

**Department of Economic Security  
Rehabilitation Services Administration**

In order to achieve compliance with the Workforce Innovation and Opportunity Act (WIOA) and ensure the Arizona Rehabilitation Services Administration (RSA) is maximizing available resources prior to expending Vocational Rehabilitation (VR) funds, RSA is proposing the following:

1. Require the exploration and utilization of all comparable benefits, including coursework available at community colleges, when considering VR support of post-secondary education and training.
  - a. VR will support the most cost-effective post-secondary education/training option that meets the client's disability-related needs and employment goal.
  
2. Require the exploration and utilization of One-Stop/Career Center services when considering VR support for basic job development and placement services.
  - a. VR will continue to purchase disability related employment services when One-Stop/Career Center services have been exhausted or are unable to meet the client's disability related employment needs.
