine if there was an impact to learners as a result of initiative; 4) Teacher reflections will be gathered and analyzed; and 5) Site visits and classroom observations will be conducted to observe implementation of strategies learned.

General Education Provisions Act (GEPA) Statement

Non-Discrimination Policy: The Arizona Department of Education (ADE) is committed to a work environment in which all individuals are treated with respect and dignity. Each individual has the right to work in a professional atmosphere that promotes equal employment opportunity and prohibits discriminatory practices, including harassment. Therefore, the Arizona Department of Education commits itself to a policy of Non-Discrimination.

- ADE has developed this policy to ensure that all its employees can work in an environment free from harassment, discrimination and retaliation.
- ADE will make every reasonable effort to ensure that all concerned are familiar with this policy and aware that any complaint of violation of such policies will be investigated and resolved appropriately.
- ADE will post the Equal Opportunity Policy Statement at the following locations-
  - Public Website- https://www.azed.gov/hr/
  - ADE Internal Website for employees
  - Employee bulletin boards at the four worksites (1535 W. Jefferson, Phoenix, AZ; 3300 N. Central, Phoenix, AZ; 3100 N. West Street, Flagstaff, AZ; 400 W. Congress St., Tucson, AZ)
- All employment announcements shall include the phrase, “The Arizona Department of Education is an EOE/ADA Reasonable Accommodation Employer.”
The ADE Adult Education Services (AES) Unit allocates and administers grant funds and provides program and performance oversight to grantees under WIOA Title II and A.R.S. 15-232 and 15-234. ADE/AES is committed to equal access and treatment for all employees, students and the general public by all entities funded under these grant funds. The provisions and strategies below will help to ensure that the principles of equal access and non-discrimination are applied and implemented:

- Grantee is required to submit a GEPA Statement as part of the grant application process
- Grantee signed assurances that ensure compliance with the Civil Rights Act, American Disabilities Act, GEPA, Uniform Guidance & Code of Federal Regulations, and the Family Educational Rights and Privacy Act
- Annual training and state leadership activities are provided to grantees on program processes to support equal access and non-discrimination such as intake/orientation processes, providing accommodations and adaptations, utilizing assistive technology and implementing universal design strategies in the classroom

**Certifications**

1. The plan is submitted by the State agency that is eligible to submit the plan.  
   
   Yes

2. The State agency has authority under State law to perform the functions of the State under the program.  
   
   Yes

3. The State legally may carry out each provision of the plan.  
   
   Yes

4. All provisions of the plan are consistent with State law.  
   
   Yes

5. A State officer, specified by title in the certification, has authority under State law to receive, hold, and disburse Federal funds made available under the plan.  
   
   Yes

6. The State officer who is submitting the plan, specified by the title in the certification, has authority to submit the plan.  
   
   Yes

7. The agency that is submitting the plan has adopted or otherwise formally approved the plan.  
   
   Yes

8. The plan is the basis for State operation and administration of the program.  
   
   Yes

**Certification Regarding Lobbying**

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for
influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an
officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal
contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard
Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award
documents for all sub awards at all tiers (including subcontracts, subgrants, and contracts under grants,
loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This
certification is a material representation of fact upon which reliance was placed when this transaction was
made or entered into. Submission of this certification is a prerequisite for making or entering into this
transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required
certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for
each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an
officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an
employee of a Member of Congress in connection with this commitment providing for the United States
to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure
of Lobbying Activities," in accordance with its instructions. Submission of this statement is a prerequisite
for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who
fails to file the required statement shall be subject to a civil penalty of not less than $10,000 and not more
than $100,000 for each such failure.

Applicant’s Organization    Arizona Department of Education
Full Name of Authorized Representative:  Sheryl Hart
Title of Authorized Representative:  State Director of Adult Education

SF LLL Form – Disclosure of Lobbying Activities (only if applicable)
(http://www2.ed.gov/fund/grant/apply/appforms/appforms.html). If applicable, please print, sign, and
email to OCTAE_MAT@ed.gov

Assurances

1. The eligible agency will expend funds appropriated to carry out title II of the Workforce Innovation and
   Opportunity Act (WIOA) only in a manner consistent with fiscal requirements under section 241(a) of
   WIOA (regarding supplement and not supplant provisions).  Yes

2. The eligible agency will ensure that there is at least one eligible provider serving each local area, as
defined in section 3(32) of WIOA.  Yes

3. The eligible agency will not use any funds made available under title II of WIOA for the purpose of
   supporting or providing programs, services, or activities for individuals who are not “eligible individuals”
within the meaning of section 203(4) of WIOA, unless it is providing programs, services or activities related
to family literacy activities, as defined in section 203(9) of WIOA. Yes

4. The Integrated English Literacy and Civics Education program under section 243(a) of WIOA will be
delivered in combination with integrated education and training activities; Yes

5. The Integrated English Literacy and Civics Education program under section 243(a) of WIOA will be
designed to (1) prepare adults who are English language learners for, and place such adults in,
unsubsidized employment in in-demand industries and occupations that lead to economic self-sufficiency
and (2) integrate with the local workforce development system and its functions to carry out the activities
of the program; and Yes

6. Using funds made available under title II of WIOA to carry out a program for criminal offenders within
a correctional institution, the eligible agency will give priority to serving individuals who are likely to leave
the correctional institution within five years of participation in the program. Yes

7. None of the funds made available under title II of WIOA will be expended by an entity unless the entity
agrees that in expending the funds the entity will comply with sections 8301 through 8303 of title 41,
United States Code (commonly known as the “Buy American Act”). Yes

Program-Specific Requirements for Vocational Rehabilitation

a) Input of State Rehabilitation Council

1) State Rehabilitation Council input, including input and recommendations on the VR services
portion of the Unified State Plan, recommendations from the Council's report, the review and
analysis of consumer satisfaction, and other Council reports that may have been developed as
part of the Council’s functions

1. SRC recommends that DES Vocational Rehabilitation continue their efforts to increase awareness and
provide outreach regarding VR services to individuals with disabilities (including a broad spectrum of
disability populations), while highlighting the importance of placement on the Order of Selection
waiting list. We further recommend, to preserve funds for direct services provision, DES/VR use of a
broad range of low-cost outreach modes including social media, public service announcements, guest
appearance on local television programs, announcements at professional sporting events and the like.

2. SRC recognizes and encourages further emphasis on DES/VR collaborative efforts regarding students
and youth transition with the additional focus on services to the transition population through WIOA.

3. SRC recommends that DES/VR continue to involve SRC representation in the development of and
communicate the implementation of the revised Arizona VR Strategic Plan.

4. SRC recommends that DES/VR continue efforts to identify and alleviate VR Program service provision
barriers in Arizona.

5. SRC celebrates DES/VR efforts to approach the mandated rehabilitation rate, and recommends that
DES/VR continues to strive to meet performance indicators and update the SRC on strategies being
implemented.
6. SRC recommends that DES/VR maintain partnerships with current Project 121 American Indian Vocational Rehabilitation Programs in Arizona and continue to identify opportunities and strategies to partner with tribes that do not have existing Project 121 Programs.

7. SRC recommends and supports DES/VR efforts to expand funding and access full federal matching funds to provide client services through a variety of alternative funding methodologies, including third party agreements.

2) Designated State unit response to the Council’s input and recommendations

1. DES/VR agrees with the recommendation to increase awareness and provide outreach regarding VR services to individuals with disabilities. DES/VR has developed a comprehensive three year strategic plan which includes objectives and associated activities related to increasing awareness and outreach opportunities. A strategic plan proposal to redesign the VR webpage has been presented to leadership with plans to continue working with DES to create a consistent message throughout the state. Additionally, a strategic plan committee is currently meeting to develop marketing materials that are client friendly and are easily accessible to staff for use when promoting vocational rehabilitation.

2. DES/VR agrees with the recommendation to continue to collaborate with local school districts and community providers to increase the identification of students and youth who may benefit from vocational rehabilitation services. DES/VR is currently working with Exceptional Student Services through the ADE to develop a data sharing agreement that will allow both agencies to reach out to students and youth who may benefit from the provision of services.

3. DES/VR is grateful for the continued support and involvement of the SRC in relation to the Rehabilitation Services Strategic Plan. The DES/VR Director will continue to communicate implementation progress as well as request SRC representation on Strategic Plan committees.

4. DES/VR agrees with this recommendation and is in the process of using a Revenue Maximization specialist to assist in the development of agreements which can be used for non–federal financial participation dollars in order to increase funding and reduce service provision barriers in Arizona. Additionally, Rehabilitation Services will continue to maintain current agreements and seek opportunities for new agreements with public entities.

5. DES/VR agrees with the recommendation with the knowledge that the performance indicators as mandated by WIOA will be substantially different in the future. State strategies will be developed with the required core partners to assist the statewide workforce development system in meeting programmatic, regional, and state performance levels. The DES/VR program will continue to strive to meet the negotiated performance indicators and will continue to report performance measures to the SRC.

6. DES/VR agrees with the recommendation to maintain partnerships with Project 121 American Indian Vocational Rehabilitation programs in Arizona. DES/VR also agrees to continue to develop and implement strategies to partner with tribes in Arizona and Border States in relation to the provision of VR services to mutual clients. DES/VR will continue to provide technical assistance and guidance to both 121 VR programs and other tribes who do not have existing 121 programs.

7. DES/VR agrees with the recommendation to expand funding in order to access full federal match funds and thus provide client services. DES/VR has retained the assistance of a Revenue Maximization specialist to assist in the development and implementation of agreements in an effort increase the non–federal financial participation dollars required for match. Rehabilitation Services will continue to advocate for an increase in state appropriated dollars to expand the ability to provide services and will inform the SRC of opportunities which may exist for advocacy on behalf of the DES/VR program.
3) **Designated State unit explanation for rejecting any of the Council’s input or recommendations.**

All SRC recommendations were accepted by DES/VR.

b) **Request for Waiver of Statewideness**

1) **Local public agency provision of the non-Federal share of costs associated with the services to be provided in accordance with the waiver request**

DES/VR has entered into agreements with the ADE to facilitate a seamless transition of students with disabilities from high school to the world of work. Agreements for these enhanced services are not available at every high school statewide. The Interagency Agreements include assurances that:

All funds made available to DES/VR are non–federal funds.

2) **Designated State unit approval of each proposed service before it is put into effect**

All services provided are developed, authorized, and approved by designated state agency personnel.

3) **State plan requirements (all), applicability**

All requirements as listed in the VR services portion of the Unified State Plan will apply to the services approved under the waiver.

c) **Cooperative Agreements with Agencies Not Carrying Out Activities Under the Statewide Workforce Development System.**

1) **Federal, State, and local agencies and programs**

Persons with Serious Mental Illness (SMI): An Intergovernmental Agreement between DES/VR and the Arizona Department of Health Services/Division of Behavioral Health Services exists to coordinate services to mutual clients. VR counselors are assigned to work with behavioral health clinical teams throughout the state in order to enhance service delivery and customer satisfaction in the provision of customized employment and vocational services.

Native Americans: Memorandums of Understanding with the American Indian VR Programs of the Navajo, Tohono O’odham, White Mountain Apache, Fort Mojave, Hopi, and Salt River Pima nations have been developed for the purpose of coordinating services to American Indians with disabilities that reside both on and off the reservation as well as provide technical assistance in areas of mutual interest.

Persons with Developmental Disabilities: An agreement with the DES Division of Developmental Disabilities (DDD) exists to detail the cooperation and coordination of both the referral processes and joint provision of services to persons with developmental disabilities who can benefit from VR services in terms of an employment outcome, and who require ongoing employment support from DDD.

171
Veterans: There is a Memorandum of Understanding with the United States Department of Veterans Affairs Vocational Rehabilitation and Employment Program that details the cooperation and coordination of services between DES/VR and the Veterans Administration for veterans who are disabled.

Persons with Developmental Disabilities within the Foster Care System: DES/VR and DDD have a Memorandum of Understanding to enhance program delivery methods and provide customized employment services to mutual clients within the foster care system. Coordination, cooperation and collaboration between agencies will be facilitated by dedicated staff positions in an effort to provide and expand a continuum of comprehensive vocational services to the identified population.

2) **State programs carried out under section 4 of the Assistive Technology Act of 1998**

Assistant Technology in Arizona: DES/VR contracts with Arizona Center for the Blind and Visually Impaired (ACBVI) to facilitate training and resource development for employers with a focus on the use of assistive technology for various disabilities and disability awareness. Numerous training modules have been developed and are offered to DES/VR staff, partner program staff, and employers.

