

Narrator:

Focus area four is about trust and confidence. The goal is for the Division to keep open, honest communication with members, families, and providers. The Division will do this by working on the following objectives. Through 2030, the Division will use many ways to share information so everyone can stay involved. The Division will share results about programs so participants know what's working. This builds trust and helps us reach goals together. With these four focus areas, the Division is working towards a future where every Arizonan with developmental disabilities leads the life they choose.