Arizona Technology Access Program (AzTAP): DES/VR, in conjunction with AzTAP and ADE/Exceptional Student Services, present an annual conference that allows staff to learn about AT devices, resources, and implementation strategies, as well as increase assistive technology expertise and obtain hands on experience with devices through participation in interactive sessions.

3) **Programs carried out by the Under Secretary for Rural Development of the United States Department of Agriculture**

DES/VR is actively engaged in communication with core partners to develop collaborative processes and agreements.

4) **Noneducational agencies serving out-of-school youth**

None at this time.

5) **State use contracting programs**

Persons who are Visually Impaired or Blind: DES/VR contracts with seven vendors who provide comprehensive adjustment services to youth in transition and adults who have visual impairments. Comprehensive Transition Blindness Adjustment Programs include training in mobility, communication, personal and home management, use of assistive technology, plus self-advocacy necessary to successfully transition to the world of work.

Persons who have a Traumatic Brain Injury or Spinal Cord Injury: DES/VR works in partnership with the Governor’s Council on Spinal and Head Injury to create and implement seamless transitions for clients diagnosed with a Traumatic Brain Injury (TBI) or Spinal Cord Injury (SCI) from Rehabilitation Services’ Independent Living Rehabilitation Services program or from other referral sources (providers, hospitals, other DES/VR counselors, etc.), to the DES/VR program. The intent is to provide quality services and
supports for persons diagnosed with TBI or SCI for whom competitive and integrated employment is the goal.

Youth with Brain Injury Transition Pilot Program (YBITPP): DES/VR has a partnership with the Governor’s Council on Spinal and Head Injury to pilot a program that is designed to assist youth with brain injuries to gain confidence and acquire the skills and competencies necessary to successfully transition to adulthood and the world of work. YBITPP is intended to be offered to youth over a four year period, beginning after the completion of their freshman year in high school and ending when the youth graduates from high school.

d) Coordination with Education Officials

1) DSU plans

DES/VR is part of a multiagency Intergovernmental Agreement (IGA) that encourages and facilitates the cooperation and collaboration between DES/VR, Division of Developmental Disabilities (DDD), and the Public Education Agencies (PEA) represented by the ADE. The vision for the IGA is “to ensure a smooth and successful transition of students with disabilities to meaningful, gainful, and sustained employment, education, and community living.”

The IGA serves to establish a statewide, interagency system of transition services in order to facilitate service provision in the following areas:

- Technical assistance and consultation;
- Outreach and identification of students;
- Referral of individuals;
- Joint planning;
- Scope of individualized services; and
- Relationship management.

Under the umbrella of the IGA, DES/VR provides coordinated transition services to 22 schools throughout the state. DES/VR has 22 Third Party Cooperative Arrangements (TPCA) with PEAs to provide enhanced transition services. The TPCAs are commonly known as Transition from School to Work (TSW) programs.

DES/VR works to engage students as early as possible within their high school experience for the purpose of developing an Individualized Plan for Employment (IPE) before the student exits school. To assist in the identification of an employment goal and completion of the IPE, DES/VR provides opportunities for students to engage in pre–employment transition activities. These activities can include career shadowing and exploration, work adjustment trainings, disability adjustment services, and exploration of postsecondary education and training options while in high school. Services are provided help to prepare the student to successfully transition from high school to postsecondary education or training if appropriate, and competitive, integrated employment.

DES/VR operates under an Order of Selection; however, students not eligible for immediate services are offered referrals, community resources, and technical assistance for transition planning.
2) **Information on the formal interagency agreement with the State educational agency with respect to:**

A) **Consultation and technical assistance to assist educational agencies in planning for the transition of students with disabilities from school to post-school activities, including VR services**

DES/VR provides technical assistance and consultation throughout the transition process in order to identify appropriate school to post school activities and services as outlined in the IGA in the following manner:

- Provide state and regional guidance and training to enhance the knowledge, skills, and abilities of personnel involved in providing transition services.
- Increase the awareness of educational and social service resources and informal and formal supports.
- Provide networking opportunities essential to establishing, building and enhancing interagency relationships and partnerships.
- Develop and implement consistent procedures on how they will consult and provide technical assistance to all parties involved.

B) **Transition planning by personnel of the designated State agency and educational agency that facilitates the development and implementation of their individualized education programs**

Coordinated transition planning will occur between PEA and DES/VR staff. DES/VR staff is available to provide group and individual presentations to parents and students who are identified by the PEA staff. PEA staff will invite DES/VR staff to students’ Individualized Education Planning meetings. DES/VR staff will be available either in person or will relay information prior to the meeting to provide program material as well as discuss postsecondary and employment opportunities. Transition services will be planned in the Individualized Education Plan by age 16 or earlier if appropriate. DES/VR staff will assist in identifying the DES/VR services and community supports available to assist with transition planning. This coordinated service planning will assist the student and parent to focus on the student’s needs for continued education, employment, and independent living services after graduation from high school.

C) **Roles and responsibilities, including financial responsibilities, of each agency, including provisions for determining State lead agencies and qualified personnel responsible for transition services**

Jointly, local Public Education Agency (PEA) staff and DES/VR staff will identify students who will require and benefit from involvement in the DES/VR program in order to meet postsecondary education and employment goals. Staff of the local PEA and VR will coordinate the development of the Individualized Education Plan and Individualized Plan for Employment with each other and will involve other community resources such as the Division of Developmental Disabilities and Regional Behavioral Health Authorities.

Services and activities mandated by Individuals with Disabilities Education Act (IDEA) will be provided by the local PEA staff; these services and supports will not be duplicated by DES/VR. PEA staff will develop a plan for transition services as mandated by IDEA. PEA staff will invite DES/VR staff to participate in
transition planning activities. DES/VR staff will participate in individual student planning sessions, as available, and will provide DES/VR program information as well as technical assistance with regard to services and community resources.

DES/VR staff will provide informational presentations and material to parents and students regarding the vocational rehabilitation program. Eligibility and Order of Selection determinations will be made by qualified DES/VR staff. The planning and development of the Individualized Plan for Employment will occur in conjunction with PEA staff, the student, and the student’s guardians. IPE’s will be developed and implemented by VR staff prior to the students exit from high school.

Students who are able to participate in the Transition School to Work (TSW) program through a Third Party Cooperative Agreement (TPCA) are afforded the opportunity to participate in a structured program of services which integrates vocational rehabilitation services into the classroom environment. These services are provided by both the local PEA staff and DES/VR staff. Involvement in these enhanced services are intended to allow the student to learn skills necessary to ameliorate disability related barriers to achieving their postsecondary goals. PEA and DES/VR staff will continue to develop and coordinate new transition services and expand or modify existing services to accommodate the needs of students with disabilities.

The PEA provides non–federal dollars to DES/VR who in turn uses these funds to generate Federal Basic Support dollars for the purpose of funding DES/VR personnel, PEA personnel, and other costs associated with the provision of enhanced vocational services as agreed by both parties in the TPCA. Funds are not transferred between the PEAs and DES/VR for the provision of required transition services.

D) Procedures for outreach to and identification of students with disabilities who need transition services

DES/VR staff will work with PEA personnel to identify students with disabilities who may need and could benefit from DES/VR services in order to develop a youth transition plan prior to his or her exit from school. Outreach efforts to students may include:

- Provision of brochures, flyers, informational letters and/or VR orientation videos to explain the VR program and the role the DES/VR program plays in transition planning.
- Explanation of DES/VR referral procedures.
- Information about availability of special joint programs.
- Information about the availability of pre–employment transition services.

PEAs will be considered the lead agency; however, ongoing support will be necessary from partner agencies.

DES/VR and Arizona Department of Education/Exceptional Student Services (ADE/ESS) are in the process of developing a formal data sharing agreement which will allow Rehabilitation Services and ADE/ESS to share data in order to identify students who may participate in pre–employment transition services as well as benefit from an exploration of how VR services may assist them in achieving their postsecondary and employment goals.
e) **Cooperative Agreements with Private Nonprofit Organizations**

DES/VR engages with Community Rehabilitation Program (CRP) non–profit VR in three ways:

- Partners in the provision of rehabilitation services to individuals with disabilities;
- Partners in building and maintaining a network of services and programs critical to the rehabilitation of individuals with disabilities; and
- Develops and solicits contracts for use by DES/VR.

DES/VR continues to review and enhance its relationships with local CRP providers as valued partners through quarterly CRP meetings. CRP meetings include review of various scopes of work, identification of and information about employer engagement opportunities, updated program information, and the opportunity for vendors to receive answers to questions, or bring issues to the attention of DES/VR management. These meetings are intended to further relationships and partnerships between DES/VR and the CRP providers. To further enhance our working relationships with our community partners, each DES/VR office has a representative staff attend the CRP meetings to ask questions, provide feedback, and develop a cooperative understanding of services for job seekers.

DES/VR has five active Partnership Plus agreements with Employment Networks (ENs) within the context of the Social Security Administration Ticket to Work (TTW) program. These agreements are designed to establish an understanding of the reciprocal referral process flow between agencies for individuals who have a TTW. DES/VR is promoting the use of these agreements to the CRP providers who function as ENs, encouraging involvement in the provision of extended supports to clients after they have met a successful employment outcome with DES/VR.

DES/VR has Employer Coordinator positions dedicated to supporting private nonprofit organizations who are actively involved in various committees, boards, and group meetings in attempts to continue to stay abreast of changes and identify opportunities in the community and local regions.

DES/VR has agreements with various private, non–profit community rehabilitation providers statewide in an effort to meet the service needs of clients.

f) **Arrangements and Cooperative Agreements for the Provision of Supported Employment Services**

DES/VR collaborates with for–profit and nonprofit Community Rehabilitation Program (CRP) providers to ensure that the capacity to serve VR clients who need supported employment services is available within the community. Additional collaboration to identify resources for individuals with significant disabilities, including youth with significant disabilities continue to be explored within DES, with other state agencies, and with entities within the client’s own support network. DES/VR has had longstanding agreements with the Arizona Department of Health Services (ADHS), Division of Behavioral Health Services (DBHS) and the DES Division of Developmental Disabilities to pay for extended support services. These agreements and combination of funding has permitted a greater number of joint clients to benefit from supported employment services. To the extent possible, DES/VR works to create a seamless transition from VR supported employment services to extended supported employment services paid by or through other agencies.
Collaboration with Employment Networks

DES/VR has established five Memorandum of Understanding agreements with local providers for the provision of ongoing Partnership Plus services. Dedicated Rehabilitation Services staff continues to encourage provider agencies to become Employment Networks through the Social Security Ticket to Work program. Provider agencies will then provide extended supports following the successful conclusion of VR services to clients who are Ticket to Work participants.

Collaboration with ADHS/DBHS

DES/VR has a cooperative Intergovernmental Agreement with the Arizona Department of Health Services/Division of Behavioral Health Services to detail the provision of supported employment services to individuals with Serious Mental Illness (SMI). This agreement coordinates services to mutual clients, assigning VR counselors to work with behavioral health clinical teams throughout the state in order to enhance service delivery, customer satisfaction, and successful outcomes through the provision of vocational rehabilitation and supported employment services.

Collaboration with DES Division of Developmental Disabilities

An Interagency Agreement with the Division of Developmental Disabilities (DDD) describes the cooperation and coordination from referral through supported employment outcomes for persons with developmental disabilities that will benefit from VR services in terms of an employment outcome but will require ongoing employment support from DDD.

Collaboration with the Councils of Government (COG)

DES/VR work jointly with the local Councils of Government (COG) in the planning process to determine the use of Social Service Block Grant (SSBG) resources. DES/VR provides assistance to the local COG’s during the SSBG planning periods by providing information on current client needs and service/provider information. DES/VR manages the resources allocated for extended employment support services, ensuring the funds are utilized to support individuals with the most significant disabilities who have successfully completed their VR program and are in need of extended employment supports to maintain employment. DES/VR contracts with community rehabilitation programs to provide the extended support services and monitors the providers to ensure quality service provision and contract compliance.

g) Coordination with Employers

1) VR services

DES/VR developed Employer Coordinator positions in an effort to provide education to VR counselors, contractors, and community partners regarding the shift in perspective of the client and the employer as dual clients. This shift is in line with WIOA and is necessary in order to better respond to the needs of employers and the clients.

Employer Coordinators, in collaboration with other federal and state workforce agencies, county programs, and Community Rehabilitation Program (CRP) providers offer employer engagement
opportunities to provide education and information about the qualified applicants available for hire. Monthly employer connection opportunities for community partners, DES/VR counselors, and contracted vendors via teleconferences continue to be provided by the Employer Coordinators. DES/VR has sponsored or co-sponsored educational events geared specifically for employers to include information on federal Schedule A hiring practices, tax credits or deductions, disability awareness training and other resources for education on hiring individuals with a disability. The provision of these training and informational sessions to employers has provided the opportunity to develop stronger partnerships with the employer community and has enhanced employment options for individuals with disabilities who are seeking employment.

Conversely, these collaborative efforts also provide opportunities for the engagement of clients in the attainment of employment goals through job fairs, distribution of employment opportunities, and client employment workshops.

Employer Coordinators, through interagency cooperative educational presentations and community resource connections, are increasing the knowledge of DES/VR staff, community partners, and employers on the employment of individuals with disabilities in the evolving labor market. Employer Coordinators will continue to engage staff, partners, and employers in an effort to provide opportunities to learn directly from employers about the current labor market, regional trends, and employer needs by facilitating a West and East Valley employers’ network meeting. Employer Coordinators continue to participate in LWDB meetings as guest presenters and as active members, as well as provide disability awareness training to boards, employers, and community stakeholders to develop stronger partnerships with the employment community in order to support persons with disabilities seeking employment.

2) **Transition services, including pre-employment transition services, for students and youth with disabilities**

DES/VR Employer Coordinators partner with secondary education schools, employers, and workforce development programs to provide pre-employment transition services and employment encounters for students and youth with disabilities across the state. Employer Coordinators partner with high school transition programs, DES/VR transition counselors, and school and program administrators to facilitate job fairs, pre-employment workshops, apprenticeship opportunities, and employer panels at local high schools.

The Employer Coordinators facilitate networking meetings between employers and educational transition partners to provide employment and pre-employment transition services to youth with disabilities. Instruction to vocational rehabilitation counselors, school transition personnel, and other persons supporting students with disabilities regarding employer engagement, opportunities for apprenticeships, internships, and secondary education resources, such as disability resource centers continue to be provided by Employer Coordinators throughout the state.

h) **Interagency Cooperation**

1) **The State Medicaid plan under title XIX of the Social Security Act**
DES/VR is a committed member of the Arizona Employment Disability Partnership committee, a group of community stakeholders dedicated to working together to further employment opportunities for people with disabilities in Arizona. Committee members include representatives from the Division of Developmental Disabilities, Arizona Health Care Cost Containment system, Arizona Department of Health Services/Division of Behavioral Health Services (DBHS), Arizona Developmental Disabilities Planning Council, ABILITY 360, Untapped Arizona, Arizona Department of Education, persons with disabilities, and various other community agencies. This committee actively collaborates to increase awareness of available services, disability–friendly job fairs, employment resources, and disability awareness events. The committee strives to increase collaboration and sharing of resources between stakeholders in efforts to address community needs and service gaps.

DES/VR is in the beginning stages of collaborating with the Arizona Health Care Cost Containment system as they begin to implement a five-year transition plan to amend and improve services. DES/VR will work with the Arizona Health Care Cost Containment system to address changes in their employment services and ensure individuals currently in center–based employment (non–integrated, non–competitive) have access to vocational services that will assist in the transition to competitive, integrated employment.

2) **The State agency responsible for providing services for individuals with developmental disabilities**

DES/VR formalized a long–standing partnership with the Division of Developmental Disabilities (DDD) through the development of a Memorandum of Understanding (MOU). The MOU describes how Rehabilitation Services and DDD will continue to work together to ensure mutual clients have access to competitive and integrated employment opportunities and if needed, long term employment supports. The MOU outlines the process for referring prospective clients and exchanging information, as well as the responsibilities of agency staff to coordinate services for mutual clients.

Since 2013, DES/VR and DDD have maintained an MOU to ensure individuals who are involved in both DDD and the foster care system have streamlined access to the DES/VR program. The purpose of this MOU is to facilitate a smooth transition for individuals as they age out of the foster care system and begin to engage in meaningful, gainful, and sustained employment, education and community living. This MOU includes a structured statewide referral process, dedicated DES/VR counselor position(s), and expedited eligibility determination.

3) **The State agency responsible for providing mental health services**

DES/VR have maintained an Intergovernmental Agreement (IGA) with the Arizona Department of Health Services/Division of Behavioral Health Services (DBHS) to provide enhanced vocational rehabilitation services to individuals determined to have a Serious Mental Illness (SMI) since 1992. DES/VR works with DBHS to amend the IGA on a yearly basis in order to modify the agreement to maintain the partnership and enhance the services provided to individuals determined to have a serious mental illness. Each Regional Behavioral Health Authority (RBHA) contracted with DBHS uses the IGA to develop a collaborative protocol to establish specific service delivery responsibilities as well as the roles and responsibilities for DES/VR and RBHA provider staff.
Per the IGA, each RBHA provider site is assigned a DES/VR counselor to work with mutual and prospective clients. The DES/VR counselor acts as the vocational consultant for the clinical team, attends meetings related to the mutual client’s vocational services, and provides Individual Service Plan recommendations for each client related to the DES/VR program. DES/VR staff conducts VR orientations at each clinic at least one time per month, and are provided with functional workspace to conduct client meetings.

To ensure continuous and streamlined communication, DES/VR, ADHS/DBHS and each RBHA coordinate quarterly meetings for all Behavioral Health VR counselors, VR supervisors, RBHA clinical representatives and mutual provider agencies. Staff is given the opportunity to discuss concerns related to the IGA and is provided with program updates and information on available resources. DES/VR and ADHS/DBHS also coordinate a biannual IGA Advisory meeting to discuss any IGA related changes, staff or agency concerns, as well as program accomplishments.

i) **Comprehensive System of Personnel Development; Data System on Personnel and Personnel Development**

1) **Data System on Personnel and Personnel Development**

A) **Qualified Personnel Needs**

i) **Number of personnel who are employed by the State agency in the provision of VR services in relation to the number of individuals served, broken down by personnel category**

DES/VR currently utilizes two systems to track personnel, the Human Resources Information Solution (HRIS) which is maintained by DES, and an internal tracking system maintained by Rehabilitation Services. Both systems retain information pertaining to DES/VR staff including hire dates, personnel actions, diversity information, plans to meet qualified standards (if necessary) and professional certification measures. These systems are used in combination to identify staff currently meeting qualified staff standards, staff that are in the process of becoming qualified staff, projected retirement dates, affirmative action criteria and general staffing needs. Recruitment of individuals with disabilities and individuals from minority backgrounds continues to be an ongoing priority. Strategies which encourage recruitment of individuals with disabilities and those of minority background continue to be sought out and implemented when appropriate.

B) **Personnel Development**

i) **List of the institutions of higher education in the State that are preparing VR professionals, by type of program**

DES/VR maintains an internal system to track the qualifications of rehabilitation professionals. All rehabilitation professionals provide an annual update of progress toward meeting qualified staff standards which mirror the Commission on Rehabilitation Counselor Certification (CRCC) requirements. DES/VR and the University of Arizona currently maintain an Intergovernmental Agreement that supports rehabilitation professionals in completing graduate level coursework to meet the CRCC requirements.

2) **Plan for Recruitment, Preparation and Retention of Qualified Personnel**

The University of Arizona is the only university in the state that offers Rehabilitation Counseling degree programs and prepares individuals to sit for the Certified Rehabilitation Counselor exam. DES/VR maintains an Intergovernmental Agreement with the University of Arizona to provide a master’s degree as well as stand-alone graduate level coursework for personnel who require additional education to meet qualified staff standards.

In addition to offering graduate level coursework, DES/VR coordinates with San Diego State University’s Interwork Institute to ensure staff has access to education and training opportunities available under the
Workforce Innovation Technical Assistance Center (WINTAC) grant from federal Rehabilitation Services Administration. The purpose of the WINTAC is to help VR programs across the nation effectively implement the changes required by WIOA. WINTAC will focus on the following five topic areas and outcomes:

- **Provision of pre–employment transition services (PETS) to students with disabilities and supported employment services to youth with disabilities.**

  **Outcome:**

  Implementation of effective and efficient PETS for students with disabilities, as set forth in section 113 of the Rehabilitation Act.

- **Implementation of the requirements in section 511 of the Rehabilitation Act that are under the purview of the U.S. Department of Education.**

  **Outcome:**

  Implementation by State Vocational Rehabilitation Agencies (SVRAs), in coordination with local and state educational agencies and with U.S. DOL, of the requirements in Section 511 of the Rehabilitation Act that are under the purview of the U.S. Department of Education.

- **Provision of resources and strategies to help individuals with disabilities achieve competitive integrated employment, including customized employment and supported employment.**

  **Outcome:**

  Increased access to supported employment and customized employment services for individuals with the most significant disabilities, including youth with the most significant disabilities, receiving services under the State VR and Supported Employment programs.

- **Integration of the State VR program into the workforce development system.**

  **Outcomes:**

  An increased percentage of individuals with disabilities who receive services through the State VR agency and who achieve employment outcomes in competitive integrated employment and improved collaboration between state VR agency and other core programs of the workforce development system.

- **Transition to the new common performance accountability system under section 116 of WIOA, including the collection and reporting of common data elements.**

  **Outcome:**

  Implementation of the new common performance accountability system under section 116 of WIOA.
3) Personnel Standards

A) Standards that are consistent with national or State-approved or -recognized certification, licensing, registration, or other comparable requirements that apply to the profession or discipline in which such personnel are providing VR services

DES/VR considers it a priority to hire and retain personnel who meet national standards for rehabilitation counseling. The Commission on Rehabilitation Counselor Certification education and work experience standards is the standard DES/VR mirrors as the qualified staff standard for rehabilitation professionals. All managers, supervisors, and professional rehabilitation staff is expected to meet the staff standards by becoming qualified and eligible to sit for the Certified Rehabilitation Counselor (CRC) exam within six years of their initial hire date. Personnel not meeting the requirements upon hire will be required to review and sign an Employee Education Agreement indicating their intention to meet qualified staff standards within six years of hire. Survey results are compiled on an annual basis to ensure compliance with qualified staff standards and to assess the DES/VR program’s qualified staffing needs. DES/VR supports individuals in obtaining professional certification reflecting qualified staff standards through reimbursement of Certified Rehabilitation Counselor exam fees, as well as payment of certification renewal fees.

B) Establishment and maintenance of education and experience requirements, in accordance with section 101(a)(7)(B)(ii) of the Rehabilitation Act, to ensure that the personnel have a 21st century understanding of the evolving labor force and the needs of individuals with disabilities

DES/VR seeks to ensure all DES/VR staff have a 21st century understanding of the evolving labor force and needs of individuals with disabilities through the maintenance of appropriate education and experience personnel requirements. These personnel requirements are outlined in the agency’s job descriptions, are verified throughout the hiring process, and are reinforced and expanded upon with additional training after hire.

All staff involved in the provision of rehabilitation services, whether in a professional or paraprofessional capacity, are required to be knowledgeable of current federal and state laws and regulations pertaining to disability and the provision of rehabilitation services to individuals with disabilities. All staff are required to be knowledgeable of the guidelines and best practices of vocational rehabilitation, various disabling conditions, and the corresponding functional limitations that may impact employment. All staff must be aware of available community resources and how to utilize information and referral services to help individuals address their needs through self-advocacy. All staff must possess skills in caseload management and organization.

In addition to the requirements stated above, rehabilitation professionals are required to be skilled in the provision of counseling to individuals with disabilities, interpreting evaluations and assessments to determine disability related barriers and needs in regards to employment, and providing current and relevant information to ensure client informed choice. Additional requirements include knowledge of assistive technology and aids and devices, awareness of applicable labor market trends and employer needs, and the ability to utilize this information when assisting in the exploration of employment goals and service needs.
Upon hire, all staff are further trained on the vocational rehabilitation process including the provision of services to address cultural and language differences (interpreters, services to family members, etc.), how to best utilize the assessment process to guide decision making, ethics in the rehabilitation process including informed choice and client confidentiality, available services and how to strategically use intermediate objectives and services such as internships and OJTs to help clients take steps towards their employment goals, and how to monitor progress and continually assess client needs.

In addition to new hire training, DES/VR maintains a contract with the Arizona Center for the Blind and Visually Impaired (ACBVI) to provide training and resource development to staff in the area of assistive technology. Staff are also welcome to attend the annual Assistive Technology conference, a collaboration between DES/VR and Arizona Technology Access Program (AzTAP), to learn about assistive technology through hands-on experience. Additional conferences are available throughout the year to educate staff on specific disability populations, cultural awareness including Native American culture, and youth services.

To further assist in the understanding of employer needs, current labor market trends, and on the job accommodations, the DES/VR Employer Coordinator hosts conference calls with employers once per month. During these calls rehabilitation staff and employers exchange information regarding employer needs, how to best prepare clients to meet those needs, available accommodations, available training opportunities, and tips for getting clients hired into permanent employment.

DES/VR is currently evaluating the job requirements and training needs of rehabilitation professional and paraprofessionals in efforts to better meet the needs of clients and employers, as well as satisfy WIOA requirements. To this end, DES/VR continues to participate in a strategic work group with the CORE partners to develop competencies for all staff providing employment services under WIOA. Once competencies are developed, DES/VR will amend job requirements as needed and actively participate in the development of new and enhanced trainings to ensure WIOA staff requirements are fulfilled to the highest extent.

4) Staff Development

A) System of staff development

All new hires participate in Comprehensive Orientation Rehabilitation Education (CORE) training which provides information specific to the position and serves to acclimate the new hire to the agency and job duties. Professional and paraprofessional new hires receive extensive training in order to learn foundational information on topics such as: the Rehabilitation Act, the Americans with Disabilities Act, the Workforce Innovation and Opportunity Act (WIOA), state policy and appropriate service provision. Topics like client engagement techniques, labor market research, client informed choice, relationship management, disability awareness, and electronic case management instruction are also presented. New employee curriculum is continually being updated and enhanced to better prepare staff for meeting the needs of DES/VR clients.

DES/VR supports the continuous professional development of professional and paraprofessional staff through the provision of numerous training and educational opportunities throughout the year. Staff is presented with opportunities to participate in in–house trainings, webinars, conferences, community events, employer engagement presentations, and graduate level coursework necessary to meet qualified
staff standards. These professional development opportunities focus on content areas such as assessment, ethics, vocational counseling, motivational interviewing, job development and placement, assistive technology, case management, case documentation, Traumatic Brain Injury, transition, and other specialty areas. Continuing education is available for those who are maintaining licensure or accreditation.

Arizona DES/VR maintains a contract with the Arizona Center for the Blind and Visually Impaired (ACBVI) to ensure staff has access to assistive technology training and education specific to rehabilitation, rehabilitation technology, and employment. Training can be requested by DES/VR staff and ACBVI will conduct the training at the local field office. This education has been provided at local ARIZONA@WORK Job Centers with core partner staff in attendance as well in order to assist in the education of all ARIZONA@WORK Job Center staff.

B) Acquisition and dissemination of significant knowledge

Materials and information relevant to the field of rehabilitation are disseminated to staff in various training sessions, through email, provided at the local offices, and listed on the DES/VR intranet. VR makes every effort to have materials and information available in various accessible formats and works diligently with the Designated State Agency and core partner staff to ensure the greatest extent of accessibility.

5) Personnel to Address Individual Communication Needs

DES/VR utilizes several mechanisms in order to best serve applicants who use alternate modes of communication or have Limited English Proficiency. The Arizona state personnel system facilitates the recruitment of qualified bilingual and American Sign Language certified staff. These efforts continue to increase the number of employees who communicate in multiple languages. All staff is trained to serve individuals with Limited English Proficiency and have received supplemental instruction specific to DES/VR Limited English Proficiency policies and procedures.

DES/VR contracts with multiple vendors who are able to assist in face to face translation/interpretation, language phone line translation/interpretation and written translation of critical documents.

Video phones are available in local offices to provide Video Relay Services (VRS) and Video Remote Interpreting (VRI). All DES/VR materials can be made available in alternative formats and are consistently made available in large print and Spanish. Each district has access to Braille materials and the ability to provide print material in alternative languages and formats per client and staff request. Staff is provided with accessible computers, software, note takers, and other devices as needed.

DES/VR maintains training sites throughout the state. Each training site is equipped with accessible computers, software and other devices as needed for accommodation purposes. Assistive listening and visual aid devices and other equipment and software are provided at all training sessions upon request from training participants.

6) Coordination of Personnel Development Under the Individuals with Disabilities Education Act

DES/VR works closely with the ADE Exceptional Student Services to provide opportunities to remain current in transition policies and procedures. An Intergovernmental Agreement exists that outlines cross
training opportunities between partners. DES/VR and ADE collaborate annually to provide a transition conference which serves to bring the community of providers together to learn about national policies, trends and best practices in serving youth with disabilities. Additionally, DES/VR partners with ADE in providing a web based career information system named Arizona Career Information System (AzCIS) which allows students, families, education professionals, and VR staff to collaboratively assist students in developing appropriate and viable career goals.

j) Statewide Assessment

1) Assessment of the rehabilitation needs of individuals with disabilities residing within the State, particularly the VR services needs of those:

A) With the most significant disabilities, including their need for supported employment services

Arizona, in conjunction with WIOA core partners, conducted a survey and focus group sessions across the state to obtain information, gather input, and solicit feedback on the vocational rehabilitation needs of individuals with disabilities and workforce development system needs in Arizona. Additional assessment data was gathered from surveys conducted by the State Rehabilitation Council, internal staff, and review of census data. Web-based surveys and focus groups collected responses from individuals with disabilities, family members of persons with disabilities, service providers, educators, and core program partner staff across the state.

A survey question which asked participants which VR service need was most important resulted in identification of communication services, interpersonal skills training, and mobility/transportation as the areas of most importance. Additionally, the provision of OJT opportunities was mentioned in focus groups across the state as a mechanism to assist individuals with barriers, including those with disabilities in obtaining skills and successful employment outcomes. Information from various focus groups also indicated that increased outreach and program awareness campaigns were needed in order to reach those individuals with the most significant disabilities who may benefit from vocational rehabilitation and supported employment services.

B) Who are minorities

Hispanic/Latino populations constituted the highest number of minority clients served by the Arizona VR program. This is similar to past CSNA data. DES/VR services were provided to individuals who reported Hispanic/Latino make up approximately a quarter of the total population served. Arizona’s proximity to the border coupled with intentional placement of bilingual DES/VR staff in border towns has likely had a significant impact on these numbers.

Engagement of those who report as American Indian or Alaskan Native is low. VR services are provided to roughly half of the individuals in the state who identify as American Indian in the state. The VR program did experience a five percent increase in the total number of client who reported American Indian or Alaskan Native as their race this year. The survey was provided to all 121 VR program directors as well as the Nineteen Tribal Nation Workforce Development Board Director. This may account for the high survey respondent percentage. Arizona VR continues to work closely with the 121 VR programs to ensure cooperative employment plan development and case management of dually enrolled clients.
In Arizona, ten percent of working age adults who reported a disability reported they were White, while those with a disability who reported a race of Black/African American, Native American, or Asian was 12.6 percent, 15.8 percent, and 4.8 percent respectively. The overall percentage of those that reported an ethnicity of Hispanic/Latino was 8.5 percent in 2013. Comparatively, when individuals served by the Arizona VR program were asked to report a race or ethnicity, 26.6 percent reported an ethnicity of Hispanic. 53.1 percent reported a race of White, 10.8 percent reported Black/African American, 5.3 percent reported Native American/Alaskan and 7.8 percent reported Asian.

C) Who have been unserved or underserved by the VR program

Attempts at determining the numbers of individuals who are not aware of or receiving services from VR program have been made but solid data is not available to report. Anecdotally, it is recognized that the vocational rehabilitation program is not well known and there is a lack of awareness about the available service available to individuals with disabilities. As a part of the CSNA, workforce partners and participants of the workforce partner programs were queried; 85 percent of the WIOA core program respondents indicated knowledge of how to refer to or access VR services. Conversely, only 54 percent of the respondents that were not affiliated with a WIOA core program (regional providers) responded positively to the same question. This indicates that a continued emphasis on disseminating information to areas of possible connection with individuals with disabilities such as doctor’s offices, pharmacies, libraries, and other public buildings. Information sharing will occur with core partner programs as WIOA implementation continues.

Youth with disabilities continue to be an underserved population. Survey data reveals that Arizona DES/VR program is reaching about 20 percent of the total youth and students with disabilities. The education system in Arizona is complex. The Arizona Department of Education, the State Board of Education, 15 County Education Agencies and hundreds of district and charter governing boards oversee 230 discrete school districts, 406 charter holders and 13 Joint Technological Education Districts. Within these districts there are over 2000 public schools, including over 1500 district schools and over 500 charter schools. Reaching out to each of the districts and communicating the DES/VR program services has been challenging considering the multitude of individuals involved in the provision of services to students and youth with disabilities. Individuals with physical disabilities are also identified as being underserved by the DES/VR program. Less than 10 percent of the total VR population reports a disability which has physical limitations as a primary disability. It is difficult to discern if individuals are reporting other disability categories thus, the lower number or if individuals with physical disabilities are not aware or taking advantage of VR services.

Attempts at determining the numbers of individuals who have been unserved or underserved by the VR program have been made but solid data is not available to report. Anecdotally, it is recognized that the vocational rehabilitation program is not well known and there is a lack of awareness about the available service available to individuals with disabilities. When queried, 85 percent of the WIOA core program respondents indicated knowledge of how to refer to or access VR services. Conversely, only 54 percent of the respondents that were not affiliated with a WIOA core program (regional providers) responded positively to the same question.
D) **Who have been served through other components of the statewide workforce development system**

Arizona is currently working with core partners to develop a mechanism to identify common participants. Initial data matching with internal DES programs (Title I–B, Title III, and Title IV) revealed a 28,455 duplicated client count with an additional 17,317 unduplicated clients being served in any single program. This indicates that approximately 60 percent of the clients served are accessing services across multiple programs.

E) **Who are youth with disabilities and students with disabilities, including, as appropriate, their need for pre-employment transition services or other transition services**

Nearly 8,000 students received services from the DES/VR program in FFY 2015 however, data from ADE indicates that there are nearly 40,000 students in Arizona who are identified as having a disability and who are receiving special education services identified in an IEP throughout the state. While students aged 14 and over make up approximately 38 percent of the total VR client population the DES/VR program is touching just 20 percent of the total population of students with disabilities. When analyzing the data, it is apparent that the complexity of Arizona’s education system impacts the DES/VR staff ability to effectively reach all students. The state education system is comprised of 15 County Education Agencies and hundreds of district and charter governing boards oversee 230 discrete school districts, 406 charter holders and 13 Joint Technological Education Districts. Within these districts there are over 2000 public schools, including over 1500 district schools and over 500 charter schools. DES/VR is currently under an order of selection and is serving only the most significantly disabled individuals. Often, students with learning disabilities are made eligible but not considered to be most significantly disabled. Additionally, it is noted that students who receive special education services through the high school based on a 504 plan are not often referred to DES/VR. DES/VR is working closely with ADE to encourage the school system to refer not only those students with learning disabilities, but all students with disabilities who receive services through and Individualized Education Plan or a 504 plan. As part of the 2015 CSNA, survey respondents were asked to rank the importance of each of the five required pre-employment transition serves. Workplace readiness was ranked as the most critically needed service in order for youth and students with disabilities to success in an employment outcome. Work-based learning experiences was ranked second with job exploration and transition/postsecondary education counseling and instruction in self-advocacy ranking third, fourth and fifth. In an effort to bolster workplace readiness skills, Arizona is looking to expand Work Adjustment Training opportunities and Project SEARCH sites in order to facilitate the acquisition of skills that will transfer to the workplace.

According to data provided from the ADE, the number of students age 14 and over in Arizona public schools and who identified a disability is 39,619. Transition aged students (age 14 and over) constitute roughly 30 percent of the total population of school aged children (age 2–21) with a disability who receive special education services. 7,387 students received services from Arizona VR during Federal Fiscal Year (FFY) 2015. Transition aged students constitute roughly 38 percent of the total population of VR clients served in Arizona during FFY 2015.
According to data provided from the ADE, the number of students age 14 and over in Arizona public schools and who identified a disability is 39,619. Transition aged students (age 14 and over) constitute roughly 30 percent of the total population of school aged children (age 2–21) with a disability who receive special education services. 7,387 students received services from Arizona VR during Federal Fiscal Year (FFY) 2015. Transition aged students constitute roughly 38 percent of the total population of VR clients served in Arizona during FFY 2015.

When asked what other pre–employment transition services would be beneficial in assisting youth and students with disabilities, respondents listed transportation, community based work opportunities and job readiness skill development as identified service needs.

2) **Need to establish, develop, or improve community rehabilitation programs within the State**

DES/VR conducted a comprehensive survey to determine the current perception of community rehabilitation programs within the state. Additionally, the State Rehabilitation Council conducted a vendor survey to assess the opinions of the Community Rehabilitation Programs. Overall, lack of communication or maintaining close contact with the vendor was the most commonly cited concern; this was followed by a decrease in the quality of service provision for individuals with the most significant disabilities and a lack of providers in rural areas or not enough travel reimbursement to incentivize providers to travel to provide client services.

The State Rehabilitation Council conducted a survey of DES/VR program services providers in February 2014 which indicated that 63.6 percent of the providers felt that they do not receive enough referrals from the VR program. When asked if the number of referrals had remained the same, increased or decreased over the previous 12 months, 48.8 percent of the respondents felt that the number of referrals has remained the same, while 7.8 percent indicated that referrals had increased and 43.4 percent indicated a decrease in referrals. Further, vendors indicated a need for increased interaction with DES/VR staff and the need for more information regarding DES/VR programs and training on contract compliance.
3) **Assessment of the needs of individuals with disabilities for transition career services and pre-employment transition services, and the extent to which such services are coordinated with transition services provided under the Individuals with Disabilities Education Act**

Opinions gathered from Exceptional Student Services staff through the ADE in relation to critical career transition and pre-employment transition needs for youth provided the following results:

Additional service needs included increasing parental involvement throughout transition planning, aligning the course of study with the individual’s strengths, weaknesses, and abilities and ameliorating transportation barriers.

DES/VR Administration (DES/VR) works to engage students as early as possible within their high school experience for the purpose of developing an Individualized Plan for Employment (IPE) before the student exits school. DES/VR staff assists in the identification of an employment goal which is commensurate with the students’ abilities, weakness, and disability related factors. DES/VR, in conjunction with the school, provides opportunities for students to engage in pre-employment transition activities. These activities can include career shadowing and exploration, work adjustment trainings, disability adjustment services, and exploration of postsecondary education and training options while in high school. Services are provided help to prepare the student to successfully transition from high school to postsecondary education or training if appropriate, and competitive, integrated employment.

Rehabilitation Services has entered into 22 Third Party Cooperative Agreements (TPCAs) with local high schools throughout the state. These agreements provide a solid structure and foundation for the provision of transition services to student beginning in high school and allow for a seamless transition to postsecondary endeavors.

**k) Annual Estimates**

1) **Number of individuals in the State who are eligible for services**

According to the 2015 Annual Disability Statistics Compendium approximately 863,924 individuals with a disability live within a community in Arizona. 55,230 persons aged 5-17 and 418,062 persons aged 18-64 have a disability in Arizona.
2) Number of eligible individuals who will receive services under:

A) The VR Program

13,842 individuals were determined eligible during PY 2017. Of the 13,482 individuals, 11,069 were placed into Priority Category One and began receiving services immediately upon eligibility determination. An additional 2,773 individuals were determined eligible for the VR program but were placed in Priority Category Two or Three within the Order of Selection.

B) The Supported Employment Program

During PY 2016 1,286 individuals were determined eligible for Supported Employment services.

C) Each priority category, if under an order of selection

Priority 1: 13,450
Priority 2: 2,305
Priority 3: 468

3) Number of individuals who are eligible for VR services, but are not receiving such services due to an order of selection

Priority 2: 2,305
Priority 3: 468

4) 2017 Cost of services for the number of individuals estimated to be eligible for services

I) State Goals and Priorities

1) Goals and priorities jointly developed

Recommendations from the State Rehabilitation Council (SRC) were provided and considered in the development of the goals and priorities. The SRC has been actively involved in the strategic planning
process and in the development a strategic plan for DES/VR. An extensive process consisting of multiple surveys, focus groups, review of various data elements, comprehensive statewide assessment results, and performance indicators provided insight and guidance into the development of the State’s goals and priorities for the DES/ VR and Supported Employment programs.

The state goals and priorities for the DES/VR and Supported Employment programs are centered on implementing WIOA as well as continuing efforts to develop effective and efficient strategies which assist in the successful outcomes of individuals with disabilities.

2) Goals and priorities in carrying out the VR and Supported Employment programs

Goal 1: Rehabilitation Services staff will be valued as accountable professionals.

- Increase the number of employee recognition events by five percent.
  - Five employee recognition events will occur in 2016.
- Increase the number of professional development activities for staff by ten percent.
  - Ten professional development activities will occur in 2016.
- Conduct “Meet and Greet” open house opportunities for staff to meet administrative/central office staff.
  - Four “Meet and Greet” opportunities will occur in 2016.

Goal 2: Rehabilitation Services will deliver high quality services to persons with disabilities.

- Increase the percentage of clients who have eligibility and Order of Selection determined within 60 calendar days from application.
  - DES/VR will strive for a 90% or better compliance rate.
- Increase the percentage of clients who have IPE’s developed and implemented within 90 calendar days from eligibility determination.
  - DES/VR will strive for a 90% or better compliance rate.
- Integrate and align with workforce programs to successfully connect clients with jobs.
  - DES/VR will increase the number of successful employment outcomes by five percent in 2016.
- Increase provision of services specific to transition youth.
  - DES/VR will provide pre-employment transition services in the amount that meets the set-aside requirement in 2016.
- Increase the number of individuals who receive Supported Employment services.
  - DES/VR will serve five percent more individuals in supported employment plans.

Goal 3: Rehabilitation Services will be a leader and respected partner in the community.

- Develop and implement a vendor report card.
  - DES/VR will develop and implement a vendor report card to inform client choice and increase community awareness of VR services and providers in 2016.
- Provide increased awareness and outreach to underserved geographic areas and target populations.
  - DES/VR will conduct four awareness events in geographic areas or to specific target populations in 2016.
- Provide information sessions to employers and community partners on VR services.
  - DES/VR will provide ten information sessions in 2016
3) **Goals and priorities based on analysis**

An extensive process consisting of multiple surveys, focus groups, review of various data elements, comprehensive statewide assessment results, and performance indicators provided insight and guidance into the development of the State’s goals and priorities for the DES/VR and Supported Employment programs.

**A) Most recent comprehensive statewide assessment, including any updates**

A comprehensive statewide assessment was conducted during 2015 to assist with the development of the state goals and priorities. The comprehensive statewide assessment was conducted in collaboration with all of the core partners in an effort to gather information pertinent to all partner programs and to assist in the development of statewide workforce investment strategies.

**B) State performance under the performance accountability measures of section 116 of WIOA**

Achievement of the state goals will support the achievement of the performance accountability measures.

**C) Other available information on the operation and effectiveness of the VR program, including reports received from the State Rehabilitation Council, and findings and recommendations from monitoring activities conducted under section 107**

DES/VR exceeded in each performance measurement with the exception of attaining a 55.8 percent rehabilitation rate. Arizona reached a rehabilitation rate of 51.1 percent at the end of FFY 2015.

**Standard 1.1: Change in Employment Outcomes - Met**

1339 individuals exited the DES/VR program with an employment outcome in FFY 2015. This represents an increase in 115 individuals over FFY 2014.

**Standard 1.2: Percent of Employment Outcomes – Not Met**

The DES/VR program obtained a rehabilitation rate of 51.1 percent, falling short of the 55.8 percent standard. An increase of 1.7 percent was experienced in FFY 2015 over FFY 2014 in relation to this standard.

**Standard 1.3: Competitive Employment – Met**

Arizona experienced a high rate of competitive employment outcomes during FFY 2015. Arizona exceeded the standard by 26.3 percent, closing 98.9 percent of the individual into competitive employment outcomes.

**Standard 1.4: Significant Disability - Met**
Arizona exceeded the required performance level by 37.4 percent, placing 99.8 percent of the individuals with a significant disability into competitive employment outcomes.

Standard 1.5: Earnings Ratio - Met

Arizona met the required performance ratio of .52, with individuals placed through the DES/VR program earning an average wage of 11.26 dollars compared to the state average of 21.76 dollars.

Standard 1.6: Self Support - Met

Arizona exceeded the required performance level of 53 percent by 29.4 percent. 82.4 percent of the individuals closed into an employment outcome reported an increase in self-sufficiency after receiving services and achieving employment.

Standard 2.1: Ratio of Minority to Non-Minority Service Rate – Met

Arizona exceeded the required performance ratio of .80 by .07. The DES/VR program served a .87 ratio of minorities to minority clients.

DES/VR is actively working with WIOA workforce partners and the case management program developers to begin the process of ensuring that the required data elements are documented. Information dissemination to field staff regarding required data elements will begin in July 2016. Audits and ad-hoc queries will be developed to ensure the integrity and accuracy of the data. Aggregate data will be utilized to effectively establish baseline target goals in compliance with Section 116 of WIOA.

m) Order of Selection

1) Designated State unit implementation of an order of selection

A) Order to be followed in selecting eligible individuals to be provided VR services

Regulations require an organized and equitable method for serving groups of individuals with disabilities in a priority order if all eligible individuals cannot be served due to a lack of resources. DES/VR has established an Order of Selection based on the number of functional limitations to employment, caused by the disabling condition(s) in combination with the number of VR services needed to address the identified limitations. Individuals in Priority Category I (Most Significantly Disabled) are served first. Individuals within each category are served based on application date as funds become available.

B) Justification for the order

Arizona is currently operating an Order of Selection due to a lack of resources. The current Order of Selection has been in effect since SFY 2009. Implementation of an Order of Selection was necessitated by a significant reduction in state appropriations beginning in SFY 2009. Due to the State of Arizona’s budget shortfall in SFY 2008, the Arizona DES/VR program lost $500,000 state appropriated dollars, decreasing the total DES/VR revenue by $2,347,418. In SFY 2009, there was a subsequent budget reduction of
$1,246,600 in state funding was implemented thereby decreasing the match from federal RSA for vocational rehabilitation services by $4,605,982.

DES/VR manages Third Party Cooperative Agreements (TPCA) and various other agreements in order to mitigate the reduction in state appropriations. DES/VR continues to work diligently toward securing additional agreements and donations in an effort to obtain full matching funds from the Federal government.

C) Service and outcome goals

Currently, all clients determined eligible and in Priority Category One begin to receive services immediately with the outcome of successful employment.

15,035 clients are receiving services in Priority Category One. Clients achieve the goals and objectives within 24 months at a cost of $13,126 per client. 2,513 individuals exited without employment after receiving services and 1,548 exited the program with an employment outcome after receiving services.

All clients determined eligible but placed in a closed Priority Category receive referral information to other workforce investment partner programs. Clients receive an annual letter reminding them of the opportunities to utilize workforce investment programs.

DES/VR began a systematic release of clients from Priority 2 in November 2016. DES/VR continues to develop methods for increasing the accuracy and timeliness of data collection and fiscal forecasting in order to continue a systematic release of clients from the Order of Selection.

D) Time within which these goals may be achieved for individuals in each priority category within the order

15,035 clients are receiving services in Priority Category One. Clients achieve the goals and objectives within 24 months at a cost of $13,126 per client. 2,513 individuals exited without employment after receiving services and 1,548 exited the program with an employment outcome after receiving services.

At the end of FFY 2017, the number of individuals who were determined eligible but placed in Priority II or Priority III waitlist was 2,305 and 468 respectively. DES/VR does not expect to have the ability to serve individuals in Priority Categories II or III, but will continue to develop methods for data collection and fiscal forecasting in order to continue a systematic release of clients from Priority II.

E) Selection of individuals with the most significant disabilities for services before all other individuals with disabilities

DES/VR has established an Order of Selection based on the number of functional limitations to employment, caused by the disabling condition(s) in combination with the number of VR services needed to address the identified limitations.

Individuals in Priority Category I (Most Significantly Disabled) are served first. Individuals within each category are served based on application date as funds become available.

Definitions

Extended period of time: Needing VR services for a duration of six months or more.
Multiple services: Two or more primary services needed to achieve a successful employment outcome.

Description of Priority Categories

Priority Category I: Eligible individuals with the most significant disabilities

An individual with a severe physical or mental impairment that seriously limits three or more functional capacities (such as mobility, communication, self-care, self-direction, interpersonal skills, work tolerance, or work skills) in the context of an employment outcome; and whose VR can be expected to require multiple VR services over an extended period of time.

Priority Category II: Individuals with significant disabilities

An individual with a severe physical or mental impairment that seriously limits one or more functional capacities (such as mobility, communication, self-care, self-direction, interpersonal skills, work tolerance, or work skills) in terms of an employment outcome; whose VR can be expected to require multiple VR services over an extended period of time.

Priority Category III: All other eligible individuals

An individual with disabilities which does not seriously limit one or more functional capacities in the context of an employment outcome; and who is not expected to require multiple services over an extended period of time.

2) Designated State unit election to serve eligible individuals, regardless of any established order of selection, who require specific services or equipment to maintain employment

Upon release of final regulations, DES/VR will serve eligible individuals, regardless of established Order of Selection, who require specific services or equipment to maintain employment as allowable by law and regulation. Review of case management system changes, development of policies and procedures, and identification of individuals on the current Order of Selection waitlist who might benefit from this exception are currently in process.

n) Goals and Plans for Distribution of title VI Funds.

1) State goals and priorities for funds received under section 603 of the Rehabilitation Act for the provision of supported employment services

In an effort to increase employment opportunities for individuals with the most significant disabilities, including youth with the most significant disabilities, Title IV monies are available to all counselors when planning services for individuals who will require supported employment and extended services in order to obtain and maintain competitive and integrated employment.

DES/VR has placed a priority on increasing the employment opportunities for individuals requiring supported employment services.
• 994 individuals received services utilizing Title VI funds during FFY 2015.
• 208 individuals obtained successful employment outcomes as a result of supported employment services in FFY 2015.
• 3,171 Individualized Plans for Employment (IPEs) were implemented in FFY 2015.

2) **Activities to be conducted, with funds reserved pursuant to section 603(d), for youth with the most significant disabilities**

A) **The provision of extended services for a period not to exceed 4 years**

DES/VR is utilizing fifty percent of the funds received for the provision of supported employment services and has set aside fifty percent of the funds received under Section 603 of the Rehabilitation Act for the provision of services specific to youth with the most significant disabilities. DES/VR was able to successfully meet the full fifty percent match requirement for supported employment services provided to youth with disabilities.

Dissemination of information to staff, clients, and community partners regarding the changes made by WIOA are continuous. Information regarding the set aside reserve for youth with the most significant disabilities and the ability to provide extended services for up to four years has been promoted and DES/VR is actively working to develop opportunities to expand the scope of extended and supported employment services. Active agreements with Arizona Department of Health Services/Behavioral Health Services (ADHS/BHS) and the Division of Developmental Disabilities (DDD) prove to be vital for the seamless transition from VR supported services to extended supports provided by an alternate funding source. DES/VR will continue to actively pursue opportunities which will allow the state to leverage public and private funds in order to increase resources and serve youth with the most significant disabilities.

B) **State leverage of other public and private funds to increase resources for extended services and expanded supported employment opportunities for youth with the most significant disabilities**

DES/VR is currently engaged with the Exceptional Student Services (ESS) of the ADE. This active engagement has allowed DES/VR to cultivate 22 Third Party Cooperative Agreements and numerous other connections with local schools statewide. DES/VR and the ADE have implemented a data sharing agreement. The agreement has allowed for the sharing of data to support collaborative work between both parties to identify, refer, and provide services to youth with the most significant disabilities.

o) **State's Strategies**

1) **Methods to be used to expand and improve services to individuals with disabilities**

In the continuing effort to expand and improve services to individuals with disabilities DES/VR will maintain, and expand as appropriate, cooperative agreements and contracts with the following entities:

• LWDBs and coordination with ARIZONA@WORK Job Centers;
• Division of Behavioral Health Services;
• Tribal entities, including the Native American 121 programs;
• Division of Developmental Disabilities;
• Veterans Administration VR program;
• Arizona Department of Education;
• Spinal and Head Injury Council; and
• Community Rehabilitation Programs.

To promote persons with disabilities working in Arizona, the DES/VR program provides all clients with access to Disability Benefits 101 (DB101). DB101 is an online tool that provides individuals with information on health coverage, benefits, and employment, as well as tools to explore how benefits may be impacted by employment wages. The DB101 site includes information specifically for young adults who are learning to manage school, benefits, and work, and also provides tips for parents regarding how to assist their young adult to make informed work/life choices.

The DES continues to use the Arizona Management System principles and tools to develop a framework of standard policies, processes, and procedures to ensure the DES/VR program is fulfilling the department’s objectives and goals: matching employers with qualified job seekers, and increasing labor force participation by serving all eligible individuals and employers who are seeking services. This results-driven management system focuses on delivering valued added customer service, tiered accountability models, and engaging in continuous improvement practices.

2) Broad range of assistive technology services and devices provided to individuals with disabilities at each stage of the rehabilitation process and on a statewide basis

Assistive technology devices and services are offered to clients throughout the rehabilitation process through a statewide network of qualified contractors. RS employs a Statewide Assistive Technology Coordinator who is available to provide consultation and technical assistance to counselors, staff, and contractors. The DES/VR program is exploring opportunities to provide greater access to Assistive Technology and has contracted with the Arizona Technology Access Program for the purposes of exploring opportunities to provide and expand access to assistive technology equipment to individuals with disabilities who are seeking employment in the State of Arizona.

VR will continue explore agreements and opportunities which will allow the program to enhance early identification of assistive technology needs and provision of assistive technology throughout the rehabilitation process.

3) Outreach procedures used to identify and serve individuals with disabilities who are minorities, including those with the most significant disabilities, as well as those who have been unserved or underserved by the VR program

DES/VR program staff participate in quarterly meetings with the Arizona Tribal 121 programs in an effort to collaborate and serve individuals on reservations who may have traditionally been unserved or underserved by the DES/VR program.

Active participation with the various Councils throughout the state such as the State Independent Living Council, Governor’s Councils for Blind/Visually Impaired and Spinal and Head Injuries and Disability Planning Council assists helps to disseminate information across a broad network of community stakeholders.
The DES/VR program began utilizing department public information staff to develop and disseminate information on social media sites which promote disability awareness, local disability and employment events, and the VR program.

4) **Methods to be used to improve and expand VR services for students with disabilities, including the coordination of services designed to facilitate the transition of such students from school to postsecondary life (including the receipt of VR services, postsecondary education, employment, and pre-employment transition services)**

The DES/VR program has contracted with community rehabilitation programs (CRPs) across the state to provide pre-employment transition services. These services are geared to provide all potentially eligible students with disabilities information related to exploring careers and opportunities to enroll in post-secondary educational opportunities, developing workplace readiness and self-advocacy skills and experiencing work based learning opportunities. In addition to contracting with CRPs to provide pre-employment transition services, DES/VR staff across the state have been trained to provide pre-employment transition services workshops in their LWDAs.

DES/VR staff and Arizona Department of Education (ADE), Exceptional Student Services (ESS) staff continue to work together to ensure that students with disabilities are successfully transitioning from secondary education to post-secondary endeavors. DES/VR and ADE entered into a data sharing agreement allowing each agency to share data necessary to facilitate the provision of services to transition age students.

5) **Plans for establishing, developing, or improving community rehabilitation programs within the State**

In order to meet the needs of Arizona’s diverse client population, DES/VR plans to continue to identify needs and provide resources when possible to support the establishment, development or increasing the ability of community rehabilitation programs in Arizona. The selected projects and actions will be based on the needs as reflected in the most recent CSNA, SRC provider satisfaction survey and continuing work with the statewide workforce development partners.

- Increasing communication with community rehabilitation programs through consistent meetings which involve both the DES/VR and provider staff to discuss contract requirements, expectations, challenges, and resolutions.
- Consistently monitor community rehabilitation program performance through onsite and desk contract monitoring.
- Provide training to community rehabilitation providers.
- Conduct targeted outreach for providers in areas with identified service gaps.
- Collaborate with SRC to identify community agencies and programs to establish new and varied vendor and liaison relationships.
- Collaborate with community organizations to increase awareness of Arizona VR and advance the mission of the organization.
- Embrace the dual customer approach and partner with business to meet their training, recruitment, hiring, accommodation, and retention needs.
- Reevaluate the method of payments for provider travel to minimize service gaps in rural areas.
6) **Strategies to improve the performance of the State with respect to the performance accountability measures under section 116 of WIOA**

The DES/VR case management system has been modified to include the WIOA data elements needed to collect Common Performance Measure data. In July 2017, the VR program started collecting data and submitting quarterly reports. The DES/VR program will utilize the data gathered each quarter to begin the process of measuring current to baseline current performance and gather enough data to inform the statistical adjustment model to negotiate target performance.

DES/VR program staff provided a series of trainings to inform staff of the need to begin gathering additional data. Guiding documents provide both screen shots and narrative descriptions of the location of the new data elements in the case management system, definitions of the new data elements, and provide suggestions regarding how to locate the information needed. These training documents are stored in a central location and can be accessed by staff at any time.

Through the implementation of the Arizona Management System the VR program has developed a future state process map. Over the next two years, DES/VR program staff will develop standard work processes and documentation to allow program staff across the state the opportunity to consistently perform common functions. Through the development of standard work and tracking outcome data, VR staff will be able to create a baseline measure from which to identify gaps in performance and opportunities to improve processes.

The DES/VR program has started using a system of metrics and scorecards to guide program and staff performance. Metrics are developed to measure critical aspects of compliance and performance as outlined in WIOA. The results of the metrics are measured and disseminated to management staff on a weekly basis. All levels of management are expected to review the weekly metric data and identify trends and areas for improvement or problem-solving opportunities.

7) **Strategies for assisting other components of the statewide workforce development system in assisting individuals with disabilities**

DES/VR identified and recommended key personnel to participate on LWDBs. DES/VR staff’s active involvement and participation in the decision making processes at the local level are opportunities to identify potential areas for improvement and service expansion in regional workforce development. The DES/VR program has supported partner staff by providing training and learning opportunities in LWDAs regarding Disability Awareness and Disability Etiquette to increase partners staff comfort, competence, and ability to effectively serve individuals with disabilities.

DES/VR staff will continue to participate in staff workshops and training sessions to educate the broader workforce development system staff about the VR program and services.

8) **Agency strategies to:**
A) **Achieve goals and priorities by the State, consistent with the comprehensive needs assessment**

The DES/VR program has expanded its reach by utilizing outreach opportunities such as consistent coordination with Councils and stakeholder groups, development of online tools to promote employment for individuals with disabilities, involvement with ARIZONA@WORK and other core partners, and use of social media sites helps to spread information about the DES/VR program.

Continued deployment of the Arizona Management System principles and tools, such as standard work, tiered accountability, continuous improvement and visual management techniques will help to streamline processes, gain efficiencies and improve program performance and service delivery.

B) **Support innovation and expansion activities**

The DES/VR program engaged with several federally funded technical assistance centers to support the innovation and expansion activities allowable under WIOA. An intensive agreement was developed with the Workforce Innovation Technical Assistance Center to improve VR service delivery, integrate into the workforce development system, and transition to the common performance accountability system. Agreements with the National Technical Assistance Center of Transition and Youth Technical Assistance Center were also developed to improve and expand service delivery to potentially eligible students and youth with disabilities.

Arizona will continue to support the State Rehabilitation Council Arizona and the State Independent Living Council in joint efforts to support and expand services to individuals with disabilities. Arizona continues to work with existing and new partners to identify opportunities to increase access and participation in the vocational rehabilitation and supported employment programs.

Strategies include:

- Identification of new and innovative practices related to the provision of pre-employment transition services.
- Identification of opportunities to utilize assistive technologies in order to facilitate client participation from rural areas or for those clients who face transportation challenges.
- Expand professional development activities for both staff and community rehabilitation providers.
- Develop agreements with state workforce development entities to provide services to job seekers with disabilities.

Additional opportunities exist as the state strives to meet the identified goals and priorities as listed in Section I of this plan.

C) **Overcome identified barriers relating to equitable access to and participation of individuals with disabilities in the State VR Services Program and the State Supported Employment Services Program**

Physical access and transportation to brick and mortar buildings is not always feasible. Efforts to expand the use of assistive technology and broaden the use of technology will continue to be a focus over the
next two years. Identifying mechanisms to provide early access through technology or develop alternative transportation options are frequent topics of discussion in LWDAs and partners are working together to address issues that face the job seekers wishing to access services.

DES/VR program staff is working cooperatively with Division of Developmental Disability staff and Employment First committee representatives to introduce systems change training to DES/VR and DD staff. The training will focus on the importance of providing the opportunity to work in a competitive integrated setting and developing supports within the employment setting to facilitate successful employment retention. Additionally, DES/VR and DD staff will be working with the Workforce Innovation and Technical Assistance Center to pilot supported employment opportunities for individuals with developmental disabilities in Program Year 2018.

p) Evaluation and Reports of Progress: VR and Supported Employment Goals

1) Evaluation of the extent to which the VR program goals described in the approved VR services portion of the Unified State Plan for the most recently completed program year were achieved

A) Strategies that contributed to the achievement of the goals

- Development of standard metrics measuring eligibility and Individualized Plan for Employment (IPE) compliance.
- Introduction of regular scorecard review describing office performance related to eligibility and IPE compliance.
- Implementation of core training courses for new staff which are offered on a quarterly basis.
- Use of outside and professional training opportunities for staff to earn Continuing Education Units.
- Continued collaboration with state Behavioral Health System and Division of Developmental Disabilities.
- Trained staff to provide pre-employment transition services workshops.
- Developed pre-employment transition services Scope of Work, solicited, and awarded contracts to Community Rehabilitation Programs to provide services to potentially eligible youth with disabilities.

B) Factors that impeded the achievement of the goals and priorities

- Lack of capacity to engage in additional employee recognition events
- High turnover in VR staffing
- Lack of resources to develop and implement an accurate and up-to-date vendor report card
2) **Evaluation of the extent to which the Supported Employment program goals described in the Supported Employment Supplement for the most recent program year were achieved**

A) **Strategies that contributed to the achievement of the goals**

- Engaged Community Rehabilitation Programs (CRP) to assist in identifying employers who are willing to customize employment for individuals with disabilities.
- Continued collaboration with the Division of Developmental Disabilities and Behavioral Health Services to effectively serve individuals with supported employment needs.
- Increased employer engagement activities through Employer Coordinators and connection with workforce development system.

B) **Factors that impeded the achievement of the goals and priorities**

- Lack of active and local Employment Networks in Arizona.
- Lack of Employment Networks that can assist individuals who are not making Substantial Gainful Activity.

3) **VR program performance on the performance accountability indicators under section 116 of WIOA**

DES/VR is actively engaged in conversations with core partners and System 7, Libera case management system developers to develop effective and accurate data management processes which will allow DES/VR to report performance on the new common performance measures as prescribed in WIOA.

A data sharing agreement has been executed allowing core partners to share aggregate information. ACA/OEO is in process of developing a web based tool which will compile information obtained from the core programs and allow workforce development staff from all programs to access the data. The data can be used to develop strategies, identify trends, and inform job seekers and employers of opportunities which exist across the state for employment.

The Vocational Rehabilitation program continues to collect data in the following areas in order to establish baseline data for the performance indicators under section 116 of WIOA:

- Employment in the 2nd quarter
- Employment in the 4th quarter
- Median Earnings
- Credential Attainment
- Measurable Skill Gains
- Effectiveness in Serving Employers
4) Utilization of funds reserved for innovation and expansion (I&E) activities

Innovation and Expansion funds were provided to the Statewide Independent Living Council (SILC) to assist in the provision of allowable activities under the State Plan for Independent Living.

q) Quality, Scope, and Extent of Supported Employment Services.

1) Quality, scope, and extent of supported employment services to be provided to individuals with the most significant disabilities, including youth with the most significant disabilities

Quality

DES/VR provides Supported Employment Services (SE) to eligible clients with the most significant disabilities. SE services are authorized by DES/VR counselors to be provided by Community Rehabilitation Programs (CRPs). CRPs are awarded competitive contracts based on their response to the Request for Proposal. Upon contract award, CRPs receive training from contract and policy staff with regard to the scope of services required. DES/VR counselors authorize services to be provided by vendors. A client service plan is developed with the DES/VR counselor, the client, and guardian if necessary, and the vendor in order to ensure appropriate service provision. Vendors are required to report activity to DES/VR counselors on a monthly basis. DES/VR counselors are responsible to review the monthly activity and approve the service costs or request a meeting to revise the client service plan goals and objectives. DES/VR utilizes a contract monitoring unit who conduct annual desk and site audits in order to ensure compliance with contract requirements.

Scope

Arizona utilizes a consistent process of eligibility and Order of Selection determination for all clients. An individual with significant disabilities who has the skills and abilities to work in an integrated, competitive workplace and needs intensive VR service in order to obtain and maintain employment is considered an individual that needs Supported Employment services. Individuals who are determined to need SE services have access to the full scope of VR services. Clients and staff will work to identify a financial or natural resource to provide ongoing support services as needed once VR services have concluded.

Financial resources include long term supports provided by the Division of Developmental Disabilities or the Behavioral Health System. Additional sources such as a Plan to Achieve Self–Sufficiency (PASS) or Impairment Work Related Expense (IRWE) plan is available to individuals who receive Social Security award monies. Arizona holds agreements with five Employment Networks who may support individuals in employment after case closure from DES/VR. Through collaboration with the Councils of Governments (COGs), Social Security Block Grant dollars are also utilized to provide extended support services after closure from DES/VR. Natural supports in an employment setting can be developed while the client is receiving VR supported services. DES/VR staff may also provide training to managers, supervisors, and coworkers in order to develop natural supports within the competitive and integrated employment setting.
Extent

DES/VR recognizes Supported Employment as a viable employment option as long as the employment outcome meets the criteria of providing competitive wages in an integrated setting. Supported Employment services may be provided by DES/VR for up to 24 months. Youth will be engaged in pre-employment transition services as early as 14 years of age and may receive planned SE services for up to four years per the draft regulations.

2) Timing of transition to extended services

The transition of DES/VR provided services to extended services provided by an alternate funding source should be a seamless transition for the client. Once a client is determined to be stable in their employment, a meeting is held with the client, counselor, and ongoing service provider. This meeting is held to review client progress and employment stability. If all are in agreement, funding for job coaching and extended services are transitioned to the extended service provider. The DES/VR counselor will then monitor the client’s progress and job stability over the next 90 days. At the conclusion of the 90 day period, if the client remains stable in the job and the team agrees, the case will be closed as meeting an employment outcome.

Certifications

Name of designated State agency or designated State unit, as appropriate  Rehabilitation Services

Name of designated State agency  Division of Employment and Rehabilitation Services

Full Name of Authorized Representative:  Michael Wisehart

Title of Authorized Representative:  Assistant Director

1. The designated State agency or designated State unit (as appropriate) listed above is authorized to submit the VR services portion of the Unified or Combined State Plan under title 1 of the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by WIOA*, and its supplement under title VI of the Rehabilitation Act.**  Yes

2. As a condition for the receipt of Federal funds under title I of the Rehabilitation Act for the provision of VR services, the designated State agency listed above agrees to operate and administer the State VR Services Program in accordance with the VR services portion of the Unified or Combined State Plan, the Rehabilitation Act, and all applicable regulations, policies, and procedures established by the Secretary of Education. Funds made available under section 111 of the Rehabilitation Act are used solely for the provision of VR services and the administration of the VR services portion of the Unified or Combined State Plan;  Yes

3. As a condition for the receipt of Federal funds under title VI of the Rehabilitation Act for supported employment services, the designated State agency agrees to operate and administer the State Supported Employment Services Program in accordance with the supplement to the VR services portion of the
Unified or Combined State Plan*, the Rehabilitation Act, and all applicable regulations, policies, and procedures established by the Secretary of Education. Funds made available under title VI are used solely for the provision of supported employment services and the administration of the supplement to the VR services portion of the Unified or Combined State Plan;** Yes

4. The designated State agency and/or the designated State unit has the authority under State law to perform the functions of the State regarding the VR services portion of the Unified or Combined State Plan and its supplement; Yes

5. The State legally may carry out each provision of the VR services portion of the Unified or Combined State Plan and its supplement. Yes

6. All provisions of the VR services portion of the Unified or Combined State Plan and its supplement are consistent with State law. Yes

7. The Authorized Representative listed above has the authority under State law to receive, hold, and disburse Federal funds made available under the VR services portion of the Unified or Combined State Plan and its supplement; Yes

8. The Authorized Representative listed above has the authority to submit the VR services portion of the Unified or Combined State Plan and the supplement for Supported Employment services; Yes

9. The agency that submits the VR services portion of the Unified or Combined State Plan and its supplement has adopted or otherwise formally approved the plan and its supplement. Yes

Footnotes

Certification 1 Footnotes
* Public Law 113-128.
** Unless otherwise stated, "Rehabilitation Act" means the Rehabilitation Act of 1973, as amended by WIOA, signed into law on July 22, 2014.

Certification 2 Footnotes
* All references in this plan to "designated State agency" or to "the State agency" relate to the agency identified in this paragraph.
** No funds under title 1 of the Rehabilitation Act may be awarded without an approved VR services portion of the Unified or Combined State Plan in accordance with section 101(a) of the Rehabilitation Act.
*** Applicable regulations, in part, include the Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 76,77,79,81, and 82; 2 CFR part 200 as adopted by 2 CFR part 3485; and the State VR Services Program regulations.

Certification 3 Footnotes
* No funds under title VI of the Rehabilitation Act may be awarded without an approved supplement to the VR services portion of the Unified or Combined State Plan in accordance with section 606(a) of the
Rehabilitation Act.

Certification Regarding Lobbying — Vocational Rehabilitation

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions. Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Assurances

The designated State agency or designated State unit, as appropriate and identified in the State certifications included with this VR services portion of the Unified or Combined State Plan and its supplement, through signature of the authorized individual, assures the Commissioner of the Rehabilitation Services Administration, that it will comply with all of the requirements of the VR services portion of the Unified or Combined State Plan and its supplement, as set forth in sections 101(a) and 606 of the Rehabilitation Act. The individual authorized to submit the VR services portion of the Unified or Combined State Plan and its supplement makes the following assurances:

1. Public Comment on Policies and Procedures:

The designated State agency assures it will comply with all statutory and regulatory requirements for public participation in the VR Services Portion of the Unified or Combined State Plan, as required by section 101(a)(16)(A) of the Rehabilitation Act.

2. Submission of the VR services portion of the Unified or Combined State Plan and Its Supplement:

The designated State unit assures it will comply with all requirements pertaining to the submission and revisions of the VR services portion of the Unified or Combined State Plan and its supplement for the State Supported Employment Services program, as required by sections 101(a)(1), (22), (23), and 606(a) of the Rehabilitation Act; section 102 of WIOA in the case of the submission of a unified plan; section 103 of WIOA in the case of a submission of a Combined State Plan; 34 CFR 76.140.

3. Administration of the VR services portion of the Unified or Combined State Plan:

The designated State agency or designated State unit, as appropriate, assures it will comply with the requirements related to:

a. The establishment of the designated State agency and designated State unit, as required by section 101(a)(2) of the Rehabilitation Act.

b. The establishment of either a State independent commission or State Rehabilitation Council, as required by section 101(a)(21) of the Rehabilitation Act.

The designated State agency or designated State unit, as applicable, (B) Has established a State Rehabilitation Council

c. Consultations regarding the administration of the VR services portion of the Unified or Combined State Plan, in accordance with section 101(a)(16)(B) of the Rehabilitation Act.
d. The financial participation by the State, or if the State so elects, by the State and local agencies, to provide the amount of the non-Federal share of the cost of carrying out the VR program in accordance with section 101(a)(3).

e. The local administration of the VR services portion of the Unified or Combined State Plan, in accordance with section 101(a)(2)(A) of the Rehabilitation Act.

The designated State agency allows for the local administration of VR funds:  Yes

f. The shared funding and administration of joint programs, in accordance with section 101(a)(2)(A)(ii) of the Rehabilitation Act.

The designated State agency allows for the shared funding and administration of joint programs:  Yes

g. Statewideness and waivers of statewideness requirements, as set forth in section 101(a)(4) of the Rehabilitation Act.

Is the designated State agency requesting or maintaining a waiver of statewideness for one or more services provided under the VR services portion of the Unified or Combined State Plan? See Section 2 of this VR services portion of the Unified or Combined State Plan.  Yes

h. The descriptions for cooperation, collaboration, and coordination, as required by sections 101(a)(11) and (24)(B); and 606(b) of the Rehabilitation Act.

i. All required methods of administration, as required by section 101(a)(6) of the Rehabilitation Act.

j. The requirements for the comprehensive system of personnel development, as set forth in section 101(a)(7) of the Rehabilitation Act.

k. The compilation and submission to the Commissioner of statewide assessments, estimates, State goals and priorities, strategies, and progress reports, as appropriate, and as required by sections 101(a)(15), 105(c)(2), and 606(b)(8) of the Rehabilitation Act.

l. The reservation and use of a portion of the funds allotted to the State under section 110 of the Rehabilitation Act for the development and implementation of innovative approaches to expand and improve the provision of VR services to individuals with disabilities, particularly individuals with the most significant disabilities.

m. The submission of reports as required by section 101(a)(10) of the Rehabilitation Act.

4. Administration of the Provision of VR Services:

211
The designated State agency, or designated State unit, as appropriate, assures that it will:

a. Comply with all requirements regarding information and referral services in accordance with sections 101(a)(5)(D) and (20) of the Rehabilitation Act.

b. Impose no duration of residence requirement as part of determining an individual’s eligibility for VR services or that excludes from services under the plan any individual who is present in the State in accordance with section 101(a)(12) of the Rehabilitation Act.

c. Provide the full range of services listed in section 103(a) of the Rehabilitation Act as appropriate, to all eligible individuals with disabilities in the State who apply for services in accordance with section 101(a)(5) of the Rehabilitation Act?

d. Determine whether comparable services and benefits are available to the individual in accordance with section 101(a)(8) of the Rehabilitation Act.

e. Comply with the requirements for the development of an individualized plan for employment in accordance with section 102(b) of the Rehabilitation Act.

f. Comply with requirements regarding the provisions of informed choice for all applicants and eligible individuals in accordance with section 102(d) of the Rehabilitation Act.

g. Provide vocational rehabilitation services to American Indians who are individuals with disabilities residing in the State, in accordance with section 101(a)(13) of the Rehabilitation Act.

h. Comply with the requirements for the conduct of semiannual or annual reviews, as appropriate, for individuals employed either in an extended employment setting in a community rehabilitation program or any other employment under section 14(c) of the Fair Labor Standards Act of 1938, as required by section 101(a)(14) of the Rehabilitation Act.

i. Meet the requirements in sections 101(a)(17) and 103(b)(2) of the Rehabilitation Act if the State elects to construct, under special circumstances, facilities for community rehabilitation programs

j. With respect to students with disabilities, the State,

   i. Has developed and will implement,
      A. Strategies to address the needs identified in the assessments; and
      B. Strategies to achieve the goals and priorities identified by the State, to improve and expand vocational rehabilitation services for students with disabilities on a statewide basis; and
   ii. Has developed and will implement strategies to provide pre-employment transition services (sections 101(a)(15) and 101(a)(25)).
a. The designated State unit assures that it will include in the VR services portion of the Unified or Combined State Plan all information required by section 606 of the Rehabilitation Act.

b. The designated State agency assures that it will submit reports in such form and in accordance with such procedures as the Commissioner may require and collects the information required by section 101(a)(10) of the Rehabilitation Act separately for individuals receiving supported employment services under title I and individuals receiving supported employment services under title VI of the Rehabilitation Act.

c. The designated state unit will coordinate activities with any other State agency that is functioning as an employment network under the Ticket to Work and Self-Sufficiency program under Section 1148 of the Social Security Act.

6. Financial Administration of the Supported Employment Program:

a. The designated State agency assures that it will expend no more than 2.5 percent of the State’s allotment under title VI for administrative costs of carrying out this program; and, the designated State agency or agencies will provide, directly or indirectly through public or private entities, non-Federal contributions in an amount that is not less than 10 percent of the costs of carrying out supported employment services provided to youth with the most significant disabilities with the funds reserved for such purpose under section 603(d) of the Rehabilitation Act, in accordance with section 606(b)(7)(G) and (H) of the Rehabilitation Act.

b. The designated State agency assures that it will use funds made available under title VI of the Rehabilitation Act only to provide supported employment services to individuals with the most significant disabilities, including extended services to youth with the most significant disabilities, who are eligible to receive such services; and, that such funds are used only to supplement and not supplant the funds provided under Title I of the Rehabilitation Act, when providing supported employment services specified in the individualized plan for employment, in accordance with section 606(b)(7)(A) and (D), of the Rehabilitation Act.

7. Provision of Supported Employment Services:

a. The designated State agency assures that it will provide supported employment services as defined in section 7(39) of the Rehabilitation Act.

b. The designated State agency assures that:

i. The comprehensive assessment of individuals with significant disabilities conducted under section 102(b)(1) of the Rehabilitation Act and funded under title I of the Rehabilitation Act includes consideration of supported employment as an appropriate employment outcome, in accordance with the requirements of section 606(b)(7)(B) of the Rehabilitation Act.
ii. An individualized plan for employment that meets the requirements of section 102(b) of the Rehabilitation Act, which is developed and updated with title I funds, in accordance with sections 102(b)(3)(F) and 606(b)(6)(C) and (E) of the Rehabilitation Act.

**A Program-Specific Requirements For Combined State Plan Partner Programs**

Arizona is submitting a Unified State Plan.

Appendix 2. Other State Attachments (Optional)

Industry Performance Indicators

Industry performance indicators chosen to define both existing and emerging industries include:

- Projected long-term annual industry employment growth,
- Average over-the-year employment growth,
- Change in industry employment as a share of total Arizona employment,
- Annual average pay and employment levels,
- Annual average employment levels compared to national levels (employment location quotients),
- Annual average pay levels compared to national levels (pay location quotient), and
- Annual average short-term over-the-year employment and pay growth.

These indicators were chosen because they highlight Arizona industries with favorable pay and employment characteristics. Existing and emerging demand industries were selected based on their overall performance in each of these pay and employment indicators. Industries were ranked against each other in each pay and employment category to calculate an overall ranking score. A list of the industry performance metrics is available in Appendix 2- Table 1 and Table 2.

Methodology

A number of factors were applied in determining the existing and emerging demand industries. Some indicators provide more insight than others into the defining qualities of an existing or emerging demand industry. To help emphasize an indicator’s importance, each indicator was given a weight between one and three. This method helps highlight important qualities of an industry, without having to exclude less-important employment and pay variables from the analysis.

For example, projected employment growth is an important indicator when defining emerging demand industries; it identifies industries with favorable growth potential. Therefore, the projected employment growth indicator was given a larger weight (more importance) when determining which industries would be selected as emerging demand industries. As another example, projected employment growth is a less valuable indicator when determining existing demand industries, because existing demand industries provide job opportunities through means other than growth. Projected employment growth was assigned a less–meaningful weight than other indicators when calculating existing demand industries. A list of the assigned weighted values applied to the industry performance indicator is illustrated in Table 15 and Table 16.

The analysis conducted also applied constraints to industry performance indicators. The constraints applied are loose restrictions to ensure that industries with a specific unfavorable quality are not selected. As an example, an industry selected as an emerging demand industry must have recorded positive over-the-year employment growth from 2013 to 2014. It is very important that an industry identified as an emerging demand industry display signs of short-term employment growth as an indication of future growth to follow. For this reason, industries were restricted to those that recorded short-term positive employment growth. A list of the constraints applies to the industries is available in Appendix 2- Table 1 and Table 2.
Existing Demand Industries Defined

Existing demand industries were identified as industries with large employment bases and above-average wages. Industries with historically large employment levels provide job stability and have established themselves within the economy. While short-term employment growth was considered, it was not emphasized when selecting existing demand industries. Industries with large employment levels offer employment opportunities not tied to growth, which is an important quality during economic downturns. It was also important that the existing demand industries selected provided above-average wage and employment concentrations compared to the United States.

Average Annual Pay Location Quotient

A pay location quotient allows for pay comparisons between industries within Arizona as well as the United States. All of the existing demand industries selected have an annual average pay location quotient above 0.75. This threshold was set to ensure the industries selected offered comparable or higher pay levels than the national average for that industry. A large average annual pay location quotient is an indication of stability and the long-term interest to retain and attract talented employees within the industry. When jobs are in-demand (increase in demand or shortage of qualified applicants), a company can increase wages to attract the desired level of talent. For this reason, it was important to highlight existing demand industries that offer high average pay levels compared to national levels.

Many of the industries selected recorded over-the-year pay growth from 2013 to 2014. The selected industries also all pay above-average median wages compared to Arizona as a whole. It was important to highlight industries that would allow Arizona residents the opportunity for pay growth. Not every occupation within the selected industries will provide above-average wages, but they provide opportunities for growth within the industry. An individual can expect greater opportunities with increases in experience and on-the-job training, and continued educational attainment within these industries.

Employment Multiplier Effect

Similar to a pay location quotient, an employment location quotient allows for employment comparisons between industries within Arizona as well as the United States. All of the existing demand industries selected were required to have an employment location quotient greater than 0.75. Industries with higher employment concentrations than national averages (larger average employment location quotients) are typically classified as export-oriented industries. This means that these industries provide products or services for communities outside the local or state economy and bring a competitive advantage to the local economy. Export-oriented industries will have an employment multiplier effect on other industries in the local economy. Growth-supporting industries, such as Construction, Business Services and Retail Sales benefit when export-oriented industries enter into or expand within an economy. For this reason, the industries selected not only directly employ individuals in their respective industries, but also indirectly help to increase employment in growth-supporting industries. Two large manufacturing industries, Aerospace Product and Parts Manufacturing and Semiconductor and Electronic Component Manufacturing, have some of the largest employment location quotients for the state and are good examples of export-oriented industries providing indirect benefits to surrounding industries.
Demand Occupations

Occupations selected as an existing demand occupation had to represent one percent or more of total industry employment. This ensured that relevant occupations representing existing and emerging demand industries were selected. Existing and emerging demand occupations were ranked by their share of total industry employment, projected long-term employment growth and average hourly wage rates. Each indicator was given an equal weight when ranking the occupations. The occupations identified as existing and emerging demand occupations represent the top occupation in an industry. More than one industry could have (and did have) the same top occupation.

Emerging Demand Industries Defined

Emerging demand industries were identified as industries with small employment levels (bottom 67 percent of industry employment levels) and large short-term historic employment and pay growth. Emerging demand industries were not restricted by location quotient estimates for pay or employment, but were required to have an above-average pay level, positive over-the-year employment level percentage change, and positive projected long-term employment percentage change. Emerging-demand-industry requirements focused on the growth potential in employment and pay to identify industries of opportunity. The long-term industry projections produced by ACA/OEO were heavily emphasized as an indicator for future employment growth. Projections are produced using historical industry trends to determine where future employment growth will occur. Short-term (2013 to 2014) over-the-year annual employment and pay growth was also utilized to help determine emerging demand industries as an indicator of potential future growth.

Short-Term Employment and Pay Growth

Short-term measures of employment and pay growth are important indicators of emerging demand industry trends. These measures highlight industries with high potential to establish themselves as core industries within the state economy. Emerging demand industries do not necessarily have large employment levels, but if short-term employment demands continue, these industries will provide employment opportunities from industry growth. Pay level increases can also be expected, if demand for skilled labor remains high within these industries.

Forecasted Employment

ACA/OEO publishes long-term industry employment projections biennially. The most recent employment projections were released June 2014 and cover projected employment from 2012 to 2022. Projected employment was considered when identifying emerging demand industries because projections identify promising industries with high growth potential. Employment projections are based off, in part, historical employment patterns. An industry recording high levels of employment growth in the recent past (one to two years) is highly likely to continue this growth pattern into future years. This growth potential is best captured and identified in employment projection estimates.

Industry Share of Total Employment

Employment within a given industry accounts for a specific share of total employment for Arizona as a whole. As employment levels fluctuate through time, an industry increases or decreased its share of total Arizona employment. Employment share changes occur based on two factors: employment level changes in an industry itself, or employment level changes in other industries of the economy. Industry shares help determine overall industry growth leaders in the economy as a whole. Looking at employment growth by itself does not identify how the industry is performing compared to the state economy as a whole. As an example, an economy could record large rates of growth in all of its industries which would make it
difficult to identify which industries are outperforming others. By including changing shares of total employment, it is possible to identify industries that outperform other industries in the economy.
